After losing 4-2 in last season's matchup, the Explorers (5-6) will be looking for a crucial victory on Friday to stay near the top in the standings. Leading the charge is sophomore and reigning A-10 Rookie of the Year Rebecca Chylack, who leads La Salle with 14 points.

To round out the slate of games on Friday, Temple will host Saint Joseph's in a game of two struggling teams searching for a much-needed victory to start conference play on the right foot.

A-10 Field Hockey

On Saturday, fresh off its upset victory over Syracuse, Massachusetts will complete its four-game home stand against winless Saint Louis.

Lady Eagles streaking

Lock Haven couldn't have entered its first A-10 conference schedule in any better way.

The Lady Eagles are undefeated in their last seven games and have outscored their opponents 34-5.

LHU most recently downed Iowa, 4-0, for the first time in its history on the strength of Shepps' hat trick.

Despite the dominance of the Lady Eagles offense, the defense has also been performing just as impressively.

Led by senior goalkeeper Enn Terreson, who boasts the best goals-against average (1.19) in the A-10, the defense has been solid, allowing 16 goals in 13 games.

The defense, as well as the offense, will have to stay sharp as it enters its first round of A-10 competition and its first true tests of the season when it opens against perennial conference powers in the Spiders and Minutewomen.

Spiders snap skid

Richmond snapped its seven-game losing streak this past Sunday, shutting out Georgetown, 3-0.

Junior Katelin Peterson continued her outstanding season, contributing on all three scores for the Spiders.

Peterson scored her fifth goal of the season and 30th of her career, assisted by Hannah Hess, 25 minutes, 14 seconds into the first half to give Richmond a 1-0 lead. She went on to record two assists, both of which were scored on breakaways, giving the Spiders a comfortable 3-0 victory. With her performance, Peterson moved into fifth in the conference in points with 15.

The victory places Richmond in fourth place with a 4-7 record heading into conference play, a familiar position for the defending champions.

Last year, the Spiders finished off their non-conference schedule with a 5-6 record before going on a tear in A-10 play, going 5-1 and eventually coming away victorious in the conference championship.

If Richmond hopes to echo its 2009 performance, it will have to count on the play of Peterson, who is a plus on an otherwise minus attack that has only mustered 17 goals in 11 games.

The Spiders opens up their A-10 schedule on the road against Lock Haven on Friday before returning home to host Longwood on Sunday.

UMass looks to increase offense

M. SOCCER from page 10

balls off of 43 shots towards the net.

Defensive collapse

Koch has preached all season to his team about making sure the defense marks its men and holds tight in goal-threatening situations, especially in the midfield.

While the defense is one of the top-performing parts of the Minutemen squad, most of the goals scored on it are due to small slip-ups in the backfield. Going into preseason play, the Minutemen sit tight with a 1.44 goals-against average, with 13 goals allowed.

Part of the defensive strength comes from Piekos, who has been tough against opponents. While Piekos was in the net for two of the Minutemen losses, he still has held off a slew of attacks from the opposition.

Key and Skrajewski, both of whom have started all nine games this season, have hounded the ball when it reaches the back four. Andrew Henshaw has also made contributions, including a goal on the opposite side of the pitch.

Herb Scribner can be reached at hscribne@student.umass.edu.

Koch and Co. prepare for conference games

UMass hopes familiar opponents cure woes

By Herb Scribner
Collegian Staff

After playing enough extra-time minutes to add an extra game to its non-conference schedule, the Massachusetts men's soccer team starts Atlantic 10 play on Friday when it hosts Xavier.

The non-conference schedule hasn't done any favors for UMass (1-3-5), which heads into its matchup against the Musketeers with one victory.

If the Minutemen struggle out of the gate, UMass coach Sam Koch and the rest of the Maroon and White will have to work on key concepts they have yet to perfect thus far in the campaign.

Mastering the counter

The Minutemen offense hasn't had any fluidity that is present in successful soccer squads. In fact, Koch has preached in the past that UMass' counterattack offense is the key to its scoring.

One piece to the puzzle of the counterattack that hasn't been placed is the midfield connecting to the forwards. Often times during these matches, forwards Bryant Craft or Hellah Sidibe receive high-long balls from defenders such as David Key or Dominic Skrajewski.

More so, the Minutemen haven't displayed an attacking midfielder that can control the ball at the center of the pitch and move it along to eventually begin developing a play. Midfielder Ben Arkian, who is fourth all-time in assists for UMass, has the ability to be this attacking midfielder, though often finds himself drifting towards the strikers position.

Finishing the ball

UMass' rejuvenated offense takes a flurry of shots each game.

In its latest match against Sienna, the Minutemen took 21 shots, with six on goal. While UMass scored two goals in the contest, one was from a penalty kick.

During their non-conference schedule, the Minutemen had multiple chances with an open net which they failed to score on. Goalkeeper Chris Pickos was even frustrated over the lack of finishing and pushed for it to be a part of the UMass practice routine.

Compared to last season, the Minutemen are doing considerably better with finishing. Entering A-10 play last year, UMass scored eight goals (28 on target) while this season it's knocked in 11

UMass hosts Fordham with lineup changes after rainouts

By Scott Cournoyer
Collegian Staff

With three rained-out matches and a string of illnesses affecting the team, Massachusetts tennis coach Judy Dixon will look for her players to step up in singles play for a chance at a victory when the Minutewomen host Fordham on Monday.

"With the week layoff and cold weather approaching, this is where we need to rise above it and produce a solid performance," Dixon said. "We've got a really talented group of players here, we're just hitting the skids a bit."

The team last competed on the weekend of Sept. 25 at the Eastern Collegiate Invitational at West Point, N.Y., posting positive results in both singles and doubles play. However, with the rained-out matches, including Wednesday against Connecticut and the flu bug hitting multiple players on the team, Dixon has an uncertain lineup to configure against the Rams.

"[Yuliana] Motyl has been battling some illness since arriving at UMass but I expect her to compete as the No. 2 in singles, bumping Julia [Comas] up to No. 1 for the time being," Dixon said.

The rest of the lineup includes senior Candyncе Boney at No. 3, with freshman Clara Matias, senior Kaitlyn Carpenter and freshman Jessica Podlofsky rounding out the top six.

The highly-touted Motyl still has the opportunity to improve her skills in the young and long season.

"She's got the pedigree and is an extremely talented individual," Dixon said. "She still has a couple of weeks to get her legs under her and to get in playing shape."

Comas, who won the Type B singles championship at the EC Invitational, has gotten off to a terrific start this year, providing leadership and toughness to an already tough group of players.

"Julia has played beautifully thus far," Dixon said. "She's given us the shot in the arm early, which is exactly what we need going into play this week."

Sending out three freshmen in the top six can be a risky decision but with the play of Podlofsky early on, Dixon believes the back end of the group is solid.

"Jess has made a huge difference for us early on," Dixon said. "She's a great asset to fill out the bottom of the singles, and I expect her to continue to grow and provide depth for us against our upcoming opponents."

This will be the first chance this season for UMass to compete one-on-one against another school.

"We need to come out tough and on fire," Dixon said. "It's important to set the tone early with our veteran players, because if we can do that, we have the depth and talent to close the door once we get ahead."

Dixon hopes to see her players slowly but surely build on the small amount of competition they've had, especially in doubles play.

"We're not ready yet to compete at full force in doubles," Dixon said. "With the inclement weather and sick bodies, I haven't had a great feel yet of where to go for doubles, but we have some things currently in place that we feel can give us a fair chance."

The doubles pairings against Fordham include the combination of seniors Tanisha Hodgson and Honey, followed by sophomore Jocelyn Providence and Carpenter, who together reached the Flight B doubles final at West Point.

Scott Cournoyer can be reached at scournoy@student.umass.edu.

Widdall critical for success against A-10

Defeating a Top 10 team once can easily be dismissed as a fluke. It's not until a team can do it again and in convincing fashion, that it shows its true ability.

Adam Miller

After its victory over Syracuse on Sunday, the Massachusetts field hockey team has done just that. There are many factors that go into why the Minutewomen (5-6) have now successfully pulled off two upsets over their biggest rivals.

You could argue that the senior leadership, which is showing a lot of poise between adversity and stiff competition. Another argument could be made for forward Katie Kelly, who leads the team with six goals on the season and is a scoring threat no matter where she is on the field.

While both aspects are important to the recent success of UMass, neither are as big of a staple to the team as the woman between the goal posts: Alesha Widdall.

The junior is having the best season of her career, boasting a 1.25 goals-against average and a 0.816 save percentage. She is already making a name for herself this year with the No. 6 save percentage in the country and the 14th-best GAA.

If the Minutewomen hope to advance far in the postseason, they will need to ride Widdall's shoulders. So far, the non-conference schedule indicates that UMass isn't going to win games outscoring its opponents, which make Widdall's role that much more important.

When the Maroon and White begin Atlantic 10 play this weekend, their biggest area of concern is its offense. The Minutewomen have 12 goals on the season, and despite having one of the toughest schedules in the country, that fact still has to be a red flag for UMass coach Justine Sowry.

But with a solid goalkeeper like Widdall, Sowry likely isn't as worried about her team's chances as she would be if her junior wasn't a stable force in net.

"She is always outstanding," Sowry said following the Minutewomen's 2-0 win over the Orange. "With a quality goalkeeper back there, we can play more aggressive, and having her back there really gives the team great confidence."

The biggest threat to UMass winning the A-10 title is red-hot Lock Haven. The Lady Eagles (9-5) have the best record in the A-10 and have the highest amount of goals, but don't have any wins against teams in the NFCA Top 20.

The last time Lock Haven played against anyone with the goalkeeping skills of Widdall was on Sept. 12 in a 3-1 loss to Penn State. If the Minutewomen hope to achieve the same result, Widdall will have to be at her best when the two teams play on Oct. 15.

However, what Widdall does in one game isn't as important as what she does against the entire A-10.

UMass runs the risk of putting itself in bad position for the postseason with more than two losses. If Widdall's play early in the season is any indication of what might happen against A-10 opponents, she should be in good shape, especially with four home games on the slate.

Ever since the Minutewomen lost to Indiana on August 29, the back of the net at Garber Field has been impenetrable thanks to the defense and Widdall's work. UMass has outscored opponents, 5-1, while Widdall has three shutouts (all of which are at home) on the season.

The lone goal in that stretch came against Albany, which even Sowry admits outhustled the Minutewomen for that score, meaning Widdall should have little trouble dominating A-10 opponents at home.

If Widdall continues to hold opponents to no more than one goal, UMass should have little trouble rolling through the second half of the year. While many coaches might see this as too much pressure to put on a goalkeeper, Sowry isn't going to think twice about Widdall's ability to handle it.

When she talks about her team as a whole, Sowry likes to mention Widdall as the fourth "senior" because of her poise. And that poise is exactly what's going to make the Minutewomen an NCAA tournament team.

Adam Miller is a Collegian columnist. He can be reached at amiller@dailycollegian.com.

MAXWELL SPARR, COLLEGIAN

Goalkeeper Alesha Widdall gets ready for a penalty shot in a game. This season, Widdall has posted a 1.25 goals-against average and a 0.816 save percentage. UMass will open up A-10 play against Saint Louis.

'Life is good' co-founder speaks at Umass

Frisbees and t-shirts thrown with the message of optimism as a powerful ally throughout life

By Rachel Tumin
Collegian Staff

Optimism can take you anywhere," John Jacobs, told the crowd yesterday in the Student Union Ballroom. Jacobs, class of '90, is the chief creative optimist and co-founder of Life is good®, a $100 million apparel and accessory company based in Boston.

Jacobs started his talk with a story of an enthusiastic young baseball player. From his position in the outfield, the boy jumped around between pitches, called out to the batter, waved at the stands and chased butterflies on the field. When the boy's father arrived at the game, he asked his son the score of the game, to which the boy joyfully replied, "18-nothing!" Elated by his son's success he began to congratulate the boy, only for the still-giddy child to point out that their team is in fact losing. The father demanded to know why his son was so excited by this fact to which the boy replied, "Cause we ain't been up yet!"

"That's a kid who sees the glass half full," Jacobs told the audience. Jacobs stressed the importance of continuing to see the world with that childlike optimism. Where an adult might see obstacles, Jacobs explained, a child sees opportunities. This optimistic, opportunistic attitude is what Jacobs credits with his success today.

The attitude is personified in Jake, the boy who appears as part of the Life is good® logos. The cheery, always smiling boy is today frequently seen beside his loyal dog, Rocket – so named for Needham High School, from which the Jacobs brothers graduated.

John Jacobs and brother Bert Jacobs began selling their self-designed t-shirts in the early nineties in college dorms and at parades around Boston. The brothers soon bought a van and named it "Enterprise" so that they might "boldly go where no t-shirt guys had gone before." The now iconic "Jake" design premiered at a parade in Boston in 1994. While the brother usually sold ten or fifteen shirts on any given day, all 48 Jake shirts sold in just one hour.

"Good vibes are contagious," quipped Jacobs when explaining the immediate popularity of the Jake t-shirt.

"Jake's power is not in his physical power, amazing foot speed [or] his superior intellect," said Jacobs. "Jake's power is in his disposition."

Instead of being happy after getting an A on a test or getting a car in the future, Jacobs said that joy comes because Jake "decides to be happy today."

John Jacobs explained that is was his mother, Joan, who taught him to always be optimistic. Running a household with 6 children meant for a tight budget, but she did not fret, explaining that having no money meant simply not having to worry about what to buy.

It was the tragedy of September 11th that inspired Life is good®'s first major philanthropy project. The company designed a simple, stylized American flag shirt and committed 100% of the proceeds from its sale to the charitable organization, The United Way, to help families of the victims. Inspired by the success of their first charitable initiative, they established the "Life is good® Kids Foundation" which provides play therapy for children who have experienced major trauma or suffer from life-threatening illnesses.

The symbol of optimism featured on John Jacobs' "Life is good" apparel has become a popular image on apparel and accessories through the country.

"The great thing about trying something is you either succeed, or you learn," said Jacobs, who has enjoyed great success in his self-professed "mission to spread optimism."

If there is any lesson Jacobs wanted the audience to take away from his speech today, it is first, "never under any circumstances do you ever need to drink more than 12 glasses of milk" and perhaps even more wisely to "do what you like and like what you do" because "that will make you a happy soul for the long haul."

John Jacobs spoke as a part of a series of lectures, workshops and public forums as an Eleanor Bateman Alumni Scholar in Residence. This Alumni Association program works to provide students with alumni role models that exemplify the achievement of the university's mission through professional accomplishments and public service.

Rachel Tumin can be reached at rtumin@student.umass.edu.

NICK O'MALLEY/COLLEGIAN

St. Peter's Basilica is a popular destination for study abroad students, even if they do not study in Italy. Scholarships like the Benjamin A. Gilman scholarship help many students achieve their travel dreams.

UMass ranks fourth in study abroad scholarship program

By Sasi Hayes
Collegian Staff

With 16 students winning the Benjamin A Gilman Scholarship for study abroad programs, the University of Massachusetts again ranks fourth nationally for the federally funded scholarship.

UMass has two more winners than it did last semester and ranks behind University of California-Berkeley, San Francisco State University, and New York University. The scholarship provides awards to U.S. undergraduate students who are studying abroad and receiving Federal Pell Grant funding at a two-year or four-year college or university. It also awards students $3,500 to $5,000.

The national acceptance rate for the Gilman Scholarship is 34 percent, but UMass's acceptance rate is 42 percent. Students submitted 2,900 applications from 381 public and private universities for the fall 2010 semester.

"I honestly think I would not have been able to afford to come to Japan this year if I hadn't won the Gilman Scholarship," said Clare Marks, Japanese and political science major from Narragansett, R.I. "I honestly think I would not have been able to afford to come to Japan this year if I hadn't won the Gilman Scholarship," said Clare Marks, Japanese and political science

Study abroad programs shown to be beneficial

By Charlotte Kenyon
Collegian Correspondent

Over 1,000 students each and every year are able to leave the lecture halls and textbooks behind at University of Massachusetts and immerse themselves in a new culture, lifestyle and form of education while studying abroad. But this opportunity is not as easy as purchasing a plane ticket and packing a bag.

A recent study performed by the British Council, focuses extensively on the determining factors 150,000 college students from 200 countries hold most important before making a decision to study abroad.

In the study results, released on Sept. 30, 59 percent of students polled said that the "quality of their education" abroad was the most important determining factor in selecting a legitimate school; 26.3 percent also value the reputation of the selected university in both, the United States and the foreign country.

Dr. Frank Hugus, Director of International Programs at UMass Amherst, agreed that educational benefit and value is one of the most important factors in an international education.

"I think the education abroad advisors are very good at what they do, and recommend academic value," he said.

He also described how most students that inquire and pursue their abroad interests are generally more focused on their studies, and that other factors are taken into consideration.

"It is an evaluative process; we have to consider G.P.A.'s, whether or not students will be good representatives of UMass and of the country," he said.

One out of every 10 participants in the survey revealed that the price and their financial standings were more important in selecting an abroad program, rather than the education they would be receiving.

Here at UMass, Hugus explained that a global education is not limited to only wealthier students, and that the goal is to expand services to all interested students.

"Our first priority is to make programs accessible," he said.

There are many opportunities to compete for a scholarship or grant to study abroad, as well as even receive in-state tuition costs for an international experience.

"Programs are also offered for the summer or during spring break from seven to 10 days, for a more reasonable cost," said Hugus.

Despite current financial hardship for many students and their families in recent years, Hugus has seen that the "trend is slightly upward" in students' interest in studying abroad.

Hugus said that students that study abroad not only come back with a more unique educational experience for a reasonable price, but also the satisfaction of giving back to their home abroad.

He added that the students who study abroad learn skills that will be applicable to situations and beneficial in the long run.

"Students can make a tremendous difference," said Hugus "One student from UMass was able to help teach at a local school in South Africa."

Depending on the location the student chooses, he or she can participate in volunteer activities and can find endless opportunities to be more involved in the community.

Overall, Hugus believes that the study abroad program at UMass "enhances understanding of the world we live in and is a broadening and enriching experience."

With his own personal experience of studying abroad, he said "the experience changed [his] view on life."

He added that the benefits of international study are immeasurable, and that students will develop personally over time. Students will not only gain the experience of a new culture and way of learning but also will "mature quite a bit," according to Hugus, and generally tend to improve their G.P.A.'s during their abroad studies and after their return home. It is a popular and enriching opportunity for students to not only find themselves, but also "increase appreciation of other people."

Charlotte Kenyon can be reached at ckenyon@student.umass.edu.

Travel possible due to award

SCHOLARSHIP from page 1

major from Narragansett, R.I.

"It was very close. I actually got placed on the waiting list, which made me very unhappy, because I didn't think anyone who won the award would turn it down," continued Marks in an e-mail interview from Japan.

"Then about a month later, I'd been turned down for every other award I applied for and I went to bed in tears thinking I wouldn't be able to go abroad. But the next morning, the notification was waiting in my inbox."

Frank Hugus, the Associate Provost and Director of International Programs, says that he is happy of the results.

"You bet we're proud of these students," he said. "This scholarship is a great opportunity."

"It helps students who might not be able to study abroad for financial reasons and they get a chance to learn and experience things internationally," he continued.

William Goldstick, a Chinese major from Belmont, MA, is studying in China because of the Gilman Scholarship.

"I personally was really happy to have won the Gilman scholarship, as it reduced financial pressure on allowing me to study abroad," he said. "The Gilman scholarship allowed me to extend my understanding of the culture and language of China."

The application is due almost a full semester before the semester it is awarded, the spring 2011 application was due Oct. 5 and the summer 2011 is due March 1.

"It's a very competitive process," said Hugus, who invites all students to the Education Abroad Advising center in the International Programming Office in Hills South for application help.

Goldstick said that she had a pretty smooth time with the process.

Nick O'Malley/Collegian

Study abroad students have the option to travel to a variety of locations, including Barcelona, Spain, which is home to the world-famous La Sagrada Familia cathedral, which has been under construction since 1882.

"I really think it went really fast," she said. "I met no problems with doing it. The Gilman Scholarship Foundation really has a good and solid application process," she added.

Marks considered the application to be easier than most others.

"I think it was probably the easiest application I've ever completed, so there's really no excuse for anyone eligible not to apply," Marks said.

"It was not terribly difficult. There are no letters of recommendation, so really all you need to do is have a Pell Grant, and go to the website to fill out the application," she said.

The Institute of International Education website reports, "International experience is critically important in the educational and career development of American students, but it can also require a substantial financial investment. The Gilman Scholarship Program broadens the student population that studies abroad by supporting undergraduates who might not otherwise participate due to financial constraints."

The scholarship is aimed towards non-western Europe or non-traditional locations for study abroad.

Students are currently studying in Ireland, Denmark, Japan, China, Turkey, China, South Africa, Italy, the United Kingdom, Brazil, the Dominican Republic, Morocco, Uganda and Thailand.

Pats kill rumors, trade Moss

Charles Trainor Jr./Miami Herald/MCT

After more than three seasons in New England, seven-time Pro Bowl receiver Randy Moss is heading back to Minnesota, the team that initially made him a first round NFL draft pick 1998. Moss will return to Foxboro when the Patriots play the Vikings at home, Oct. 31.

According to ESPN's Adam Schefter, New England Patriots wide receiver Randy Moss was traded to the Minnesota Vikings in exchange for a third-round draft pick in the 2011 NFL Draft. The Patriots also sent a 2012 seventh-round draft pick to the Vikings.

Rumors of a New England-Minnesota deal emerged late Tuesday night, with speculation arising that a new contract for Moss once he reached the Vikings was the remaining factor. On Wednesday morning, the rumors proved to be true.

Moss, who the Patriots acquired from the Raiders in April 2007 for a fourth-round pick, had seen his status among coaches and fans diminish in recent seasons.

After setting the NFL single season touchdown record with 23 receiving touchdowns in his first season with the Patriots, Moss spent the waning months of his time in New England speaking out about his contract situation as rumors swirled about his effort on the field.

The move came as a sudden shock to many fans, who still considered Moss a vital part of the Patriot offense. New England fans will not have to wait long to see the seven-time Pro Bowler play at Gillete Stadium again, as the Patriots face the Vikings at home on Oct. 31.

The Patriots are not the first team that Moss has left on less-than friendly terms. Seven seasons after drafted him in the first round, the Vikings traded Moss to the Oakland Raiders, where his off – and on – the-field antics were expected to be overlooked.

During his time in New England, Moss was called out in the media for taking plays off and failing to give a full effort. Such actions were reflective of his past transgressions, which included squirting a referee with a water bottle, walking off the field while time remained on the clock, faux-mooning the crowd against the Green Bay Packers and telling a columnist that he played when he wanted to play.

'Don't ask, don't tell' fight continues

The battle continues to protect rights of homosexual soldiers

BY NANCY A. YOUSSEF AND WILLIAM DOUGLAS
MCCLATCHY NEWSPAPERS

WASHINGTON — With Congress stalled on whether to repeal "don't ask, don't tell," some proponents of eliminating the longstanding policy rather see gays and lesbians serving openly in the military now before their best hope lies with an increasingly supportive court system.

Lawyers for the Log Cabin Republicans, a group of gay GOP members serving openly in U.S. military, asked a judge in California soon to issue a nationwide injunction that would prohibit the military from enforcing the ban throughout the United States. The judge, Virginia Phillips, a Bill Clinton appointee, last month ruled that the prohibition violated gay servicemembers' constitutional rights to free speech and due process.

"Waiting for Congress and the administration hasn't worked. It has failed. The president has since nothing but talk," said Dan Woods, the lawyer who brought the case on behalf of the Log Cabin Republicans. "The courts have to take over because Congress and the president have failed to act."

Other proponents of repeal say the courts are a prime way to overturn the ban. Appeals of any permanent injunction would likely take years to resolve, and the current Supreme Court seems an unlikely ally.

"The statute is in place until there is finality," said Aubrey Sarvis, executive director of the servicemembers Legal Defense Network, which since the past 17 years has represented more than 1,000 soldiers, sailors and Marines faced with military expulsion because of accusations of homosexuality. "Appeals will mean they will likely be tied up in the courts for years. All eyes are on the Senate where they should be."

Still, an injunction by Phillips and an appeal by the Obama administration might quickly bring the issue to the Supreme Court, which up to now hasn't taken a direct role in the "don't ask, don't tell" debate. Last year the court declined to hear a case Pietrangelo v. Gates, brought by Sarvis' organization against Secretary of Defense Robert Gates on behalf of James E. Pietrangelo II, a former Army captain discharged from the military for being gay.

The eagerness for court intervention by at least some advocates of repealing the policy underscores the significance of two events that took place last month.

The first was Phillips' 85-page ruling that "don't ask, don't tell" was unconstitutional because, she found, the different treatment gays received in the military violated constitutional requirements for due process as well as the First Amendment right to free association. Phillips said that far from being necessary for military readiness the policy had a "direct and deleterious effect" on the armed services.

In her opinion, Phillips acknowledged that the courts must show Congress deference when it comes to the military. But she quoted a Supreme Court case in ruling that "deference does not mean abdication."

Then, after months of back and forth, the Senate refused to block for the defense authorization bill after repeal proponents failed to win an amendment to end "don't ask, don't tell." The 56-43 vote not to consider the bill — a filibuster measure was required — was a rarity for a bill that usually is a bipartisan affair.

The Senate is expected to take up the authorization bill again after the November election. Members of Congress expressed little concern about Phillips' ruling.

"I would hope the courts would understand that setting the rules for military service has traditionally been a congressional function, not it's role to set if we've overstepped the Constitution," said Sen. Lindsey Graham, R-S.C., a member of the Senate Armed Services Committee. "That's the way our legal system works, and I don't have a problem with that."

Sen. John McCain, R-Ariz., who led last month's effort to defeat the defense authorization bill, was more direct. Asked if Phillips had overstepped her authority, he said simply, "Of course, of course."

For its part, the Obama administration has said it favors congressional action over the courts. In a filing last week before Judge Phillips, the Justice Department said: "A court should not compel the Executive to implement an immediate cessation particularly at a time when the military is engaged in combat operations and other demanding military activities around the globe."

But the administration still favors repeal. The day the Justice Department made the filing, White House spokesman Robert Gibbs issued a statement saying President Barack Obama still favored the repeal of "don't ask, don't tell."

"This filing in no way diminishes the president's firm commitment to achieve a legislative repeal of DADT," Gibbs said. "Clearly, those who say Congress must act to end this misguided policy."

Woods, however, says it seems clear Congress won't act. The bill is unlikely to fare any better after the November election, he said, and most analysts predicting a more conservative Congress taking office in January, repeal advocates need to accept that the courts are the best avenue for repeal.

"The court system is the best and quickest way to address this," he said.

Recent court battles have fought over the fairness of the "Don't ask, don't tell" rule, which prevents enlisted soldiers to openly express their sexuality. A bill featuring a repeal of the policy was defeated 56-43.

THE MASSACHUSETTS DAILY COLLEGIAN

EDITORIAL OPINION

THURSDAY, OCTOBER 7, 2010

"If we don't believe in free expression for people we despise, we don't believe in it at all." -Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

Three-year scam

Beginning next fall the University of Massachusetts will officially allow qualifying students to graduate in three years as opposed to the standard four. Some colleges and universities are already doing this, and many more plan to over the next few years. We agree that it looks good on paper, but we'd like to address some concerns.

First, an education "bubble" looms in the near future. The three-year degree is universities' response to the bubble. They've figured out how to maintain credit inflow while permitting a few students the benefit of the slightly more affordable accelerated track. In actuality, only about half of students will graduate in four years. Many are taking up to an additional two years to complete their degrees. The students likely to capitalize on the three-year program will enter college with advanced placement credit or college credit by other means.

They will also need to bulk up on credits during the regular semesters and take summer courses (which can be more expensive than fall and spring courses depending on the university). There won't be much time for switching majors either (a rather frequent occurrence for undergraduate students). Some colleges with three-year degree programs require students to choose their majors during freshman year without allowing them to change.

Like in the case of the housing bubble, the United States government and taxpayers are funneling hundreds of billions of dollars annually into higher education predicated on the notion that a college degree secures jobs and future wealth. College and university administrators, already drunk from this huge credit infusion, ask for more and more each year. After tallying tuition, fees and housing, college is nearly a $50,000 per year investment (if you choose the private school avenue), which means many graduates carry home mortgage-like debt. This is unsustainable.

The National Center for Policy and Higher Education reports that a college education has outpaced the rate of inflation and the cost of healthcare. It has risen more than 400 percent on average over the last 25 years. The question is, like it was for the housing market, "When will everyone realize that the value of a college degree is continuously falling?"

Community colleges and online degree programs, such as those offered at the University of Phoenix, are attracting middle class students who cannot afford an exorbitantly-priced traditional education. Considering the job outlook for the next few years, these alternative educational paths are practical, if not genius. Holyoke Community College is still a better deal than a three-year degree from a traditional four-year university. When you factor in that research shows most college graduates aren't even proficient readers and study much less than the class of yesteryear, the luxury four-year route is almost absurd.

Furthermore, the three-year degree program may appear cheaper at first glance. However, we want to know how many years of 400 percent inflation will it take for it to reach the cost of the four-year track? Take at look at Florida State University, for example. Roughly 40 percent of students enrolled in their three-year program remain for an additional year, thus eliminating expected savings.

This page also noted earlier this semester that a serious disconnect exists between what the administration says about the University's finances and what the visible reality is. Recently UMass Amherst Provost James Staros told the Boston Globe, "As the state backs out of support for public higher education, and families take on a bigger chunk of the burden, we need to try to mitigate that."

If the state has backed out of support for higher-ed, someone else is filling out his shoes very well. Instead of implementing a three-year degree track, perhaps a better way to "mitigate the burden" would be to halt the $375 million in construction projects the University currently has under way.

In 2009, when UMass instituted a $1500 fee increase, it noted in a talking points memo that, "If ... the fee increase remains in place, families at or below the state median of $78,500 would have the effects of the increase offset by additional grant aid."

In other words, they raised the price of attendance knowing the feds (via taxpayer money) would pick up the tab. Colleges and universities are in cahoots with each other. Federal financial aid is a $200 billion per year racket, and every college president, chancellor and lingering administrative bureaucrat wants a piece of the very large pie. Unfortunately, it may take a bubble burst to put the brakes on the scam.

We support a three-year degree only if it will tangibly reduce student fees and debt. We remain leery of a program that will overburden students with coursework and inhibit them from enjoying college life outside the classroom. Is it really worth rushing through undergraduate school to potentially save a few thousand dollars? We hope UMass and its fellow universities are not trying to pull another fast one on their students and the taxpayers.

Unsigned editorials represent the majority opinion of The Massachusetts Daily Collegian's Editorial Board.

Yes, they could have but they didn't

Mike Tudoreanu

It is common knowledge that the Democrats can expect a disaster at the polls next month.

The only question is, will the Republicans sweep into power or will the Democrats hang on with a much smaller majority? I do not know the answer, but I believe it matters less than most people think. Judging by the behavior of the Democrats so far, even if their majorities survive in the House and Senate we can still expect conservative policies — because they will argue that the Republicans need to be appeased rather than confronted. So let's put aside the question of what will happen in November and talk about how we got here.

For one year, 2009, the Democratic Party had absolute control of the executive and legislative branches of government, complete with a supermajority in the Senate. That supermajority was lost after Scott Brown was elected in 2010, but the Democrats still held more seats in the Senate than the Republicans ever had at any point since the 1920s. And what did they do with this once-in-a-lifetime opportunity?

Well, they spent the first half of 2009 making hard choices about Obama's new dog. And bailing out banks just like Bush did. Then they finally got around to discussing some real "change we can believe in" over the summer — the health care reform — and spent the next six months crafting a non-reform bill that was far more right-wing than the health care policies of conservative parties in Canada, Western Europe, Australia and Japan.

There are two main reasons why the U.S. government is experiencing record deficits right now, and one of them is that taxes are absurdly low by historical standards (the other reason is the bloated defense budget).

Let me emphasize that, despite all the crazy talk from teary-eyed conservative talk show hosts, "Obama-care" is more market-oriented and involves less government intervention than anything supported by mainstream right-wing parties anywhere else in the developed world. In fact, it is even less progressive than a health reform proposal once made by the Nixon administration.

Finally, after they were done pretending to reform health care, the Democrats gave Wall Street a slap on the wrist and told them to play nice next time. I can definitely see their logic here: After this terrible recession, we can rest assured that the banks will never again be so reckless as to take huge risks that might crash the economy and force the government to give billions of dollars to the banks... Oh wait, never mind.

Throughout all this, the Democrats did very little to help working people who had lost their jobs or homes. If they were going to bail out the banks anyway, they could have done it by buying up all the foreclosed homes and letting their occupants stay there.

Not only would this have been the right thing to do from a moral perspective, but it would have also helped the economy. After all, it's a lot easier to find and keep a steady job if you have a home to live in.

To deal with the record levels of unemployment (officially hovering around 10 percent, but unofficially around 16 percent when you count the underemployed and the "discouraged workers"), the Democrats could have started a massive government jobs program like in the New Deal.

The government could have employed people to build public transport networks, which are sorely needed in this country. Or there could have been a jobs boom in health care if they actually created a public option.

To pay for it all, they could have raised taxes on the wealthy. There are two main reasons why the U.S. government is experiencing record deficits right now, and one of them is that taxes are absurdly low by historical standards (the other reason is the bloated defense budget).

The top marginal income tax rate — the tax rate paid by the richest Americans — was 63 percent during FDR's first term, 79 percent during his second term, 91 percent under Eisenhower, 70 percent under Nixon, and 50 percent under Ronald Reagan.

It is 35 percent under Obama. Don't tell me that taxes are too high. They are at their second lowest point in almost 80 years.

But the Democrats did not help working people, did not pursue any meaningful reform of health care or Wall Street, and did not punish those who caused the Great Recession (in fact, they rewarded them). So now they are going to be swept out of office by a wave of public anger, and they have only themselves to blame.

Right-wing commentators insist that the mistake of the Democrats was going "too far to the left," but that is absurd.

On all the key issues, the Democrats were too far to the right; they could have secured more votes by going further left. For example, does anyone really believe that the American people would have been opposed to the government inflicting severe punishment on Wall Street?

If the Democrats had taken a more left-wing stance against the banks, they would have won more popular support, not less.

Or imagine if Obama actually created a system of "socialized health care" like the British NHS, meaning that anyone could walk into a hospital and get treatment for any serious illness at little or no cost. Is there any doubt that he would have earned the eternal support — and votes — of the tens of millions of uninsured, and the other tens of millions of people with bad insurance, high deductibles or co-pays, or pre-existing conditions?

And if the Democrats created a government jobs program that put millions of people back to work, is there any doubt that all those people would have voted for them this November?

Whatever you think about which policies are best, there can be no doubt that more progressive policies would have earned the Democrats more votes.

But instead, they chose to fiddle while the economy burned.

MARIJUANA PROPAGANDA

Dear Editor,

Re: "Prohibition is not working," Daily Collegian 9/28

If health outcomes determined drug laws instead of cultural norms, marijuana would be legal. Unlike alcohol, marijuana has never been shown to cause an overdose death, nor does it share the addictive properties of tobacco. Like any drug, marijuana can be harmful if abused, but jail cells are inappropriate as health interventions and ineffective as deterrents.

The first marijuana laws were enacted in response to Mexican immigration during the early 1900s, despite opposition from the American Medical Association. Dire warnings that marijuana inspires homicidal rages have been counterproductive at best. White Americans did not even begin to smoke pot until a soon-to-be entrenched federal bureaucracy began funding reefer madness propaganda.

Marijuana prohibition has failed miserably as a deterrent. The U.S. has higher rates of marijuana use than the Netherlands, where marijuana is legally available to adults. The only clear winners in the war on marijuana are drug cartels and shameless tough-on-drugs politicians who've built careers confusing the drug war's collateral damage with a relatively harmless plant.

Students who want to help end the intergenerational culture war otherwise known as the war on some drugs should contact Students for Sensible Drug Policy at www.SchoolsNotPrisons.com.

Sincerely,

Robert Sharpe, MPA

Washington, DC

POLITO BAD FOR THE DIFFERENTLY-ABLED

Dear Editor,

Representative Karyn Polito (R-Shrewsbury) is playing a dangerous game of political roulette with the health and welfare of thousands of individuals with disabilities at stake. In her transparent attempt to be fiscally prudent she is endangering vital funding for residential, employment and family support programs. After the combined efforts of The Arc of Massachusetts, ADDP, the Governor, and most of the Congressional delegation, the critical FMAP (federal matching Medicaid monies) extension passed. It will bring our state an additional $500 million, but Rep. Polito stands in the way of these dollars reaching Massachusetts families who are struggling.

Citizens who have written to her in the past few days have gotten the response that the bill is being "pushed forward during informal sessions of the House when there is no meaningful opportunity to debate, amend and vote on the bill." This doesn't make sense, because last June both the House and Senate did approve a 2012 budget with FMAP dollars and most of the very line items that are in the spending bill. The line items were reduced by the Governor, but it was agreed that if the new FMAP dollars did materialize, they could be added through a supplemental bill.

Why object now?

Sincerely,

Leo Sarkissian,
Executive Director
The Arc of Massachusetts
Waltham, Mass.

LOOKING FOR 9/11 TRUTH

Dear Editor,

Last week, I attended a talk by Michael Arad, the designer of the World Trade Center's September 11 Memorial called "Reflecting Absence." This talk was sponsored by the Architecture and Design program at the University of Massachusetts and it touched on many aspects of the design evolution from conceptualization through the nuts and bolts of construction and on to which trees would provide the best canopy for pedestrians.

He related his belief in the power and appropriateness of his design during the competition even though the odds against it selection had been daunting. He related the frustrations and triumphs in working with other stakeholders to achieve a design that would be meaningful, enduring and most important, meet the building codes and public safety requirements.

He talked about concepts he had learned from his professors and how he had synthesized them. He emphasized that everything needed to be addressed in the design stage, because once it is finalized, you can't be told, for example, that it needs a railing, because that would change the perspective of the entire memorial.

After the formal talk, he asked for questions and I took the opportunity to pose one that intrigues me. I began my question stating that "the meaning of memorials change as the understanding of the event evolves over time.

The event that this memorial recalls is the death of thousands of people after planes hit the building, creating fires that led to their complete and catastrophic collapse down into their basements." I identified myself as a registered professional engineer and one of over 1300 architects and engineers that believe that the evidence is overwhelming that the three skyscrapers were, in fact, destroyed by controlled demolition using pre-planted explosives. I continued, "How will the meaning of this memorial change as those irrefutable facts become more well-known?" Arad declined to answer that question stating his disagreement with my premise.

While disappointed with his response, I sat half-listening to other questions while I silently recounted my own evolving experiences with another memorial – the Vietnam Memorial. My first visit was in 1985 shortly after its completion. At that time it was a place to remember individuals; to touch the small voids in the wall that spelled their names; to reflect on the void that their sacrifices left in their world. It was a place to remember individual losses and sacrifices.

Over the years as I learned more about the Vietnam War including the deceit behind the Gulf of Tonkin incident, the meaning of the memorial shifted to the immensity of the tragedy. In recent years as I have advocated for veterans with Post Traumatic Stress Disorder (PTSD), and learned that if the wall were to be expanded to include veterans that committed suicide upon their return, it would need to be two to six times larger. So now, to me, the meaning of that memorial has become a symbol that calls out for peace, truth and justice so that such a senseless war never occurs again.

As I reflect on the design that Michael Arad has brought forth, I believe that because of its focus on loss and remembrance it will be an enduring design whose meaning can grow and adapt as our understanding of the events of that day in 2001 evolve. I look forward to experiencing it once it is open to the public.

Yorn transforms: will fans follow?

By Andrew Cogan
Collegian Staff

Pete Yorn, a folk singer-songwriter turned alternative rock artist made his Northampton debut Monday night. Yorn dropped in for a quick set at Pearl Street to promote his new self-titled album. The album was released Sept. 28 on Vagrant Records, and produced by Frank Black of the Pixies.

Yorn and his band – Marc Noseworthy on guitar, Zak Shaffer on bass and Scott Seiver on drums – kicked off the night with a shocking visual display that certainly caught the attention of the audience. The group came on stage adorned completely in white, and played in front of a white backdrop illuminated by glaringly bright lights. The effect was flashy and dazzling; the purity of color symbolized the new beginning that Yorn is searching for with his new album.

Longtime fans of Yorn's music will recognize the change in his aesthetic, which forgoes the heavy layers of orchestration, typical of his previous records. Instead, he favors a more stripped-down, candid style of songwriting. The sound is rough and guitar-driven, replacing the familiar pop sheen with gritty, raw emotion.

On stage, Yorn's newfound edginess came across strikingly. For one thing, the volume was cranked up to a level not usually expected of a singer-songwriter – then again, Yorn has never been afraid to defy the conventions of his genre. From the beginning of the set, the impression was distinctly rock 'n' roll. Yorn and Noseworthy teamed up on electric guitars to create a wall of distortion behind Yorn's soaring vocal melodies. Shaffer and Seiver anchored the sound with pounding, hard-driving rhythms.

Yorn opened with "Precious Stone," the first track off of the new album, and continued with "Bad Man" and "Always." On the fourth song, Yorn donned an acoustic guitar for "Strange Condition," his first hit single. The song appeared on the soundtrack for the Farrelly Brothers' film, "Me, Myself, and Irene," a film he additionally scored. He followed with a mellow rendition of "Just Another," from "Musicforthemorningafter."

Yorn came back strong with "Rock Crowd," one of the best tracks on the new album, and a highlight of the set. With Yorn playing acoustic, Noseworthy's lead arrangement had ample room to breathe, and his subtle melodic riffs shined through. The song featured a climactic build-up to the final chorus, aided by the energetic participation of the crowd.

Yorn closed with several more songs from the new record, along with his biggest hit, "Life on a Chain." He finished the set with the crowd singing along to another old favorite, "For Nancy."

Based on Monday's performance, Yorn's transformation is apparent. He has come a long way since his debut album, "Musicforthemorningafter," with which he achieved initial critical and popular success. Since then, his sound has evolved over several records, including "Day I Forgot" and "Nightcrawler;" his new album culminates 10 years of personal growth and songwriting maturation.

However, commercial success has eluded Yorn in the decade since his first big break. It is not clear if this new record has what it takes to recapture audiences. He has a lot of things going for him, like catchy melodies and easily relatable lyrics, but this has been the case throughout his career. Even with Frank Black at the helm, Yorn's new record is not exactly a radical departure.

If nothing else, Yorn will maintain his devoted following of long-time fans, and his rocking stage show is definitely a good time. His sound is just aggressive enough to distinguish him from the deluge of other popular rock artists, and his occasional harmonica reminds us of his folk-singer-songwriter roots. Even if Yorn never finds true mainstream success, his music is solid enough to still be heard.

Folk singer-songwriter Pete Yorn surprised his audience Monday night at the Pearl Street Night Club in Northampton with a new sound and look that left some shaking their heads.

Barefoot toes the line

By Andrew Cogan
Collegian Staff

For a long time, the Barefoot Truth has been up-and-coming, teetering on the edge of mainstream success, but not anymore. The socially conscious roots-rock band rolled out the red carpet Friday night with a spectacular performance at Pearl Street. With their infectious songs, tight musicianship and incredible live show, the Barefoot Truth will be the leading band in the canon of American roots-rock before long.

Friday night's performance showcased the band's eclectic mix of folk, rock, blues and jazz. Their songs were upbeat and catchy; every vocal and instrumental line was memorable, and delivered with bounding, joyful energy. Their stage show was infused with positive vibes, and communicated a sense of togetherness with the audience. The Barefoot Truth connected with their fans in a way that few bands are capable of.

Barefoot Truth is five members strong, featuring Will Evans on lead vocals and drums, Jay Driscoll on guitar, Andy Wrba on bass, Garret Duffy on the harmonica, and Wayno on the piano. Driscoll, Duffy, and Wayno performed in the appropriate fashion – without shoes.

The band is uncommonly versatile, seamlessly fusing many genres of American music. Their set list transitioned smoothly between hard-edged rock songs, reggae-infused jams, and soft acoustic numbers. Driscoll's guitar riffs were memorable and melodic, complementing Evans' distinct vocal style. Duffy pushed his harmonica to its fullest potential as a lead instrument, and Wayno's jazzy keyboards added another layer of complexity to the bands sound. Wrba on bass, together with Evans on drums, laid down a bouncing, upbeat rhythm section that elevated the music to a heightened level of intensity.

The band opened with several songs from their last album, "Threads," including favorites, "Okay," "The Ocean," and "Spoonful." The title track off of the album was one of the highlights of the show, prompting everyone in the crowd to sing along.

The audience roared as the Barefoot Truth played two new songs slated for their upcoming album, to be released in Spring 2011. "Worth" is a straightforward, guitar-driven rocker, and "Playing with Fire" is a duet with Evans on acoustic guitar and Wayno on piano.

During the set, the band incorporated a medley of "Billionaire" by Travie McCoy and "Santeria" by Sublime. For the encore, they closed with a cover of "The Bad Touch" by Bloodhound Gang.

The band's popularity has exploded since the February release of their album, "Threads," a critical and popular breakthrough that crystallized the essence of the band.

"I think it's really an album where the group is really at its whole, and the recording, the producing, and everything is the idea of Barefoot Truth. I think it was a moving forward album for sure," Wayno said before the show.

With their newly defined sound, the Barefoot Truth will continue to tour the East Coast through the fall, building anticipation for their new album. With it, the band is hoping to emulate what they achieved with "Threads."

"We're sticking with the sound of Threads," Wayno said. "We're really happy with how everything sounded."

The last time the Barefoot Truth played in Northampton was only days after "Threads" was released. The show on Friday night was a celebration of everything the band has accomplished since then.

Several of the band members are from Pioneer Valley, and Driscoll graduated from UMass in 2007. The band had many friends and family members in attendance, in addition to a devoted local following. Their presence complimented the music by contributing to the positive and friendly atmosphere, and helped to make the concert an all around great night.

"It's really fun for us to come back and do this sort of hometown show," Driscoll said.

Barefoot Truth will continue to tour extensively as their fan base expands rapidly beyond the North East. In the interview, Driscoll and Wayno mentioned the potential for an international tour. Their growth in popularity seems a natural result of the band's genre-bending roots-rock, which combines an unusual level of accessibility and musical proficiency. The Barefoot Truth is certainly one of the best bands in their genre of American music.

Up-and-coming roots-rock band Barefoot Truth tiptoes towards fame as their hard-edge, reggae-influenced, acoustic jams challenge the boundaries of their genre.

Comedians bring laughs to local non-profit to help others 'thrive'

By Ellie Rulon-Miller
Collegian Staff

Five comedians took to the six-inch-high, 10-foot-wide stage at the Montague Elks Lodge in Turners Falls on Saturday to perform as part of a weekend of fundraising events for the local non-profit organization the Thrive Project. The venue was standing room only when the show actually began – a good indicator that the organization raised ample funds that night.

The organization is lead by executive director and University of Massachusetts professor Jamie Berger. Berger, who teaches three sections of college writing 112, came up with the idea for the Thrive Project this April. He wanted to create an organization that would help adults who have not been given a fair shot at reaching their goals in life.

"I had just finished school and I was thinking about what to do when I was finished and thought about starting a tutoring business, but then that would be just helping people who have $50 – $75 an hour to pay me," he said. After a lifetime of living in cities, Berger, currently residing in Turners Falls, has met "a lot of really great people ... who weren't ready when they were 15 and 18 to excel" and struggled to find the motivation to do so as adults. He hopes that the Thrive Project will give them the tools needed to "[get] people out of their apartment and into the bigger world."

The Thrive Project opened its doors on Sunday after a weekend of events which has been dubbed "Thrive Fest."

As the emcee for the event, Berger introduced the comedians at the start of the show. First, though, he announced a few events that the organization has lined up for the upcoming weeks and months, including tutoring, movie nights, workshops, and D.I.Y nights.

"We're ... going to be defined by what people want and need," he said.

There are already people coming to Thrive for help, as well as people lining up to help the organization as tutors and mentors.

"Whether we raise a tiny bit [of money] or we raise a ton, we'll exist," Berger said. One of the organization's goals for longevity is that it will be able to maintain a "calm, sustained existence," according to Berger.

After introducing the four headlining acts, known throughout the performance as "The Four Fellows," the performers came on all at once to tell some jokes together. The comedians – Eugene Mirman, Michael Showalter ("I'm just happy to be doing standup comedy in a haunted barn," he joked), A.D. Miles, and Leo Allen – bantered amongst each other, remarking on the humorously small stage they stood on, for a few minutes before introducing a special guest, comedian Seth Herzog.

Herzog, like the other comedians, started off his act by making jokes about the location of Turners Falls and commenting on various items hanging on the walls of the Elks Lodge, such as a large pair of antlers.

Each of the comedians had a similar comedic style: They all told apparently true, absurd stories from their own lives. Herzog was no exception, telling a series of hilarious stories of strange people he encounters and kids saying the darnedest things.

Next up was A.D. Miles, a writer for "Late Night with Jimmy Fallon," who had appeared alongside Showalter in the 2001 film "Wet Hot American Summer." He made light of his recent divorce and mocked his own effeminate appearance. He dabbled in dirty punch lines and one-liners and explained a quirk that his father has through an exaggerated impersonation.

Perhaps the funniest joke he told was about his cat getting a blockage in his urethra and growing considerably in size after not being able to pee for several days, then passing out after Miles tickled his belly.

"I don't know about you guys, but my cat dick maintenance budget is zero," he joked, finishing the joke with asking his veterinarian, "Is this something I can fix myself?"

Miles then introduced Leo Allen as the next artist. Allen is a former writer for "Saturday Night Live" and has performed at a number of comedy festivals. He started off his act by going off of Miles' last joke about people misbehaving in a movie theater. Overall, Allen's humor wasn't spectacular; his stories weren't quite as absurd and silly as those of the other comedians. While his jokes lacked in absurdity, the audience appreciated the familiarity of the situations he described.

Following Allen was Michael Showalter, who seemed to be unprepared in comparison with the other comedians. He too began his act by making comments about the size and location of Turners Falls and about the Elks Lodge. He spent a lot of his stage time chatting with and poking fun at a few audience members in the front row.

Showalter did relate a few anecdotes from his childhood – stories of Friendly's Fribbles and being denied the role he wanted in his high school production of "The Crucible." The rest of the comedians, standing to the side of the stage, got to poke fun at him when he suddenly fell off of his stool.

The final comedian to perform was Eugene Mirman, a personal friend of Berger and a board member of the Thrive Project. His act was hands-down the highlight of the evening. His wit shone through with every quip made at the expense of various victims, such as the Tea Party and Czechoslovakia. There was not a sentence uttered from his lips that did not garner substantial laughter from the crowd.

The funniest and most interesting part of Mirman's act was when he pulled out a theremin. "I'm gonna try something here. I've always had this fantasy of telling one-liner jokes with a theremin," he said, lifting the instrument onto the stage.

A theremin is an electronic instrument with two antennae sticking out from it. The antennae sense how close a person's hands are to them and the instrument produces a sound in accordance with the location of their two hands. Mirman told a series of intentionally unfunny one-liners and produced the appropriate noises using the instrument, causing the audience to laugh uproariously.

Overall, the show was a success for the Thrive Project. The Elks Lodge was packed full of people, many of whom gave donations to the organization. Last weekend was the first of what the Thrive Project hopes will be many annual Thrive Fests to come.

The Thrive Project is always looking for people to get involved. Says Berger, you can even help out by "[telling] your story... we need people to believe they can get a break."

Ellie Rulon-Miller can be reached at ellie@dailycollegian.com.

French bistro sizzles

By Jess Watsky
Collegian Staff

Perched along North Pleasant Street in the center of Amherst is a veritable jewel of a restaurant. It is inconspicuous in its architecture, sandwiched between stores, allowing its prestige and clientele to speak for itself. That restaurant is Chez Albert, a Parisian bistro in the middle of Western Massachusetts.

On a chilly Friday evening, the staff was bustling and the place was packed. That's not too hard for the location, which is smaller than a single in Sylvan and about as pricey. After getting a table, the server poured water and it was time to take a look at the menu.

For such haute cuisine, it was surprising to discover that there was, for one, a short and rather unimpressive wine list, and apparent electricity moderation as well, with sparse lighting that comes off as Cretaceous rather than creative. Thus, this allowed very few options to imbibe while waiting for the food in the dark. Deciding on the moderately-priced French onion soup ($9) and the butternut squash soup ($8) was no challenge.

However, the entrées went up from there. There is no prix fixe menu or middle ground, as the most economical entrée from thereon out is a paltry $23, which may be reasonable for dinner with parents, but for college students, it seems a bit too high.

The soup came out relatively quickly. The French onion soup was served in a rather rustic and simple style, in a classic soup crock with a small handle. It was warm and hearty, but unfortunately, those were its only merits. The onions, though plentiful, were stringy and tough, and soaked into the beef broth, imparting a flavor devoid of any other notes due to the intensity of the allium cepa.

While trying other French onion soups, there have been cream or cheese based toppings to cut the tang of the onion's flavor and mix in a different savory flavor. Nothing like that in this one, merely a bruschetta-sized baguette with more of a gruyere confetti than topping that quickly soaks up the soup, rendering it inedible.

The butternut squash soup fared for the better, with a multi-layered flavor from the crème fraiche and the pumpkin seeds. It was a delightful dance of spicy and sweet, indulgent and earthy, and large enough to serve two for a starting amuse bouche. If Chez Albert serves dishes to this level and depth, it's no surprise that they're so successful.

For such a creative array of main courses, it seems like the chef ran out of ideas while starting on pastries. Featured in the restaurant are desserts rehashed to retirement in stereotypical French cuisine – a plain crème brulee, tart tatin, what have you, but not necessarily representative of France itself.

The creme brulee was fine, with a lovely, but thick, caramelization of sugar on top, requiring one to be more of a Charles Atlas than an Amélie when tapping it with a spoon to yield to the custard beneath. That being said, it's a substantial portion, liberally dotted with vanilla bean seeds, and is a delicious, if uninventive finish to this small dinner.

Chez Albert is a charming restaurant that offers little variety, but consistent quality. While the menu may be pricey, the polished product is worth every penny. The restaurant is located at 27 South Pleasant St. in Amherst.

Jess Watsky can be reached at jwatsky@student.umass.edu.

French bistro Chez Albert features classic cuisine at a high price. Chez Albert Restuarant is located at 27 South Pleasant St. in Amherst.

Chaplin's 'Circus' still ropes in laughs more than 80 years later

By Austin Dale
Collegian Correspondent

The great French filmmaker Claude Chabrol had a famous quote: "Stupidity is infinitely more fascinating than intelligence." He went on to say, "Intelligence has its limits while stupidity has none. To observe a profoundly stupid person can be very enriching, and that's why we should never feel contempt for them." No character personifies this idea as much as the famous creation of another great filmmaker, perhaps the greatest of all.

Charlie Chaplin's character, called simply the Tramp is the quintessential fool of the cinema and, indeed, of the world's consciousness. Over the course of two decades and both World Wars, the Tramp gave people from all over the world comfort, tears and laughter. He bumbles around in his raggedy ensemble – the too-small tailcoat, the too-big pants and shoes, and, of course, the derby hat and cane – forever an underdog among men and a perpetually-failing romantic with a heart of gold.

In film after film, he meets the same fate, ends up where he began, and starts again, always looking for a permanent transformation through love. In perhaps no Chaplin film are his idiocy or pure heart more passionately presented than in "The Circus," which screened in a new print at Amherst Cinema's ongoing Chaplin retrospective.

The story of "The Circus" is simple. It begins with the Tramp, who, running from the police in a lovingly edited slapstick sequence, ends up in the center ring of a traveling circus. The ensuing on-stage chase from a cop ends up being the most entertaining part of the whole show, and the ringmaster, who knows a good thing when he sees one, hires the Tramp on the spot. His circus is failing, so the ringmaster takes out his frustration on his daughter, the innocent and beautiful young trapeze artist. Unbeknownst to him, the Tramp becomes the show's starring attraction, and he gets the girl's affection.

The final act of the film changes all of this. In the penultimate scenes, the Tramp's incredible gestures of love are at the same time brilliantly funny and completely devastating. And by the time he walks off into the darkness alone like always, we are reminded that undying hope, and not necessarily love, is all we need to carry on.

The world of "The Circus" is every bit as cruel and indifferent as ours. Yet, amid all this, Chaplin and what can only be called his divine humanity and creative grace manage to make us laugh, and wildly so, at the ridiculousness of it all.

If, in the first few weeks of school you have found little to laugh about or cry over, give Chaplin a chance. "The Circus" is 80 years old and in it, as he does in so many of his other great masterpieces, he offers us a shoulder to cry on, a pat on the back, a touch of cheer and, of course, the push we all need.

The Chaplin Retrospective continues with another Chaplin film every week until November.

Austin Dale can be reached at aadale@student.umass.edu.

'Dirty Sexy Politics'

Meghan McCain reveals the dark side of being a 'daughter-of' in her new tell-all memoir

By Kate MacDonald
Collegian Staff

Meghan McCain, daughter of 2008 Republican presidential nominee John McCain, gives her fans a behind-the-scenes look at campaigning in her new tell-all "Dirty Sexy Politics." The book, dedicated to her parents, tells the often untold story of what she has dubbed "a daughter-of."

Fresh out of Columbia University, McCain joined her parents on the campaign trail as a blogger, writing for the website McCain Bloggette. As a result, she is able to talk about the campaign in a rare, intimate manner, stressing her personal prerogative to tell things like they are.

She does admit, though, that the book "tells the story of my own struggle to get my act together."

The nice thing about "Dirty Sexy Politics" is that McCain is not trying to force her father's beliefs down reader's throats. She is the first to say that hardcore conservative Republicanism might not be the best thing right now. Though she mentions her personal beliefs from time to time, she stresses that she is more of a moderate Republican, liberal, even, when it comes to social issues.

Many times in the memoir, McCain expresses the hope that the Republican Party will take things in a new direction, in order to attract younger voters. She doesn't bash Barack Obama or his politics, though she did take her father's loss hard. The book only sparingly has political musings.

Instead, she gives readers an in-depth view on landmark events during John McCain's bid for president. "Dirty Sexy Politics" gives an interesting insight on his choice of Sarah Palin as a running mate. She was shocked and confused, and came to view Palin as inspiring, though she realized quickly that Palin seemed to be in it to make a name for herself.

Meghan McCain shares her views on the whole Palin family, the media storm that surrounded the clan and her private thoughts on Bristol Palin's teen pregnancy scandal.

McCain comes off as very honest, and writes of events that would probably embarrass her parents. She quickly admits that she has gotten tattoos, swears like a sailor and, more than anything, is not about to change for anyone, something that comes off in her headstrong manner of writing.

The author conveys that she is just like any other 20-something, not just the stereotypical "daughter-of" who smiles and stays silent for the cameras. From her near-arrest for stealing Mitt Romney signs to her accidental almost-overdose of Xanax on Election Day, she keeps the readers laughing along with her.

It is due to these incidents, plus a few botched interviews and a disastrous lunch with the Bushes that lead John McCain's advisors to dub her a troublemaker and banish her to a decrepit bus. So Meghan McCain had to figure out how to make the best of her less than perfect surroundings and promote her father while having a good time touring the nation with her best friends.

McCain comes off as very youthful throughout much of her book, fitting, as she is only 25 years-old. "Dirty Sexy Politics" is not a boring analysis on politics, as many political memoirs are. McCain's book is simply an account of a young woman's flying emotions during a stressful campaign.

"Dirty Sexy Politics" exposes the inside world of political campaigning from dilapidated hotels, to the sexcapades of staffers, to the required image consultants, McCain presents a unique view on a lot of matters that readers would not have been privy to.

That being said, though "Dirty Sexy Politics" is a pretty good read, it would have been nice if the book was a little longer. At fewer than 200 pages, McCain's account comes off as more of an unorganized jumble of short stories, as opposed to a memoir, at times.

Whether you've got an interest in the Republican Party, or simply want to know more about things not advertised about the campaign process, this book is for you. Or, if you've got no interest in politics, it's at the very least an interesting story of an opinionated girl thrust into the limelight while trying to retain her personality.

Though she has no political aspirations, Meghan McCain has accomplished something many politicians have failed at – she wrote a memoir that's not boring or forced – one that will probably interest some young voters.

"Dirty Sexy Politics" shows many aspects of the political system that many people know nothing about – how it affects regular people. While it can drag at times, those times are overshadowed by the surprising and witty events that make the book a surprising hit.

One aspect of "Dirty Sexy Politics" is predictable, however, regardless of fans' political beliefs. As Meghan McCain dictates from the introduction, "As for plot twists, the whole world knows how this books ends already. My dad loses."

'Nobody but me:' The Office defines comedy

By Kate MacDonald
Collegian Staff

The seventh season of the critically acclaimed comedy, "The Office," kicked off on Thursday, Sept. 24. With the first episode titled "Nepotism," director Jeffrey Blitz began the season with a bang – literally.

The viewers were first reacquainted with their favorite characters in a lip dub opening, to the sounds of "Nobody but Me" by The Human Beinz. In a hilarious two-minute lip synching sketch, fans saw Creed rocking out on the guitar, Michael (Steve Carrell) making fireballs explode in his hand (surprisingly successfully) and Dwight (Rainn Wilson) pulling an Ozzy Osbourne and biting the head off of a stuffed animal while doing a weird dance number.

A great way to start the seventh season, the director caught the attention of viewers and accurately showed off all the quirks that make "The Office" such a successful show.

The characters go on to a familiar elementary school technique of telling what they did with their summer. They consist of pretty funny accounts including someone contracting West Nile Virus, watching CNN all summer and taking business classes, something that would seemingly greatly help Scranton's Dunder Mifflin.

Two big changes to the Scranton office have occurred over the summer. First, the building has fallen under new ownership. This is sure to provide multiple plot lines and customary pranks during the coming season.

Secondly, Dunder Mifflin has acquired a new intern. Luke, played by Evan Peters (a small screen pro, known for bit roles on "House" and "Criminal Minds"), is Michael's nephew, hence the episode title. Luke is a nefarious 10-something, despised by the whole office. He provides an interesting foil for, well, just about any of the well-meaning characters.

As Luke's pranks and screw-ups become more and more bothersome, Michael Scott devises a quick way to punish him. Probably the funniest moment in the season starter comes when Stanley (Leslie David Baker) deems Michael's inappropriate action as "Texas justice."

Unfortunately, many of the side stories of season seven's first episode are played out. Andy ("The Hangover's" Ed Helms) is always getting the short end of the stick when it comes to relationships, Toby (Paul Lieberstein) is constantly being put down by Michael and Creed (Creed Bratton) likes to pretend he's younger.

Luckily, though, Creed's deadpan quips haven't left the show, and often save some of the more boring scenes. Another problem die-hard fans may have with this particular episode is that many of the plotlines left open at the end of season six weren't addressed.

"Office" fans can look forward to what will probably be a legendary season. Season seven will be Steve Carell's last season on the program, hoping to branch out in his career after this year.

While the premiere of "The Office" was pretty decent and rather amusing, it was not a standout episode by any means. Hopefully the writers can come up with something to tie up the loose ends and keep the attention of viewers. At the very least, viewers can count on ridiculous statements from Dwight, Jim's (John Krasinski) pranks and Andy's obliviousness to carry the rest of the season, if all else fails.

Kate MacDonald can be reached at kaitlynm@student.umass.edu.

Dainton wearing 'C'

CAHOON from page 12

been for many, many years. [Minnesota coach] Don Lucia is an excellent coach."

The Gophers finished last season with an 18-19-2 mark, with their offense managing 2.72 goals per game last season, an average of about 0.5 less than the year before. However, the team expects the offense to perform better this season. They are counting on the return of red-shirt senior and team captain Jay Barriball, who carries a team-high 102 career points with him.

UMass goalie Paul Dainton, the sole team captain for the Minutemen returns for his senior year in front of the net. He held a 3.08 goals against average last season with a .901 save percentage, and is one of the top returning goaltenders in Hockey East.

Dainton and Barriball have never faced each others' teams. But while both teams do not have much experience against one another, Cahoon's team will continue to work on its fundamentals.

"There's a whole slew of things we need to get better at," Cahoon said. "Whether it be holding opposition defensively, being a little more physically inclined in the goal area. We need to be a better shot-blocking team, more poised and collected. Our youthfulness shows itself. That comes with time and with 13 freshmen getting to be in the mix on a regular basis. And it will come, but there's no shortage of areas to work on in practice."

The youthful Minutemen will walk into a hostile environment at Mariucci Arena. The Gophers went 8-8-1 at their home rink last year.

"I've been there many times," Cahoon said. "It's 11,000 people just screaming their heads off. Big time gopher chants. It's a Big Ten operation that functions at a high level. We go in and give it our best shot. We try to get places in a hurry and get there in ill humor, making it a real difficult proposition for them. Hopefully we can execute on special teams, get good goaltending and come out of there with a 'W.'"

While Cahoon knows that every season is a unique season, over the last couple of years, UMass has gotten off to strong starts. The Minutemen started 7-1-0 last season, and began 6-2-1 in 2008-09.

In order to sustain that standard, UMass will have to play three-straight road games, something that has never been done to start a season. The road begins in Minnesota. The Minutemen will need to draw from Cahoon's experience there to bring them their first victory of the season.

Pete Vasquez can be reached at pvasquez@student.umass.edu.

FRESHMEN from page 12

All-American Chris Ingils.

The Mashpee, Mass. native will open his career against BU in less than 10 days, giving the team a new energy and formidable threat.

Even with new talent being recruited and molded into college level standouts, it is up to the veterans and team captains to make sure the team's focus and the drive is still being brought to every meet.

Over this past summer, Yarworth announced that seniors Dan Backler, Adam Duffield and Brian Schmidt will serve as the swimming and diving team's tri-captains for the upcoming season.

The three seniors will guide the four-time defending A-10 champion Minutemen as they look to capture their 13th conference title.

"These young men have shown tremendous ability and attitude during their tenure at UMass," Yarworth said. "I am fully confident they will provide the leadership necessary for us to continue to compete for the A-10 title and beyond."

With a head coach as esteemed as Yarmouth, three senior tri-captains and nine incoming freshman, it looks like the Minutemen have all the pieces in place to not only compete for the A-10 title, but to claim it once again.

Nick Bellofatto can be reached at nbellofa@student.umass.edu.

Yarworth names three seniors captains for 2010-11 campaign

CAPTAINS from page 12

team. That group won gold, repeating as champions for the second-straight season. The year before, Schmidt helped the medley team set a school record for the 400.

Schmidt burst onto the scene at UMass, notching two gold medals as a freshman. Both came at the BU Terrier Invitational, where Schmidt also placed second in the 200 individual medley and 400 individual medley and combined with the other members of the 400 medley relay team on a silver medal. Including medleys, Schmidt is a 13-time gold and 13-time silver medalist at UMass.

The Minutemen are looking at these three co-captains to lead them to a fifth-straight Atlantic 10 Championship. If they can pull it off, this would be the 13th conference championship ever for UMass men's swimming. The hunt for another title begins Oct. 16 at Boston University, with the first home meet taking place Oct. 23 against Army.

only red-shirt on the squad.

In the Bud Light Hockey Coaches Radio Show, held at The Hangar Pub & Grill, Raiola talked about doing his best to get into the lineup in competitive situations.

"It's going to be a battle all year and I'm going to take it one step at a time," Raiola said. "I'm going to hopefully block some shots and do what I have to do to get in the lineup."

UMass coach Don Cahoon spoke about Raiola during the same interview and discussed his chances of seeing action this season.

"He has some offensive capabilities," Cahoon said. "Over the last couple of weeks, he has steadily improved. I think part of it is his level of fitness on the ice. He is in the mix, right now, with a lot of groups of young players. His challenge is to give us every reason in the world to be in the lineup night-in and night-out. His situation is no different than any other guys, and he knows that."

Gophers forwards look to be shut down

The Gophers feature 19 players on their roster who were drafted by the National Hockey League. Five seniors, six juniors, two sophomores and six freshmen all had their names called during the NHL Entry Draft. The latest are freshmen Nick Bjugstad, Mark Alt, Justin Holl and Max Gardener who were picked in the first three rounds and were the top 4 [illegible] Cahoon said his team will be a pr[illegible] deterring forwards Jake Hansen and [illegible] recent draftees.

The tandem will be a major [illegible] prepares his team to halt a Gophers [illegible] six-times in its last exhibition [illegible] Columbia.

Hansen, a junior, was selected [illegible] Blue Jackets in the third round of the [illegible] previous two seasons, he tallied 19 points [illegible] including seven goals and 6 assists in 2009. Hansen netted two goals in the Minutemen's 6-0 win against British Columbia. After the game, Hansen was asked what his role on the team will be.

"Whatever my coach calls for[illegible] to get a few goals, get back. It [illegible] start."

Sophomore Jack Budish join[illegible] He was drafted by the Nashville Predators [illegible] round of the 2009 Draft.

Budish played in all 39 games [illegible] Gopher's front-line at right wing. He scored 17 [illegible] on his way to Western Collegiate Hockey [illegible] Rookie of the Week Honors twice last season.

Minutemen open season on road

UM takes on No.15 Gophers Friday, Sat.

By Pete Vasquez
Collegian Staff

The Massachusetts men's hockey team is eager to begin its 2010-11 season. The setting will be Minneapolis, Minn. as the Minutemen face No. 15 Minnesota on Friday and Saturday nights.

"We're very anxious," UMass coach Don Cahoon said. "We've got a tall order and that's good because the whole league is a tall order. I remember an old Harvard coach saying years and years ago 'Minnesota: the land of 10,000 lakes. It's pretty cold out there; they probably have some pretty good hockey players.' So they're going to very good."

UMass is coming off an 18-18-0 season, during which it went 9-8-0 versus ranked teams, the program's best all-time record against ranked opponents. This is only the second and third time UMass will face Minnesota in program history, with the only other matchup against the Gophers coming in 2004 at the Nye Frontier Classic, in which the Gophers won, 1-0.

Cahoon has a career 1-1-0 record against the Gophers. However, he is still very aware of this weekend's opponent.

"I know quite a bit about the building they play in, the types of teams they package," Cahoon said. "They're a great program and have

The Minutemen celebrate after scoring a goal in a game last season. UMass opens on the road against the Gophers this weekend.

Defensemen Raiola returns to home state

By Dan Gigliotti
Collegian Staff

Though Minnesota is foreign territory to most of the members of the Massachusetts hockey team, it isn't to Anthony Raiola.

The Victoria, Minn. native heads back to his home state this weekend when UMass takes on Minnesota, a game he hopes to play in and that will feature many of his former high school teammates. Raiola is a redshirt freshman for the Minutemen, one of nine defensemen on the roster this season.

He played at Minnetonka High School, recording five goals and 12 assists. He last played for the North Iowa Outlaws of the United States Hockey League in 2008-09, and is a member of the Hockey East all-academic team.

Raiola's family will host a fundraiser for the UMass hockey team at his home on Thursday. His father is promoting the event, called "Pick 'Em By the Pond/" which is presented by the Grammy organization in conjunction with the Pond Club. The fundraiser features two-time Grammy Award winning country singer Lee Ann Womack, among other performing artists, with the proceeds supporting the Massachusetts hockey organization.

Raiola has three years of eligibility left after this season, as the

UMass looks to defend A-10 title as season begins Oct. 16

By Nick Bellofatto
Collegian Correspondent

The 2010-11 season for the Massachusetts swimming and diving team is quickly approaching and it seems as if they have all the pieces in place to defend their Atlantic 10 crown.

There is a sports cliché that says that there is no substitute for good coaching and the past success of the Minutemen can be attributed to tenured coach and UMass alum Russ Yarworth.

Entering his 32-year as head coach of the team, Yarworth has brought incomparable success to the program. As just the third coach in the history of the UMass program, Yarworth's 246 wins account for more than half of the programs 425 all-time victories.

In the previous 31 years as head coach of the team, Yarworth's teams have won 20 titles, including 12 A-10 championships. Since 1996, the team has failed to capture the A-10 crown in only three seasons (1999, 2000 and 2006). The team also recorded eight-consecutive New England championships from 1987-1994, posting a 246 – 70 dual-meet record.

With a winning percentage of .778, it is no wonder that the 12 A-10 titles are by far the most of any program in the leagues 26 years of hosting swimming and diving championship meets.

With this type of unparalleled success comes acknowledgment, and this recognition has landed Yarworth 11 A-10 Coach of the Year awards – the most in any sport in A-10 history.

As the Minutemen open their season on Saturday, Oct. 16 against Boston University, it looks as if this team has the drive and the coaching to capture another A-10 crown. However, with five seniors missing from the roster this year, it is up to the newcomers to fill their shoes and step up for this 2010-11 season.

The team has not had a hard time recruiting young and raw talent. This year alone the Minutemen will welcome nine new freshmen to the squad, including USA Swimming Scholastic

See FRESHMEN on page 9

Veteran trio to lead this year

By Ben Lambert
Collegian Staff

When naming his captain for the upcoming season, Massachusetts men's swimming head coach Russ Yarworth was looking for veteran savvy and experience to lead his squad. He found it in seniors Dan Backler, Adam Duffield and Brian Schmidt, who will be serving as co-captains for the upcoming season.

Backler, a native of Newburyport, Mass., is ranked third all-time at UMass in the 200- meter breaststroke and fifth all-time in the 100-meter breaststroke.

Last year, he won bronze at the Atlantic 10 Championships in the 200-meter breaststroke and added a fifth-place finish in the 100-meter breaststroke, pacing the Minutemen each time. He showed the ability to rise to the occasion when it counted, as he notched his best times of the season in these races.

In years' past, Backler has been a steady performer for the Minutemen. Since he transferred to UMass in 2008-09 as a sophomore, he has never finished lower than ninth in any race. He has one gold medal to his name, in the 100-meter breaststroke at Boston College as a sophomore and four silver medals as well.

Adam Duffield, a native of Brookfield, Conn., ranks ninth all-time in UMass history in the three-meter dive. He won the silver medal at the A-10 Championships this past year with a combined score of 571.70, including a bronze medal finish in the three-meter dive. He scored 31 points overall for UMass during the meet.

Duffield has been excellent for UMass throughout his career as a member of the Minutemen. He's never placed lower than sixth for the year and last season finished no lower than fourth.

He's also an excellent performer in the classroom. A mechanical engineering major, Duffield has also been named to the A-10 Academic All-Conference Team each of the past two seasons.

Brian Schmidt, a native of Falmouth, Mass., pairs with Backler to represent UMass in the breaststroke. He tied Backler at the A-10 Championship for fifth-place in the 100-meter, as well as swimming the breast leg of the 400-meter medley relay

See CAPTAINS on page 9

The Minutemen finish up a heat in a meet last season. UMass opens its season Oct. 22 in search of its 13th conference title, lead by a trio of senior captains.

MAXWELL SPARK/COLLEGIAN

UMass coach Kevin Morris addresses the media following the Michigan game. The Minutemen have a bye this weekend.

Morris and Co. roll into bye week with No. 8 ranking, Holmes gains accolades

By Jay Asser
Collegian Staff

At the unofficial midway point of the season, the Massachusetts football team has been a modest surprise.

After losing multiple seniors and starters from last year's squad, UMass has had a successful first half en route to a 4-1 record entering its bye week.

The Minutemen are climbing in the rankings, despite staying put at No. 8 in the latest polls following a 27-14 victory over Towson on Saturday.

Other than UMass, six Colonial Athletic Association teams are ranked, including No. 2 Delaware, No. 4 William & Mary, No. 6 Villanova, No. 7 James Madison, No. 11 Richmond and No. 22 New Hampshire.

Though UMass coach Kevin Morris isn't completely satisfied with his team's performance up to this point, he is glad to see them getting better week-by-week.

"For us, it's all been about just evolving as a squad and maturing as a team," Morris said in a teleconference earlier in the week. "Am I happy at this point? Yeah. We've played well enough to win games. We obviously didn't win the Michigan game, but had some good positives come out of that game."

The Minutemen will look to continue their strong play when they return to action for homecoming against Richmond on Oct. 16. The contest will mark the first of six-consecutive CAA matchups for UMass to close out the regular season.

Holmes earning praise

Following a career-game against Towson, linebacker Tyler Holmes garnered more national attention, building upon the recognition he received in the preseason.

In addition to being named the UMass Co-Athlete of the Week, the junior earned the FCS National Linebacker of the Week award and was added to the 2010 Buck Buchanan Award Watch List. The honor is awarded to the top FCS defensive player and will be announced at the national awards banquet on Jan. 6 in Frisco, Texas.

Against the Tigers, Holmes recorded a career-high 18 tackles, including three for losses, while adding a sack to lead the Minutemen defense.

"Another great job by Tyler and he's the leader of our defense and he's playing that way throughout the season and the first five games, whether he's catching tipped balls for interceptions," Morris said. "Tyler's just being Tyler and having a lot of fun playing great football and again, we're certainly relying on him to do that."

So far this season, the Blacksburg, Va. native is averaging just over 10 tackles per game, ranking him second in the CAA with 51 total tackles. Holmes is also the only linebacker tied with the conference lead in interceptions with three.

Securing the ball

Coming into the year, Morris emphasized the need to hold on to the ball and control the possession.

"As we've talked about in the preseason, based on our issues from last year, 2009 and 2010, we've been all about the ball," Morris said. "That's been our focal point with everything that we do. Still the ball is going to pop loose and we just have to continue to focus on it and get better with it because that will cost us and it almost did on [Saturday], but the kids fought back and overcame it."

Last season, UMass had a poor turnover margin at minus 11, second to last in the CAA only ahead of Towson. Through five games this year, the Minutemen are once again only ahead of the Tigers in the turnover margin at minus two.

Quarterback Kyle Havens hasn't been as big of a detriment to the margin with three interceptions, compared to a total of 15 in 2009.

Regardless, UMass will try to improve retaining the possession in its final six games, including fixing a conference-worst five fumbles lost.

Party foul: 3 UWis students fined over $86,000 following massive house party

MILWAUKEE JOURNAL SENTINEL
MCT

MADISON, Wis. – It must have been some party.

Madison's city attorney's office has slapped three University of Wisconsin-Madison students with fines totaling more than $86,000 – that's about $28,000 apiece - for hosting a house party last month that led to more than 130 citations, Madison police said Tuesday.

To put that in some context, attending UW-Madison for a year and paying for housing and other expenses costs about $21,600.

Travis W. Ludy, 21, Mitchell J. Klatt, 20, and Kevin J. Tracy, 20, were each cited with one count of dispensing alcohol without a permit, 21 counts of procuring alcohol for an underage person and 21 counts of adult encouraging underage alcohol consumption. The students also could face discipline from the university.

Madison Police Officer Brian Chaney, who was involved in breaking up the party at a two-story brick house, said officers were more concerned about safety than racking up fines. The problem was that the hosts didn't work with the officers.

The three students were charging most party-goers $5 per cup to get in and get drinks from half-barrels, according to police. Many of the attendees were freshmen in just the second weekend of classes.

When police arrived and saw 200 to 300 students milling around the house with plastic cups, they knocked on the door. Those inside immediately stopped the music, locked the door and hushed themselves, Chaney said.

Officers wanted the hosts to come out and give them permission to search the home, Chaney said. That way, they could check whether students inside were incapacitated. They have found in the past that house parties can get so big that the hosts can't keep track of the guests.

Chaney said it took awhile before students decided "it wasn't worth it to barricade themselves in the house with their hosts."

When the hosts still didn't identify themselves, the officers started counting suspected underage drinkers. They stopped once the hosts came forward and were cooperative.

In an interview Tuesday Ludy said the party started as a pregame celebration before the Badgers game Sept. 11 against San Jose State University, "with a bunch of old guys we sell our parking to."

"It's all like 40- or 50-year-olds with their families," Ludy said.

The nighttime party started out with two kegs of beer and was the first big party the roommates had, he said.

"More kids just kept coming and coming, even after we started kicking them out," he said.

"It just got pretty out of hand."

Ludy said the partyers who were kicked out began milling around the parking lot, refusing to leave.

He said once the three found out "by word of mouth" that police had arrived, "it was just 'what do we do? What do we do?'"

"And then the cops came and busted all of us," he said.

Ludy said the three are hoping to get their fines reduced, because "none of us have anywhere near that kind of money."

"I would probably go to jail, to be honest," he said. "I don't have anywhere near that, and my parents aren't rich. I don't know what they do to people who can't pay their fines, but I'm guessing it's nothing good."

A neighbor, Spencer Evenson, a 20-year-old junior from Wayzata, Minn., said the fines are "absolutely unbelievable" and that partying is a way of life in the neighborhood.

"It's a college town, it happens," Evenson said.

"I don't know how you could ever charge somebody $86,000 for having people over."

Marci Paulsen, who handles most house party cases for Madison's city attorney's office, noted that the fines are the maximum that the hosts of this party might have to pay. The hosts might negotiate a lesser amount with her office.

The party is the only one with major fines so far this year, Paulsen said, adding there were only one or two such parties last year.

Authorities in Madison said they've been trying to crack down on large house parties because they worry uncontrolled revelry could lead to sexual assaults, batteries, thefts and damaged property, as well as alcohol poisoning.

Chaney said officers have been pushing residents to limit the size of any party and to make sure they know those attending parties they host.

There is a benefit for hosts who cooperate Chaney said officers on his Community Police Team broke up another house party on the same night about a block away from the kegger. The hosts at that party worked with police – and were only issued about $5,000 in tickets, he said.

"They get some sort of citation," he said, "but nothing in comparison with the parties that are uncooperative."

For Tracy, who didn't want to comment Tuesday on the Sept. 11 party fiasco, the incident was another chapter in an already well-chronicled college career. Tracy was featured on the MTV series "College Life," in which eight UW-Madison freshmen and sophomores were equipped with cameras to document their lives on the Madison campus.

Laws permit insects in our food

THE UNIVERSITY DAILY KANSAN
CAMPUS NEWS NETWORK

After Sara Hawes saw an ant crawl into her backpack, she quickly began to rifle through its contents in search of the tiny insect.

It seems likely that Hawes would express similar disgust upon hearing that the U.S. Food and Drug Administration allows an average of 30 fly eggs or two or more maggots per 100 grams of ketchup. "Bugs in general just gross me out," says Hawes, Paola, freshman. But, "If I can't see its tiny little legs in it, it's not a problem," she says.

The FDA regulates the number of "unavoidable defects," like insects, in manufactured foods. Peanut butter, for instance, can have up to 30 insect fragments per 100 grams. Once the contents breach the standard level, they are considered "adulterated" and are subject to government action.

"The question is not do we ban insects in food, but what level is safe," says Ira Allen, a press officer for the Center for Food Safety and Applied Nutrition. "Things made with wheat, for instance, are bound to have a certain level of insects in them because wheat grows in fields and insects live in fields," he says.

Allen says it took years of consultation with industry leaders and scientific academics to develop standards at which insects can be consumed or exterminated safely.

Philip Nixon, an entomologist at the University of Illinois, says there may be an "ew" factor in our society regarding bugs, but they are perfectly safe to consume.

COURTESY WIKIMEDIA COMMONS

Many consumers in the United States are unaware that federal laws allow unpleasant creatures, such as these maggots, to be present in many packaged foods.

Science fiction & nuclear fusion: UM grad student unveils exhibit

Explores roots of sci-fi atomic era

BY WILLIAM PERKINS
COLLEGIAN STAFF

Morgan Hubbard has been a science fiction fan for quite sometime.

"I've always loved science fiction," said Hubbard, a second-year graduate student of history at the University of Massachusetts.

In an effort to combine his admiration for the sci-fi genre and his studies in history together, Hubbard has designed a new exhibit at the W.E.B. Du Bois Library that takes a stirring look at sci-fi, and how it was influenced by one of the most significant aspects of the last century.

This exhibit, entitled "Uncertain Futures: Americans and Science Fiction in the Early Cold War Era" traces the role that the world's events of the era played in sci-fi publications.

Keystone events of the Cold War "really changed the genre," Hubbard said of the evolution of sci-fi publications.

Starting with the first detonation of the atomic bomb in 1945, Hubbard's exhibit displays how increased tensions in the nuclear era influenced elements of the stories that many Americans were reading in sci-fi themed magazines and books.

"The Cold War really began in 1945, and was a crucial backdrop to the beginnings of science fiction," Hubbard said, noting that his exhibit offers a relatively loose interpretation of the Cold War, starting with the bombings of Hiroshima and Nagasaki at the end of World War II, and continuing with heightened anxiety between the United States and the Soviet Union.

Through numerous magazines, books and photographs, the exhibit shows how many sci-fi stories and artwork were seemingly impacted by the events and stories that were making headlines across the globe. From stories on the effects of a nuclear fallout to pieces inspired by the space race between the United States and Soviet Union, the works by sci-fi authors seemed to mimic the fears and apprehensions that many Americans had during that tumultuous time.

Hubbard conceded that no direct links between specific world events and sci-fi stories are on record, but he still has a hunch that many stories were inspired by the major global occurrences of the era.

"It's always hard to draw direct casual links between the real world and fiction," said Hubbard, who was inspired to complete the exhibit after writing a paper for a graduate public history course at U Mass.

According to Hubbard, many sci-fi links during the Cold War era popped up right here at U Mass, due in part to funding and lobbying by the U Mass Science Fiction Society – a major contributor of documents and pieces in his exhibit.

Sci-fi authors and editors such as Isaac Asimov and John Campbell can be seen speaking at U Mass in a collection of photographs that Hubbard compiled for his exhibit. Most of the events that famed sci-fi figures spoke at, Hubbard said, were put on by the Science Fiction Society, an organization that traces its roots at U Mass back to the 1960s, and is still active in many ways today.

"You can't really talk about sci-fi without talking about the local part, which is where the UMass Science Fiction Society comes in," Hubbard said.

Additionally, something that is often overlooked is that sci-fi was really ignited on a small scale by people in local communities who would get in contact with each other, according to Hubbard.

"Science fiction is a story based on local people and local histories," Hubbard said, noting that some sci-fi publications would print the addresses of people who would submit feedback so that others in their area could get in contact with them and form sci-fi themed fan clubs.

Hubbard also added that even though publications during the era seemingly had similar themes, they were still as eclectic as many fiction-based publications are today.

"People tend to think of science fiction as being monolithic," Hubbard said. "But there were different audiences for different sci-fi magazines."

And besides the apparent connections between the Cold War and sci-fi stories, Hubbard said that another thing he feels revolutionized the market is the spike in sales of sci-fi books in the 1950s. He attributes the spike to a wider accessibility of cheap, paperback editions of stories.

Hubbard also said that one thing that he took most out of his research from the exhibit is how many parallels seemingly existed between historical stories and real events. He'd like exhibit-goers to take that out of the displays as well.

"I'd like people to think about the link between fiction and reality," he said.

Hubbard's exhibit can be seen at Mirror through Friday from 10 a.m. to 4 p.m. on the 25th floor of the Du Bois Library through Oct. 31. Hubbard has also created an interactive Web exhibit on the library's website.

The high price of classism

Victoria Knobloch

The idea that the University of Massachusetts Amherst is an inferior institution is not a new one; our "zoo-mass" and "safety school" reputation has been prevalent since my father was here in the '70s.

Often the argument against our school is based on the idea that only students who are not intelligent enough to be accepted to other schools would ever consider coming here.

The now infamous Boston Globe article that ran in September featured a student who opted out of UMass, despite the discount price, because she was smart enough, the article implied. Many others have critiqued this article, pointing out the abundance of redeeming features available to us at this lovely school, but it seems that no one is talking about the classism hidden in this type of thinking about public education.

Saying that only students who don't get in anywhere better come to UMass erases students who cannot afford to go anywhere better.

The price of UMass is probably it's best selling point comparatively, but even for in-state students it is still a large sum of money to pay for higher education. Our reputation frames us as not smart enough and not sober enough to make it anywhere else, as if elite private institutions are free from belligerent morons who are only there because their guardians can afford it.

There is nothing wrong with having your parents pay for your education, and there are many students at private institutions that through scholarships, loans and their own salaries are managing to pay their own way. But to say that students who can get in to more elite schools always go there instead of UMass is ignoring that college, even with scholarships and loans, is outrageously expensive and for many young people and their families, a financial impossibility. The ability to go to college at all is an advantage; having the choice to avoid public education in Massachusetts is a privilege.

> The message hidden behind the claim that UMass is not a place full of intellectual rigor and incredible opportunity is classist at heart.

The message hidden behind the claim that UMass is not a place full of intellectual rigor and incredible opportunity is classist at heart. By making those who cannot afford any other school invisible, we equate them with those who cannot meet the intellectual standards of a "better" school. When someone says that UMass is not good enough it will always be followed with UMass does not have enough money, we're stupid, we're drunks, and we're poor. This representation is elitist and irresponsible and ultimately lazy.

Its a much easier sell to talk about the pretty blond girl featured in the Globe article, who looks down on UMass because her parents can send her elsewhere than it is to talk about the many brilliant students here who are suffering because of increased budget cuts due to a state government and taxpayers who don't care about us. There is a fear of accusing the state government of failure, and yet it runs rampant in every state funded project, from the Big Dig, to the new greenway, to the tiny, isolated ICA — an incredible missed opportunity.

But even more difficult is to accuse the privileged people of Massachusetts of apathy. But such stories would be , a word I would not use to describe the Boston Globe. It seems like even a human-interest piece would be a step in the right direction that is not being taken.

I've never seen front page coverage about a student at community college that is making it work, or a young person who can't go to school because they have to work full time to support his or her self. If these people were smart enough, if we were all smart enough, we wouldn't be in this situation, right?

While there are all kinds of blame to hand around for why our school suffers financially while other public institutions flourish, articles like that in the Globe perpetuate a classist attitude that is seen across the state in every vote against more money for public education. UMass is an institution full of problems on every level; there is no ignoring it. But if the media continues to highlight the upper class views of UMass instead of featuring the stories of students who are making every overpriced day of their higher education count, attitudes towards our school will never change.

Perpetuating the myth of lower class inferiority will mean less money coming in from donors who wish to support an excellent university and will scare away students who could be great assets to our community, but instead are given the opportunity to attend some place else. A higher education, no matter the place, is an incredible opportunity at an often-crippling cost.

Only when we acknowledge our classist attitudes can we begin to repair our public education system, making state school an appealing and attainable option for everyone.

Victoria Knobloch is a Collegian columnist and can be reached at vknobloc@student.umass.edu.

"He who has gold makes and accomplishes whatever he wishes in the world and finally uses it to send souls to paradise."

- Christopher Columbus

POINT-COUNTER-POINT

"I disapprove of what you say, but I will defend to the death your right to say it." - Evelyn Beatrice Hall

Reigning: Cats or dogs?

The cat's meow

Alison Bowler

Are cats really all that and a ball of string? Today, there are more cats with homes than dogs in the United States. Approximately 93.6 million individuals that own cats live in the U.S. according to the Humane Society of the U.S.. Clearly, there are many that agree that quite frankly, cats rule.

Health-wise, cats are more controlled population-wise and are cheaper per year to keep as pets. There are more neutered cats (a majority of 87 percent) than neutered dogs in the U.S., according to the Humane Society. Cat owners spend an average of $203 a year on veterinary care, while dog owners spend slightly more each year. Not to mention the fact that cats take significantly less time to provide basic care on the daily basis. Cats are trained by their mothers to use a litter box properly, and often require minimal assistance in reinforcing this taught behavior. There are no accidents, newspapers spread over your favorite rug, or presents on the front lawn to worry about. As well, cats don't need to be walked, which cuts a significant amount of time off of the total needed to care for a cat.

> More than anything care-related, cats can be wonderful companions.

As easy to care for animals, they clean themselves, meaning there is no hassle in trying to figure out how to fit them into the bathtub or shaking all over your new bath towels. Of course, while cats can be trained to stand a bath on a consistent basis, this is a choice the owner can make. Cats can be either indoor or outdoor, making them versatile to different environments as highly independent animals.

More than anything care-related, cats can be wonderful companions. They can be soft, warm, and friendly, curling up next to your feet on cold winter nights and sitting next to you thoughtfully as you read a book. They don't bark for strange reasons, they don't need to be let out in the middle of the night. There's no "wet cat" smell, nor is there a problem with having to walk your cat in the pouring rain or a blizzard twice a day.

For people who enjoy stress-free pet ownership, one where owner and pet live in perfect harmony, cats serve that purpose quite well. Cats often seem to "do their own thing," and while they might not jump up and lick your face when you come into the house after a long, stressful day, that isn't necessarily a bad thing; especially the licking part.

Small and agile, a cat will never grow to 80 pounds, and their ability to be swift helps them maneuver better around household objects. This is of course not to say that a cat can do no damage around a house, but in many ways the damage done can be seen as far less devastating in terms of size.

For those who enjoy pets that work hard, cats are skilled hunters that are very capable of catching unwanted household vermin. They have the power to keep unwanted things out and as a result do not need training to serve an important job. They don't mistake people for food, and they are very accurate when it comes to catching their prey.

Outdoor cats live more solitary lives, yet they can still come back to the house to be affectionate. Cats don't beg at the table after a long day and won't bark demanding for food. They eat their food cleanly without chewing and food flying all around, and they aren't nearly as prone to food aggression. In terms of playfulness, cats enjoy chasing small objects and batting at string. They can be entertained easily.

Choosing a cat as a pet for a family or for only one person is a smart decision, simply because it does not put a constraint on your time. This means that busy families or a busy person doesn't have to worry about finding their couch chewed up or their favorite shoes, and their pet will still be there when they get home from work or school.

To put it quite simply, for tranquility and ease in having a companion, cats really are a person's best friend. Whether they are protecting the house from mice or curled up against you on a cold winter's night, cats never cease to be anything but themselves.

Alison Bowler is a Collegian columnist and can be reached at abowler@student.umass.edu.

Man's best friend

Dave Coffey

Is there any creature nobler than man's best friend? Dogs have earned that nickname for thousands of years. Many people do not realize that humans have been domesticating Canis lupus familiaris for over 100 centuries. That is not a typo; dogs and humans have been interacting in a domesticated fashion for more than five millennia. Dogs have extended nearly undying loyalty and friendship to their human counterparts throughout this time period.

Look anywhere in time and one can see dogs aiding and accompanying humanity in some way. In ancient Rome and Greece, dogs were used to aid in hunting. When humans migrated from Siberia to North American across the Bering Strait, many experts suggest they used sled dogs to aid in transportation. Australian Aborigines made great use of dogs as camp companions because they improved sanitation (cleaned up human waste and spare food scraps), alerted the camp of predators or strangers and even slept with humans in order to provide warmth at night.

> "Man's best friend" may be a cliché, but it is such for a good reason.

Today, domesticated dogs obviously still play a large part in the lives of humankind. Besides earning near-familial status in many households across the world, they fulfill dozens of other uses as well. In addition to their historical roles as aids in hunting, herding and protection, canines today assist handicapped individuals as Seeing Eye dogs, aid police forces in detecting explosives and drugs and help search and rescue officials save and recover endangered individuals.

Of course, these countless roles pale in comparison to perhaps the most notable attribute of our canine friends: Companionship. "Man's best friend" may be a cliché, but it is such for a good reason. Coming home to a darkened and empty house only to be greeted eagerly at the door by your faithful canine companion is an underappreciated luxury that only dog owners can enjoy. The friendship between dogs and humans is countless generations old; it's just hardwired into our systems by now.

There have been numerous examples of dogs' undying friendship toward their owners in recent recorded history. In June of 2010, a farmer in Alburnett, Iowa was suddenly attacked by one of his 2,300-pound bulls. The animal threw the farmer into the air, and he lay defenseless on the ground. At that moment, the farmer's 35-pound dog approached the bull, attacking the larger animal until it actually went down.

That's right, a 35-pound dog stood up to and saved his owner from a one-ton, angry animal. Another example lies in a Diabetes patient from Michigan. The man, who had an infected big toe due to his type II diabetes, came home in a drunken stupor one night. After he laid down, his dog, Kiko, bit off the infected digit. Doctors later said this action actually saved his life, since the infection was a seriously dangerous. At the drop of a hat, a dog will defend its owner, or even a person whom the dog has never met before, as it there is no other alternative.

Then, of course, there are cats. The comparison is seemingly undeniable. As the two most popular choices for modern domesticated pets, the question of which is better will always arise. On one hand, you have an intelligent, loyal and courageous being that has been befriending us, defending us and working with us for thousands of years. And then you've got cats. It's hard to describe what it is that cats do for humans because, let's face it: When was the last time you saw a cat do anything?

If one were to embrace a cat in friendship the way a dog instinctively does to a human, you'd get one of two reactions. One is that the cat continues to do nothing, save for put on that face that seems to whisper, "What makes you think you can touch me, human scum?" The other is at the slightest physical contact, the cat will latch onto your most exposed extremity with its claws and silently chuckle to itself over the fact that it gets to do this to you and get fed later.

Is there any real comparison here? Dogs have been laying down their lives for us nearly since the dawn of human civilization. The closest thing a cat has ever done to help a human hunt is leaving a dead bird half-chewed on your front porch. The choice is yours.

School for the Dead

Ingrid rolls into Noho

By Lindsey Davis
Collegian Staff

Once upon a time, a sculptor and classical composer fell in love and created today's leading indie-pop princess that has dominated the music world with her clever lyrics and whimsical instrumentals. That princess is Ingrid Michaelson, and she is returning to Northampton this weekend.

The 30-year-old singer dawns a geek chic style with her signature rimmed glasses and her sound that fuses an eclectic range of instruments from piano to ukulele. Her quirky lyrics embody every aspect of a college girl's diary — writing of fuzzy love, love gone wrong, and learning from mistakes — but is laced with a youthful sense of humor. As indie as her soul may be, Michaelson has been known to do live covers of songs by mainstream pop royalties including Britney Spears, Lady Gaga and Vanilla Ice.

In an interview with the Daily Hampshire Gazette in June, Ingrid explained what makes her concerts special.

"Every show has been so fun for different reasons. We have dance moves; we're always doing silly things," she said. "We are having a lot of fun. It's part of something bigger than people watching us play. My music can stand alone, but why not have fun? At the end of the day, I pour my heart into my performances."

But Michaelson did not start her performance career as a musician.

Despite her extensive musical training since age 4, Michaelson dreamt of being an actress and received a theater degree at Binghamton University.

She traveled the country as a member of a theater troupe and worked for a children's theater group in New York. It was not until after college that she dabbled in writing songs.

"I had not a thought in my head to be a musician," she told the Gazette. "Then I started to write music and it was like something clicked. It was kind of like coming home. I discovered this is way more fun [than theater]."

As a fresh musical talent, the Staten Island native kicked off her music career in 2006 when she released the charming "Girls and Boys" album on her own label, Cabin 24 Records, which gained her celebrity status on Myspace.com. The album nailed her a national songwriting award and attracted the attention of major television networks.

Her songs have climbed the charts while being featured on television soundtracks for shows such as "Grey's Anatomy," "Ugly Betty" and "One Tree Hill." Even her future hit "The Way I Am" made it's way into Old Navy's 2007 commercial campaign. The songstress was instantly dubbed an artist "You Oughta Know" by VH1, being the first unsigned artist to earn the honor.

She continued playing small venues such as The Hotel Café, home to alternative independent pop shows that have featured artists such as Imogen Heap, KT Tunstall, and Lenka. In 2008, Michaelson collaborated with Sara Bareilles on "Winter Song," a haunting melody set as the opening track on The Hotel Cafe's "Winter Songs" compilation album to benefit Susan G. Komen for the Cure. She also donated a portion of the proceeds from her "Be Ok" album to cancer research.

Despite all the success of the past three years, Michaelson has further to go. Only a few shows on her headlining tour have sold out, but Michaelson tweeted her excitement, "Portland and DC sold out now! Who are all you people? I remember when my parents were the only people at my shows?"

Michaelson is no stranger to Northampton. She kicked off a tour in October 2007 with the Iron Horse Music Hall and joined Feist at Smith College in 2008. This year, she has already played two shows in the city in March with Eric Hutchinson and June.

This Columbus Day weekend, Ingrid Michaelson will perform at the Calvin Theater in Northampton on October 10 at 8 p.m. Tickets are $20.00 and $30.00. Dublin-grown, alternative folk band Guggenheim Grotto will open.

Lindsey Davis can be reached at lmdavis@student.umass.edu.

Trampling Pearl St.

By Andrew Cogan
Collegian Staff

Any fans of experimental music must find a way to be at Pearl Street this Saturday night at 9 p.m. Seminal avant-garde pop band, Deerhoof, is coming to town, supported by their contemporaries, Xiu Xiu. Over the many years of their careers, both bands have distinguished themselves as artists intent on pushing the boundaries of popular music. The opening act is Father Murphy, an experimental trio that incorporates elements of Chinese traditional music. The combination of these three bands on the same stage is something you don't want to miss.

If you haven't heard of Deerhoof, chances are that you've at least heard of the many bands they've influenced: Sleigh Bells, Dirty Projectors, Of Montreal, The Flaming Lips and Sufjan Stevens, just to name a few. After many years of obscurity, Deerhoof is finally being recognized for their pioneering experimental pop, which contrasts hard-edged blasts of noise with infectiously sweet melodies.

Group founders, Greg Saunier and Rob Fisk, began performing under the name of Deerhoof in 1994 after their band Nitre Pit broke up, despite having shows still booked. The duo's noisy improvisational style developed in large part to the limitations of having only two members, and the time constraint brought on by the previously booked shows.

Since then, Deerhoof has been continually making music, albeit with a constantly evolving lineup of musicians. Fisk left the band in 1999, leaving Saunier as the only original member. A key addition to the band was vocalist, Satomi Matsuzaki, who joined the group despite having no prior musical experience. She has since taught herself to play bass and guitar, and her minimalist, child-like vocals are striking against the group's often loud, cacophonous instrumentation. On recent albums, she sings in both English and her native Japanese.

Deerhoof is currently a four-piece act. Saunier plays drums, with Matsuzaki on bass and vocals, and John Dieterich and Ed Rodriguez on guitar. All four members have creative input, and are not restricted to the instruments they play on stage.

As Deerhoof's line up has changed frequently over time, naturally so has their sound. The group has experimented with many different kinds of instrumentation and recording styles. In general, Deerhoof's records are self-produced, and recording is a low budget, do-it-yourself affair.

The band's first critical recognition came in 2002, when they released "Reveille" (Kill Rock Stars), which featured a polished, layered sound, made possible by the use of computer sampling techniques. The follow up, "Apple O" (Kill Rock Stars, 2003), saw a return to live recording that was more organic and guitar-based.

In 2004, Deerhoof released "Milk Man", another deviation for the band musically. The album featured lush orchestration put together with a piece-meal recording style; all the different instruments were recorded at separate times.

"The Runners Four" was another critical breakthrough for the band.

At 20 tracks, the album was far longer than anything the band had released previously. It also marked a return to live-production. The record placed number 6 on Pitchfork Media's best of 2006 albums list.

After releasing "Friend Opportunity" in 2007, Deerhoof released "Offend Maggie" (2008), the bands most recent album. It's also their first record with Rodriguez; the guitar interplay between Dieterich and him is one of its main focuses.

Deerhoof is now considered among the pioneers of the do-it-yourself ethos that has dominated independent music culture in the past decade. They have influenced countless bands, and have toured with the likes of Radiohead, Sonic Youth, Wilco, the Flaming Lips, and the Roots.

According to the bands website, they have recorded a new album over the summer, which is currently in the mixing stage.

The show is Saturday at 9 p.m. in the Pearl Street clubroom. Tickets are $13 in advance and $15 at the door.

Andrew Cogan can be reached at acogan@student.umass.edu.

'Neon

By Dave Coffey
Collegian Staff

Since 2007's independent release "Green," New York-based songstress Caitlin Canty has been offering up the bittersweet, but rare variety of acoustic folk pop that could make even the most callous barfly both weep and sing along in one three-minute tune. But her latest album, "Neon Streets," released in May 2010, is a first for Canty.

In addition to her masterful beyond-her-years songwriting and vulnerably pure voice, she has an ace up her sleeve on this record; or rather, five aces. As opposed to her prior recorded works, which solely featured Canty on acoustic guitar and vocals, Northampton string-rock quintet provides instrumental accompaniment on each of the seven tracks.

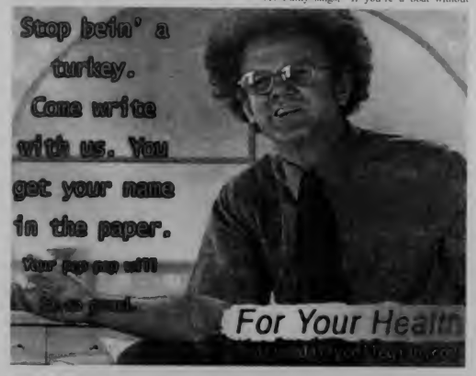
The result of this unique collaboration of the folksy singer-songwriter genre and classical-tinged acoustic rock is exactly what pop music should be like: compact, catchy and uber-melodic songs set against sparse but perfectly paced instrumental accompaniment. Every track is built upon the foundation of Canty's acoustic rhythm guitar and hook-laden vocal work, while Darlingside adds the final touch by way of varying layers of strings and percussion, depending on the song.

Basically an acoustic album in its entirety, "Neon Streets" most immediately endearing property is its sonically organic nature. Despite straddling the genres of folk, pop, country, blues and soft rock, the album never alienates the listener. One could easily lose him or herself in wistful tearjerkers such as "Shore" or "In The Way," and somehow immediately snap into the driving, percussive rhythm of country-blues rocker "Two Hands."

The sublimity of Canty's songs lies within the serene yet painful sincerity that pours out of every last verse. Thematically, the lyrics speak softly, but carry a big stick, so to speak. They are soft-spoken yet hard-hitting, evoking emotionally and physically visceral imagery out of a vulnerable backdrop. But while the subject matter tends to drift on the melancholy and meandering side of things, it never becomes weighed down with pointless and self-pitiful dreariness. Rather, there is a redeeming sense of purpose and carrying on amidst the trials and strife of everyday relationships.

A collaboration with local band Darlingside, Caitlin Canty's "Neon Streets" is almost perfect. The New York based artist released her secont album in May 2010. She is performing in Northampton on Oct. 20 at Sam's Pizzeria and Cafe.

As Canty sings, "If you're a boat without a shore, I will try to be your sun, but I burn too bright or not enough." Leading in the climactic key change of the bridge to "Shore," she highlights the main lyrical theme of Neon Streets; identifying, but not dwelling on, the sometimes deceptively devastating troubles and snags encountered every day, and, at the very least, a glance in the right direction.



The other half of Canty's immense talent as a singer-songwriter is of course her clear-as-day, sultry-as-night vocal stylings. While displaying a decent amount of range on the album, the moods on "Neon Streets" are perfectly set by Canty's frequent usage of her lower register, allowing for a sleepy, ethereal ambiance on most of the tracks. However, even when deep in her chest voice, she manages to make every line as purely melodic as the last. Her voice is unadulterated in that there is no overbearing raspy or twangy quality, but simply a resonance that rings through every track. The perfect dichotomy of her vocals ends up resonating in her songwriting: she has the uncanny ability to sound serenely soft and self-doubting yet immediate and hopeful to a fault at the same exact time. As a result, we are left with gems such as the opening track Halo, perhaps the strongest track on the album, in which Canty, both vocally and lyrically, confronts personal vulnerability with an undeniable independence and self-solidarity.

What makes the album really shine more than most others of its kind is the lush instrumental provided for each song by Darlingside. Unlike most rock quintets, the Noho residents are known for using various relatively eclectic instruments such as cello and mandolin. Tracks such as the aforementioned "Halo" and "Thin Moon" are lent extra depth in the form swelling and building movements of strings the likes of which are only heard in professional movie scores. As a result, Canty's already brilliant ballads and acoustic folk anthems are transformed into a truly atmospheric sonic experience that is paced to a tee.

Furthermore, several Darlingside members lend their voices for harmony vocals on some of the tracks. While getting male and female harmony vocals to sound just right is often a struggle, many of the songs, such as the title track have harmony lines that simply take the melodic choruses to another level. Even more impressive is the ever-so-hard-to-do-just-right element of percussion in mostly acoustic settings. Songs such as "Halo," "Thin Moon" and "Two Hands" are rhythmically driven by the slow and steady beat supplied by Darlingside drummer Sam Kapala, who manages to oversee this process without walking all over the mix, thus preserving the intimate nature of the songs.

Ultimately, "Neon Streets" exceeds as an excellent album of the singer-songwriter genre, because it walks the razor concerning all the aspects that make it so intimately organic for its dimension, and yet powerfully exotic for its genre. Production wise, the beauty in the songs is brought out in a shimmering texture, yet it never feels glossy or plastic. Darlingside's musical accompaniment, while never overbearing, provides a flourishing frame for Canty's creative talent. And last but certainly not least, Canty's songs are equal parts genuine melody and unrelenting emotion. She is endlessly reflective, sans the whining and delcatism, and it's this quality that constitutes the foundation of Neon Streets as an A- record.

Minutewomen set for tests in Ohio

GEOFF PARIS/COLLEGIAN

Freshman Brittany Moore kicks the ball up the field against Harvard on Sept. 26.

UM looking to contain Dayton

By David Martin
Collegian Staff

The Massachusetts women's soccer team will look to strengthen its Atlantic 10 record this weekend in Ohio as it prepares to face off against Xavier and Dayton.

The Minutewomen (4-7-0) will first square off against Xavier (5-6-0) on Friday evening for their third game in conference play this season. UMass looks to continue its success after a strong 1-0 win against Saint Louis this past weekend.

The Musketeers, who are also 1-0 in conference play this season, are trying to start up a roll of their own after losing three of their last four matches in the shootout. They have, however, proven that they are not a team to be taken lightly, as their 4-1 win over La Salle indicates.

The team also has an ace in the hole with goalkeeper Jennifer Perri, who is just in her sophomore season, has played in all 11 games on the season and holds a 1.19 goals-against average along with an .800 save percentage, making her one of the best goalkeepers in the A-10.

She will have to face tough competition in the Minutewomen, whose revamped offense is led by Deanna Colarossi's five goals and Therese Smith's 38 shots.

Unfortunately for the Maroon and White, the weekend road trip does not get easier once it enters Flyer territory.

Dayton (10-2-0) is sporting the best record in the A-10, outscoring its opponents, 23-6, and outshooting them, 208-116. Its biggest offensive threat lies in Colleen Williams, who has 27 points off of 11 goals and five assists.

The Flyers also have five other shooters with at least five points or more to their names, making them the most offensively potent team the Minutewomen will yet face.

The only two losses they have suffered this year have come at the hands of non-conference opponents, Colorado College and Ohio State, and both were closely-played 1-0 losses.

"We have a tough weekend ahead of us," UMass coach Ed Matz said. "We just have to go out and keep ourselves composed and confident. We ended last weekend well with the shutout win, and we are going to try to carry it over into next weekend. Our goal is to get at least three points out of the weekend, but we will play to win both games."

One of the big question marks for this weekend is whether or not freshman goalkeeper Emersyn Pullan will again be called upon to play for injured starter Emily Cota. The sophomore has not played since suffering a collision with an opposing player in the team's loss to Harvard three games ago.

Pullan has picked up nicely in Cota's absence, allowing only two goals in just over 220 minutes. She has a 1-1 record thus far with nine saves, a .818 save percentage, and one shutout.

Chance for redemption awaits

Koch looking for improved results

By Steve Levine
Collegian Staff

A chance for redemption awaits the Massachusetts men's soccer team on Friday, when it will attempt to avenge its frustrating non-conference schedule with a win against Xavier to open conference play.

UMass' first game of the season came on Sept. 1, when it tied Boston University, 1-1. The Minutemen went on to tie four of their next eight games while only winning one.

A key reason for UMass' 1-3-5 record was its difficult schedule. During the non-conference slate, the Minutemen welcomed two nationally-ranked teams in Harvard and Indiana to Rudd Field. Both games were very close, but UMass ultimately lost both by one goal. In fact, the Minutemen were not outscored by more than one goal during the non-conference schedule.

UMass regrets not having some of its ties go for wins, considering it had ample scoring opportunities to win games in overtime. It seemed for a while that the Maroon and White could not catch a break, from shots hitting posts and crossbars, to bad deflections and even shots that crept along their opponents' goal line.

Still, UMass coach Sam Koch knows it could have gone better.

"[The non-conference schedule] was not as good as we hoped," Koch said. "We played a tough schedule. Certainly it has showed us what our strengths are and what our weaknesses are. As far as being able to learn from it, we certainly have. And now we'll see if we have been able to learn enough when we go into our game on Friday."

Strong defense and transition offense has been a staple throughout UMass' impressive soccer history. In 2007, when the Minutemen made it to the NCAA semifinals, it was no different.

Although UMass only gave up more than two goals once during the preseason, the defense was shaky at times, which almost always came back to haunt the Minutemen.

Heading into conference play, UMass needs its defense to return to form and its offense to finish on quality scoring chances.

"There are obviously things we need to be aware of, but more than anything else we have to control the ball, we have to play the line well together, we have to make sure that we are supporting each other in the attack and we move the ball quickly," Koch said. "And I think if they do that, it will create chances that hopefully will do a better job finishing than we have in the first part of the season."

Most signs point to UMass turning things around. Christ Pickos has played well in net, registering a 1.08 goals-against average and .824 save percentage in seven starts. Bryant Craft is stepping up as the go-to goal-scorer as the team leader for tallies (four). With five assists, midfielder Ben Arikian continues to make plays and climb UMass' all-time assists ladder. Even new Minutemen have joined the attack, with rookies Tyler Cleverdon and Brett Canepa joining the score sheet and logging important minutes.

But even with all these pluses, UMass still cannot score enough. In nine games, the Minutemen have 11 goals. Moving forward into conference play, UMass will relay on secondary scoring on top of finishing good scoring opportunities.

Minutemen to take on Xavier, Dayton

By Herb Scribner
Collegian Staff

It's about that time again.

The Massachusetts men's soccer team opens up conference play when it takes on Xavier this afternoon.

"Everybody is 0-0 going into this game," UMass coach Sam Koch said. "It's the opener. It's the most important game of our season because it's the next one we're playing."

Both the Minutemen (1-3-5) and the Musketeers (3-2-3) enter today's affair with confidence boosters. While UMass has an edge on XU historically, the Musketeers are riding a four-game unbeaten streak and are ranked 10th in the NCAA Mid-Atlantic Regional Rankings.

"We're not really worried about them, we're more concerned about how we're going to play," Koch said.

Xavier comes into the game on a four-game unbeaten streak, including its most recent victories over IUPUI (1-0) and Alabama A&M (3-2). The streak started with a 1-0 win over Lipscomb, followed by a 0-0 draw against Cincinnati.

I expect the match between the Musketeers and the Minutemen to be highly defensive, as XU has allowed four goals over its first eight games. Leading the way for the Musketeers on the backline is Justin Jarvis, James Queree and Sean Ryan who all have about 700 minutes played this season.

"They're very good defensively, we know that," Koch said. "They've got two very good center backs, so putting balls in the air in the center of the field is not going to be very productive."

UMass is no stranger to defensive battles, as six of its opening nine games have been pushed into extra time. The Minutemen have allowed no more than one goal in four of its opening matches, with three of them resulting in draws.

Conversely, both the Musketeers and the Minutemen have suffered from the same problems on the offensive side of the pitch. XU has scored five goals off of 87 shots (29 shots on goal), which gives them a .057 shot percentage. Similarly, UMass has struggled scoring goals, putting away 11-of-113 shots (43 on goal), giving it a .097 shot percentage.

"We got to attack their weaknesses and stay away from their strengths," Koch said. "We know that they will get back as a team quickly and so we have to, if we're going to counter on them, we have to do it quicker than they can get back. We have to be able to keep our patience and make sure that we do what we need to do as a team to maintain our discipline and keep our shape.

A key match between the two sides actually comes from completely opposite sides of the field as goalkeepers Chris Pickos and Justin Marshall will both look to impress between the posts.

Pickos stands tall with 42 saves and a .824 save percentage, despite allowing nine goals over the course of the season and not earning a win.

Marshall, meanwhile, has allowed three goals with 29 saves giving him a .906 save percentage. Furthermore, Marshall has five shutouts on the year while Pickos has one against Fairfield.

"He's done a very good job, we know we're going to have to create a number of chances to get one by him, and that's what we plan on doing," Koch said on Marshall. "He's been very good for them, he's a solid keeper. Now we're in the Atlantic 10 and now we'll see how he does against Atlantic 10 competition. He's solid, we know we have to play well to beat him."

In 2009, the Minutemen conquered the Musketeers, 1-0, thanks to a header by defender Andrew Henshaw. The junior will not only return to Rudd Field to face XU, but he already has a goal to his name after a low-corner shot which gave UMass a short-lived edge against Vermont earlier in the season.

The season-opener for the Maroon and White will be its eighth game at Rudd Field. Sunday's game against Dayton will be UMass' final contest of its eight-game home stretch.

Minutewomen host winless Saint Louis

Sowry hoping to build off win

By Michael Wood
Collegian Staff

After an emotional 2-0 victory over nationally ranked Syracuse last weekend, the focus of the Massachusetts women's soccer team is set to do a complete 180 degree turn as it matches up against winless Saint Louis.

The win against the Orange marked the second time this season the Minutewomen have defeated a Top 10 team, and the second time they have defeated a team in the Big East conference, a perennial field hockey powerhouse.

Many teams will experience such a huge win, and the "hangover" or emotions from the game will filter through practice and into the following week's game. UMass coach Justine Sowry said her team has the ability to play with the best in the nation, but is taking special care to stay consistent on a week-to-week basis.

"We have the ability to play with the best when everything is perfect," Sowry said. "But then the next game we lack that consistency. I think that's from how young and inexperienced our team is. Our senior leadership has provided consistency with certain performances but its getting freshman and those playing a lot of minutes consistency within the structure."

Despite her team's impressive performance against Syracuse last week, Sowry said the squad is taking one game at a time and trying to focus on perfecting the minor details of play in order to stay strong against a 0-12 Billiken team.

"We're not even looking at Saint Louis' record," Sowry said. "I think there were times last year where we didn't refocus for the A-10 competition and went into the weekend not focused on the task at hand. Our job is to come together and be strong in the Atlantic 10 and win that. We're just going to take one game at a time."

After a disappointing loss in the semifinals of the A-10 tournament last year, UMass is taking no chances this time around. Sowry said her team is taking things slow and trying to be methodical in its approach. The most important games of the season, in terms of advancing to national playoffs, come against teams from the A-10, and Sowry says she is not looking past the week's opponent.

"What we're trying to do is learn lessons from previous years," Sowry said. "We looked ahead last year and it hurt us because we didn't take that opening weekend seriously. We were put in a difficult place. This year we are literally thinking one game at a time, and the rest will take care of itself."

Slightly more than halfway through the 2010 season, the Minutewomen stand 5-6 overall and play six of their last seven games against A-10 opponents. Sowry said that aside from the three seniors (Katie Kelly, Makaela Potts, Jamie Bourracris) and goalkeeper Alesha Widdall, she has been tremendously pleased with the entire team's effort throughout the season. She highlighted a few players she has taken particular notice of, but stressed that each player has contributed in some shape or form each week.

"In any game that we've played there has been someone who's stood out," Sowry said. "I'm pretty happy overall with many of them. If we're talking about the amount of minutes and consistency there are players like Hannah Prince who has played nearly every minute and I think that's pretty impressive as a freshman to be a defender. I think Alexa Sikaitis has performed exceptionally against good opponents. Then at various times we've had solid performances from the freshman on the forward lines as well."

Sowry also noted two key returners from last season who have used their experience and knowledge to help the team this year.

"There are two [players], one of which would have to be Nicole Cordero on the forward line," Sowry said. "I think she's really stepped it up a notch with her leadership, her work ethic and the punch she's been able to provide. And somewhat of an unsung hero has been Nikki Pasicnicco. She stepped up as our starting center midfielder and has played against some of the best players in the country and has done a great job. It's critical that she performs tough everyday and she's been able to do that for us."

The Minutewomen will begin A-10 play against the Billikens at 6:00 p.m., Oct. 9 at Garber field.

Stephen Colbert is blurring the lines between fake pundit and national icon with his recent announcement that he will be holding a "March to Keep Fear Alive" Oct. 30 on the National Mall in Washington D.C.

He hopes his march will be a "counter rally," to Jon Stewart's "Rally to Restore Sanity," set to take place in Washington on the same day.

Colbert elaborated on the motivations behind his march and what he truly fears in a teleconference last Friday, taking questions from student journalists from across the nation, including the University of Massachusetts, Columbia, Yale and Rutgers.

Colbert began the teleconference at 3:37 p.m., telling the mediator, a representative of Comedy Central, that he was, "ready to rock and roll."

The first question posed questioned why Americans should attend Colbert's rally over Stewart's.

"I don't think it's easy to get exited about sanity," quipped Colbert, claiming that the theme of his rally, fear, is much easier to get people riled up about.

Glenn Beck held a rally in Washington D.C. called, "Restoring Honor," in August. A student journalist pointed out similarities in the themes of Beck's rally and Colbert's and asked Colbert if he saw any parallels.

"Glenn Beck's [rally] I believe was a religious festival," said Colbert, who admitted he would not be reading passages from the Bible, as Beck did at his rally. Colbert claimed that Beck's idea of God was an angrier power, while his own understanding of God is a more soothing and calming one.

Colbert stated his main motivation for holding his march is to spite Jon Stewart, and said he sees no good coming from a rational, grounded American public.

"Rationality will get you the atomic bomb," said Colbert, who also claimed fear was the reason why the United States and Soviet Union didn't annihilate each other during the Cold War.

Colbert claimed the "fight or flight" response is the reason why the human race has survived for 200,000 years.

"People who were afraid of snakes survived," said Colbert, who furthered that those who didn't have the same fear didn't last long enough to make babies.

A student journalist from Georgetown University in Washington asked a question regarding the importance of the march relative to the mid-term elections, which will take place just four days later. Before answering the student's question, Colbert jokingly took a minute to tell the student journalist he used to have a girlfriend that went to Georgetown.

"She broke my heart," Colbert said.

On Oct. 30, television pundits Jon Stewart and Stephen Colbert will host opposing rallies in Washington D.C.

"I don't care about elections," he added. "I am just there to make sure people do not think rationally about who they vote for."

When asked about his biggest fear, Colbert gave an interesting response.

"Bears, gay immigrant bears, is that possible?" said Colbert. "I guess Canadian bears."

"[Stewart's] people might get dangerously reasonable," said Colbert, describing his fears about the attendees of the "Rally to Restore Sanity."

If Jon Stewart manages to bring more people to his rally, Colbert said he plans to "curl up in the fetal position."

Despite his stated opposition to Stewart's sanity-restoration efforts, Colbert cracked when a student journalist asked him why the two rallies should not be combined into one broader march.

Decision 2010: MA election overview

By Sam Butterfield
Collegian Staff

The November 2nd midterm elections are fast approaching, and this year, Massachusetts will see several fierce fights for various offices.

The governor's race features a tight three-way race pitting Democratic incumbent Deval Patrick against Republican challenger Charlie Baker and Independent Tim Cahill. Green-Rainbow candidate Jill Stein has also attracted some attention. In addition, nine of 10 Congressional races have at least two candidates running this year.

This will be the Collegian's first look at Massachusetts' electoral picture this year, with stories focusing on many of these races to come in the weeks leading up to the election.

Governor

The race for the Commonwealth's executive position is a very heated one this year, promising to be substantially closer and more tightly contested than the 2006 race, which saw current governor Deval Patrick trounce Republican opponent Kerry Healey by a margin of 55.6 to 35.3 percent. This year, four candidates are in the field, although two of them, Patrick and Republican opponent Charlie Baker, a former Massachusetts secretary of health and human services and later CEO of Harvard Pilgrim Health Care, have pulled to the top of the pack.

According to a Sept. 30 poll from Rasmussen Reports, Patrick maintains a slim lead over Baker, with 47 percent of a survey of 750 likely voters saying they would stick with Patrick, and 42 percent favoring Baker. In the Rasmussen survey, six percent of likely voters favored Cahill, while two percent supported another candidate and three percent said they were undecided.

The Rasmussen poll gives Patrick the other hand in other ways.

In the survey, 78 percent of Patrick supporters stated they were certain of how they will vote in the election, compared to 69 percent of Baker voters. Patrick also seems to hold the upper hand in favorability. 55 percent of likely voters viewed him favorably in the sample, with 43 percent holding an unfavorable view of him. This compares to 52 percent of voters having a favorable opinion of Baker and 40 percent viewing him unfavorably.

Some polls, though, have come to other conclusions.

A Sept. 26 poll conducted by the Boston Globe found that Baker was nearly even with Patrick. In the Globe survey of 522 Massachusetts citizens, Patrick clung to a 35 to 34 percent lead over Baker, while Cahill earned 11 percent, Stein claimed four, and 14 percent of voters remained undecided. Baker and Patrick are effectively even in the poll given its margin of error.

Further, the political climate seems to be favoring Baker. Registered Republicans appear much more charged about this electoral cycle than their Democratic counterparts, with 78 percent of Republicans telling the Globe they were excited about this election, compared to just 37 percent of likely Democratic voters.

Another issue Patrick will have to contend with is voters' opinion of the state's economy. In the Globe poll, 59 percent of the sample believed jobs and the economy were the most important issues this year. While Patrick and his campaign attempt to make the pitch that his administration has fortified the Bay State's economy, voters seem skeptical. Forty-one percent of respondents said they were worse off now than a year ago, with just 21 percent telling the Globe they are now better off. In addition, just 40 percent of likely voters said the state is going in the right direction, compared to 50 percent who indicated the Commonwealth is headed the wrong way.

In a state with a large contingent of unregistered voters, Patrick's standing with Independents is quite poor. The Globe survey found that only 24 percent of Independents view Patrick favorably, with 59 percent of that bracket viewing him unfavorably.

Although this year's election is different than many in years past with three major candidates on the ballot, it is not quite clear just how Tim Cahill may affect this election.

Among the 11 percent of voters supporting Cahill, Massachusetts' current treasurer, 39 percent listed Patrick as their second choice, with 35 percent saying they would instead choose Baker.

All of these factors certainly make the 2010 governor's race a toss-up.

Congressional Races

Nine of Massachusetts' 10 congressional districts have races featuring at least two candidates, with just one district, eight, featuring only one candidate. Locally, nine-term incumbent John Olver is squaring off against Republican Bill Gunn and Independent Michael Engel in District One. Slightly to the south, incumbent and University of Massachusetts faculty member Richard Neal is facing Republicans Jay Fleitman and Tom Wesley.

The first district, which includes all of Berkshire and Franklin counties and parts of Hampshire County, includes West Springfield, Amherst, Belchertown, Fitchburg, Leominster, Southampton, Westhampton and Williamsburg.

In 2008, Olver defeated Republican opponent Nathan Bech 72.8 to 27 percent.

Gunn, a Tea Party activist, is running on many of the platforms which have elevated the movement to national prominence, including what his website calls a "renewed reverence for the Constitution." Gunn also hopes to reduce the sales tax, as well as listing on

Volunteers work to beautify Holyoke's Land of Providence

By Nancy Pierce
Collegian Staff

Last Sunday volunteers from around the Pioneer Valley gathered at the Land of Providence in Holyoke, a 25-acre preserve maintained by the Trustees of Reservations, to help plant trees along the Connecticut River.

The effort was part of the 350.org 10.10.10 Global Work Party to raise international climate awareness. The tree planting was hosted by the Trustees of Reservations and funded by the Massachusetts Environmental Trust (MET). The volunteers worked to reach the goal of planting 100 saplings along the river. The project served as both a means of raising awareness about climate change and an attempt to restore the floodplain forest along the river.

The Trustees of Reservations, founded in 1891, is America's oldest nonprofit land trust. The organization works to promote the well-being and care of wildlife and historic land all across the Commonwealth. They raise awareness about the necessity for a diversity of ecosystems by offering volunteer work for those interested in working on land preservation. The Trustees maintain and develop 103 different sites in Massachusetts, from farmland to beaches.

The floodplain forest restoration was performed on the Land of Providence, a farm and preserve located just outside downtown Holyoke and donated to the Trustees by the religious order the Sisters of Providence.

Josh Knox, superintendent of the Trustees, explained that the immediate goal of the 10/10/10 project was to plant 100 trees to replenish the floodplain forest. These trees, he said, will act as a buffer to agricultural runoff from the neighboring Nuestras Raices farm, a community farm which leases land from the Trustees. The trees will also serve as habitat for the preserve's wildlife.

"By increasing forest, we will be strengthening its capacity to filter pollution," Knox said.

The Trustees hope to replenish about five acres of floodplain forest, which would buffer and filter runoff resulting, in the hopes of creating a much cleaner river. This project, the Trustees believe, is vital to Holyoke's biosphere, as the Paper City is built on and dependent upon the river. Not only does it provide an abundance of resources, but it is also an attractive site for the area.

"I think it's quite beautiful and has profound aesthetic value," Knox added.

A large part of these efforts were also to raise awareness about the threat of climate change. Knox hoped the volunteers got something valuable out of their work.

"We hope that people come out, nurture their connection to the great outdoors and are inspired to take action," he said.

10.10.10, a campaign launched by 350.org, an international organization dedicated to reducing the amount of CO_2 in the air, was intended to be a day of climate change awareness.

The event was what the Trustees hoped would serve as a contribution to 350.org, which was founded by Bill McKibben, a prominent environmentalist.

Ginny Fuhringer, a volunteer from Holyoke, said she respects the values of 350.org and is a fan of McKibben's.

"I like that it's run by Bill McKibben, a pioneer in addressing climate change," she said. "He is able to rally a lot of people."

The 10.10.10 Global Work Party took place in 188 different countries.

Fuhringer was excited about the international contribution, as she said she believes the 10/10/10 effort was inspiring.

"The fact that it's global makes it more energizing," she said.

SGA outlines plans for coming semester

By Sam Butterfield
Collegian Staff

The newly-elected Student Government Association (SGA) met for the first time last Wednesday.

After what SGA Secretary of Outreach Andrew Prowten called a "successful election" in a Friday release, the 40-member senate met for the first time last week. The group was sworn in by Chief Justice Chris Marquis. In the meeting, the elects were briefed about their legislative powers by Director of Student Legal Services Chuck DiMare. The Senate will next meet this Wednesday.

In other SGA-related news, Secretary of Diversity Andy Dawson recently stepped down, citing academic and job-related constraints. According to the release, SGA President Brandon Tower and Chief of Staff Rachel Dutton have held meetings with "several UMass undergraduates" and will present their choice to the Senate this Wednesday for approval.

The SGA has also partnered with the University's Ski and Board Club to sponsor a "Rail Jam for Charity," which will be held Dec. 10, the last day of classes this semester. Both organizations have partnered with Ellen's Heart and Soul, a planning company which specializes in charity event fund raising. The group was founded by the family of a UMass undergraduate, Andrew Leavitt, in memory of his mother, Ellen Leavitt. The "Rail Jam" will benefit the Virginia Thurston Healing Garden of Massachusetts, a Harvard, Mass., healing center for people suffering from breast cancer. The event will run from 4 to 9 p.m. Dec. 10, and will be, according to Prowten, "the first ever large scale Rail Jam in UMass history." The Jam will be held on the Metawampe Lawn, adjacent to Campus Center.

"We feel that the SGA has failed to show students that we are here for them. This event is to show our peers that we want to give to them as well as fight for noble causes," said Prowten.

The release also details the SGA's agenda for finances. According to Prowten, "Secretary of Finance Benjamin Levine has been actively working with the Center for Student Development (CSD) to streamline the budget allocation process to better serve Registered Student Organizations (RSOs)."

In addition, "the SGA is also looking into ways of saving Student Account Trust Fund monies to prevent increases in Student Fees."

The SGA is also taking steps to improve relations between the University and Amherst. Last week, Prowten, Tower, Speaker Modesto Montero and Secretary of University Policy and External Affairs David Robertson attended a meeting with the Amherst Select Board, as well as Chancellor Robert Holub, Town Manager John Musante, and the chiefs of the UMPD and the Amherst Police Department.

"Despite a historical disconnect, the Town Board was very open and supportive to reestablish a connection from which student voices can be heard," said Robertson.

Another area the SGA is addressing is in attempting to improve students' experience with parking woes on campus. SGA Attorney General Kyle Howard has been working with Director of Parking Services Mike Brennan to implement a system which would text message students if their car has been towed, allowing them to get their cars sooner and avoid paying fees for letting their car remain impounded at Ernie's Garage.

"Essentially what happens is Ernie's Towing Company will circle UMass lots looking for students to tow; when a car is towed for something like parking in the wrong lot, it is an immediate $90 fee, followed by another $20 fee when the tow truck enters Ernie's parking lot, and then another $20 per night that the car is there. Students were being towed on a Monday or Tuesday and not finding out about it until they went back to grab their cars on Friday or Saturday. No one ever told the students that their car had been towed, so their cars just sat in Ernie's parking lot racking up hundreds of dollars in fees," said Howard.

The SGA and Parking Services have since established an opt-in system, where students can sign up to receive texts letting them know if their car has been towed or their lot number has changed. Students can sign up for the service at http://parking.umass.edu/index.php/generalinfo/textmessaging.

Howard has also been working with the Dean of Students office to inform students about their right to counsel through the SGA's Judicial Advisers Program before hearings in front of the Judicial Board. Each year, about 5,000 UMass students are charged with violations, while, according to the release, only about one-fifth of those students were informed of their right to counsel. These judicial advisers explain to students what they are being charged with, what possible consequences they face, and how to prepare themselves for a Judicial Conference. Information about the program is now printed on the back of every Notice of Charge sent by the Dean of Students office, along with a brochure detailing students' rights included in the mailing. Information about the judicial counsel program can be found at: http://www.umass-sga.com/judicial_advisors.php. As a result, Prowten said the SGA hopes about 4000 students per year will go to their Judicial Conference "well informed and preapred with an effective gameplan."

Sam Butterfield can be reached at sbutterfield@dailycollegian.com.

Volunteers work to green Holyoke park

GREEN from page 1

Fuhringer did her part on 10/10/10 as part of the floodplain restoration project, but she also wants to see more change take place.

"More people getting involved on this level doing events, but also influencing the government," are among the trends she said she would like to witness.

Fuhringer added that, while the topic of climate change can be a stressful one, she believes projects like the one in Holyoke over the weekend can be unifying and help take some of the worry out of the matter.

"The whole concept of climate change is so overwhelming," she said. "It's nice to be a part of an event that addresses climate change and to be with other people who have the same desire."

Nancy Pierce can be reached at npierce@student.umass.edu.

Land of Providence in Holyoke leases its 25 acres to Nuestras Raices, a program seeking to promote healthy local food in the Pioneer Valley.

Stephen Colbert, pictured here in British Columbia at last year's Olympics, took some swipes at Canada in a conference call about his March to Keep Fear Alive, telling reporters he must fears a "gay, Canadian bear."

Colbert seeks to keep fear alive in America

FEAR from page 1

"OK, you've convinced me," said Colbert, seemingly agreeing to combine the two rallies.

A student journalist from Boston University asked what Colbert expected from his march.

"I can only hope it defines a generation," said Colbert, "I'd be OK with that." Colbert also stated that he wants Jon Stewart to admit that he is terrified as a result of the rally.

Colbert has told people to dress up as their biggest fear for their rally. During the teleconference, Colbert recommended attendees wear the scariest costumes they can find, which he says would be a mosque or Stewart.

Throughout the teleconference, Colbert touted the website donorschoose.org, where he hopes attendees will go to donate to schools in need. Colbert is on the board of donorschoose.org, which he used as a tenet of his quasi-serious 2008 presidential bid. Colbert said he could not legally take donations, so people who wanted to donate to his campaign could instead donate to schools on donorschoose.org.

The Collegian asked Colbert to respond to conservative pundit Bill O'Reilly's mock threat during a recent appearance on Stewart's "Daily Show" to launch a predator drone strike against him.

"That's terrifying," said Colbert. "It's good, clearly he is on the side of fear."

When asked what people should do for after-parties following the rally, Colbert told the reporters there should, naturally, be fear parties.

And the next day parents should bring their kids out to, "spread fear door-to-door."

Another student journalist asked what college students should be afraid of.

"Graduating should be the biggest fear of college students," said Colbert, referencing the bleak job market for graduating seniors. "Students should stretch those credits out."

When asked whether he would be inviting the Westboro Baptist Church to the fear rally, Colbert clarified what the march is about.

"[My rally is] no place for hate," said Colbert.

But he did expect attendees to become angry.

"Fear is the horse that anger rides," said Colbert.

Colbert also floated the possibility that he would hold another fear rally in 2012, as well as intimating that there is a possibility he could mount another presidential bid.

Colbert did not give any hint about the special guests that will be attending his rally on Oct. 30.

Bobby Hitt can be reached at rhitt@student.umass.edu.

Gubernatorial race a tight one this election

ELECTIONS from page 1

his site that he would vote to repeal federally-funded health care legislation, his support for the right to bear arms, his opposition to federal bailouts, and his support of allowing farmers to use whatever methods they deem necessary.

Engel, a professor emeritus at Westfield State University and a former select board member in Easthampton, leans much the other way. His site states that he is running because of his concerns about "the unchecked growth of corporate power" and the "transformation of our economy by Wall Street and the big banks into a carnival of speculation."

In District Two, Richard Neal, presently serving his 11th term, is contending against Republicans Jay Fleitman and Tom Wesley. The political analysis site CQ Politics lists the district as "safe Democratic," and as of the last federal filing deadline, Neal had raised almost 20 times more funds than either of his opponents.

Fleitman, a Northampton pulmonary doctor, recently won the endorsement of the Springfield Republican. Fleitman favors many conventional Republican tenets of the conservative doctrine, such as cutting taxes, opposing what his site calls judicial activism, tighter border security, support for the second amendment, opposition to last March's health care reform bill, and support for charter schools.

Wesley is a former Navy pilot and business executive. His site lists cutting taxes as among his top priorities, as well as reframing how America's foreign affairs have been prosecuted. Specifically, his site states that he would like to see America employ more special forces and intelligence based operations than ground troops in the War on Terror. Further, he states that he would be tough on immigration reform, and lists prioritizing math and science in education as among his primary goals.

The Collegian will continue to feature more coverage of the 2010 elections until they take place Nov. 2.

Sam Butterfield can be reached at sbutterfield@dailycollegian.com.

Republican Charlie Baker left, and incumbent Gov. Deval Patrick, right, have pulled to the front of the Massachusetts gubernatorial race, leading Independent Tim Cahill and Green-Rainbow candidate Jill Stein.

What is it with the NFL and breasts

Nick Lyons

It's the first Sunday of October (Breast Cancer Awareness Month), and National Football League teams across the country are donning pink gloves, cleats and uniform accents. This year, however, I noticed the addition of pink whistles, shoelaces, chinstraps and hats. Because professional football is comprised almost entirely of men, this glitzy support of a pertinent women's issue is a noteworthy cause.

Teams across the league fundraise large amounts of money, distribute breast cancer ribbons to their players, coaches and fans and involve themselves with breast cancer foundations, such as the Susan G. Komen Race for the Cure - a major partner with the NFL's breast cancer based efforts.

With such a public, hot pink display of "support," even as a big fan, I cannot help but question the NFL's motive. Ostensibly, the athletes couldn't seem to be any more committed to curing breast cancer, a disease that, in 2009, took the lives of over 40,000 women.

However, what about the NFL players, take awareness about breast cancer in their private lives?

With such a public, hot pink display of "support," even as a big fan, I cannot help but question the NFL's motive.

Does the NFL really care, or is this month of fuchsia just an attempt to heal what has become a public relations nightmare? Since July of 2008, Steelers Quarterback Ben Roethlisberger has been accused twice of sexually assaulting women (once in Lake Tahoe, Nevada, and a second occasion in Milledgeville, Ga). Roethlisberger was not criminally charged in either case, and little information regarding the incidents has been made public. According to the accuser of the Georgia incident, Roethlisberger sexually assaulted her in the V.I.P. room of a Milledgeville club while the two had been partying and drinking with a group of friends.

Throughout the entire legal process, Roethlisberger, his attorneys, Commissioner Roger Goddell and the NFL have done their best to push these problems under the rug and out of the public eye. Roethlisberger, who brought the Steelers to Superbowl titles in 2006 and 2009, was initially suspended for six games, but Goodell recently reduced the suspension to four games.

Seattle Seahawks Linebacker LeRoy Hill, currently facing a one-game suspension for substance violations, is also facing domestic abuse charges. New England Patriot Tackle Quinn Ojinnaka was suspended for only one game for committing battery against his wife.

Things don't get much better once the players get married, as the reported divorce rate in NFL players is somewhere between 60 and 80 percent.

Before the 2010 season, players on the New York Jets were accused of harassing Inez Sainz, a reporter from TV Azteca, a sports channel in Mexico. The league responded, but many criticized Sainz for the way she dressed, almost as if she was provoking the Jets players, and that they were not at fault. (Sainz' tag line, however is that she's the "hottest reporter in Mexico" so maybe she was culpable in the eyes of some.) Regardless, how can the NFL take such a loud stance on a women's issue like breast cancer, while simultaneously hushing stories of other issues concerning women behind closed doors. In the United States, an estimated 1.3 million women are victims of domestic violence each year, as compared to about 200,000 new cases of breast cancer.

Bear in mind that none of this support is really the product of the players. It's not as if Tom Brady, Ray Lewis and LaDainian Tomlinson were all sitting at lunch one day and decided that they'd all like to wear pink sweatbands for three games in October. The NFL's support of breast cancer was the work of some clever public relations officials who decided that they could bolster the image of the NFL, and support a good cause all at the same time. The NFL identifies as a league of players, but this campaign has very little to do with them. An equipment manager drops off boxes of pink at each player's locker before the game, containing an "Instant Breast Cancer Support Kit."

After that, an NFL representative shows up and tells the players that they are expected to wear the new gear because the NFL troubled itself to get specialty pink Nike and Reebok cleats for its members. After all, no good deed was going to get in the way of those endorsement deals. Some of the players may protest the wearing of stereotypically feminine color. Others may have a sister or mother who battled breast cancer and will gladly wear the pink. Most players, though, are just there to play, and couldn't care less what color cleats they're wearing. The bottom line is, the athletes only agree to do this because they know that they have a terrible reputation when it comes to relations with women. What better way to take the public's attention from a QB guilty of assaulting women twice than with bright pink cleats for breast cancer research.

Like I said, I will always be a big fan and supporter of the NFL. All of the money that's raised in support of breast cancer is a great thing, and for many people the support means a lot. The NFL does all it can do to hide it's player's intimate affairs, but once October rolls around it suddenly becomes women's number one advocate.

The NFL, after continuous issues with women, has latched onto a high profile cause to boost its image. Any money for breast cancer research is a good thing, but do they have to be so loud about it? To quote St. Matthew, "But when thou doest alms, do not let thy left hand know what thy right hand doeth." Even if thy hands are wearing bright pink gloves.

Nick Lyons is a Collegian columnist and can be reached at nlyons@student.umass.edu.

Philly editor not cut out for digital media

Nick O'Malley

As announced by the newspaper on Oct. 8, Philadelphia Inquirer Editor William K. Marimow was removed from his position as the paper's editor and demoted to the position of investigative reporter. It's a familiar position for Marimow, who won two Pulitzers as an Inquirer reporter.

The reason? According to a statement on Philly.com, Marimow, "despite his national reputation as an outstanding print journalist, he did not have the background in digital media necessary to lead the paper going forward." The call to remove Marimow from the position was made by the paper's new owner, Philadelphia Media Network Inc., which owns the Inquirer, The Philadelphia News and Philly.com. What's important about that list, though, is the last part of the group – the website. The new owner is well aware that, if there is any sort of future for The Inquirer as a whole, the website must have success.

Financial success, though, certainly does not describe what The Inquirer has gone through recently, as the Philadelphia Media Group's purchase marked the end of the paper's 20-month bankruptcy, which occurred under Marimow's watch.

No one is questioning Marimow's work in print journalism- he holds two Pulitzers for his work in investigating police abuse in Philadelphia. The problem, though, is that Marimow is symbolic of the newspaper leadership that has failed to adapt to the digital age and the Internet.

I'm not saying that Marimow was a dinosaur, but the new owners of The Inquirer are saying so, and they're one of the few that have identified the fact that the newspaper industry needs more than good print journalists.

The sort of old, crusty newspaperfolk are heavily criticized for refusing to change their ways – dinosaurs. I'm not saying that Marimow was a dinosaur, but the new owners of The Inquirer are saying so, and they're one of the few that have identified the fact that the newspaper industry needs more than good print journalists.

It's not a knock against folks like Marimow, they specialize in the newspaper industry that they grew up in, where advertising sales were high and newspapers could afford high-cost investigative projects that journalists could build their careers on. Today, though, newspaper sales are down, classifieds are moving to Craigslist, the Internet offers free news and The Inquirer still has to put the same paper out everyday. More than that, consumers aren't as willing to sit down and read paper and want their news to come through their laptops and iPhones. They also don't want to pay for it. Running a newspaper ain't easy.

I'm not one to say that I know what it takes to run a newspaper, but having people like Marimow running newspapers isn't the best choice business-wise.

Journalism-wise, Marimow's the man. But newspaper execs need to be more familiar with the online and multimedia aspects of the media markets than the print aspect. The best example for this is the nearby Springfield Republican and its online form, Masslive.com, which has become a substantial media identity of its own.

While the Republican provides the old-school, newspaper print journalism that the older generation wants, Masslive.com gives uppity, snotty younger news seekers like myself blogs, video and photo in smaller bite sizes. Kids don't have time to read a whole newspaper – we have stuff to do. But the decision to make such a significant change at the top of the newspaper ladder shows how big of a change is needed in order to shake the traditional business model of the industry. It's a great thing to say that papers are sticking to their guns and not succumbing to pressures from things likes the "market" and "what's going to keep the company profitable."

Time will tell as to whether or not the new ownership in of The Inquirer made the right call. But as the paper's bankruptcy, the financial woes of papers like the Boston Globe and the closing of papers like The Rocky Mountain News have shown, there needs to be change in the journalism industry.

Newspapers need to figure out how to make money on the Internet. So do a lot of people. But it's obvious to see that the model that worked even 15 years ago is no longer an option. Marimow is a great journalist. He just might not be the best choice to lead a newspaper and establish a profitable business model in the 21st century.

In a perfect world, the great, ethical journalists with great leadership skills would be the editor at every paper in the country. But that's not what The Inquirer needs. The Inquirer needs, as now-former Patriots receiver Randy Moss would say, "straight cash, homey."

Even if that means posting blog posts about "Jersey Shore" instead of uncovering police abuse. It sounds bad now, but if newspapers refuse to change, there will be none left in a few years.

Nick O'Malley is a Collegian columnist. He can be reached at nomalley@student.umass.edu.

Five Reasons to Celebrate Columbus Day

1) Not all Italians belong on "Jersey Shore."

2) Or "Godfather" knock-offs.

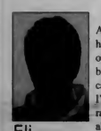
3) You'd feel silly celebrating Lief Erichson Day.

4) Just two letters away from "Columbo" Day.

5) What other holiday celebrates a man who committed genocide?

ED/OP

Ayn Rand is an adolescent sociopath



Eli Gottlieb

In recent times, American society has brought forth one of the most bizarre ideological aberrations that I've ever seen: the radical individualist. This person not only considers himself so special that he should have no obligations to anything greater than himself, but honestly believes that nothing greater than he even exists. Armed with his Ayn Rand books and subscription to Reason magazine, he stampedes onto our college campuses, onto our television screens and into our newspapers. He spreads a seductive creed that each of us has no ties binding us to others, and we can all simply do as we please while remaining entirely moral beings. They tell us, essentially, that no morality exists beyond the law, and that since the law orients itself towards individual freedom, we should treat the life of clubs, groups, parties, peoples, nations and creeds as nonexistent or irrelevant to us.

No, we oughtn't wage class warfare, but the charges of "socialism" thrown around by revolutionary Randists have nothing to do with actual revolutionary Marxism.

I don't buy it, and I don't think anyone else should either. For one thing, this violates every commandment of God's Torah, but even on a secular level this kind of thinking simply kicks me in the gut. Every collective binds itself, after all, according to the rabbi and philosopher Jonathan Sacks, by two covenants: the covenant of faith, yes, of shared ideas and feelings, but also the covenant of fate – subjection to the same problems and boons, common conditions. While anyone can, if they so please, ignore the covenants of faith that make the world function all around them (such as the way I can trust that nobody will steal my belongings in the dining common when I go to get a drink), they have no such choice about the covenants of fate.

Besides, let us be frank. These so-called intellectuals have not barged into our collective conversation simply to make this most adolescent of abstract philosophical points. They have barged into our political conversation and attempted to fracture the American public, to atomize it, at exactly the time when we all need to stand together. As a matter of fact, it would bare saying to point out that most of these people either suffer extreme self-delusion or realize that they belong to a self-conscious movement driven by parties like the Koch Brothers and Fox News.

The economy remains the worst it has been in 40 years. Not many people can find work because jobs have been sent overseas to exploit cheap labor and a lack of environmental protections. Our wages continue to fall while our cost of living continues to rise, and a neo-feudal class of ultra-rich corporations successfully hold our government hostage, effectively vetoing any improvements we try to make. Here at the University of Massachusetts, tuition and fees continue to rise while the semester shortens and even the most meager of conveniences and services once available, such as trays in the dining commons or computer labs for printing homework, have slowly evaporated.

One cannot simply say, "I am not a UMass student," when one attends residential classes at UMass. One cannot simply say, "I am not an American" when one lives in America and clearly lives subject to the living conditions of the United States government. One cannot say, "I am not a worker," when one works for a living and suffers without the income of a job. If someone tries, he's not only lying to himself but declining a moral duty.

When did we stop thinking that helping others in our conditions helps ourselves in the end? When did we stop thinking that we have a moral obligation to better the lives of others? When did we become so ignorant of such simple realities? In the words of Ben Franklin, "We must all hang together, or most assuredly we shall all hang separately."

Yet, somehow people want us to believe that what defines America is in fact a steadfast refusal to take part in any life outside of one's own private property and the quest to enlarge that property.

No, we shouldn't wage class warfare, but the charges of "socialism" thrown around by revolutionary Randists have nothing to do with actual revolutionary Marxism. All anyone asks is that we help our fellow citizens. Rather than trying to lift our boat from the ocean's surface with rocket jets, we should all work to create a rising tide that will lift all boats.

Randists can throw economics and game theory at us, but real economics and real game theory acknowledge the real world, in which collective action problems often occur. Perfect competition doesn't exist, and only the super-rich have perfect information.

Sometimes, if we want to prosper, we have to work together. Let's not fall for it. Let's work together, because together we will thrive.

Ingrid Michaelson better than 'OK' at Calvin

By Lindsey Davis
Collegian Staff

Ingrid Michaelson was more than "okay" when the indie goddess shattered all perceptions of her musical style when she kicked off her tour at the Calvin Theater in Northampton on Sunday. Her sweet lyrics and lovely rhythms transformed into powerhouse anthems and comical anecdotes leaving audience members crushing on Ms. Michaelson herself.

Guggenheim Grotto opened the show with a hauntingly harmonic medley of vocals and guitar. As their set went on, the performance energy culminated at a crescendo of acoustic farinland rock stomp. The Irish duo had the audience at their finger tips with their charming anecdotes, sensitive lyrics, and fedora and vest outfits. Even Michaelson remarked on her opening act, "Aren't they great. I felt like my aunt at shows, 'Oh they are good. Aren't they great?'"

After a long intermission, the lights dimmed to reveal an orangey hue of light engulfing the stage while Led Zeppelin's "Immigrant Song" blared through the speakers. Moments later, six cloaked bodies marched single-file on to stage and bowed to the audience. Once they took their place, the cloaks went flying and Michaelson began to belt the classic rock hit to a screaming crowd.

From there, she alternated between upbeat singalongs and heartfelt medleys that captivated all, but Michaelson was surprised at how "proper" the audience was compared to her Iron Horse Musical Hall show this past June.

"We're so accustom to playing in places that reek of urine and drunk people," Michaelson said. "Give a person air conditioning and a seat and they become British."

Halfway through the show, the ukulele lady gathered her five band members to the front mic. "I'm about to do something as cute as kittens in a basket," said Michaelson, who complained of sore cheeks from smiling too much throughout the concert. "I want to do something to bring us all together and share something we all have inside of us? Like urine." Through this, she inspires herself to improve "The Pee Pee Song" which ends on a comical note with "We all have some pee in us."

Her famous love song "The Way I Am," which was featured in an Old Navy commercial, brought the crowd goosebumps but, in true Michaelson fashion, she decided to show the audience what would happen if she tried to be "really cool" and "hardcore" by recreating the love song with a Paramore-style rendition. She even pokes fun at her start to musical fame with several songs featured on "Grey's Anatomy's" soundtrack.

Michaelson performed her hits "Breakable," "Keep Breathing," "Die Alone" and "Be OK" with new vocal heights beyond what can be heard on any of her albums. The songbird also proved that her latest single, "Parachute," released on iTunes on Sept. 14, is worthy of the Ingrid Michaelson branding.

Towards the end of the show, Michaelson announced the last song but warned the audience that she was getting lazy at age 30 so instead of running off stage and coming back to for the cliche pretend-encore after several minutes of applause, she had a plan. When the last song would wrap up, the band would then hide under a cloak behind the piano for a few minutes to wait out the standing ovation. They did just that with an eruption of laughter from the entire theater that lasted the entire ovation.

The encore did not disappoint as Michaelson performed a ukulele cover of Britney Spears' "Toxic" paired with full band choreography equipped with booty slaps and jazz hands.

Lindsey Davis can be reached at lmdavis@student.umass.edu

Singer-songwriter Ingrid Michaelson graced the Calvin Theater on Sunday. She blended her well-known musical stylings with ample amounts of humor. She also performed her newest single, "Parachute."

Deerhoof, others conduct rock experiment in Northampton

By Andrew Cogan
Collegian Staff

In the dark confines of the Pearl Street clubroom, with but several multi-colored lights over the stage, Deerhoof unleashed their raw and powerful energy on Saturday night.

Euphoric blasts of noise caromed off the low ceiling. Deep, thundering drums reverberated through the crowded floor. The band's screeching, distorted, yet sweet melodic pop could hardly be contained in such a small space. The music, once obscure, was now a bonding force, creating the classic concert feeling that everyone was united by the energy of sound. Deerhoof may have started on the fringes of the avant-garde, and they may now be considered veterans in the indie-experimental genre, but they are nothing if not rock and roll.

The concert was Saturday night in Northampton, with Father Murphy and Xiu Xiu performing earlier on the bill. It was thanks to these bands as well that such an incredible night of live music took place.

Father Murphy is an experimental trio from Italy who opened the show with chanting vocals, black metal guitars and the sounds and percussion of traditional Chinese music. Xiu Xiu is another fixture of experimental indie-rock, with singer-songwriter Jamie Stewart and multi-instrumentalist Angela Seo. Together they performed Stewart's dark but sublimely beautiful compositions.

Due to long sound checks, possibly because of technical difficulties, the show got off to a late start. Xiu Xiu unfortunately was not allowed to perform their last song, creating a brief tension between them and the sound crew. However, this was resolved when Deerhoof took the stage. Even though their set started almost thirty minutes late, they played every song in their repertoire, and were called back on stage for two encores. The second time, Father Murphy and Xiu Xiu joined the band on stage to cover Joy Division, decisively ending the show on a positive note.

Deerhoof's main set drew heavily on their recent work, featuring songs like "Milk Man," the title track of their 2004 album, and "Fresh Born," off of "Offend Maggie." The group's sound rides on dense distorted twelve-string guitars, played by Ed Rodriguez and John Dieterich. The pair has remarkable chemistry, weaving melodies up, over and around each other, and breaking down in explosions of feedback and noise.

Underpinning the groups sound is Greg Saunier's furiously spastic drumming, which fills the spaces in between the guitars with thick walls of percussion. Saunier's rhythm is sometimes straight ahead rock, but other times it is looser, with hits falling in between the beat. His energy drives the music forward at breakneck speed.

The final ingredient to Deerhoof's sound is Satomi Matsuzaki on lead vocals and bass. Her cute, poppy, and often minimalist singing contrasts starkly with the other instruments. She also makes Deerhoof's stage show incredibly dynamic, hopping and jumping around the stage, duck walking with Rodriguez, or making choreographed arm motions along with the music. For the first encore she climbed up on an extra drummers throne to lead the crowd as they sang along then jumped down and leaped about flailing her arms and legs every direction, yet despite her bounding stage presence, she hardly missed a note. Her voice rang clear above the crushing waves of background noise.

As a testament to their versatility and experience, the members of Deerhoof often switched instruments during the set. At one point a full rotation occurred. Rodriguez moved to bass and Matsuzaki to drums, and Dietrich took Rodriguez's guitar so that Saunier could take his. Saunier then sang lead vocals on a cover of the Byrds.

All in all, Deerhoof's performance was spectacular. Their stage presence and tight musicianship was befitting of a band that has been around in one form or another for over fifteen years. There's no end in sight either, as they've just recorded a new album this summer. Entitled, "Deerhoof vs. Evil," it is currently in the mixing stages and is expected to be released some time in the next few months. They played one of the new songs on Saturday, and if it's anything to go by, it seems they've further honed their innovative blend of noise melodic pop music.

Andrew Cogan can be reached at acogan@student.umass.edu

Pearl Street played host to three experimental rock bands on Saturday night. Deerhoof, Xiu Xiu and Father Murphy each performed electrifying sets. Deerhoof called upon band members from each opening act to play with them during their encore.

Disney film 'Secretariat' a predictable story of triumph and struggle

By Nick Lyons
Collegian Correspondent

Any longtime fan of Thoroughbred racing should be excited to see that a movie has finally been based on the story of Secretariat. Secretariat, who won the Triple Crown in 1973, was one of only 11 horses to have done so, and many argue was the greatest race horse of all time.

Winning the Triple Crown (finishing first at the Kentucky Derby, The Preakness and the Belmont Stakes) is a feat that is both fantastic and unique as no other sport has an accomplishment on nearly the same level. Bill Russell won 11 NBA championships, Wilt Chamberlain scored 100 points in a game, Joe Dimaggio got a hit in 56 consecutive games, and Secretariat won The Triple Crown, an achievement that had not happened in 25 years, and has only happened twice since.

Almost as central as the story of Secretariat is that of his owner, Penny Chenery (played by Diane Lane), who the movie follows almost more than the horse. "Secretariat" opens with Penny, a 1970s housewife in Colorado, being called home to her rich father's stable in Virginia to attend her mother's funeral. Upon returning home, Penny realizes that after her mother's death, her ailing father's interests are at risk and she decides to take more of an involvement in her family's affairs. This puts a strain on her relationship with her husband and children, and supplies the movie with its only non-racing drama.

In a moment of rushed character development, Penny fires the stable's trainer immediately upon arrival. Appointing herself head honcho of the farm after only one day, she looks through the records to discover a strange deal with millionaire horse owner Ogden Phipps (played by James Cromwell). It turns out that Penny's father had planned with Phipps that two of his horses would be sired by Bold Ruler (Phipps' horse) and a coin toss would decide who got which foal. Long story short, Penny loses the coin toss, and in true Disney fashion ends up with the horse no one wanted, but would end up as a great winner.

Penny seeks out the famous and flamboyant trainer Lucien Laurin, a typical John Malkovich character, to train Secretariat and make him into a winner. After losing some races, (not by much, this is a Disney film after all) and going through a few jockeys, the motley crew of Penny, Laurin and Secretariat finally start winning.

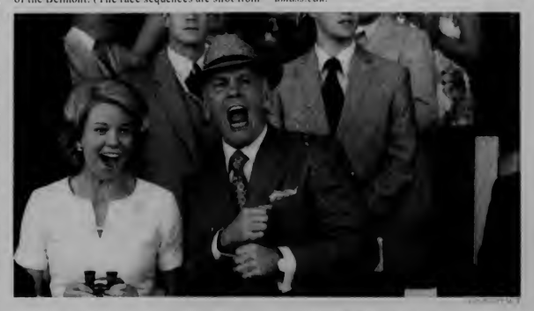
After an expected montage of training, Secretariat beats Sham, the favorite, in the Kentucky Derby, even though he was branded as a horse made only for speed and not distance. (The races of The Triple Crown are some of the longest in Thoroughbred racing.) He then goes on to beat Sham again in the Preakness and also wins the Belmont Stakes by an unheard of 31 lengths. To get an idea, winning a race like the Belmont by such a huge margin is like hitting a home run 650 feet or finishing a marathon in an hour and a half – it just doesn't happen.

Make no mistake, if a deep analysis of the world of horse racing and the story of Secretariat is what you desire, you should expect to leave the theater wanting more. As we can not forget, this is a Disney movie. Prepare yourself for feel good scenes of triumph and reward delivered to you in predictable PG glory.

The story of Secretariat and Penny Chenery is a great one of a woman infiltrating a male's sport and a horse that did the impossible, and Disney and director Randall Wallace serve only to playfully embellish this greatness. Lines full of "doing what you believe," and, "never giving up," litter the film and more than a few scenes beg for an eye roll. The overload of stereotypical Disney fluff in the film makes the viewer wonder, "Is this how it really happened?"

"Secretariat" is not a documentary, nor does it pretend to be one. However, the portrayal of some of the races is extremely accurate, especially that of the Belmont. (The race sequences are shot from the jockey's perspective, which makes for a neat effect.) For lovers of horse racing, "Secretariat" as a shallow testament to that love, and for those not familiar with the sport, it paints a picture of the heart-pounding excitement it can produce. All in all, "Secretariat" is a happy depiction of a happy story and makes you wish you were standing at the rail singing "My Old Kentucky Home."

Nick Lyons can be reached at jnlyons@student.umass.edu.



Although the plot is generic and trite, 'Secretariat' features a stunning cast, including Diane Lane and John Malkovich as the titular horse's owner and trainer, respectively.

Minutewomen defense quiets Saint Louis

UM holds Billikens to 0 shots, shutout SLU under the lights

By Pete Vasquez
Collegian Staff

The Massachusetts field hockey team made history Saturday night at Garber Field when it held Saint Louis without a shot attempt for the entire game in its 4-0 win.

Under the lights, with a big crowd on hand, the Minutewomen (6-6, 1-0 Atlantic 10) faced their first A-10 opponent of the season and controlled play from the opening whistle.

For the first time in more than a decade, UMass held an opponent without a shot attempt on goal, 28-0. Most of the action occurred on the Billikens' (0-14, 0-1 A-10) half of the field.

"I'm very pleased," UMass coach Justine Sowry said. "It's good to get a win under the belt; it's our first Atlantic 10 [win]. The buildup, we were actually really excited for the start of the Atlantic 10. To get a win was our goal. It's literally one step at a time so now we can move on. The nerves, hopefully we can get rid of them and start playing some free flowing hockey."

UMass	4
SLU	0

Just a minute and 32 seconds into the game, freshman Alexa Sikalis took a shot off a rebound from net to give UMass an early 1-0 lead. It was Sikalis's first career goal with Kelly earning the assist.

"It was our first round of the A-10s and we came out pretty strong," senior captain Katie Kelly said. "It's nice to go into the A-10s with a little bit of confidence. We just need to make sure we bring it every day from here on out because the games are only going to get harder."

Senior Makaela Potts scored twice, after coming into Saturday with just one goal on the season. Both goals were well-struck grounders set-up by penalty corners. Senior Jamie Bourazeris assisted on both Potts goals.

"I've only scored one goal before this so it's good to get some goals in there," Potts said. "But it's not all for me, I think it was just a team effort and I just got lucky to get them in the goal."

Potts almost collected her third tally of the game, but had her shot waved off for being too high. Potts received a yellow card for disagreeing with the call.

"She had a call, which she didn't really appreciate, and it knocked her off her game a little bit but I'm pleased with how she came back on the field," Sowry said. "With the youth that was around her, she was actually a great leader and was able to generate some good attacking play for us."

Kelly scored the other UMass goal in the 13th minute. It was her team-leading seventh goal of the year. Potts and Kelly combined for 17 of the team's 28 shots.

The Minutewomen will finish non-conference play on Tuesday afternoon at Dartmouth. The Big Green (8-3, 2-1 Ivy League) began the season with a 7-1 record, however have recently lost two games out of three. Their latest game was a 4-1 loss at Boston University on Sunday.

Last season, UMass hosted Dartmouth on Oct. 28 and fell 6-3. Potts and sophomore Nicole Cordero each had goals for the Minutewomen while midfielder Kelly Hood had two goals in that game for the Big Green.

"They're playing good hockey," Sowry said. "They have a couple of very key figures on the field in Kelly Hood and [senior midfielder] Virginia Peisch and they've got a very solid goalkeeper as well. They can definitely throw a lot of overheads and then run off with your mistakes. But they also have some great attacking plays as well."

Hood has a team-leading 16 goals for Dartmouth, having taken 31 percent of the Big Green's shots. The next closest goal scorer on Dartmouth has five.

"Kelly Hood would be someone we really have to deny the ball," Sowry said. "She seems to be generating probably half of their opportunities and half of their goals. We really need to take care of business and deny her as much as possible."

For the Minutewomen, this game is a chance to fine-tune certain aspects of their game that still need improvements.

"We'll definitely use that game to work on some of the things that we're going to need to execute in the A-10s," Kelly said, "working the ball around the back and just different things like that that we maybe haven't been doing or we need to continue doing."

Pete Vasquez can be reached at pvasquez@student.umass.edu.

Jeff Bernstein/Collegian

Forward Eileen Seffron hounds the ball in a game earlier this year. Seffron contributed to an offensive effort that drubbed Saint Louis, 4-0, with three shots in 56 minutes.

Four new faces finish in top 5

By Ben Lambert
Collegian Staff

As the sun set on Franklin Park in Boston, the Massachusetts cross-country teams had overcome a variety of different obstacles to turn in two strong performances.

The men's team had four new faces among its top five finishers, who overcame their inexperience to lead the team to a 30th place finish of out 47 teams. The women's team overcame a series of nagging injuries to improve on last year's performance, coming in 11th out of 47 teams as well.

The Minutemen were led by junior Patrick McAllister, who led the team for the first time this season with a 90th place finish in 26 minutes, eight seconds. Senior Sonny Gamble (26:16) and freshman Paul Merriman (26:57), who came in 109th and 186th respectively, followed McAllister.

Rounding out the five top finishers for the Minutemen were freshman Jared Reddy, who finished in 187th with a time of 26:59, and junior Andrew Erwin, who came in 199th with a time of 27:06. Only Gamble had placed before for the Minutemen this season.

Dartmouth College was the overall winner of the men's race. Dartmouth had all five of its placing runners finish in the top 50 competitors, an accomplishment no other school in this competition can boast.

Tom Robbins was the top finisher for the Big Green, coming in fifth with a time of 24:36. Their 138 points just edged out Boston University, which finished with 140 points.

Eric Ashe led BU with a second place finish. The individual victor was Glarius Rop of American International College, who finished in a time of 24:08.

The top competitor for the Minutewomen was sophomore Courtney Baldwin, no stranger to these top finishes.

Baldwin has placed first for the Minutewomen in three of their four meets this season. She crossed the finish line in 18:41, good for 39th place. Junior Karen Roa (18:45) came in second, with a 46th overall finish. Senior Gina Perno, senior Elizabeth Fisk and junior Jennifer Harkey rounded out the top five for the Minutewomen.

"I thought the women competed well, they raced hard. We are still not 100 percent with the athletes," UMass coach Julie LaFreniere said. "Karen Roa is not healthy, Gina Perno was diagnosed with a sinus infection last week. We have ideas of what we need to work on, we just need a little time to heal from the injuries."

Boston College ran away with the women's race, finishing with 26 points. This blew away its closest competitor, Connecticut, which came in second with 116 points.

The Golden Eagles placed four runners in the top five overall finishers, with their fifth competitor coming in 12th. The top individual finisher was Corey Conner of Maine, who crossed the finish line in 16:54.

The men's team will next return to action on Oct. 16 at the Chili Pepper Festival in Fayetteville, Ark. The women's team will next be competing at the Rothenberg Race in Warwick, R.I. on Oct. 15. After that, the Atlantic 10 Championships are on the horizon for both teams.

Ben Lambert can be reached at wlambert@student.umass.edu.

University Health Services • Mental Health Services
SUPPORT AND THERAPY GROUP MEETINGS
FALL, 2010

HILLS HOUSE GROUPS

RELAXATION AND STRESS MANAGEMENT
Mondays, 4:30 – 6 p.m., beginning in October.
Open to new members each month. Learn and practice a variety of relaxation skills to help deal more effectively with stress.

WOMEN'S THERAPY GROUP FOR GRADUATE STUDENTS
Mondays, 6:30 – 8 p.m. beginning in October.
Focus on issues such as self-acceptance, self-expression, relationships, family, anxiety and academic demands in this group just for women.

MEN'S THERAPY GROUP FOR GRADUATE STUDENTS
Tuesdays, 5 – 6:30 p.m. beginning in October.
Closed to new members after first session. Addressing issues including male identity, self-acceptance, isolation and forging more satisfying relationships.

MINDFULNESS-BASED STRESS REDUCTION (MBSR)
Wednesdays, 2 – 3:30 p.m. beginning Oct. 13.
Closed to new members after first session. Mindfulness is a way of paying attention with intention, in the moment and without judgment. With regular practice, MBSR has the potential to lower stress, anxiety and depression, promote relaxation, improve concentration, raise self-awareness and enhance the immune system.

INTERNATIONAL STUDENTS' SUPPORT GROUP
Wednesdays, 6 – 7:15 p.m. from Oct. 6 – Dec. 1.
Open to new members throughout the semester. Talk about home, cultural adjustments, language issues and more, with undergraduate and graduate students from all over the world. Meetings take place in the International Programs Office, Hills South.

MAKING CONNECTIONS
Thursdays, 3:30 – 5 p.m. beginning in October.
Closed to new members after first session. Join undergraduates in exploring topics including self-esteem, relationships and school adjustment.

BERKSHIRE HOUSE GROUPS

LIVING WITH LOSS
Thursdays, 4 – 5:15 p.m. beginning in October.
Closed to new members after first session. A support group for undergraduate and graduate students dealing with the loss of someone close to them.

MEN, TALKING
Fridays, 3:30 – 5 p.m. beginning in October.
Open to new members throughout the semester. A small, safe group of undergraduate men committed to building community, supporting each other and discussing issues including romantic relationships, satisfying friendships, academic stress and masculine identity.

Pre-registration is required: call weekdays, 8 a.m. – 5 p.m. For groups meeting at Hills House, call (413) 545-2337; for groups at Berkshire House, call (413) 545-0333.

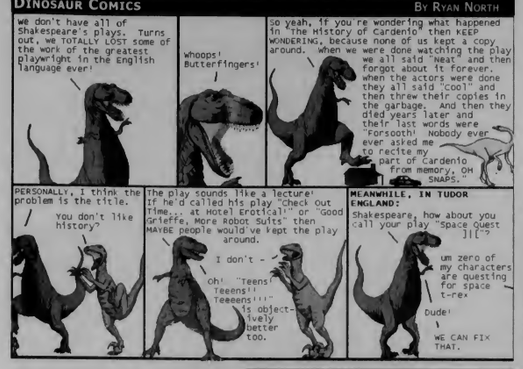
-Where Class and Good Judgment Go To Rot and Die-

Dinosaur Comics By Ryan North



we don't have all of Shakespeare's plays. Turns out, we TOTALLY LOST some of the work of the greatest playwright in the English language ever!
Whoops! Butterfingers!
So yeah, if you're wondering what happened in "The History of Cardenio" then KEEP WONDERING, because none of us kept a copy around. When we were done watching the play we all said "Neat" and then forgot about it forever. When the actors were done they all said "Cool" and then threw their copies in the garbage. And then they died years later and their last words were "Forsooth! Nobody ever ever asked me to recite my part of Cardenio from memory. OH SNAP!"
PERSONALLY, I think the problem is the title.
You don't like history?
The play sounds like a lecture! If he'd called his play "Check Out Time... at Hotel Erotica!" or "Good Griefe, More Robot Sufts" then MAYBE people would've kept the play around.
I don't - Oh! "Teens" "Teens!" "Teeeens!!!" Is object-lively better too.
MEANWHILE, IN TUDOR ENGLAND:
Shakespeare, how about you call your play "Space Quest III"?
um zero of my characters are questing for space t-rex
dude!
WE CAN FIX THAT.

Got a burning question?

UMass goes undefeated in opening weekend

By Steve Levine
Collegian Staff

Despite a 1-3-5 start to the season, the Massachusetts soccer team turned it around last weekend when it shut-out Xavier on Friday and tied Dayton on Sunday for a 1-0-1 start to conference play.

Prior to Friday's match, the Minutemen hadn't won since Sept. 17. Two days later, they lost to then-ranked No. 24 Indiana, 2-1. The proceeding four games all were decided in double-overtime, with the Minutemen going 0-3-1.

UMass	2
Xavier	0
UMass	1
Dayton	1

The first half could not have gone better for the Minutemen, who jumped out to an early lead when midfielder Stuart Amick scored his third goal of the season. Amick's goal was set up by forward Chris Roswess, who dribbled through traffic on the right flank before sending a low cross to Amick, who one-timed his shot past Xavier goalkeeper Justin Marshall in what proved to be the game-winning goal.

UMass midfielder Morgan Brandso scored his first collegiate goal in the 38th minute to give the Minutemen a 2-0 lead. Brandso, a sophomore, headed a high cross from forward Bryant Craft into the top-right corner. After Marshall appeared to have made the save, the ball was ruled to have crossed the plane of the goal line.

It was the first 2-0 lead UMass had going into halftime this season.

"The first half went well, we dictated the play, possessed a lot, and did the things that we talked about in practice all week," UMass assistant coach Walter Boyd said. "We got down the flanks on them and we were dangerous in and around the '6' which is what we've been trying to do. Luckily we held on in the second half and eeked out a [2-0] win."

The second half wasn't pretty for the Minutemen, who were out-shot, 14-1, and out-cornered 8-0.

"The second half wasn't good for us," Boyd said. "Playing with a lead and keeping that lead is something that has been foreign to us this season. It's something that we're going to have to get used to and get better at."

UMass goalkeeper Chris Piekos was strong once again, with five of his six saves in the second half en route to his first shutout of the season.

"We got a little complacent in the second half and Xavier took advantage of it," Boyd said. "They had us on our heels and luckily we held on and got the shutout. Piekos and the rest of the defense are all deserving of the shutout so I'm happy for them."

"[The win] feels great," Brandso said. "We haven't won in a long time. We've been going into overtime after overtime and it was getting frustrating but it was good to win today. Hopefully we'll carry [this momentum] with us, ride this wave of confidence and hopefully go far."

The Minutemen appeared very confident on Sunday against Dayton, especially after receiving an early goal from midfielder Ben Arikian to put UMass up, 1-0.

His goal came in the 14th minute when Craft sent him a long pass up the field. The play seemed to be broken up by Dayton's defense but a bobble allowed Arikian a one-on-one with Dayton's goalie Tyler Picard who couldn't make the head-on save.

It was Arikian's first goal of the season as it upped his point total to seven. With the assist, Craft extended his team-lead in points to ten. The duo is first and second on the team in points, respectively.

UMass' attempt at winning its second-straight conference match fell short when it gave up a game-tying goal midway through the second half. The goal came on a strike from Oskar Kretzinger that beat Piekos to the left post.

The second half again belonged to UMass' opponent, as the Minutemen were outshot, 10-5. UMass coach Sam Koch understands his team must play better in the second half.

"If we held them off the board, this game could have certainly gone better," Koch said. "We're still having trouble in the second half, we've got to figure that out and we haven't been able to do that well enough or quick enough. But it was better today than it was on Friday, but that's something we've got to work on to play with the intensity and the focus on for the full 90 [minutes]. I think when we do that we will be a tough team to beat, but until we do that we'll have some tough times."

UMass was out-shot, 3-0, in the first overtime period and again relied on Piekos to make important saves. The second overtime period held just one shot – a blocked shot by Arikian.

"These are the games that count [and] yes, they're more intense," Koch said regarding conference play. There's no question that these games are very critical. As far as each one, they mean more than the non-conference games. The idea is to improve each week to get better each week, whether it's conference or non-conference."

Steve Levine can be reached at slevine@student.umass.edu.

Midfielder Chris Roswess aims to kick the ball in UMass' 1-1 draw with Dayton. Roswess contributed in the Minutemen's 2-0 win over Xaiver on Friday with an assist to Stuart Amick.

The Minutemen celebrate after a goal in a game last season. UMass nearly escaped losses to nationally-ranked Minnesota, falling 5-3 and 5-4 in its two games this weekend.

Minutemen scare Minnesota in pair of games over weekend

By Dan Gigliotti
Collegian Staff

The Massachusetts hockey team experienced near identical results in its two games this past weekend when it traveled to the Twin City of Minneapolis.

UMass lost on Friday, 5-3, and on Saturday, 5-4, to No. 15 Minnesota, but not before a serious scare.

UMass coach Don Cahoon was pleased with the character that his players showed, but he has high hopes for his team, even if no one else has similar expectations.

UMass	3
Minnesota	5
UMass	4
Minnesota	5

"As a coach, the bottom line is winning, so there's a bitter taste to all of this," Cahoon said. "We competed really hard, we showed resiliency [and] we definitely persevered serious struggles. Those are the positives that build a foundation, but that's not where we need to be. As a coach, we're going to get there as soon as we possibly can."

The Minutemen faced a 3-0 deficit in the opening frame of Saturday's game, their goalie and captain Paul Dainton left the ice with an injury. After battling to narrow the deficit, T.J. Syner netted a goal to cut the Gopher lead to one with an open net and under two minutes in regulation.

The power play units of both teams became the difference in the game as the Gophers went 2-for-3, while the Minutemen misfired on five opportunities.

"We had all sorts of power play opportunities... we just have to bury [them]," Cahoon said. "I wasn't disappointed with the way our power play moved the puck, we had some real good looks."

UMass held a 36-33 shot advantage in the game, after being out-shot, 17-7, in the first period.

Defenseman Anthony Raiola, a Minnesota native, netted his first career goal to begin the Minutemen rally. Conor Sheary and Michael Marcou also found goal on Saturday, unable to overcome a first period hat trick by Minnesota's Jay Barriball.

Dainton left the game in the first period after making 10 saves and Cahoon said he is day-to-day.

UMass converted on 2-of-6 opportunities with a man-advantage on Friday, but failed to capitalize on two chances in the first period to take the lead, including a five-minute power-play.

Bariball gave the Gophers a 1-0 lead at the end of the first period, followed by a second goal by Mike Hoeffel 12 seconds into the second period.

The two teams traded goals into the third period, when Syner connected on a breakaway goal off of a pass from Michael Pereira in transition to make it 4-3 Minnesota. Then, Zach Budish scored on an empty net with under a minute in regulation to ice the game.

Syner had two goals on the weekend and six other UMass players netted their first goals of the season. Marcou had three points in the two games, assisting on a score in each of the Minutemen losses.

Despite the loss, Cahoon saw a lot of promise in his team's ability to play from behind.

"I was pleased with the way we responded to the adversity of being down three goals," Cahoon said. "I don't like the idea that we were down three. There's a lot to work on."

Maroon & White suffer five Dayton goals, UM rebounds with own shutout at Xaiver

By Jocelyn Taylor & Jacob Rosen
Xavier Newswire & Flyer News (Dayton)

The Dayton women's soccer team defeated Massachusetts, 5-0, on Sunday afternoon.

The Flyers (12-2, 4-0 Atlantic 10) scored within the first 10 minutes and three times total in the first half, relentlessly attacking the Minutewomen (5-8, 2-2 A-10).

UMass	0
Dayton	5
UMass	3
Xavier	0

UD freshman Juliana Libertin began the scoring with her first career collegiate goal off a rebound assist from senior Ali Giner. Freshman Stephanie Emery followed suit with her first-ever goal at 33 minutes, five seconds, capitalizing off another rebound away from freshman goalkeeper Emersyn Pullan.

Colleen Williams, the leading scorer in the A-10, then netted her 12th goal of the season exactly five minutes later. That score remained until the 67th minute when Giner extended the lead to 4-0 and just afterwards, sophomore Maggie Hinkle scored to provide the final result of the match.

UMass finished with eight shots total against 24 for the Flyers. Sophomore Emily Cota replaced Pullan in the second half, but made only two saves against the two goals allowed.

It was the final home contest of the regular season for the experienced Flyers, who have now won 19 consecutive regular season games in the conference.

UMass coach Ed Matz said the goal for his young team was to finish with three points for the two-game weekend trip to Xavier and Dayton. The team met that goal with a 3-0 victory at Xavier, and looking forward, he maintains that it's not the end of the world for its chances in the A-10 conference.

"Like what I told the [players], we're 2-2 and coming in with a very young team and a new coaching staff," Matz said. "Our schedule is more to our advantage the rest of the way with travel and home games, and against teams that aren't nearly as strong as Dayton. We can still draw our own destiny, but we can't be disappointed with where we are right now."

Matz said it was frustrating how his team allowed those quick first three goals, and was sidetracked from the start of the afternoon.

"It's tough to win on the road in this conference because of the travel and a lot of reasons, but it's not impossible," Matz said. "But we had said that the goal was to get three points during the weekend, and you know, we got that Friday night. But as a coach, you get that and you should want to try and get that fourth point or six points, if you can."

Matz's statement proved true on Friday against Xavier. The Minutewomen pressured the Musketeers early with their offense.

Xavier was blindsided by forward Sydney Stoll who struck for the game's first goal in the first five minutes.

UMass refused to let up after the first goal. Senior Therese Smith scored the second goal after a corner kick by junior Meghan Collins in the 16th minute.

The Musketeers were not deterred by the quick goals from the Minutewomen. A few substitutions allowed them to put their opponents on their defensive heels.

Xavier freshman Mariah Whitaker freed herself from her defender and aimed for the goal. However, the UMass defense made a quick recovery and stopped the ball from going in.

No Musketeer could connect with the net, but they prevented the Minutewomen from getting another goal before halftime.

In the second half, Xavier came out with a different formation to throw the Maroon and White off-balance.

"In the second half, Xavier came out really hard in the new formation, and put a lot of pressure on us," Matz said.

However, the Musketeers didn't do much to stop UMass.

Instead it was Stoll who gave the Minutewomen another insurance goal.

"We were fortunate that Sydney scored her second goal," Matz said. "She's been out for most of the year. I think having a dangerous striker like Sydney Stoll out there toughens things up because teams have to respect her."

The Minutewomen out-shot the Musketeers, 13-5, in the game.

Matz believes that the team is becoming more competitive since the loss to Charlotte on Oct. 1st. With the return of injured players, the team's confidence is at a high.

This article is special to the Daily Collegian from Xavier Newswire and Flyer News (Dayton).

Forward Deanna Colarossi, whose offensive was absent in UMass' 5-0 loss to Dayton this weekend, dribbles the ball up the pitch.

Rutgers student death related to harassment

By Melanie Muller
Collegian Correspondent

The nation was shocked last week when Tyler Clementi, a freshman student at Rutgers University, jumped to his death last week from the George Washington Bridge.

Despite the fact that numerous college students commit suicide each year, Clementi's death was particularly unnerving as his death is one of the four recent suicides prompted from bullying a student's homosexuality or alleged homosexuality.

Dharun Ravi, Clementi's roommate, allegedly streamed live video on the Internet of Clementi engaging in a sexual encounter with another man from the room of another freshman, Molly Wei. The night of the video's taping, Ravi's Twitter post read, "Roommate asked for the room 'till midnight. I went into molly's room and turned on my webcam. I saw him making out with a dude. Yay."

Ravi and Wei have been charged with invasion of privacy under New Jersey law, which carries a maximum penalty of five years in prison. Hate crime charges are being considered for the pair, which would lengthen a potential sentence to 10 years, according to a New York Times article, "Legal Debate Swirls Over Charges in a Student's Suicide," published Oct. 1.

Hours before taking his own life, Clementi's Facebook status read, "jumping off the GW bridge, sorry."

University of Massachusetts students were saddened at the news of the Clementi's death. Freshman Sarah Zuraw said she thought the whole affair was "pretty terrible." Evan Sheinhait, also a freshman, was "surprised at how quickly it had all escalated and that the suicide happened so early in the semester."

The news of the suicide caused outrage from the American media. Television personalities including Katie Couric and Ellen DeGeneres decried the taping on their shows and the event has been discussed extensively in the New York Times, Huffington Post and on television news networks.

The case has been discussed in light of the plight of gay teens generally, who commit suicide at four times the rate of straight teens, and of the growing phenomenon of cyber-bullying, according to a New York Times blog entitled, "Motherload."

The reaction at Rutgers was strong as well. Candlelight vigils were held, as well as a protest by gay students for safe spaces and general safer living on campus. According to the Examiner, Rutgers students debated whether the taping was

Lt. Gov. Tim Murray on Obama's MA visit

By Sam Butterfield
Collegian Staff

Lieutenant Gov. Tim Murray discussed President Barack Obama's Saturday visit to Boston to support the Deval Patrick campaign in a short conference call with a group of Bay State reporters Monday night.

After a brief introduction from Murray's communications director, Alec Loftus, Murray came onto the line around 8 p.m., greeting the reporters and outlining the logistical details of the event.

Obama will appear at 1 p.m. with doors opening at noon at the Hynes Convention Center on Boylston St. in Boston's Back Bay neighborhood. Murray informed the reporters that there will be "airport style security," at the rally, and then detailed what attendees can expect to hear from the President.

"We think it's a great opportunity for us to kick off the final push, the final two-and-a-half weeks to election day, to talk about our record of adding jobs," said the Lieutenant Governor, who formerly served three terms as mayor of Worcester.

"We've created 65,000 jobs since the first of the year, number one in the country in our job growth rate," continuing to elaborate on the administration's accomplishments and citing the Commonwealth's health care plan, educational accolades and veterans' care programs.

See MURRAY on page 3

Race for lieutenant governor heats up as elections approach

By Sam Butterfield
Collegian Staff

The race for Lieutenant Governor in Massachusetts will likely come down to the running mate of whichever candidate is elected governor of the Commonwealth. On Nov. 2, voters will decide between four candidates for governor of Massachusetts: incumbent and Democrat Deval Patrick, Republican Charlie Baker, Independent Tim Cahill or Green-Rainbow candidate Jill Stein. Presently, it appears Patrick and Baker have drawn the race closer to a two-man contest, but Cahill and Stein continue to attract support from the state's Independents and unaffiliated voters.

Their deputies running for Lieutenant Governor are Tim Murray, Patrick's running mate and the former mayor of Worcester, Richard Tisei, the State Senate Minority Leader, and Stein's deputy, Bollyoke resident and activist Rick Purcell. In a surprise twist, Cahill's partner, former state representative Paul Loscocco, dropped out of the race, as support for the third-party candidate and State Treasurer dwindled.

With Patrick and Baker locked in a statistical dead heat, according to recent Boston Globe polls, the contest appears to be coming down to the two major parties' candidates, Murray and Tisei.

Murray, a native of Worcester, attended Fordham University in New York, and then attended law school at the Western New England College School of Law in Springfield. He made his debut in politics in 1997, serving on the Worcester City Council. He remained on the council until he was elected mayor in 2001. He was the Bay State's second-largest city's mayor for three terms. As mayor, Murray was the chair of the Worcester School Committee, which includes some 24,000 students, according to his website.

In Nov. 2006, he was elected Lieutenant Governor after he beat out Democratic opponents Deborah Goldberg and Andrea Silbert to win a spot on the ticket with Deval Patrick.

During his term in as Lieutenant Governor, Murray has served on the Governor's Council on Veterans' Services, the Governor's Councils on Housing and Homelessness, and has worked with the railroad corporation CSX to bolster commuter and freight rail traffic in the Commonwealth, according to his website, timmurray.org. Murray has also taken over

Student suicide after video exposed online

Students gather for candlelight vigil at Hofstra University to commemorate Tyler Clementi.

RUTGERS from page 1

in fact a crime or merely a "thoughtless prank."

In Rutgers' student newspaper, the Daily Targum, the editorial board criticized those who protested outside the student center, claiming they and certain members of the media were "exploiting" the tragedy. In the Oct. 5 editorial entitled "Media Exploits University Tragedy," the editors denied the legitimacy of gay groups using the tragedy as a rallying point, writing, "the focal point of Clementi's tragic death should have been a boy's inability to deal with the hardships of life."

The editorial inspired a huge debate on the Targum's website, with 419 comments posted as of Monday night. By comparison, both of the Targum's Monday editorials netted a total of three comments. Some comments attacked the use of "the hardships of life," to refer to Ravi and Wei's actions. A number of comments called for the expulsion of Ravi and Wei and criticized the Rutgers administration for failing to discipline Wei and Ravi.

It is not yet clear whether Rutgers will discipline Wei and Ravi. The Rutgers Student Code of Conduct contains a clause designating "making or attempting to make an audio or video recording of any person(s) on University premises in bathrooms, showers, bedrooms or other premises where there is an expectation of privacy with respect to nudity and or sexual activity, without the knowledge and consent of all participants subject to such recordings," a separable offense, according to the Rutgers Student Code of Conduct.

According to the New York Times article "Before Suicide, Hints in Online Musings," published on Sept. 30, there is evidence that Clementi informed a residence assistant of his situation less than 24 hours before his death. According to a blog titled "Kashmir Hill" on Forbes.com, messages posted onto a site for gay men from a computer at Rutgers seem highly likely to have originated from Clementi. The user "cit2mo" details his roommate's spying on him with a webcam and asks for advice on what to do. In the final posts, the writer says, "went to the nearest RA." to complain, who he said, "Seemed to take it seriously." The RA allegedly asked cit2mo to, "email him a written a written paragraph about what exactly happened."

UMass residential assistants Alex Tasak and Daniel Child said that if faced with a complaint of a roommate streaming video onto the internet they would "immediately refer the matter to the Residence Director of their cluster.

"I would first talk to the roommates separately, and ask the victim if there was anything I could do to help," Child said, "and then ask the other one 'what were you thinking?'" Tasak and Child agreed that the offender would then most likely be expelled from student housing. Tasak also noted that if the victim of the invasion of privacy seemed distressed she would escort them to Mental Health Services.

The UMass Student Code of Conduct does not specifically designate nonconsensual recordings as an offense, but the document does list "harassment" as a violation of the code. The term "harassment" is defined broadly, with special concern reserved for "incidents in which students are subject to such conduct because of membership in a particular racial, religious, gender or sexual orientation group, disability or veteran status."

AOTC tax credit

President Barack Obama recently explains the impact of the American Opportunity Tax Credit to college students.

President Barack Obama is trying to move forward on his agenda to make college more affordable for American students. According to a press release from the White House, Obama will hold a meeting today with college students and their families to explain the impact of the American Opportunity Tax Credit (AOTC). The credit is part of the American Recovery and Reinvestment Act.

The president has proposed to make the tax credit permanent in his FY2011 budget.

The treasury department has analyzed how the AOTC has made college more affordable and will release a report today unveiling its findings. According to the report, the AOTC has increased higher education tax benefits by over 90 percent, which helped over 12.5 million college students in 2009 pay for school. The number of students receiving aid from the tax credit increased by 400,000 from 2008 to 2009.

On average, recipients received $1,700 in tax credit in 2009, an increase of 75 percent over the Hope Credit or Lifetime Learning Credit recipients in 2008.

According to the treasury department report, 4.5 million students and families received a tax refund averaging $800 because of the refundable AOTC in 2009. Unlike the Hope Credit, which only is available two years, the AOTC is available for students for the duration of their undergraduate careers. If the AOTC is made permanent, a student could receive $10,000 over four years.

The AOTC phases out at a higher level than the Hope Credit did in the past. The Hope Credit phased out between approximately $100,000 and $120,000 for married couples who filed together and an estimated $50,000 to $60,000 for single taxpayers, while the AOTC phases out at about $160,000 and $180,000 for married couples and approximately $80,000 to $90,000 for single taxpayers.

According to the report, this provides American families with a larger tax credit. Along with creating the AOTC the American Recovery and Reinvestment Act increased the Pell Grant to $5,550 for the 2010 and 2011 award year.

Obama visits Boston to show Dems support

MURRAY from page 1

The rally will highlight, "our record of making tough decisions and bringing efficiency to government," he said, it "allows us to bring some energy and get the word out and go in the final two weeks to help us spread that message."

Lt. Gov. Murray then opened the field to questions from several reporters who remained on the line.

A student-journalist from the Boston University Free Press asked Murray his primary goals for the final two weeks.

"It's really trying to identify our voters," he said, "sway those who are undecided and really begin our 'get out the vote' efforts for the final weeks leading up to election day, continuing to push the message out, convincing the undecideds and appealing to our Democratic base and others to show up Nov. 2."

Another journalist asked Murray what parts of the state budget a second Patrick-Murray administration would work to shave.

"If you're talking about a $2-2.5 billion cut, virtually every area of the budget will be impacted," said Murray, referencing budget reforms Republican gubernatorial candidate Charlie Baker has proposed. "But those areas I would see being most impacted would be local aid, which aids cities and towns, libraries, public health, Chapter 70, which gives Bay State aid to schools would be adversely impacted [and other programs]."

"You really are talking about $2.5 billion out of the budget, everything is impacted, some programs being done away with altogether, which is why the Governor and I are in opposition, we want people to be clear eyed about what's happening to the state, and we think a more reasonable approach is that we continue to add jobs and get out of the recession," he said.

Murray added that he and Patrick feel that once the Commonwealth has righted itself, the administration would be open to "having a conversation to move the sales tax back to 5 percent."

The Collegian next asked Murray what he feels will be the most significant issues affecting the campaign up to election day.

"I hope it'll be about jobs and what the respective tickets have to offer for solutions," he said. "You know, there's been, I think in the campaign a lot of rhetoric, and not rhetoric. I would say, finger pointing, pretending there are easy answers to our problems, and in order to be talking about reductions or talking about transportation reform, welfare reform," the Lt. Governor said, there need to be "real solutions."

Murray then attacked the Baker campaign's record on health care and welfare reform, as Republican Lt. Governor candidate Richard Tisei led an effort to tighten welfare regulations in the early 1990s, and Baker served as CEO of Harvard Pilgrim health care.

"We've got a record of taking on the health insurance companies, and Charlie Baker was CEO of Harvard Pilgrim recently."

"I'm hoping [the remainder of the campaign] is about real solutions and how we're going to continue to grow jobs in Massachusetts," he concluded.

Doors will open for the Obama appearance in Boston at noon Saturday, with the President's speech kicking off around 1 p.m.

Sam Butterfield can be reached at sbutterfield@dailycollegian.com.

Reaching Beacon Hill is the goal for this election season's potential governors and lieutenant governors. Polls show Baker and Patrick in a dead heat, as well as their respected running mates.

Richard Tisei (left) is the lieutenant governor candidate representing the GOP. His opponent, Rick Purcell, (right) is the Green-Rainbow party candidate. The candidates are also running against incumbent Tim Murray.

Running mates square off for the approaching Nov. 2 election

LT. GOV from page 1

the position of Eastern Region Chair of the National Lieutenant Governors Association Executive Committee and is the Secretary-Treasurer of the Democratic Lieutenant Governors Association.

The 48-year-old Tisei, Baker's running mate, represents the Middlesex and Essex district of the state in the Massachusetts Senate. The Wakefield, Mass. native graduated from American University in Washington, D.C. and almost immediately ran for state representative. He became the youngest Republican ever elected to the Massachusetts General Court when he won office in 1984.

He served as a state representative until 1990, when he won a seat in the State Senate. Also in 1990, he was tabbed as former governor William Weld's Campaign Chairman, according to his website, richardtisei2010.com. In 1997, he became assistant minority leader, taking over as Senate Minority Leader in January 2007.

According to his site, Tisei earned a high rating of 93 for fiscal conservatism from the anti-tax organization Citizens for Limited Taxation. He also voted against the Commonwealth's recent sales tax increase. Among the legislative accomplishments his website lists are his involvement in a 1993 welfare reform law, and his sponsorship of the Whistleblower Protection Law. He also worked on a State House effort to shelter health care industry workers who report their employers for patient abuse and unsafe conditions from retribution, according to his campaign's site.

Tisei, who is openly gay, is also the owner of Northrup Realtors, based in Lynnfield, Mass.

Purcell, the Green-Rainbow Party candidate running alongside gubernatorial candidate Jill Stein, is a resident of Holyoke, and, according to his campaign's site, rickpurcell.org, "a distinguished community activist," as well as a worker in the health care industry and a 10-year veteran of active duty in the U.S. Army.

A native of the Tohatchi Indian Reservation in N.M., Purcell moved to Massachusetts with his family in 1974, splitting time between Holyoke and Chicopee. He served in Operation Desert Storm as an air medic, has worked for Baystate Health Systems and has worked on various community efforts.

Among the efforts he has contributed to are a campaign to fight the privatization of Holyoke's waste management services, a ballot initiative to start a police commission, and an unsuccessful 2006 run for City Council.

With Patrick and Baker polling at 35 and 34 percent respectively in the latest Boston Globe gubernatorial race poll, the lieutenant governor's race is sure to be close, as well. In the Sept. 26 poll, Tim Cahill earned 11 percent of the vote, and Stein took four.

"If we don't believe in free expression for people we despise, we don't believe in it at all." Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

Israel slips in wrong direction

I have two words for the Israeli Parliament: wake up.

The Knesset, the Israeli equivalent of our Congress, passed a new law stating that any non-Jew who wishes to become an Israeli citizen must "pledge allegiance to Israel as a Jewish and democratic state." While this may seem initially a non-issue, as every country requires new citizens to pledge allegiance to their country, I see many problems with this new law, both as an American and an Israeli citizen.

Roy Ribitzky

These "loyalty oaths" will merely add fuel to the fire raging in the Middle East.

Instead of trying to accomplish full peace, the Israeli government is starting to exclude people based on their perceived loyalty to the state. Sounds painfully similar to what other corrupt nations have done in the last century. Do Prime Minister Benjamin Netanyahu and Foreign Minister Avigdor Lieberman really want peace? Or do they want to further advance racist goals?

In other words, these loyalty oaths are similar to our 'Patriot Act' which racially profiles non-whites in some misconceived notion that only Arabs commit terrorist acts.

For starters, not everyone in Israel is Jewish. Why should the Arabs living in Tel Aviv and Jerusalem be forced to pledge to a religious ideology that is not their own? Will my loyalty be questioned on my trip back to Israel as an open atheist? This new law gives an excuse for the ultraconservative right wing of Israeli politics to strip non-Jews of their citizenship. In other words, these loyalty oaths are similar to our "Patriot Act," which racially profiles non-Whites in some misconceived notion that only Arabs commit terrorist acts.

The conservatives' reasoning for this new law is to demand recognition of the Jewish state. It is undeniable that many nations do not recognize Israel as a legitimate state, but you don't gain respect by jamming it down people's throats. As the Knesset Speaker put it, "the establishment of a Jewish state in the Land of Israel was an ethical act" and that does not warrant a law recognizing this.

If Israel is to truly be a democracy, this law is a step in the wrong direction, fostering religious domination within a society. The Dark Ages taught us something: religious rule does not fair well for most people. Then how is it possible for a people who have suffered so much and endured the worst of crimes committed against them, that they are now using similar methods to weed out "enemies of the state?"

In refusing to extend the settlement-building freeze, passing this new law and hiring a known and open racist as foreign minister, Prime Minister Netanyahu is sending Israel into a diplomatic abyss. I do believe in the right for Israel to exist. I also believe in the right for Palestinians to eat in the same café's as I do, to visit the same beautiful beaches as I do and to worship the religion of their choice. Lieberman and Netanyahu have reared their ugly smirks at the rest of the world and spat in the face of the countries working so hard to see peace in the region.

American Jews expressed immense outrage when the law was first introduced to the Knesset floor. What I wanted to see was condemnation from the Obama administration. Current conservative policy in Israel is seriously making me question just how much influence the United States has in the Israel-Palestinian conflict. In my opinion, we are not pressuring the current Israeli administration hard enough. As an Israeli citizen, I do not want to see my parents' homeland get destroyed by war or politics. Unfortunately, it becomes clearer to me that America has to make some difficult choices in how we support Israel.

For over 60 years, men and women have fought for the right to exist. My parents immigrated to America so that my siblings and I would not have to face those same battles. But what does it say when people our age are still fighting this war?

Hamas, Hezbollah and other terrorist organizations and states are not helping the situation either. At some point though, we need to point the finger at ourselves and ask: "what are we doing wrong? What can we do better?" For sure we can do better – America and Israel. It was a disgrace when the prime minister was elected. Everyone knew his stance on the conflict.

What we get in return is alliances with ultraconservative parties and futile peace talks. The arrogance, intolerance and stupidity of the current Israeli administration will tear the region apart. The sad part is that this law may only be the tip of the iceberg. If the religious faction gains more power in the Knesset – a faction no different from the radical Islamic and Christian terror groups – Israel will lose any support it has in the world.

Many people can ignore this situation and live their lives without ever hearing about the Knesset, the Palestinian Liberation Organization or Hamas. If we let politicians in Israel and America fail at signing peace with our enemies, the hole left to the east of the Mediterranean will create a vacuum of bureaucracy, terror and hopelessness.

Israel is on the verge of becoming a permanent warring state. The only way to prevent this from happening is to reverse the racist laws, permanently remove all the settlements and remove the few individuals representing the minority. When a minority like the conservatives in Israel rule, it is no longer a democracy, but a militant, theocratic state.

Statistical 'factiness'

Daniel Patrick Moynihan, who served as Senator from New York for 24 years, once said that "everyone is entitled to his own opinion, but not his own facts."

Various figures have tossed this quote around quite a bit, usually to bash someone or other with whom they disagree.

Ben Rudnick

As simple as the saying seems, it is important to remember that like many such obvious truths, it is not entirely true.

For one thing, it is entirely possible for people to come to differing opinions of an issue not only using different sets of facts, but also using identical ones.

This is especially true with regard to varying political views of big issues such as taxes, global trade or pay equity. This brings me to one of the great scourges of our times: statistics.

I have already addressed some of the unknown facts regarding the history of our tax policies, as I have exposed some of the hidden truths of the war on drugs, but there are two statistics that are often cited that masquerade as facts because they are technically true, but do not reveal the whole story of their respective issues.

The first is the oft-mentioned "fact" that because of the huge drop in the number of manufacturing jobs in the U.S., it is clear that we do not make anything here anymore.

I have seen this belief repeated in car commercials, have heard it bandied about on political chat shows and now it has made its way onto the floor of Congress.

Boston Globe columnist Jeff Jacoby notes in the Globe's Oct. 6 issue that there is a trade war brewing between the U.S. and China.

Jacoby examines a tariff bill under debate in Congress and decries the protectionist impulses it represents.

Based on that, I would be more concerned about SkyNet and the Terminators taking power over humanity than I would be about China stealing all our jobs.

Jacoby highlights the fact that part of the argument is based on the shrinking U.S. manufacturing sector, but that while the number of people employed in manufacturing has decreased by something like 33 percent or more since the 1970s, actual manufacturing output has risen by at least 250 percent.

The truth is that a far greater portion of the drop in American manufacturing employment results from the huge increase in our productivity rather than the massive outsourcing of jobs decried by so many anti-capitalist and anti-free trade voices.

While many new factories and the jobs that go with them have opened in China to make inexpensive goods for our markets, it is disingenuous to claim that all of America's manufacturing jobs have been shipped overseas.

We have simply gotten hugely better at producing even more goods using fewer workers by relying on robotics and other technologies.

Based on that, I would be more concerned about SkyNet and the Terminators taking power over humanity than I would be about China stealing all our jobs.

The other statistical "fact" I would like to address is the gap in pay between women and men in America.

In an April 2007 posting to Reason.com, Steve Chapman comments on this gap and notes that the Democrats' presidential candidates had all endorsed legislation to fix the problem.

But the problem may not even exist.

This is not to say that there is not inequality between men and women, or that gender equity is not an issue that we still need to grapple with as a society, it simply means that the widely-quoted fact that "women make only 77 cents for every dollar paid to men" is true only to a very small degree.

In his 2008 book, "Economic Facts and Fallacies," award-winning author and scholar Thomas Sowell tackles the issue of the pay gap and details why it is so misleading.

The statistic is used to criticize the difference in pay between all women and men without factoring in the very different life choices that individuals make.

Sowell disapproves of this generic approach and concludes that among "college-educated, never-married individuals with no children who worked full-time and were from 40 to 64 years old ... men averaged $40,000 a year ... while women averaged $47,000."

In other words, when you compare women apples to men apples, as opposed to all working women to all working men, the women come out $7,000 ahead.

Mark Twain once said that "Facts are stubborn things, but statistics are more pliable," and this is clearly more true today than ever.

The two examples I have given are a cautionary tale in that they show that even when they are literally true, statistics can lie.

Whenever someone starts throwing a bunch of statistics at you in support of an argument and I include myself in this, make sure you understand where they got their information from.

It is all well and good to remember Daniel Patrick Moynihan's adage, but always keep in mind that Twain went there first and his warning is just as true, if not a little bit more.

S P Sullivan

THE S.P. SULLIVAN MEMORIAL PRIZE FOR HAIKU WRITING

E-mail us your haikus!
The winner each week will be published and receive a prize.

A haiku is an old form of poetry from Japan, originating from around the 17th century.

In English, haikus have usually been 17 syllables on three lines: five, seven and five.

S.P. Sullivan, former Collegian Managing Editor, was a major proponent of the haiku.

Eco-friendly bags bagged following noise complaints

SunChips is now discontinuing their line of biodegradable bags after Facebook groups and other complaints sprung up against the noisy bags. The bags, which were made of polyactic acid, a plant product, made the bags louder than their plastic counterparts.

Tim Cheplick

Virtually all other chip bags are made of plastic, whose main component is petroleum. According to a study made in 2007 by online market research firm InsightExpress for chemical giant Metabolix, Inc and food processor Archer Daniels Midland, 72 percent of Americans don't realize plastic is made from petroleum.

With oil reserves dwindling at a pace of 85 million barrels a day, the superabundance of plastics in our daily life, the accumulation of plastic junk in our expanding landfills and the increasing price of oil as it runs out, one would think that alternatives to petroleum-based bags would be embraced.

In the case of the SunChips bags however, the noise that they made was too much to handle for too many people. The company saw their sales decline by 11 percent last year and is attributing this to the bags.

As oil production peaks, which most experts say is happening now or will happen in the very near future, oil will become increasingly scarce and expensive. Most oil goes towards powering automobiles (we only get four percent of our electricity from oil), but 10 percent goes towards making plastics.

In your dorm or apartment:, the phone, laptop, TV, refrigerator, microwave, beverage and food containers, pens, speakers, calculator, trash bins, lamp, binders, alarm clock, tape, ear buds and shoes are at least in part made of plastic, and thus, are petroleum products. Everything else in your room is also somehow linked with oil usage. Your clothes for instance were grown with petroleum-based fertilizers and transported to the warehouse and store by trucks, planes, ships or trains burning oil.

When the price of oil goes up, it affects more than just the price at the pump. It affects the price of almost everything.

If Americans can't even make a sacrifice like putting up with noisier bags, which is just such a burden, how will they cope with bigger lifestyle changes like taking public transport, which currently accounts for just 12 percent of trips?

That is if you can even call putting up with noisy bags a sacrifice. It shows us how stubborn and ignorant we are of the problems facing us.

How high-strung do you have to be to get upset over a noisy chip bag? Especially when you should be able to realize, from the huge print on the bag, that the reason for this is that they are compostable. I am optimistic enough to think that most people know what that means and that it has a positive connotation in their minds.

On the other hand, one might ask why anyone should be so upset about the loss of the noisy bag, since it is just one of many products and it's influence on oil levels and prices is minuscule.

I think that the resistance to the bag is mostly symbolic. It shows us how disturbingly little we're willing to sacrifice. That is if you can even call putting up with noisy bags a sacrifice. It shows us how stubborn and ignorant we are of the problems facing us. People want energy independence and they don't want to fight wars in the Middle East over oil. People want cheap chips, too. But those same people will resist even the tiniest of changes.

Like it or not, as oil becomes more expensive, companies will look for alternatives to keep prices down and the options may not always look and feel the same or even be of the same quality as the petroleum-based products before them.

Nosier bags of chips should be the least of our concerns. The medical industry, for example, has become dependent on plastic in the form of sterile containers and disposable syringes. Sufficient alternatives will be hard to come by.

But besides making products with petroleum, there is the problem of what to do with the products upon disposal. A shift towards biodegradable bioplastics like the SunChips bag can alleviate some of these problems, which present themselves in the form of over-filling landfills and the 10-million-square mile swirl of mostly plastic junk in the Pacific Ocean known colloquially as the "Great Pacific Garbage Patch."

According to their website, SunChips will continue to use the compostable bags for the original flavor, claim to be committed to improving upon the bags and "look forward to introducing the next generation compostable bag."

SunChips bags are just a small part of the big picture, but the resistance against the bags may indicate something much greater.

Tim Cheplick is a Collegian columnist. He can be reached at tcheplic@student.umass.edu.

"Fear of a name increases fear of the thing itself." - Harry Potter & the Sorcerer's Stone

ARTS@DAILYCOLLEGIAN.COM

Hoffman makes directorial debut

By Kevin Mele
Collegian Staff

In his directorial debut "Jack Goes Boating," Philip Seymour Hoffman plays Jack, a lonely man living in Manhattan and working as a limo driver. The opening shot holds stock-still on Jack's lackluster mug, his eyes staring lifelessly out of his skull as he lies in bed.

This may remind Seymour Hoffman fans of the opening scene of "Synecdoche, New York", a film written and directed by Charlie Kaufman in which Hoffman stars, also as a depressed loner type. In Kaufman's film, though, he has the excuse of being an agonized artist, whereas in "Jack Goes Boating," there's no reason for Jack's life being so miserable. It just is.

Jack goes boating – and not much else. But this shortage of activity doesn't detract from the film. If anything, the film's narrow scope actually works to its advantage, yielding a kind of dense, truthful character study.

As the misery mounts, the film begins to make you laugh. It's the dead of winter and Jack's day-in and day-out existence is so stultified that it makes you want to cry.

At this point, his friend Clyde offers to set him up with an "assistant embalmer," a friend of his wife's. For Jack, this is adding insult to injury, as he winces, shakes his head and gasps in disgust. His misery, broaching the absurd, becomes funny.

Despite Jack's initial reservations, it turns out that Connie, who really only answers telephones in an office that offers mortuary services and has no hand in the actual embalming, is probably the best thing that ever happened to him. On their first date, Connie goes off on this odd monologue about the drawn-out and freakish death of her father and as it grows worse and worse, the listening Jack knows no other way to respond than to keep issuing a disgusted "God," over and over again-to the point of absurdity.

It's strange to laugh when the characters on screen remain so serious. But the theme of death is just too persistent in this film for the viewer to do anything but laugh at it.

But it's not all funny. Jack and Connie form a relationship that saves them both. The small things that connect them manage to lift them out of death and despair. For instance, on one of their walks, with snowflakes falling all around, Connie happens to express a feeling of nostalgia for boating in the summer.

This softly-spoken reminiscence, whimsically entertained by Connie, does something to Jack. He begins to try to make it happen. Only, first, he has to learn how to swim.

Later, Jack learns that Connie has never had anyone cook for her. Something begins in him again. We slowly see the emptiness in Jack's demeanor subside as he sets to work learning how to cook and swim.

The swimming pool and the hot plate suddenly become endowed with new significance. However trivial they may seem as objects, they are now places of work and places of life. He practices and prepares. It's a huge change from the nothingness of that gray visage at the beginning of the film, with Jack just lying in bed with nothing to do. It was fascinating to watch how one man, who had nothing, began to have everything and all it took was someone else.

The film takes you from a profound sadness at the beginning to a taste of happiness at the end, with Jack and Connie boating on the lake in the summer, their relationship just beginning.

The process of getting there is a pleasure to watch and the humor that manages to tinge both the sad moments and the happy moments is really remarkable. It's a film worth seeing, regardless of whether or not you're a fan of Seymour Hoffman.

Kevin Mele can be reached at kmele@student.umass.edu.

Supporting the stars of "Jack Goes Boating" (Philip Seymour Hoffman and Amy Ryan) are costars John Ortiz and Daphne Rubin-Vega, who also were cast in the 2007 play by Bob Glaudini.

(SCREENCRAVE)

Katherine Heigl and Josh Duhamhel aren't quite prepared for the difficulties of parenthood in romantic comedy "Life As We Know It." Although predictable, the actors' chemistry is undeniable.

'Life As We Know It,' predictable but fun

By Malea Ritz
Collegian Correspondent

"Life as We Know It" begins by drawing in viewers to witness the humorous first date of two very different people: Holly and "Messer," played by Katherine Heigl and Josh Duhamel. They are set up on a blind date by mutual friends, Peter, played by Hayes MacArthur, and Alison, played by Christina Hendricks. Holly and Messer quickly realize that they are simply wasting each other's time. Noticing the lack of interest, the two end their date as quickly as possible, hoping to never see each other again.

Unfortunately for the pair, they are reunited for every major event in the lives of their friends from their wedding to the birth of their first child, Sophie. Separately, their lives are everything they have ever wanted. They have both have the perfect careers for their lifestyles. When they are brought together, they do nothing but antagonize each other. They can never put their differences aside, even for the own good of their friends, but with one phone call, life as they know it changes forever.

After being notified of the death of their two friends in a tragic car accident, questions are raised about what will happen to the orphaned child. After meeting with Peter and Alison's lawyer, Holly and Messer are struck with a greatly significant surprise. Unbeknownst to them, they have both been assigned as the legal guardians of Sophie, in the event of the sudden death of their friends. Holly and Messer are in disbelief that a topic so substantial was never brought to their attention. Unable to agree on anything, they decide their best option is to look for other family members to care for Sophie rather than them.

After looking into other possibilities, they conclude that they are the best possible "proper" guardians for Sophie. They are forced to restrict their career plans in order to do what is best for her. They begin by moving into Alison and Peter's home in order to make the easiest transition for the child. The sudden transformation from career-oriented adults to parents is enough to make them wonder if they really were the right choice. After realizing they are living in the shadows of ghosts, they decide to make some changes to make the house more of their own home.

The neighbors are a little uncertain initially whether Holly, Messe, and Sophie will survive as a family. After getting to know them personally, they see that there is hope for Sophie's future. The neighbors try to help them in any way possible, as they fall in love with Holly and Messer as a couple.

From here on out, this romantic comedy becomes a predictable love story. Katherine Heigl and Josh Duhamee put their differences aside in order to work together for the well-being of Sophie. While it is cute and witty,

See LIFE on page 6

'Never Let Me Go' falls short of book

By Andrew Cogan
Collegian Staff

"Never Let Me Go" is the movie adaptation of Kazuo Ishiguro's stunning novel about three British school children that are tragically unaware of the special purpose a dystopian society has ordained for them. Set in an alternative late 20th century Britain, the three friends, Kathy, Ruth and Tommy look back on their past and grapple with the dim prospects of their future.

The film is directed by Mark Romanek and the screenplay is by Alex Garland. Carry Mulligan stars as Kathy, the main character and narrator of the story. Keira Knightley and Andrew Garfield play her friends in Ruth and Tommy. The beginning of the film features younger versions of the characters, each played by Isobel Meikle-Small, Ella Purnell and Charlie Rowe.

Book-to-movie adaptations are almost inevitably deficient when compared to their original form. Sadly, "Never Let Me Go" is no exception, though it's disappointing in a way you wouldn't expect. "Never Let Me Go" falls short, not by failing outright but by coming so close to capturing the essence of the novel. Frustratingly, the film leaves it hanging in the air, never fully expressed.

The problem arises from the decision to focus predominantly on the triangular love relationship between Kathy, Ruth and Tommy. This relationship is certainly the heart of the novel, buts it's also intended to reveal the characters' relationships with society at large, not just with themselves. Many of the scenes essential to conveying the former have been altered to reinforce the latter.

The film does not benefit from these changes because the love relationship is already a central theme, as it comes across strong enough on its own. As such, these changes only serve to detract from the main idea of the story.

Unfortunately, the problem of confusing themes is made even more acute by what the film does well. The acting is superb, with all three of the

See ISHIGURO on page 6

(SCREENCRAVE)

Izzy Meikle-Small, Charlie Rowe and Ella Purnell respectively each play the younger versions of the characters portrayed by Keira Knightley, Andrew Garfield and Carey Mulligan in Mark Romanek's adaption of "Never Let Me Go."

'Never Let Me Go' disappoints fans of Kazuo Ishiguro's novel

ISHIGURO from page 5

principle actors delivering genuinely moving performances. The tragedy and emotion of the novel is kept alive in them.

However, the emotion provided by the story has no context because the film does not adequately explain the reasons for it.

Unlike the novel, the horrible truth about the predicament of the characters and the society they live in is never pulled into plain sight. The film has to be inferred from dialogue, leaving viewers who haven't read the novel at a significant disadvantage.

This brings up an interesting point about the use of voice-over narration in the film. This device is used sparingly at the beginning and the end, as well as at transitional phases in the story. However, by limiting its usage, the film misses an opportunity to capture Ishiguro's stylistic prose, as well as the character insight and back story that is so crucial to understanding the full scope of the original novel.

Virtually every aspect of the film falls perfectly into place with the world beautifully imagined and captured on film.

The casting and the acting is spot on, but the film falls short in its overall vision. A lot of times this happens in book-to-movie adaptations, simply because it's unavoidable when shifting between drastically different mediums.

But in the case of "Never Let Me Go," this really didn't have to happen. It wasn't even a question of space in the film, and even if it was, the film's runtime is only 103 minutes. There could have been more scenes added if needed.

The real problem was staying true to the novel when it mattered, at the most crucial points in the story. Unfortunately, it was at those times when the film deviated most.

"Never Let Me Go" is certainly an achievement for Mulligan, Knightley and Garfield, whom despite everything give shockingly moving performances. But because of inadequate storytelling, audiences are not equipped to fully understand why the character's emotions are so powerful.

Andrew Cogan can be reached at acogan@student.umasss.edu.

'Life...' entertaining

LIFE from page 5

viewers can anticipate the stereotypical ending of this chick flick. Katherine Heigl and Josh Duhamel have great chemistry together; it is almost effortless. As a viewer, you will find yourself pushing for their relationship to work.

They started the movie as an unlikely couple, but with Sophie bringing them together for an unlikely cause they become a family. Although it is somewhat unoriginal, it is still an entertaining watch. It is not advisable to pay the ten dollars to see in it theaters, however. Wait for it to come out OnDemand or on Netflix.

It is a good chick flick to watch with your girlfriends on a night in. In the meantime, save your money for a movie that provides a few more surprises.

Malea Ritz can be reached at mritz@student.umass.edu.

Katherine Heigl co-stars in the romantic comedy "Life As We Know It" with Josh Duhamel. The pair's antics are enjoyable.

COURTESY TEMPLE MEDIA RELATIONS

Forward Bridget Settles helped the Owls snap a four-game losing streak with an assist on a game-winning goal against Saint Joseph's.

Settles receives second A-10 Performer of the Week award

BY STEPHEN SELLNER
COLLEGIAN CORRESPONDENT

Forward Bridget Settles of the Temple field hockey team continued her impressive start to the season by earning her second Atlantic 10 Conference Performer of the Week award.

Settles helped the Owls snap a four-game losing streak by assisting teammate Kaylee Keener's game-winning goal in their 1-0 triumph over conference rival Saint Joseph's.

The junior continued her success by scoring two goals in the Owls' 4-1 handling of Pennsylvania and is tied for third place in the A-10 with nine goals.

Settles also earned Performer of the Week honors on Sept. 7 for her two-goal effort in Temple's 7-0 blowout of Saint Francis and for her goal in a 2-0 win over Georgetown.

Settles' offensive production has the Owls tied for first place in the A-10, as they travel to La Salle on Friday for their next conference showdown.

WCU WINS IN OPENER

West Chester emerged victorious in its conference opener, defeating La Salle, 3-0.

The Rams (5-7) controlled the tempo throughout the contest, never affording the Explorers an opportunity to establish their offense.

Nicole Fiorilla began West Chester's scoring 10 minutes into the contest with her goal off a pass from Kate Zunski. The score proved to be all the offense the team would need.

A-10 Field Hockey

Goalkeeper Kristin Arnold earned her second consecutive shutout, thanks to a superb defensive effort with limited La Salle to two shots on net.

Nancy Stehman continued the WCU offensive production, scoring just two minutes into the second half. An additional insurance goal by Alisha Moran with three minutes left to play sealed the victory.

The Golden Rams dictated the pace of the game, forcing the Explorers to react to the opposition as opposed to setting up their own offensive sets.

Open passing lanes and precise ball movement helped WCU produce 11 shots on goal, with La Salle goalkeeper Emma Ruth stopping eight attempts.

The Golden Rams appear to be a contender in the conference, as West Chester is tied for first in the A-10 with Lock Haven, Massachusetts and the Owls.

WCU travels to Saint Joseph's on Friday to continue conference play while La Salle hosts Temple.

HORDENDORF LEADS LHU

Lock Haven earned its first conference win of the season, defeating Richmond 2-1 last Friday.

Amy Hordendorf scored in the 15th minute to give the Bald Eagles the lead on a pass from Leslie Ahern.

Hordendorf is off to a fast start this season, ranking first in the A-10 in shots, goals and points, with 55, 13 and 29 respectively.

Richmond tied the game 10 minutes later on senior Dani Pycroft's fifth goal of the season, assisted by Chelsea Davies.

Ahern scored the game-winning goal for the Bald Eagles on an assist from Hordendorf, sealing the Lock Haven victory.

LHU continues conference play with a visit to the University of Massachusetts on Friday, while the Spiders visit Saint Louis.

Stephen Sellner can be reached at ssellner@student.umass.edu.

Eagles take down UM

BY NICK O'MALLEY
COLLEGIAN STAFF

The Massachusetts rugby team was chomping at the bit to finally face off against Boston College. But the game that was three weeks in the making was out of reach for the Minutemen, who fell to the Eagles, 30-15.

Late in the first half, after a successful try and conversion, UMass looked to be in position to turn the tie game in its favor before the half. But a Minutemen pitch was picked off and run back by the Eagles untouched for the score to take the lead permanently.

The miscue was one of many for UMass, which had not taken the field since its 66-17 win against Connecticut on Sept. 8. Referee miscues and mishandlings by the team forced a forfeit against the Eagles earlier this season on Sept. 25, while putting its Oct. 2 game against Northeastern in limbo.

In the first matchup against BC, the referee failed to arrive on time for the game, leaving UMass in a vulnerable position in which they were afforded two choices by the Eagles squad: Play a friendly or forfeit. By this time, a substitute referee had arrived but Minutemen coach Tony Neverson says that BC had no interest in playing an official game.

With his team already facing a number of injuries, Neverson waived the friendly and took the forfeit, playing his younger B-side and C-side players. The result left the coach and his players jaded from the match and looking forward to Saturday's matchup with seething anticipation. Neverson himself was disappointed in BC's choice to go for the forfeit rather than play two weeks ago.

"A team will do what is in their team's best interest," Neverson said. "To say that I would not have asked for the forfeit, it's not keeping within the honor and the integrity of the game, where you want to decide it on the field."

Neverson also said he'd never been as excited for a game so much in his 30-plus years of rugby experience. But what disappointed the UMass coach most was after the Minutemen asked to put out the B-side and C-side teams to give them experience, BC initially agreed but later decided to put out their starters against the younger UMass players.

BC	30
UMass	15

The second meeting, though, was heavily marked by Minutemen miscues, evidence that they had not seen live game action since the season opener.

"Today, I think, was a case of us being idle for a couple of weeks, two games," Neverson said. "Everyone else has had their full slate of games and we've been idle for two weeks, so I think we were a little bit rusty."

Backs captain Edaun Pickholz agreed, saying that scrimmaging in practice is no substitute for live game action against a real opponent.

"It was the simple things that killed us," Pickholz said. "We kind of beat ourselves. The thing about rugby is, because of how aggressive the game is by nature, if you take two weeks off from that, it's hard to get back into the flow... You can work on fitness in practice, but there's nothing like a game."

After halftime, the Eagles gained the upper hand in terms of momentum, putting up two penalty tries to stretch the lead to 23-10.

UMass would strike again, however, as an Eagles penalty gave the Minutemen a free rush just meters away from the goal line. The first pitch, though, was fumbled back to BC in what appeared to be a costly mistake. But a quick UMass recovery set them up just beyond 20 yards out as good execution by the forwards resulted in a breakaway by flanker Connor Carroll, with a missed conversion bringing the Minutemen within eight points.

In the waning minutes, BC continued to work its way deliberately down the field, scoring with a final try and conversion to seal the win.

Following the A-side game, the UMass and BC B-side teams faced off, with the Minutemen pulling out a 23-15 victory.

There was a great amount of confusion following the first meeting between the teams as to why the referee had not shown up as expected. The problem, according to Neverson, turned out to have stemmed from an unpaid hotel bill from last season.

When the Minutemen were in Florida during the playoffs last year, a now-former member of the team was cited with a noise complaint in the team hotel, unbeknownst to Neverson or any other member of the rugby team.

The bill, which went without mention for months, was eventually sent to the UMass Athletic apartment, which, upon discovering the unpaid bill, froze the rugby team's spending account. Because the account was frozen, the referee that Neverson thought was hired for the game was not, and so the problems began to surface.

According to Neverson, neither he nor the team was made aware of the bill or the account freeze until after the game.

Nick O'Malley can be reached at nomalley@student.umass.edu.

The Minutemen couldn't avenge a forced forfeit in their last meeting with Boston College as they fell, 30-15. The UMass B-side team, however, earned a 23-15 victory over the Eagles' B-side squad.

JEFF BERNSTEIN/COLLEGIAN

The UMass offensive attack poured on a season-high five goals in its win over the Big Green on Tuesday. The previous high was four goals in a shutout victory against Saint Louis in the last contest.

Minutewomen score a season-high in goals en route to victory

F. HOCKEY from page 10

go for it and attack," Sowry said.

UMass improved to a 2-0 record in overtime games this year. Their first win came at Yale on Sept. 12, when it erased a two-goal deficit to win 3-2. Kelly's breakaway goal in overtime completed the comeback and her two-goal effort pushed her senson total to a team-leading 10 goals.

"[Kelly's] effort on a day-to-day basis is nothing short of 100 percent so I expect that everyday at practice and throughout the course of the game," Sowry said. "When it comes down to overtime, [Kelly's] been a great leader. She's an incredible competitor and she doesn't like to lose. Whatever gas is left in the gas tank, she finds a way. Fortunately, she's been on the receiving end of scoring some pretty crucial game winners."

Molly MacDonnell scored the UMass goal in the 25th minute off of an assist from Kelly. It evened the score at one before the Minutewomen scored two straight. Kim Young scored her second goal of the year as UMass built a 3-1 advantage at halftime.

Sowry was most impressed with her team's ability to score. The Minutewomen's five-score effort was the most goals they've put up in a game this year. They now have nine scores in their last two games.

"The most important thing is to be able to score more goals," Sowry said. "We haven't done that all year, and as we move forward into a very important weekend, putting that many goals into the back of the net is really pleasing. Any hard-fought wins, in particular in overtime, it really does a lot for your confidence."

UM looks to stay unbeaten

By Scott Cournoyer
Collegian Staff

In another Atlantic 10 match-up, the Massachusetts tennis team will travel to Rhode Island on Wednesday, looking to remain undefeated this season in conference play.

The team will be without one of its up-and-coming freshman, Yuliana Motyl, as she continues to battle illness since the start of the fall season. UMass coach Judy Dixon is confident in the depth of her top six in singles, the strength of this year's squad.

"We're not all there yet in terms of playing a great overall match," Dixon said. "We're slowly taking a step forward every day, which is always positive to see, but we need to continue to improve in all phases to be successful."

Just as Dixon did against Fordham on Monday, sophomore Julia Comas will be penciled in as the No. 1 in singles against the Rams. She will also compete in doubles as the No. 1 pair alongside senior Candynce Boney, who will compete in singles as the No. 2.

"Julia's a real competitor," Dixon said. "She knows how to turn it on and compete in a match all the way through, so I think it's important to get her involved in both singles and doubles ... playing her with [Candynce] will hopefully give us an edge."

After showing toughness in coming back against her opponent Monday in the Fordham match, freshman Clara Matias will compete as the No. 3 in singles, as well as teaming up with senior Tanisha Hodgson as No. 2 doubles.

"[Clara] really stepped up in a tight spot for us," Dixon said. "She needs to continue to grow and improve, but she showed me something coming from behind in the first set and ultimately winning...it was nice to see, and I look for her to grow with every match."

After only competing in doubles against the Rams due to illness, freshman Jessica Podlofsky will solely compete in singles play against URI, being tabbed as the No. 5. Podlofsky's last singles match took place at the Eastern Collegiate Invitational late last month. She won five singles matches on her way to winning the Flight D finals, beating out West Virginia's Melis Tanik in both sets, 7-5, 6-0.

"Jess will be good for us against Rhode Island," Dixon said. "We knew how competitive she was coming in as a freshman. We just didn't predict this sort of impact this early on...it's nice to have her filling out the bottom of our lineup and provide us with more options."

Senior Kaitlyn Carpenter and sophomore Jocelyn Providence round off the top six in singles, competing at the No. 4 and No. 6, respectably. The two will also team up as the No. 3 pair in doubles after their success against Fordham, where they won in a shutout, 8-0.

Providence stepped in as the No. 6 for Podlofsky against Fordham, coming away with a victory in two sets, 6-2, 6-0. Providence has provided Dixon flexibility in making late changes, such as she did against Fordham.

"[Jocelyn] was able to step in late for us in singles when I decided Jess wasn't fully healthy," Dixon said. "Having her as a late addition for singles provided the energy when we needed to carry through. She was great for us."

Dixon hopes to see another step taken forward in respect to doubles play against the Rams.

"We're getting there," Dixon said. "I know it's still the fall and very early, but these conference matches are important to get strategies and team play down, so as we move forward, we're better prepared for what's ahead."

Scott Cournoyer can be reached at scournoy@student.umass.edu.

Senior Candynce Boney looks to serve against the opposition. The senior will compete at No. 1 doubles and No. 2 singles against URI.

Julia Comas will match up with Candynce Boney as the No. 1 doubles team when the Minutewomen face the Rams today.

UMass competes with eight boats in six races

By Stephen Hewitt
Collegian Correspondent

(This article was originally published Oct. 11 on Dailycollegian.com).

This past weekend, the Massachusetts crew team traveled 100 miles south to the Housatonic River in Shelton, Conn., to compete in the Head of the Housatonic in its season opener.

The 16th annual event, which covers a 2.7 mile strip as the course, attracted rowers of all ages, from novice high school students to veteran masters, in one of the biggest races in New England has to offer.

Despite a rainout that delayed the Minutewomen's opener one week and created scheduling difficulties last week, they still put together a solid showing in Connecticut.

Overall, UMass competed with eight boats in six races against some of New England's best college rowers.

Junior Emily Boucher, a United States U-23 team member, started things off for the Minutewomen in the morning with a respectable performance in the Lightweight Single, finishing in fourth place with a time of 20 minutes, 32.95 seconds, about 27 seconds behind the leader.

Following Boucher were seniors Elizabeth Euiler and Chelsea Wakeham, who faced off against three crews from Radcliffe in the Lightweight Double. The duo finished in third place, clocking in at 20:36.81.

UMass entered two Varsity 4 boats into competition as well. Carly Payne and senior Alexandra DiMatteo finished in a solid fifth place with a time of 19:14.28.

The Minutewomen's B team, coxed by Em Chiu, finished in 11th place with a time of 20:55.07. Both Varsity 4 boats finished ahead of familiar A-10 competitor Fordham, which placed in 17th.

During the afternoon session, sophomore Tory Gordan and graduate student Megan Donovan competed as a double and finished in second place with a time of 23:18.35.

Rounding out the day of competition for the varsity crew were the Varsity 8 races, in which UMass entered two boats.

The first boat, coxed by Chiu, finished in 12th place with a time of 17:58.44. Just behind them was the second Minutewomen boat, coxed by Payne, finishing in 13th place and clocking in at 18:03.00.

On the novice level, UMass also finished respectably, led by Jilland Jack, the Novice 4 boat placed in fourth with a time of 23:22.10 behind two Trinity boats and Fordham.

The Minutwomen will look to build off of their solid start to the season when they return home for Homecoming Weekend to host the Pumpkin Head Regatta this Saturday morning on the Connecticut River.

Stephen Hewitt can be reached at shewitt@student.umass.edu.

SPORTS@DAILYCOLLEGIAN.COM

Kelly leads UM past DC in two overtimes

By Pete Vasquez
Collegian Staff

It took two overtimes, but the Massachusetts field hockey team won a Tuesday afternoon thriller, beating Dartmouth, 5-4, in Hanover, N.H. in its final non-conference game.

Katie Kelly scored two minutes and 57 seconds into double-overtime for the Minutewomen (7-6, 1-0 Atlantic 10), after sophomore Sarah Schlossstein's shot was kicked away by the Big Green goalie. It was Kelly's second goal of the game as well as her second game-winning overtime goal of the season.

UMass	5
DC	4

The game-winning goal ended a high intensity, back-and-forth contest between the two teams. Prior to that, the Big Green (8-4, 2-1 Ivy League) erased a 3-1 deficit and seemed to match every UMass goal.

"Today was a great win," UMass coach Justine Sowry said. "I think any time that you have such a difficult battle and a game that goes into overtime, a game that went back and forth, the energy and work ethic gets put out onto the field."

With the score tied at three with under seven minutes remaining, Makaela Potts received the ball off of a penalty corner and hit a sharp grounder into the net to give UMass a 4-3 lead. The lead quickly vanished when Dartmouth came right back into UMass' circle before Samantha McPherson evened the score again.

"It was a very attacking game of hockey," Sowry said. "We put Potts in the midfield and asked her to play more attack. She's got the athleticism, skill and speed to really put the opposition under a lot of pressure. The pace of the game was definitely fast. It was end to end. There wasn't a lot of build up. It was definitely get from one end to the other as fast as possible."

The result was the Minutewomen's second overtime this season. Sowry and her players have consistently taken lessons from 2009 and learned when the same situation arose this year. Consequently, they switched their mindset at the start of Tuesday's overtime.

"Last year in our overtime games we played very pensive, quite nice hockey but we weren't getting the results that we needed, so our attitude this year is to

See F. HOCKEY on page 7

JEFF BERNSTEIN/COLLEGIAN

Senior Katie Kelly has been instrumental in the success of UMass this season. The forward dished an assist and scored two goals in the win over Dartmouth to increase her team-leading total to 10 goals.

MAXWELL SPARK/COLLEGIAN

Goalkeeper Chris Piekos makes a save on a shot in a game earlier this season. Piekos received Atlantic 10 Player of the Week honors for his work over the weekend when he allowed one goal and made 10 saves.

Piekos anchoring back line in recent matches

By Steve Levine
Collegian Staff

The tide has turned for the Massachusetts men's soccer team as it dives deeper into Atlantic 10 play.

After beginning the season 1-3-5, the Minutemen won a convincing 2-0 decision against Xavier on Friday to open conference play. On Sunday, UMass tied Dayton, 1-1, moving their conference record to 1-0-1.

Piekos anchoring defense

A key reason to UMass' recent success is goalkeeper Chris Piekos' impressive play. On Monday, Piekos received Atlantic 10 Player of the Week honors for his work over the weekend when he allowed one goal and made 10 saves in two games.

Earlier in the season, UMass coach Sam Koch employed a platoon between Piekos and fellow netminder Shane Curran-Hays. However, now it appears as if Piekos will be getting the majority of the starts.

"We're just going one game at a time right now," Koch said. "Right now we're focused on Rhode Island and Piekos will be in goal. He's solid and does a real good job."

Piekos has started nine of 11 games this season, posting a 0.95 goals against average and a 0.839 save percentage with two shutouts. He was the tough-luck loser in a number of close games, which is reflected in his 1-2-6 record.

Koch believes that much of Piekos' success comes from the presence of Curran-Hays.

"Shane is an outstanding keeper," Koch said. "We would do well with either one of them in there and right now Piekos is playing a little better, and we have to go with the keeper that's hot. We're very, very lucky to have a keeper like Shane supporting Piekos and it's no question Shane is a big reason why Piekos is playing as well as he is. They both respect each other and push each other, and I think they are indeed supportive of each other, which is extremely hard because there's no question Shane wants to play."

Second half breakdowns

Much of UMass' frustration in the regular season can be attributed to its ineffective play in the second half.

Of the 14 goals the Minutemen have relinquished so far this season, eight have come in the second half and one in double-overtime. Shots are also coming easier for opponents in the second half, as UMass has allowed 89 shots in the second half compared to 50 in the first.

Those trends did not change on Friday against Xavier, when UMass took a 2-0 lead into halftime but allowed the Musketeers ample opportunities to score in the second stanza. Xavier outshot UMass 14-1 and had eight corner kicks in the second half.

"We're not happy with that," Koch said. "We're trying to work on that. I give Xavier a tremendous amount of credit; they came out flying in the second half. We were trying to keep our lead and sit on it, which wasn't a good idea. If they had gotten one [goal] it would've been very hard to keep them off the scoreboard after that. I think we did a pretty good job making it hard for them to score, but it was much more difficult than it needed to be."

With their eight-game homestand ending last weekend, the Minutemen hope their good fortune continues when they travel to Rhode Island and Philadelphia to play against Rhode Island, Temple and Saint Joseph's.

Steve Levine can be reached at slevine@student.umass.edu.

Minutemen continue A-10 play with URI

UMass takes on Rams after drawing Dayton

By Herb Scribner
Collegian Staff

The Massachusetts men's soccer team starts its second Atlantic 10 weekend when it travels to Rhode Island for a match between the New England rivals.

"They're a team that can beat you, there's no question," UMass coach Sam Koch said. "They're a little bit snake-bitten right now. Their backs are against the wall, [and] they need a result. They are in big trouble if they don't get a win on Saturday, so they're going to be ready to play. They're not looking past this game, that's for sure."

The Rams (2-7-2, 0-1-1 A-10) sit nowhere near the top of the table thus far in the season with a single point to their names. Similar to the Minutemen, URI kicked off its opening conference weekend with matches against Dayton and Xavier. While UMass pulled off a victory over the Musketeers, the Rams suffered a 2-0 defeat.

"[URI is not weak," Koch said. "They're outplaying opponents. They just haven't been able to get the ball in the back of the net. They're a very formidable opponent. This is a big game, there's no question about it. It helps us to keep going forward with a good result."

URI is no stranger to shutouts, having lost six matches without scoring a goal, five of which occurred during a six-game span. The first shutout came from Old Dominion (2-0), followed by a 4-0 dominance by William & Mary. After defeating Siena, 2-1, a team which the Minutemen earned a 2-2 draw against, URI suffered three straight shutouts to No. 10 Boston College, Boston University and No. 23 South Florida.

In its final game of the preseason, the Rams earned a 1-1 draw with Fairfield, an opponent the Minutemen drew with, 0-0, in their third game of the season.

The strength of URI this season in terms of offense is Jamie Eckmayer, who has a pair of goals off of eight shots. Nearly just as productive is Greg Balicki, who has one goal on 22 shots, 11 of which have been on target.

"They attack with a number of people whether its Balicki, who is a very good left-footed player," Koch said. "They have a lot of different offensive weapons. Individually they're very skillful. Are they playing really well as a whole unit? That's their question. I want to make sure they're asking those questions after we play them. They're capable of beating anybody but we have to make sure that we're ready to play."

This will be the first road game of the A-10 schedule for the Minutemen and the first of a three-game away span for the Maroon and White, who have played eight-straight games at Rudd Field.

Midfielder Ben Arikian will look to extend his offense-producing ways in the game against the Rams, having scored his first goal of the 2010 season against the Flyers. Arikian remains four assists from being third all-time for UMass and is two goals shy of matching his 2009 total.

The Minutemen will look to expose the Rams' lack of ability to stop goals from reaching the back of the net. Through last weekend, URI allowed a total of 21 goals, with 13 of those scores coming in the first half alone. Comparatively, UMass has given up 14 goals on the year, with five goals coming in the first half and eight in the second half.

"We have to take care of ourselves, that's the main thing," Koch said.

Always a talking point, goalkeeper Chris Piekos and URI's goalkeeper Peyton Warwick stand nearly level in terms of their score sheets so far in the 2010 campaign. While Warwick has saved more balls than Piekos (55-52), the UMass Athlete of the Week outclasses Warwick in goals allowed (10-21).

The Minutemen kicked off A-10 play by splitting with a 2-0 victory over Xavier and a 1-1 draw with Dayton. The draw with the Flyers must be a confidence booster for UMass, after Dayton finished at the top of the A-10 last season.

"If we don't get a good result [against URI], it's not the end of the world, but it would set us back a notch," Koch said. "We don't want that, we want to keep moving forward and I think we're on the verge of playing really well and we want to take the next step this weekend."

Herb Scribner can be reached at hscribne@student.umass.edu.

JEFF BERNSTEIN/COLLEGIAN

Midfielder Ben Arikian has started all 11 games this season, leading the Minutemen in assists with five and shots with 28. Arikian scored his first goal of the year in a 1-1 draw with Dayton on Sunday.

Lack of parental aid cripples students

Struggling students resort to desperate measures

By Tim Jones
Collegian Staff

Kari Ross, a sophomore at the University of Massachusetts, will not graduate with her friends. She will never watch a basketball game at the Mullins Center. And she will never experience spring in New England.

That's because she cannot afford to stay another semester at UMass, and must return home.

"I really want to stay here. I've made so many friends and I love living in the dorms, but I just can't afford it," said Ross.

Ross is among the many UMass students today who are supporting themselves through college without parental support. Financial aid is out of their grasp, because even though parents cannot support her, it does not justify the allocation of funds according to the University's Financial Aid Office.

With rising tuition and loans, times will only become more difficult for students, and signs show that there are little-to-no solutions to this problem.

As a domestic exchange student from Indiana, Ross came to UMass to experience a new school, but her work in Massachusetts will come to an end this semester.

She lives with her mother and stepfather at home, where she also works a full-time job in addition to being a student. She said her parents are there for moral support, but cannot afford to support her financially.

What Ross has in common with many students, is that her financial aid isn't enough to cover the cost of a UMass education, and there's practically nothing she can do to change that.

Jean Berg, counselor at UMass Financial Aid Offices, helps students obtain the most financial aid they can possibly receive, but said that because of certain students' situations, they just won't receive the aid they feel they deserve.

"For someone to say I don't want to pay and I'm not paying, that's not a valid reason to get independence," said Berg.

"I don't want to give a Pell grant to someone whose parents just don't want to pay, because that takes away funds from those who really need it," she added.

The Free Application for Federal Student Aid (FAFSA) application, which helps the government determine the rightful amount of financial aid a students receives, restricts students from declaring independence from their parents until they are 24 years old, or have met the criteria for specific guidelines, which have recently increased from six to twelve options.

Resource Economics professor M.J. Alhabeeb of UMass finds today's financial aid to be lacking.

"Students' financial aid is not enough at all. It is under-performing, in my view, especially at a time of economic downturn like now," he said.

"I would say it needs a complete overhaul. As for the federal grants, the availability, qualification, and amounts sometimes are laughable," he added.

Berg said that just because a parent does not want to, or does not have the money to financially support his or her child, does not mean their child is independent.

"Unfortunately, it's just the way it is, because if this was allowed, every parent would just refuse to pay," she said.

She added that there are reasons why everyone just can't be independent.

"At 18, you're an adult, but you can't drink and still don't have full benefits. At 21 you can drink, but you only have two years left of college, and that's the mindset of the government," she said.

"The government can't fund every single 21-year-old who is a junior, and that's why the independence age is set at 24," she continued.

To this, Berg recommended that students who are in truly tight situations speak with the Financial Aid offices. Depending on the situation, students may be able to obtain professional letters and prove independence if they don't meet the criteria on the FAFSA, but simply cannot provide parental information because of circumstances.

University Health Services and the Dean of Students Office will also meet with students and provide letters if there are no

John Regan of Pennsylvania State University was one of the keynote speakers discussing the recent breakthroughs in bioelectric microbiology and the possibilities that may soon be available.

Professors discuss new results in bioelectric microbiology field

By Alyssa Creamer
Collegian Staff

This week, the University of Massachusetts hosted a conference for the nation's crowning green bioenergy researchers and professionals to discuss developments within the field of bioelectric microbiology and its interrelated studies.

Titled the North American BioElectric Systems Meeting (NABESM), the conference is the first of this group's national conferences and was held from Oct. 11-13.

The three-day conference was held in the UMass campus center, and, according to a University release, it drew in approximately 40 leading scientists looking to gain a fuller understanding of the various "new technologies and discoveries that allow scientists to electrically connect with bacteria."

"I think it's been really good to get a nice broad range of speakers from different locations and having them all look at different aspects of microbe and electrode interactions," said keynote speaker and UMass microbiology professor Derek Lovley.

According to the release, the conference discussed numerous topics including how to harvest electricity from bacteria, use electricity-producing bacteria in industry and how bacteria feed on solar-generated electricity and convert the greenhouse gas carbon dioxide into gasoline and other fuels.

Lovley explained one of the primary focuses of his lecture and of the examination of microbe and electrode interactions is to stress their potential to create a new kind of bioenergy. This energy would harness solar power to feed electricity to microorganisms to produce fuel from carbon dioxide.

He used the example of converting plants to make ethanol, citing what Lovley and others in the scientific world call "microbial electrosynthesis," could have the possibility of being "much more efficient without the need for farming [that exists with plants], especially since solar technology is so much better than harvesting sun energy on earth than plants."

BioControl discusses flora overgrowth issue

By Katie Landeck
Collegian Correspondent

To most people, the stalks of purple flowers that border the wetlands of the highway are just a pretty sight. To the international scientists that attended the 2010 BioControl for Nature Conference, these flowers, purple loosestrife, one of the topics of the conference, are menaces that need to be stopped.

The conference, organized by University of Massachusetts professor Roy Van Driesche and University of California Riverside professor Mark Hoodle, was held at the Hotel Northampton focused on the management of invasive species, such as the purple loosestrife, using classical biological control which is "the intentional introduction of a natural enemy to reduce a pest's life," said Hoodle.

Over the course of the conference, which lasted from Oct. 3-7, more than 90 speeches were delivered on the topic, and a field trip was taken to watch examples of destruction caused by invasive species and places where classical biological control has met a difference.

During their field trip, the conference members went to visit several locations in Massachusetts, including Mount Tom, Dinosaur Tracks and Amherst, where they looked at purple loosestrife. Unfortunately, it was scheduled for the rainiest day of the conference which resulted in the scientists spending more time on the bus than outside.

"It was wet," said Van Driesche. "But people were very valiant and most pressed on. We saw most of what we wanted to see and discovered a great new coffee shop in South Deerfield because we were cold and wet and really wanted coffee."

Both Van Driesche and Hoodle hoped that through the conference, scientists would see examples of successful classical biological control and that it would inspire more cooperation between conservation biologists, invasive biologists, conservation/land managers and biological control managers.

To achieve this, the conference was kept small with no concurrent sessions.

"Everyone sat through the same material with lots of opportunities to talk," said Van Driesche. "As a result, everyone got along very well and several well known conservationists made connections with classical biological control biologists.".

The conference expanded on the ideas of a 2007 conference hosted in Beijing, China, that discussed biological control of forest pests.

"Ours was broader in several ways," said Van Driesche. "We considered all kinds of habitats and considered a wider range of interactions."

However, at the Beijing Conference, more ways of controlling invasive species such as mechanical removal and chemical methods were discussed.

"We focused on classical biological control, because it is more practical when talking about a forest or a dessert. When you are talking about a whole landscape it becomes too costly and uses too much labor to use other methods on a large scale," said Van Driesche.

"You might be able to pull all of the purple loosestrife out of your pond at home, but we don't have enough man power to pull it out of the entire state," he added.

In the past 40 years, the field of classical biological control has made advances. Horror stories, such as the release of the cane toad in Australia to control French Cane Beetles in 1935, have become largely a thing of the past.

Now, scientists are more careful about observing the effects of releasing a new species in contained environment. According to Van Driesche, this observation period led to a sharp decline in ineffective treatments in between 1965 and 1970.

"The public has been very sensitized to the concept the

SGA registers over 1,500 new voters

New group of voters to express voting opinion in midterms

By Ashley Berger
Collegian Staff

Wednesday, Oct. 13 marked the conclusion of the student voting registration. A student coalition consisting of the Student Government Association, MassPIRG, the Center for Educational Policy Advocacy, and the University of Massachusetts Democrats finished registering a total of 1,512 students to vote.

A project that initiated at the beginning of the semester with a table at the Activities Exposition, the coalition expanded to include many other ways of spreading the word.

SGA Student Trustee Mike Fox explained the importance of students registering to vote.

The more students that are registered to vote equals the more active the students' voice is in decision making on a larger scale," said Fox.

Fox works closely with the Board of Trustees for the entire University system and plays a key role in the student's representation of finances and other campus decisions.

Another key person in the success of the coalition was UMass Democrats president Emily Jacobs. Her main contribution to the project was the administrative and organization tasks, which included contacting students who filled out the registration incorrectly.

"A lot of kids don't know how to go about registering how to vote," said Jacobs. "This year is especially important for students to register because it is such a crucial election year in the state of Massachusetts."

In addition to working on the student coalition, Jacobs is also an active member of the Deval Patrick re-election campaign. Her duties within that organization include canvassing the area, which consists of knocking on people's doors and figuring out their political stance, educating them, and encouraging them to vote for the campaign's particular candidates, including current Massachusetts governor Patrick as well as other democratic senators and congressmen.

Jacobs explained that most questions deal with taxes and revenue, these being two key issues that affect students more than they may think. This year in particular, Question Three on the ballot refers to the proposed decrease in sales tax. If this passes, and the sales and tax rates lower to three percent, tuition at public universities would likely increase because of the decrease funds the university would potentially receive.

Senior Amanda Jusino, who works with the Center for Educational Policy Advocacy agreed with Jacobs.

"There is a large negative stigma about taxes, but people have to realize that in some forms they can be beneficial," explained Jusino.

She added that taxes are a necessary requirement, as they allow funding to the university and support education.

"Taxes help fund this institution. Without the necessary amount of taxes, students would likely see a direct hike in the cost of tuition."

Jusino said that in the coalition's pursuit to register as many students as possible, the groups were very specific in drawing attention to the tax questions on the referendum.

The coalition used many different tools by which to encourage and draw interest to students. One way that Jusino helped contribute was by coordinating class residential area programs, in which she had to contact all UMass professors to schedule time in which volunteers would be allowed to take class time to explain the registration process and hand out forms.

Jusino said that the overall plan was met with general praise.

"The strategy was very effective," said Jusino. "Most professors were very receptive to the idea."

In addition, the groups took on the task of "dorm-storming," in which volunteers would knock on every door and educate whoever answered about registering. The committees also spent time tabling in the campus center to attract attention from passers-by.

The three volunteers who were interviewed all agreed that the most important thing was getting the word out in any way possible.

"It was important to us that people were made aware of the availability and accessibility to registering," said Fox.

"It's very powerful," said Jusino. "It is important for students to be aware and recognize the power they have. They have a say in who is elected and the decisions that those elected people make. They are directly affected."

Overall, all three volunteers agreed that the coalition was an extremely successful one and would like to see bigger and better results in future years. The general consensus of those interviewed was that it is especially important for students to register during election years and to always be educated enough to make smart voting choices.

Ashley Berger can be reached at aberger@student.umass.edu.

Just recently closing up the new student voting registration, the SGA managed to pull in over 1,500 new voters for the upcoming midterms using some unique strategies.

Invasive plant debate to continue in book

Wetlands have become a natural habitat for the purple loosestrife and have been overrun by the plant which rapidly spreads.

PLANT from page 1

biological control inductions can become invaders themselves, said Van Driesche.

"A long historical view shows that in the 1700s and 1800s it did almost always go badly, but those kind of releases are in the past in the same way that blood letting is in the past in the medical profession."

Van Driesche, along with several other scientists, is using the information discussed at the conference to write a book with more detail. The team of 10 scientists hopes to complete the book within the next two years.

Financial aid help just beyond reach

AID from page 1

other options.

Saera Hanlon, a senior, 25, finally got the financial aid she needed because she passed the age requirement, but admits that she had a difficult time before that.

"I moved out when I was 17, and my dad wouldn't even sign the FAFSA," she said.

"I would get up at 7:00 a.m. in the morning, be back from work and school at 11:00 p.m. at night, and still have homework," she added.

Hanlon added that she did have a significant other helping her out along the way, and part of the reason that she didn't attend college for so long was because she was disappointed by the quality of her previous school. But she added that the time between school was just as difficult.

Alhabeeb says that a faltering economy will have dire effects on students supporting themselves, and that these trends will continue to rise.

"The outcome is clear and multifaceted, such as a sharp drop in the percentage of students to have a college education, a higher pressure on those who manage to get into college to work hard in the labor market and to incur more debt, and addition social and psychological pressure on families and their relations to their kids," he said.

Berg added that certain assumptions make things more difficult for everyone involved.

"Unfortunately, I think that the U.S. Government has certain assumptions, and one of those is that everyone has a family, a unit, and it's not UMass who is the one's thinking that, as there are men with broken families," she said.

"I think it's rubbing some people's faces in the fact that they don't have that support or care," she added.

If anything, the students accept what has happened, and are ready for the future.

Hanlon added, "I think that it means a lot to be my own person. I'm grateful for the way my life turned out."

Ross finished, "I'm a positive person, and I know I have to go back home. I'd rather not go back to my life of solitude, but I'll make the best of it, and I'm happy with what I've gotten so far."

Tim Jones can be reached at timothyj@student.umass.edu.

Students are frequently seen going into Whitmore to speak with the Financial Aid Offices about problems they have with their aid.

Discussion focuses on future processes

STUDY from page 1

Microbial electrosynthesis is a rather new idea in the microbiologically-focused scientific community.

According a statement released by Elena Sharnoff, director of communications of Dean of the College of Natural Sciences, professor Steve Goodwin's said "the understanding that bacteria could be used to generate electricity, or that bacteria could use electricity to generate new compounds and fuel are two of the most exciting discoveries in microbiology in the past 20 years. I expect we'll be seeing some practical applications of these ground-breaking discoveries in the very near future."

In another University release put out earlier this year, Lovley described his microbial electrosynthesis experiments as being possibly "the most exciting and significant development in alternative fuels in years."

According to the release, Lovley's microbial electrosynthesis provides a solution to the storage issue involved in the use of solar panels to produce electricity.

Lovley's system "immediately turns solar power directly into chemicals, which are then readily stored with existing infrastructure and distributed on demand."

The release continued to add, "[microbial electrosynthesis] requires no biomass feedstock or arable land, uses far less water and requires no elaborate post-production fermentation ... The microbial cells and electrode food sources don't get used up, so they are more than 90 percent efficient at turning electrons into fuel without further processing."

"This is a specialized topic," said Lovley. "And there really hasn't been a good venue or forum for people to necessarily get together in an easily communicable way. When people usually present their ideas in national conferences with much broader audiences, [the presentations] get kind of deluded out."

"Because there are so many other things going on," said Lovley of national conventions on microbiology, "it's hard for the few people working in the field to necessarily find each other."

Lovley's colleague Ashley Franks, a research assistant professor at UMass concentrating on microbial fuel cells and biology, coordinated the conference.

According to Lovley, Franks' idea was to give "young investigators an opportunity to meet and have plenty of time to discuss different ideas." Franks could not be reached for comment by press time.

Dr. John Regan of Pennsylvania State University was also one of the three keynote speakers. His research, according to the NABESM's website, focuses on "biological processes with an emphasis on nutrient removal, regrowth in drinking water distribution systems, fermentative biological hydrogren production, microbial fuel cells, methanogenic systems and molecular microbial ecology."

The final keynote speaker was Dr. Leonard Tender of the United States Naval Research Laboratory. According to the website, Tender's research focuses on "marine sediment microbial fuel cell systems and their deployment."

A myriad of other speakers made presentations and demonstrations throughout the conference.

"It's really nice to have a facility like this at UMass so that we can have these kind of meetings," said Lovley.

According to a University release, Lovley is also the leader of the Geobacter project, "research focused on the physiology and ecology of new anaerobic microorganisms."

NGOs exceptions to the rule

Eli Gottlieb

We need to face up to the fact that, when it comes to nongovernmental organizations (NGOs), quangos and civil society organizations, the political right has a point. It's not a large point, but it is a point: These organizations are fundamentally undemocratic.

They have a loud, influential voice in our public life without subjection to electioneering laws, and often while receiving government funding. Through armies of lawyers, lobbyists and intellectuals, NGOs of both the left and the right have systemically shifted, from issue- or community-based advocacy organizations with little role in broader politics to organizations that openly claim the right to dictate what's right and wrong to the public. In fact, in nearly every advanced democracy, they often act through legal cases and rights councils that directly override the democratically-decided laws.

Some might say that more constraint on the state's power must always be better. However, the power does not simply disappear, it instead moves from the elected government to those in the super electoral domain: advising committees, courts, the legal profession and most of all NGOs. Laws no longer are written through ideological compromise and are not overridden through independent legal cases in an independent judiciary. Instead, NGOs (also known as "lobbies") often take an active hand in writing the laws, push for the creation of new super electoral governing bodies and then use their financing, clout and intellectual might to colonize the new political sphere. They usually then turn their strength to populating the government with allies who will continue to hand money, prestige and legal power to the sphere where the NGOs operate. Thus, governmental good deeds become mixed so intimately with base corruption that many can no longer tell the difference.

Now, many will still ask, "What is wrong with constraining the government to respect the environment, the rights of citizens and all other good causes?" The problem is that most modern NGOs do not nearly qualify as non-partisan or transparent. Through their broad lobbying and intellectual production, each one now tends to push forward a body of opinion that qualifies as its own narrowly-focused ideology. In fact, some NGOs exist only to oppose or criticize other NGOs. How can we call them apolitical while they take political stances and joust with political opponents?

As Kevin Myers once put it in the Irish Independent, "[Amnesty International] originally began by demanding freedom for a Portuguese man in Salazar's prison cell. Now it has forceful and declamatory opinions on littering, breast-feeding, double-parking, immigration, global warming, air-line taxes and the laws on offside in soccer and [leg before wicket] in cricket. It is also – according to the [National Women's C – in favor of keeping children's benefits as they are. A human rights organization can only take a side on welfare benefits for parents by reading the doctrine of human rights into a full-blown governing ideology."

The problem is that most modern NGOs do not nearly qualify as non-partisan or transparent.

In addition, the major NGOs don't just operate internationally; they funnel money between their branches to support each other's work. A donation to Oxfam in America intended to relieve famine can support warlords in the Congo of which the donor may not know and with which they may not agree. As it turns out, many conservative NGOs in the United States appear plentifully funded by the rich Koch Brothers and the royalty of Saudi Arabia. The quality of NGO work varies wildly based on the precise national branch in question and the precise views of the staff operating that branch, and all such work has a tendency to become explicitly political at some point, to voice opinions and biases rather than objective assessments. Staff and board members themselves receive their appointments without any recourse to the donors' assent, and thus NGOs with backing from the rich can appoint whoever they want to do whatever they want.

In short, NGOs now operate exactly like international political parties, except that they never have to stand for elections, face restraint of their influence by low polling numbers, accept instructions from their members or abide by the clean-government laws for political parties. Now they operate exactly like international political parties, except totally and completely corrupt. They are the privatized public.

The complexities of modern political issues would be better represented by an assembly of interests than just a single-vote body, no matter how proportional its representation of those single votes. If we want a body with proportional representation, let the people have multiple votes (perhaps three or five) each to grant to whatever organizations they wish. Let's integrate the so-called non-governmental organizations and civil society organizations into the political process as democratically accountable members, and let the assembly represent not only the diversity of the populace but the diversity of each person's views and interests. Votes would remain of equal value, so once again a simple threshold proportional-representation system would adequately and fairly distribute seats.

Such a body would have the advantages of more accurately representing voters' views, especially independent voters, and of integrating advocacy, activist and lobbying organizations into the political process, dependent on the people for their power. It would also grant increased voice to the many causes and interests supported by large portions of the public but lacking funding and column-space from the chattering classes.

Of course, many of today's radicals and totalitarians rail against lobbies and undemocratic influence as well, but by this they tend to mean that they want to destroy the political voice (and possibly the rights and lives) of disfavored ethnic, religious or ideological groups entirely. I want nothing of the sort. After all, many NGOs provide crucial advocacy for issues too specialized or marginalized for the mainstream political parties to take up. No, I want only to bring the power of NGOs in line with their public support, whomever the public supports. I do, though, think that the results will surprise most NGO constituents, since I think the demographicss of today are far more interested in domestic economic and social issues than in the cratia's desire to have more dance parties for "aid" that keeps hungry Ethiopians hungry.

From Canada to Cuba

Zachary Weishar

Weary from travel, yet ever optimistic, two voyagers continue upon their cross-country adventure. Their goal: to travel from their home in Montreal, Canada to Cuba with only a backpack and an out stretched thumb to hail their next ride.

Dressed in tight-fitting, rolled-up capris, and a tattered baby blue wife beater, with a travel-stained orange scarf around his neck, Luic's appearance when I met him hinted strongly at his foreign heritage. Despite this, he and his friend Maxim have little trouble encouraging sympathy for their cause, and are often quite successful at acquiring the necessities of life such as food and a place to sleep from strangers. These commodities are most prized on a cross-country trip where hitchhiking is the only form of transportation and hotels are out of the question because of cost.

As these two travelers move through the country ... they prove that society is not devoid of good-natured people.

Hitchhiking is a practice that has become less and less common over the years. While hitchhiking has likely existed ever since the advent of transportation, its hay day came in the 70s. During this time, a line of the hopeful and adventurous waiting to thumb a ride down the road was a common sight at the rest stops off of busy interstates. A decade of mind expansion and free love, the 70s harbored a trust in the natural good nature of human beings that is so vital to the practice of hitchhiking. Yet in the past decades, this trust has declined, taking with it the practice of hitchhiking.

As media has become more accessible, and its methods of transmitting news more effective, we as a society have become far less trusting. Each day it seems that a news report chronicling a murder or violent crime is released, creating an illusion that violent crime is more common. Studies have shown that our nation's perception of crime is at an all time high, while the actual occurrence of violent crime has declined significantly in the past decade. With media becoming more and more a part of our every day lives, we are exposed to more tales of crime than ever. This creates the false notion that crime is more prevalent.

The two teens from Canada do not seem to share these apprehensions. Maxim and Luic have been on the road for several weeks now. After crossing the boarder on foot, the two made their way to a near by truck stop. From there they hitched a ride in an 18-wheeler from northern Maine to Richmond, Va., where they stayed for several days on the couches of people willing to lend a hand to the vulnerable travelers. Another week passed, and the friends found themselves in Charleston, S.C., where they befriended a local college student while attempting to use the Internet in the school's library. Each day, they explore a new section of Charleston, meeting new people, lazily passing their time until they decide to continue their travels.

Even though they live for little more than the price of their daily allotment of cigarettes, the two are far from free loaders. In return for the hospitality shown to them by the apartment of five, the two men cook dinner and do odd jobs around the house – a service much appreciated by the unkempt college students.

These two French-Canadians exemplify a state of mind that is currently on the decline. Undaunted by the uncertainty of their situation, the two continue to travel, even without the added safety of a cell phone, a modern convenience that is out of their price range.

Ask them about the friends they have made on their trip, and they will produce a heap of paper scraps bearing the names and numbers of dozens of acquaintances, the majority of which are female. After all, they are 19-year-old French boys with an accent seductive enough to arouse the lustful imagination of many young women, an asset they enjoy using often.

After a week in Charleston, the place we met, the two said they were about ready to move on. It's possible they will be farther along their journey by the time you read this story. In any case, their exploits are worthy of recognition. As these two travelers move through the country, constantly susceptible to crime, they prove that society is not devoid of good-natured people.

Moral of the story: Maybe it is time we started trusting one another again. Maybe it is time to take a step back and re-examine our social landscape. Instead of living in perpetual fear of the unknown, it may benefit us to embrace that which we do not fully understand. Set aside the dark view of society perpetuated by the news media, and start to place more trust in the goodness of individuals.

I am not advocating an abandonment of caution, for this would be foolish. Undoubtedly, there are dangers that did not exist during the height of hitchhiking's popularity and travelers should always act with vigilance. What I am suggesting is that perhaps the world is not as hostile a place as it is often portrayed. At the very least, Luic and Maxim's journey has proven that much.

Ed/Op presents the S.P Sullivan Memorial Prize for Haiku Writing

MEMORIAL PRIZE FOR HAIKU WRITING

I mail in our haikus!
The winner each week will be published and receive a prize

S P Sullivan

A haiku is an old form of poetry from Japan, originating from around the 17th century.

In English, haikus have usually been 17 syllables on three lines: five, seven and five.

S.P. Sullivan, former Collegian Managing Editor, was a major proponent of the haiku.

Our winner!

GABRIELLE GRIFFIS

Recycle old thought
The government won't let you
Think outside the box

–Gabrielle Griffis

Congratulations!

Come down to the newsroom to claim your prize

LETTERS to the EDITOR

Write to us! DailyCollegian.com

Letters to the editor should be no longer than 350 words and can be sent to editorial@dailycollegian.com or submitted online at dailycollegian.com. We regret that, due to space constraints, not all letters will be printed, but can be found online.

GOVERNMENT MONEY ANYTHING BUT STIMULATING

Dear Editor,

In February 2009, President Barack Obama implemented an economic stimulus package of $787 billion, which was supposed to create five million new jobs by the end of 2010. This estimate was subsequently lowered to three million new jobs.

The administration then said they would create and save jobs. They said unemployment would peak at eight percent by the end of 2010, and then recede.

Some officials estimate the stimulus might create/save two million jobs, and the current unemployment rate of 9.6 percent could go to 10 percent by year end, and stay near 10 percent for 2011. The real unemployment rate is over 15 percent, and includes people whose unemployment benefits have expired and who have stopped looking for work.

The economic stimulus money was wasted on programs that did not create the new jobs promised by Obama.

Since the beginning of the Obama economic debacle in January 2009, the national debt as a percentage of GDP has gone from 40 percent to approximately 60 percent, and the national deficit in 2010 is projected to reach about $1.5 trillion.

Obama's economy is a shambles because consumers, who account for 65 percent of our economy, are cutting back on expenditures due to a lack of trust and confidence in the current administration. Obama's policies and programs have created lethargy in this country, which is due to the uncertainty fomented by the Obama administration.

We need a fresh approach to our economy, and the discontent of the American public should be heard in the upcoming elections in November.

Donald A. Moskowitz
Londonderry, NH

PROHIBITION A FAILED EXERCISE

Dear Editor,

Robert Sharpe (Letter: Marijuana Prohibition Has Failed, Oct. 6, 2010), got an arrow-splitting bull's-eye exposing the failure of cannabis (marijuana) prohibition.

A sane or moral reason to cage responsible adults for using the relatively safe, God-given plant cannabis doesn't exist.

Ending cannabis prohibition and extermination is one of the most important issues of our time.

'It's Kind of a Funny' movie

By Tyler Manoukian
Collegian Correspondent

In light of recent media notice concerning teen suicide, the media has centered its attention on a now very common childhood dilemma – depression. While much discussion has been aimed towards reducing bullying in childhood environments, a very relevant tangent has gained some steam – the subject of emotional and mental health of teens.

Directed by Anna Boden and Ryan Fleck, "It's Kind of a Funny Story" features a strong supportive cast founded off the star power of Zach Galifianakis as Bobby and Emma Roberts as Noelle, with the lead role performed by Keir Gilchrist ("Dead Silence") as Craig Gilner.

Based on the novel by Ned Vizzini, the story features Gilner, a depressed teen who checks himself into a local psychiatric ward. Worried that he might commit suicide, he checks himself in to Three North, the adult ward, where he finds friendship, intimacy and self-acceptance. The story deals with Craig's emotional problems resulting from the less than appealing pressures society has put him under and his battle to conform to societal norms.

While calling attention to a major issue many face today, the movie did nothing to raise awareness or bring to the forefront the true problems depressed teens face. It starts with an average, very cliché plot, which does what most other movies have been known to do – aim to please the crowd. The plot tells the story of a depressed teen's lowest point who suddenly realizes his life is not as bad as he thought.

Self-aware Gilchrist is not the ideal lead actor as his performance is something to get used to during the film. He does not do a very good job representing a teenager who has struggled with depression due to exorbitant amounts of stress. Once he rids himself of the feel-sorry-for-me attitude, Gilchrist gives a spectacular performance that any audience can get behind and support. As good as he was, his acting was spotty at best. In scenes where the emotional triggers needed to be prominently forged in order to sell his role as a depressed teen, they were nonexistent. As a result, his lack of emotionally driven acting takes away from the overall growth of the character.

Since the release of "The Hangover," fans have anxiously awaited Galifianakis' breakthrough performance, and this film delivered. The weird and screwy role as Bobby preludes Galifianakis' dramatic breakthrough performance. His character successfully transitions from off and mysterious to a weary and disturbed yet caring individual. Frequently cast in a role with more comedic leeway, Galifianakis handled his role quite well, proving his worth in both comedy and drama. Unfortunately, his solid performance is hindered by the horribly underdeveloped role in which he is cast. While he is not the main character, his dealings with real-world problems are just as important as Craig's for the story to work. The lack of character build-up slightly thwarts his accomplishments because we do not know enough of his story.

The aloofness of "Funny Story" comes from its lack of consistency. It features its share of funny lines, packed with intelligence and wisdom. While sometimes insightful, a big detractor is the clarity. Laughable and insanely awkward scenes have you chuckling while the next ones are more like a dull therapy session with the audience concerning Craig's mental health.

This new type of comedic drama or "dramedy," bounces between a feel good story and an early age intervention. Its coolness helps to teach others the values of life. "It's Kind of a Funny Story" features the self-loathing, overdramatic teen who learns the lessons of growing up, including empathy, sensitivity, and life appreciation. However, the film annoyingly suggests that depression can be solved by discovering something you love to do, telling your parents how you really feel and by wooing a girl who is into Radiohead and The Pixies.

Emma Roberts' role as Noelle plays a big part in the development of Craig's character. She is the only other teen on Three North, and Craig is instantly love struck by Noelle's distinctive ambiance. Her role seemed to show Craig a side of life he had not experienced since his early years. Noelle becomes the center of Craig's affection throughout the movie, which in some ways had a negative impact on the film's progress.

Though the film's inconsistent plot paired with a sugarcoated teen depression story did not make for the most accurate depiction, it still managed to wow the audience due to the breakthrough acting by Galifianakis. However, the inconsistent comedy directed by Boden and Fleck trivialized teen psychiatric treatment to the point where it is seen as cool.

Overall, the mostly cliché film has your typical romantic conflict, which takes away from the intended plot line. Regrettably, the romance seems to take precedent, therefore undermining the rest of the story: the true struggles of a depressed teen.

Tyler Manoukian can be reached at tmanouki@student.umass.edu.

COURTESY FOCUS FEATURES

Zach Galifianakis and Emma Roberts highlight the cast of "It's Kind of a Funny Story," a collaborative effort by directors Anna Boden and Ryan Fleck. While a cliché romantic comedy, the film takes on a topical and controversial issue: teenage depression.

Rockers to do 'Miss America'

By Tyler Manoukian
Collegian Correspondent

This Friday night, Saving Abel, Jacob's Son and One Theory will come together for the first time ever at the Pearl Street Ballroom for a show presented by Lazer 99.3 FM. The concert will be headlined by up-and-coming alternative rock band Saving Abel to promote their most recent album release, "Miss America."

Saving Abel plays a type of Southern hard rock with influence flooding in from classic bands like Lynyrd Skynyrd and contemporary bands like Three Doors Down. The five-man group is led by Jared Weeks and guitarist Jason Null. Also in tow are guitarist Scott Bartlett, drummer Blake Dixon and bassist Eric Taylor.

The quintet has produced two albums to date, the self-titled, "Saving Abel" in 2008 and "Miss America" in 2010. After landing a record deal with Virgin Records, the band produced some popular tracks in 2008.

"Addicted," their first mainstream hit, instantly became their most popular song. The entire song is a sexual innuendo packed with racy lyrics and a quick beat.

Other hits off their freshman album include "18 Days," which, according to lead guitarist Jason Null, was lyrically inspired by Sheriff Buford Pusser of "Walking Tall" fame, "Running from You" and "Drowning Face Down." These tracks were also released off of their first album.

COURTESY MYSPACE.COM

Saving Abel will perform in Northampton this Friday night at the Pearl Street Ballroom to promote their latest album, "Miss America."

"Miss America," the band's newest album, features the single "Stupid Girl (Only in Hollywood)," which was released earlier this summer. The group's soft rock playing style has led to success all across the country, having toured with popular alternative rock bands like Puddle of Mudd, Shinedown and Buckcherry.

Jacob's Son is a local indie band originally from Astoria, N.Y. After making their way to Massachusetts, brothers Mike and Greg Bean followed their vision by forming the group. Later joined by Nick Cosimini and Tony Levesque, the quartet began writing with a hard rock and pop melody. The alternative rock they produce has captivated audience interest, which instigated the release of a 2008 EP titled, "Goodbye to Reason." Their latest EP is set to release later this year.

Jacob's Son writes music similar to the band Audioslave. Their soft melodies are very well written. "Lajoie" is about the troubles of a man left alone with a mysterious violent side. This song is produced similar to Audioslave's hit, "Be Yourself," which highlights the troubles of everyday people, be they insane or healthy.

One Theory will also be rocking the ballroom Friday night, bringing their musical talent in from San Diego, Calif. Their band is constructed of a vocalist, a drummer, a bassist and two guitarists. The band's influence is comprised of original metal, new metal and punk rock. The group creates musical chaos with their screamer sound bites paired with their killer guitar strums.

One Theory draws on the musical geniuses from the likes of Killswitch Engage and Iron Maiden. "See Through Pain" is a combination of punk influence and screamer-type melody. Featuring a combination of the two, the band has toured with widely recognized bands like Drowning Pool and Dope.

2007 saw the release of "World's Decay," their first full-length album, which they took to promoting from San Diego to Milwaukee, Wis. in as many cities as possible. With the release of their newest EP, "All The Pieces," One Theory has once again hit the road to promote the EP.

Each band brings a variety of different elements ranging from talent to musical style that feature a new perspective to the audience of the Pioneer Valley. If you're interested in catching a breath of fresh musical talent away from the overly saturated bands such as Nickelback, Shinedown, and Drowning Pool, this concert is surely just what you're looking for.

Saving Abel, Jacob's Son and One Theory are performing this Friday, Oct. 15 at 7 p.m. at the Pearl Street Ballroom in Northampton. Tickets are $20 in advance and $23 at the door.

Tyler Manoukian can be reached at tmanouk@student.umass.edu.

Katamari Damacy a cheap cult classic

COURTESY NAMCO

Your character must create new stars for The King of All Cosmos in Katamari Damacy, a cult Playstation 2 game that goes for cheap online.

By Nick O'Malley
Collegian Staff

Katamari Damacy is a masterful fusion of two of the most important things that make video games fun to play: the mechanic and the personality.

The 'mechanic' encompasses the empirical actions that occur during the process of playing a game, something best captured in a game like Tetris; it begins and ends with a simple concept: Take blocks and line them up. Simple.

In this way, Katamari Damacy is certainly comparable to Tetris. The premise isn't much more than a metaphor – a snowball. Using the analog sticks, the player takes a ball – the Katamari – to pick up objects smaller than the ball by rolling over them, and then proceeding to grow the Katamari to pick up bigger objects and prompt growth.

The feel of the ball is authentic thanks to a clever physics engine. The ball rolls slowly up hill, quickly down them, becomes cumbersome when long objects are picked up and bounces around when struck. Simple.

Of course, overall, Katamari Damacy is an insane, euphoric, clown-nightmare of a game.

The player takes the reigns of The Prince, the son of The King of All Cosmos, who, before the start of the game, got drunk and destroyed all the stars in the sky. So, the task falls upon you, The Prince, to roll up objects on Earth to restore the stars. After all, you owe them for bringing you into existence, right?

The game starts small, still emulating a concept-heavy game with a simple premise. The player rolls the Katamari around a room, picking up familiar objects like thumbtacks and candy. Pick up enough candy, then the Katamari become able to pick up pencils and batteries, then orange peels and Lego blocks, then cups. But the King of All Cosmos only give the Prince a limited time to reach the level's specific goal, be it a certain size or number of fish. And right as the Katamari is ready to start really going and grabbing everything, it's time to go.

But a level or two later, The Prince returns to the room, a little bigger now, and the mice that terrorized the first level are now mere fodder for you. But then the dog begins to overshadow you. You must roll it up. Why? Because it's there – and it's spiting you with its enormous size.

In this way, the game lays before the player a progressive set of goals that, though not stated anywhere in the game, drive the motivation of the player. The game is well aware that the player has been wanting to roll up into the fold that man riding a panda for three levels. Yes, there is a man riding a panda in the game, along with a band of trapeze artists walking around in a human stack that goes five-people high. There are rings of telephones and pineapples around trees. There are bears with balloons and go-karts, school kids with four-foot cowlicks, mermaids, giant squids, power plants, hot-air balloons and penguins. It all builds upon itself, much like the katamari.

The mechanic itself is not really exciting enough to merit the 10-plus hours it takes to make a dry run through the game. It's the progression of size and the overwhelming feeling of accomplishment that comes with moving from a room to a house, then a city, then an island.

Towards the game's end the rats that looked gargantuan in the first level are no longer even acknowledged. Soon, the player begins to roll up the entire house that once housed a level. Then, the city that once encompassed several levels is swallowed up in a single pass. Then the game reaches the breaking point where the gloves come off in a 25-minute epic that takes the player to the furthest reaches of the game.

Once the katamari escapes the confines of the city that once seemed limitless, the player begins to grab large buildings, ships, power plants, office buildings. Then, seemingly out of nowhere, once the novelty of giant squids and Godzilla have passed, it's the ocean and sky scrapers. Then the islands themselves begin to come up, as the katamari grabs clouds and rainbows and tornadoes and everything that's ever existed in the game.

And then there's nothing left, just a ball and complete dominance over the world that once seemed overwhelming. Somewhere in there, under the skyserapers and islands, there's a pineapple that laid nearby at the level's start. Seven levels ago, that pineapple was a big part of making the katamari – big enough to pass the objective. Now it's nothing. Now, you are the king of everything.

Well, you are the Prince of All Cosmos at least.

Katamari Damacy is available for the Playstation 2 and is best purchased online. The copy used in this review cost around $15, shipping included.

Nick O'Malley can be reached at nomalley@student.umass.edu.

Bowerbirds prepared to fluff their stuff at the Iron Horse

By Ashley Berger
Collegian Staff

Add one part Phil Moore, one part Beth Tacular and one part Mark Paulson, mix in an acoustic guitar, a drum set and maybe a piano, and you come up with the trio that calls themselves the Bowerbirds.

Inspired by the idea that the earth is a sacred place, the original couple-duo Moore and Tacular founded the band in South Carolina before relocating to North Carolina. In 2006, the couple, along with Paulson, recorded their independent EP, "Danger at Sea."

After being picked up by Burly Time Records, the trio recorded their debut album "Hymns for a Dark Horse." The album features Moore's deep, yet airy, voice in an almost chant-like state, combined with Tacular's significantly higher pitched echo to balance out to a melodic and weird but likeable sound that is extremely unique.

The album, mostly inspired by nature, focuses on the environment around them. The Birds present an eco-friendly, save-the-Earth message in a way that is not too preachy or in your face. It is a subtle and earnest plea for humans to recognize the destruction that we continue to be responsible for day after day.

In a 2008 interview with the Boston Globe, Moore said of his inspiration of the album, "Beth and I were living in South Carolina, and I took a job watching birds for the summer in this funny little place called Pet Village – a hunting village ... I started writing songs that were more simple and more about melodies and singing. They were just for myself."

The album and songs on it, would lead to a tour that spanned across the United States as well as parts of Canada in a collection of small clubs and taverns. The Birds stopped in Northampton on the tour. The group has also played in various venues in Boston and Cambridge, Mass. Following Thursday night's show in Northampton, the band will head east to play in Cambridge at TT the Bear's, before closing out their tour at Event's Barn in Clinton, N.Y.

Arguably the best part of their work is not the soft melodies or the message that the lyrics send, but the band's use of unconventional instruments. Laced throughout the album, Tacular meddles on her accordion, while Paulson explores the wonders of his fiddle.

"Horse" also garnered attention from executives at the indie-folk album label Dead Oceans. In the winter of 2008, the trio signed with the label, who re-released both their debut EP as well as "Hymns for a Dark Horse." In 2009, after the extensive United States tour, the Bowerbirds released the full-length record entitled "Upper Air."

"Upper Air" holds a more mature, more personal lyrical set. The songs focus not just on the observations of the world around them, but also install a deeper personal voice and emotion in the lyrics. Moore's voice presents itself again in a nostalgic and wistful way, as Tacular's voice complements him on the tracks in a haunting, yet beautiful essence. The album is simple and abstract, a perfect album to listen to while relaxing. In particular, "House of Diamonds" and "Northern Lights" stick out as must-listen to components on the album.

One of the many great quirks of the Bowerbirds is that they are consistently adding new members to their live tour, whether it be old friends or musicians from the opening acts. On the spring 2009 tour, the Birds added Matt Damron to play drums on the Midwest leg of their tour. Later in the summer of that same year, the Birds welcomed Megafaun's Brad Cook to play upright bass with them for some shows. Not many bands can smoothly welcome a new player into their entire set, but the Birds make this look easy.

The Bowerbirds are the embodiment of all things artsy. Moore and Tacular reside in an eco-friendly house. Moore considers himself to be a songwriter and poet. Tacular is originally a visually artist and in known to draw and create anything on any type of medium. Tacular is behind the band's webpage artwork and design, and frequently updates the band's blog whether on or off tour.

The blog is a fascinating part of the band's presence and interaction with their fans. Updated with concert locations, shout-outs to various DJ's, updates on nature and animals, as well as a "Name That Beard" contest, the Bowerbirds are truly a unique collection of individuals. Whether it be the music or just on the side, the Birds blend eccentricity with natural vibes the create excitement while soothing the listener at the same time.

On Thursday Oct. 14, the Bowerbirds will perform at the Iron Horse in Northampton at 8:30 p.m. Sharon Van is the opening act. Tickets are $13.00 at the door.

Ashley Berger can be reached at aberger@student.umass.edu

The South Carolina-based duo, the Bowerbirds, will bring their unconventional sound to Northampton Thursday, Oct. 14 at 8:30 p.m. The show will be at the Iron Horse and tickets are $13.

Minutemen address self-inflicted errors

By Dan Gigliotti
Collegian Staff

Six weeks into the football season, the best asset of the Massachusetts football team is its offense.

The Minutemen (4-1, 2-0 Colonial Athletic Association) are exhibiting the type of balanced attack that UMass coach Kevin Morris hoped they would, doing so with certain success.

John Griffin, Jonathan Hernandez and the UMass rushing attack is providing the foundation for an offense that ranks first in the CAA (445.8 yards per game) and second in rushing yards (208.4 ypg).

Additionally, the Minutemen are throwing the ball efficiently with quarterback Kyle Havens, ranked second in the league in pass offense with over 237.4 yards per game.

Yet, amidst the Minutemen's offensive efficiency have been fundamental errors they look to avoid going into, perhaps, their most difficult stretch of games on their schedule.

UMass is eighth in the conference in turnover-margin (80th in Football Championship Subdivision). Morris stressed ball security, as well as penalties and tackling during the bye week before he began preparing his team for its game against Richmond on Saturday.

"We tried to get healthy, work on fundamentals and then work on Richmond," Morris said. The Minutemen were poised to upset the Michigan on the road on Sept. 18, when a Hernandez touchdown gave them a 10-point lead as the second quarter drew to a close. That lead evaporated before the break, due in large to a costly fumble with 45 seconds to play in the half.

In its last game against Towson on Oct. 2, UMass lost three fumbles in the first 17 minutes of the game, allowing the Tigers to take a 14-7 lead.

All season, UMass has struggled to shore up its high tendency for penalties. UMass gave up 181 penalty yards combined over its first two games at home against William & Mary and Holy Cross. The Minutemen currently average seven penalties per game for over 62 yards, ranking seventh in the CAA in that category.

Last week, they had their least penalized game (three for 23 yards), helping them overcome their turnover discrepancy in a 27-14 win against the Tigers.

"All year long, we have tried to make sure we are better in our technique," Morris said. "Making sure that we get to our spots in good position, so that we are not having some not-smart penalties that have cropped up. Tackling and ball security is always very big for us and we spend a good amount of time on that, as well."

Aside from its giveaways, the Minutemen have dominated control of the ball in the first half of their season, ranking second in the nation in time of possession (35:37) and fourth in first downs (24.2 per game).

The UMass defense forced two turnovers-on-downs against the Tigers, which do not show up under turnover margin on the stat sheet, but are just as equitable. The Minutemen are fourth in the FCS in 4th down percentage defense (14.6 percent), allowing one conversion out of seven attempts.

Junior captain Tyler Holmes, last week's FCS Defensive Player of the Week and a recent addition to the Buck Buchannan Award Watch List, leads UMass in interceptions.

On Sept. 25, Holmes intercepted a deflected pass with 1:08 left to seal a 26-21 win at Stony Brook. In the season opener, Holmes made an interception of on W&M's last drive, also off of a deflection, in a 27-23 win.

One of only two linebackers in the FCS with three picks, Holmes says himself that he always seems to be "in the right place at the right time."

Ball security and other fundamentals could end up being the difference between wins and losses, especially during a stretch of the schedule that includes three opponents ranked in the FCS Top 25 and two in the top seven (No. 7 James Madison and No. 2 Delaware).

Dan Gigliotti can be reached at dgigliot@student.umass.edu

John Griffin looks to find the endzone against the Wolverines. Griffin, along with Jonathan Hernandez look to be successful against a potent Spiders defensive unit.

Tailback Jonathan Hernandez looks for a hole against the Wolverines this season. The Minutemen look to take advantage of a Richmond team that is playing their third string quarterback.

RBs key UM attack

HOMECOMING from page 10

returned 40 yards for a touchdown. Corp remained down and had to be carted off the field.

With Hicks at the helm, Richmond struggled to generate offense. The sophomore completed only 9-of-27 passes for 64 yards, while throwing five interceptions and being sacked twice. The only way the Spiders were able to move the ball was on the ground with tailback Tyler Kirchoff gaining 110 yards on 17 carries.

The Richmond defense, however, held strong and allowed just 232 total yards to a UNH attack which ranks first in the CAA in pass offense at 238.3 yards per game.

"They've always been a strong defensive team and a real good offensive team," Morris said. "Now with the quarterback out, they're going to make some adjustments and we have to be ready for whatever adjustments they may make come game time and we'll try to address some of those things during the week."

The No. 8-ranked Minutemen (4-1, 2-0 CAA), meanwhile, will look to continue their success after picking up road victories against Stony Brook and Towson.

Against the Spiders, UMass will likely lean on its balanced ground game with tailbacks John Griffin and Jonathan Hernandez. The Minutemen are averaging 208.4 rushing yards per game (21st nationally) along with an efficient passing attack, which totals to the eighth-best nationally ranked offense at 445.8 yards per game.

"The goal is really going to be we have to play UMass football," Morris said. "We can't be so much concerned with what they're doing and what their issues are. We have our own issues and we have to continue to get better."

Saturday will mark the 25th meeting between the Minutemen and the Spiders, with the teams playing every season except for two since 1984 (2006, 2007). UMass leads the overall series, 13-11.

A large homecoming crowd is expected on Saturday as McGuirk Stadium and could have its 10th sell-out of 17,000-plus. The last home game that sold out was on Dec. 2, 2006, in a 24-17 victory over UNH in the NCAA Quarterfinals.

"We haven't had a home game in over a month so our guys are going to be excited playing in front of the home fans and were just excited about playing some football," Morris said. "We've had the bye week, and now were ready to go against Richmond. It's going to be a battle, there's no question about that."

Spiders crawl into Amherst Sat.

UMass host Spiders in homecoming game

By Jay Asser
Collegian Staff

After three consecutive road games and a bye week, the Massachusetts football team heads back to McGuirk Alumni Stadium for Homecoming against a wounded Richmond squad on Saturday.

The No. 20 Spiders (2-3, 0-2 Colonial Athletic Association) will be without starting quarterback Aaron Corp, who suffered a knee injury in a 17-0 loss at New Hampshire last Saturday. Richmond announced on Monday that the junior will have season-ending surgery.

Corp finishes the year with an average of 129 passing yards per game, three touchdowns and four interceptions after transferring from Southern California last spring.

"It's very unfortunate to see such a quality player in any program go down and Richmond certainly taking the brunt of that with the [Corp] going down," UMass coach Kevin Morris said in a teleconference earlier in the week. "We all feel sorry for his situation."

The Spiders, however, won't be able to turn to backup John Laub, who suffered a wrist injury against Delaware in Week 4 and is also unavailable. That means third-string quarterback Nick Hicks, who usually starts as the punter, will make his first collegiate start after coming in for relief last week.

In the first series against the Wildcats (3-3, 1-2 CAA), Corp's left leg was rolled into on a pass attempt which was picked off by safety John Greer and

See HOMECOMING on page 7

MAXWELL SPARR/COLLEGIAN

Quarterback Kyle Havens throws a ball against Michigan. The Minutemen take on Richmond Saturday at McGuirk Stadium.

Mid-season report card for Minutemen

Adam Miller

David Brinch

As the Massachusetts football team looks forward to its second half of the season which begins on Saturday against Richmond, it's time to assess how the Minutemen look going into their final six games.

Here is a position-by-position mid-term report card of where No. 8 UMass stands heading into its Homecoming weekend match-up against the Spiders.

Quarterbacks
Adam Miller: A-
David Brinch: A-

A quarterback is one of the essential tools needed to make a successful team, and the Minutemen are no exception.

Senior quarterback Kyle Havens has an efficiency rating of 141.56 with a 64.86 completion percentage, which is very good, but not remarkable. However, it's also important to take into account that he plays in the Colonial Athletic Association, the best conference in the Football Championship Series.

That being said, if UMass alum Liam Coen is the gold standard for UMass quarterbacks, Havens isn't too far away from being at that level. After all, you don't come close to beating Michigan on its home turf without the ability to throw the ball. Havens can do just that. He also has cut down on the turnovers from last year, throwing just three interceptions so far this season. Last season, Havens threw 15 interceptions, including four against the Spiders.

Running backs
AM: B+
DB: A

The two-headed monster is making a difference for the Minutemen this season. With two durable backs, UMass coach Kevin Morris can feel comfortable running the ball as much as he wants without worrying about the wear and tear.

Despite sharing the ball with Jonathan Hernandez, John Griffin still averages 100 yards rushing per game. Since the first game against William & Mary, the running game has been very stable and is pretty much guaranteed to get the Minutemen yards when necessary. These two are the main reasons why the Minutemen are ranked second in the CAA in rushing offense (1,042 yards/208.4 yards per game) and lead the conference in rushing scores with 13.

Receivers
AM: B
DB: B+

The receiving corps has been pretty solid all-around with contributions coming mostly from Julian Talley and Anthony Nelson. Combined, they have over 600 yards receiving and three touchdowns.

Both receivers are the only two players from the same school to be in the top five for receiving yards per game and are capable of making big plays. UMass is the second-best passing offense (237.4 yards per game) and Havens couldn't help his team get that feat without the help of his receivers. Considering the loss of the likes of Victor Cruz and Jermey Horne to the N.F.L, this group has been a pleasant surprise.

Tight ends
AM: B
DB: B+

Emil Igwenagu gives his team a very valuable offensive weapon, not only as a tight end, but also as a running back. He currently has seven catches for 89 yards in the four games he has played.

Igwenagu played a large role in the team's win over W&M with five catches for 58 yards. He is a team captain not only because of his experience, but because of his ability to adapt to different positions. Redshirt freshman Rob Blanchflower has been a formidable back-up, playing in all five games while registering five catches for 38 yards and his first career touchdown against Holy Cross. As the season goes on, Havens should continue to look for his tight ends over the middle to balance the offensive attack.

Offensive line
AM: A-
DB: A

Without Vladimir Ducasse, the O-line had gigantic shoes to fill. Allowing just four sacks all season is certainly a good start.

The Minutemen suffered not only from the loss of Ducasse, but this season, center Quinton Sales is learning how to adjust on the fly after senior John Ihne suffered an injury in the second half against Michigan.

Ihne, a redshirt senior, started the first three games of the season and was a key factor in the Michigan. When Ihne has been in the starting lineup for the Minutemen this season, the offensive line has allowed just two sacks and has amassed an average of 221 rushing yards. Ihne is slated to return against the Spiders.

In his absence, Sales has embraced the added pressure and is making the transition pretty seamlessly, while Northeastern transfer Greg Niland has started all five games at left guard.

Defensive line
AM: C
DB: C

If there's any area that's a work in progress right now, is the defensive line. While the defense itself has been very good, the line up-front is having problems getting to the quarterback or making the other team's offensive line a non-factor. This can also be attributed the unit's inexperience. Out of the 12 defensive linemen on the roster, seven are redshirt freshmen and two are true freshmen.

The Minutemen are currently ranked worse than 100th in the FCS both for sacks and tackles for loss. However, other facets of the defense, including the linebacker play as well as their solid offense production are a reason why the D-line's problems are a non-factor, for now.

Linebackers
AM: A
DB: A+

Tyler Holmes continues to be the focal point of the UMass defense and is probably the Most Valuable Player of the first half. Not only is he making the case for being considered as the best player on his team, but the best in the nation as well.

The captain leads the team in interceptions (three) as well as tackles (51). His teammate at middle linebacker, Mike Mele, isn't too far behind with 38 tackles on the season.

With two strong options at the linebacker position, it's hard to find any reason to mark this position down.

Secondary
AM: B
DB: B+

It hasn't been the same without Jeromy Miles, Courtney Robinson or Sean Smalls, but this unit is still doing just fine. The Minutemen have allowed a respectable 180.60 yards per game this season and for the most part have kept other team's deep threats from getting into the end-zone.

The safeties, Darren Thellen and Shane Viveiros have a combined eight pass deflections on the season while Kumar Davis has been pretty solid with an interception of his own. Redshirt seniors David Cozzo and James Carven have helped bring a veteran presence on the field. Cozzo has played in four games this season with a tackle at Holy Cross, while Carven has seen the most minutes of his collegiate career, especially in defensive packages. He has seven tackles, including two against the Wolverines.

Special teams
AM: B-
DB: B

The special teams are certainly making some highlights in the first half of the season, specifically Scott Duggan's punt-block against the Wolverines. But overall, there's nothing flashy in the return game numbers (16.4 yards), and the punting has been good, but not great.

The one positive for the Minutemen is that Caleb Violette has been perfect in field goals on six attempts. His longest field goal was from 37 yards out. Carven also recorded an on-side kick against the Crusaders earlier this year.

Overall
AM: A-
DB: A-

UMass had very low expectations coming into the season, especially with the losses to graduation and players to the N.F.L, which has only benefited the entire program, along with an near-upset at the Big House. Morris, in his second season, continues to lead his team to an impressive season and the No. 8 team in the FCS.

At this point, the Minutemen look like heavy contenders to win the CAA – not an easy feat by any stretch of the imagination. Even though UMass might not be an overwhelming team, it can win games on either side of the ball and look to in the second half of their 2010 campaign.

David Brinch and Adam Miller are Collegian columnists. David can be reached at dbrinch@student.umass.edu. Adam can be reached at amiller@dailycollegian.com.

Cahoon and Co. open conference slate

By Pete Vasquez
Collegian Staff

The Massachusetts men's hockey team will play its conference-opener on Saturday night and, if the playing conditions were tough in Minnesota, the atmosphere at Boston University should prove no different.

After losing both games at Minnesota last weekend to begin their season, the Minutemen will travel to No. 10 BU for their first in-state match-up.

UMass (0-2) faces a familiar foe in the Terriers (2-0). Just last year, the two teams faced off three times, with the home team taking each game. While the Minutemen edged the Terriers, 3-2, in their first meeting, BU took the next two games in Boston by a combined score of 13-5.

In the past five years, the Terriers have taken the season series by a count of 10-5-2. The Minutemen's biggest win of the series came on Nov. 14, 2008 in Amherst when UMass dethroned BU as the No. 1 team in the country with a decisive 5-1 victory. It was the Minutemen's first win over a No. 1 ranked team since 1995. Goalkeeper and senior captain Paul Dainton made 30 saves that night as a sophomore, as then-freshman Matt Irwin scored his first collegiate goal.

However this year has its own storyline to tell in this long-time rivalry, a familial one.

Saturday's game marks the first time that the Pereira brothers will face each other. Joe Pereira is a senior at BU and the Terriers captain and leads his team with three goals in the early season, all three coming in the past two games.

UMass freshman Michael Pereira got off to a hot start in his collegiate debut, scoring the first Minutemen goal of the year on Friday as well as racking up an assist against the Golden Gophers.

Each of the Terriers' two wins this year has been decided by one goal. They beat Wisconsin on Friday, 4-3 and Notre Dame on Sunday, 5-4. BU's first three games of year are played on their home ice. The same cannot be said for UMass which, for the first time ever in the program, plays its first three games on the road.

Dainton left the Minutemen's last game against UM just 11 minutes and 47 seconds in, allowing one goal while making 10 saves in his short outing. Freshmen Jeff Teglia relieved Dainton for his first action as a Minuteman and surrendered four goals while making 18 saves.

Dainton has given up six goals in two games, while the Terriers goalkeepers, Kieran Millan and Grant Rollheiser have given up three and four goals, respectively. Millan, a junior from Edmonton-Alberta, Canada. Millan holds a 3.00 goals against average this year with a .889 save percentage, while Dainton's save percentage rests at .886 percent.

UMass coach Don Cahoon is coaching his 11th season as the Minutemen head coach while BU coach Jack Parker has been at the helm of the Terriers hockey program for 38 years. Parker has an overall record of 836-429-104.

The next game for the Minutemen following Saturday's game will be their home opener on Oct. 22 against none other than BU. Both teams will face each other one more time during the regular season, Feb. 11 at the Mullins Center.

Pete Vasquez can be reached at pvasquez@student.umass.edu.

MAXWELL SPARR/COLLEGIAN

Members of the Minutemen converse after a game last season. UMass opens its Hockey East schedule this weekend against the Terriers in Boston.

New look power-play looks to succeed

By Steve Levine
Collegian Staff

On Oct. 2, the Massachusetts hockey season officially began when it lost an exhibition match to New Brunswick, 4-3.

The result was reminiscent of last year's opener, when the Minutemen lost a 3-2 exhibition to the same team. UMass went on to win its next four games, outscoring opponents 15-10.

Much of that early success was credited to players who are no longer on the roster, including James Marcou, Casey Wellman and Matt Irwin. All three signed contracts with the NHL upon the season's conclusion, with Marcou and Wellman taking the anchor of the team's first power-play unit with them.

This year, however, the Minutemen did not turn around its early defeat, instead they lost their next two games at the hands of No. 15 Minnesota last weekend. Without some of its star players, UMass' success this year will largely depend on its new, younger roster that features 13 freshmen.

Nonetheless, the start to the regular season wasn't exactly what UMass coach Don Cahoon envisioned, although there were certainly a few positive things he took away from the weekend.

For one, UMass showed strong resilience to close out the weekend, coming back from an early 3-0 deficit to eventually lose, 5-4. Cahoon acknowledged this in an interview conducted by UMassAthletics.com.

"We competed from behind, we showed resiliency, and we didn't fold up in a venue where a lot of teams fold up," Cahoon said.

Instead, UMass came out firing after the first intermission, scoring three times in the second period while registering 12 shots on goal to Minnesota's six.

The Minutemen continued pouring shots on net in the third, outshooting the Golden Gophers, 17-10.

"I was pleased to how we responded to the adversity of being down three goals, [but] I don't like the idea of being down three. There's [a lot] to work on," Cahoon said.

UMass finished with a 36-33 shot advantage. Three Minutemen registered more than five shots on goal: junior Danny Hobbs, sophomore Rocco Carzo and freshman Branden Gracel. Although Hobbs and Carzo are not seniors, they are looked at to provide a veteran presence to the young UMass team.

The absence of Wellman and Marcou on the power-play was evident, as the Minutemen went 0-5 in power play opportunities.

"We had all sorts of power-play opportunities," Cahoon said. "I thought the last power-play we had we moved the puck around extremely well. We had a couple of open nets and we just have to bury those opportunities. I wasn't disappointed; I thought we had some real good power play looks."

Fortunately for the Minutemen, it didn't take too long before they started receiving big contributions from freshmen players.

In the series-opener on Oct. 8, freshman Michael Pereira and sophomore Darren Rowe scored the first two goals of UMass' season, both via the power-play.

"[Pereira] can make plays offensively for sure. He scored a nice goal and he had a couple of near misses. He's very gifted," Cahoon said. "We had some young guys play really well, some other guys made some mistakes but that's part of the development process."

The development process is well underway. The two-game series against Minnesota served as an opportunity for the Minutemen to gain structure and make sense out of its youthful roster.

The series also represented the last non-conference games the Minutemen will play. On Oct. 16, UMass will open its Hockey East schedule when they travel to Boston for a match against No. 10 ranked Boston University.

Band leader memorialized

By Sam Hayes
Collegian Staff

Late University of Massachusetts marching band director George Parks' "great and innumerable accomplishments" were formally recognized by the Student Government Association in a unanimously passed motion at Wednesday's weekly SGA meeting.

SGA senate sponsor of the motion and marching band member Daniel Stratford said he believed the motion shows unilateral support for Parks' memory from the student body.

"I just want [Parks] to be recognized by the whole student body," he said. "Thank you all, I am immensely flattered," that the whole senate voted for the motion.

The University will celebrate Parks' memory on Saturday with a memorial for the late band director commencing at 11:30 a.m. in the Mullins Center. Speakers at the Parks event will include University system President Jack M. Wilson, Chancellor Robert Holub, State Sen. Stan Rosenberg of Amherst, and several former band members and students, including at least one from each decade of Parks' 33-year tenure, according to a Thursday University release. Also speaking will be Jeff Cox, chair of the Dance department and former band director and professor of music and dance John Jenkins.

Alumni and Marching Band members wishing to participate can gather at 11 a.m. at the Old Chapel and march to the Mullins Center, passing on their way the band's future home, presently under construction. Saturday's ceremony will include a performance from the band and reflections on Parks' contributions to the University.

In other news from the Undergraduate Student Senate meeting Wednesday, a motion passed to create a Student Advertising Committee, a Wellman Clarification Act of 2010 was passed and a motion to create a student historical association was postponed for one week.

The Student Advertising Committee, if initiated, would hope to facilitate student involvement in advertising UMass through pamphlets and materials for prospective students. The motion's sponsor said "The administration portrays a view of students with a student voice."

The Wellman Clarification Act of 2010 would clarify the Wellman Document, the "central document from which the SGA …derives its authority," which has "been a source of much controversy and tension between the SGA and the Vice Chancellor of Student Affairs and Campus Life."

When SGA President Brandon Tower stepped up to podium, the Senate audience erupted with playful taunts and heckling. Tower retorted with some light-hearted jokes, before diving into an outline of his ambitions for the upcoming year.

"Last year's executive branch failed to assemble for a semester," said Tower, "The SGA was ineffectual and accomplished little … It was a sandbox for children to play government."

"We are far from a grand construction," said Tower, "but we need to exploit what we have… our power is in the form of recommendations."

"Student Government is hard … and it will be frustrating," said President Tower before the Senate, "we are all the same party here, all on the same team … we have the same goal, the same purpose."

"The cause of one student is the cause of all students," Tower continued, adding that "we have an incredible student body, and it needs to be represented by an incredible student government."

Tower said that "the only agenda that matters is not mine or Speaker [Modesto Montero's] but the student agenda."

As Tower stepped down from the podium, he was met with strong applause. SGA senator Josh Davidson gave a short speech on how he first was critical of Tower and did not think Tower was qualified to be President, and even considered running against him. Davidson elaborated, however, that following Tower's speech before the Faculty Senate and the Tower administration's work, Davidson is proud of what the SGA has done.

Tower's legislative agenda includes lowering textbook prices through a potential online swap market, reforming academic advising, establishing a task force to gather student input on the construction of the new Student Union, keeping tuition and fees low, making campus safety and woman's health issues a higher priority, and reforming the Code of Student Conduct.

"We are also working to prevent 'doubling up' on punishment by fighting the University to ensure it doesn't levy additional on-campus punishments for incidents that occur off-campus," wrote Tower in his legislative agenda.

SGA Attorney General Kyle Howard is starting the "Don't Get Caught" campaign also meant to protect student rights. "Don't Get Caught" will help students "with how to deal with cops when they show up at your door," said Howard.

The Faculty Senate has mandated that all new students taking the newly-instituted class, The Integrated Experience, which will combine general education with major-specific material for juniors in their respective departments. The new class will

affect freshman, transfer students, and all classes heading into the future. The Faculty Senate's liaison at the SGA meeting noted that nobody knows how they will fund the program at the moment.

Secretary of Finance Ben Levine said students will be polled to see if new fees should be added to pay for a planned new Student Union.

Speaker Modesto Montero said he hopes to work more closely with registered student organizations.

"My personal goal is to reach out to Registered Student Organizations," stating that he feels the SGA has been neglecting its relationship with RSOs.

Before the meeting officially started, the reeent election results were discussed. Voter turnout improved from 7 or 8 percent of the student body

The UMass Democrats announced there will be a bus leaving this Saturday free of cost that will travel to Massachusetts Governor Deval Patrick's fundraiser, "Moving Massachusetts Forward," where U.S. President Barack Obama will speak.

In other SGA news, Garrett Gowen, Orchard Hill Area Governor, announced a Super Smash Brothers Tournament that "was huge last year, and brought a lot of money in."

Former UMass students recieve Fulbright Honors

Five former University of Massachusetts students, among them four 2010 graduates, were awarded Fulbright Scholarships for international studies, according to a Wednesday release from the University's News and Media Relations office.

The students are among some 1,500 U.S. citizens to win Fulbrights, administered by the U.S. Department of State's Bureau of Educational and Cultural Affairs, for the 2010– 2011 academic year.

Last year, UMass was named a "Top Producer of Fulbright Scholars" by the education journal Chronicle of Higher Education.

Psychology professor and director of the University's Office of National Scholarship Advisement Susan Whitbourne said in the release that the awards illustrate the strength of the school's student body.

"Once again, our students have demonstrated exceptional academic skills and a determination to stand out during the selection process," she said. "It is also a proud achievement for the faculty and staff who worked with the students as they pursued these highly competitive scholarships."

Of the five students who received the scholarships, three graduated last year with distinction from the Commonwealth Honors College.

That group includes Needham, Mass., native Lucian Bessmer, a former history major here who will study in Turkey, classics graduate Kelsey Whiting-Jones, a resident of Cummington, Mass., who will travel to Malaysia to teach English and Kerry Shields, also of Needham, a bachelor's degree with individual concentration recipient who focused on international relations and community development in Amherst. Shields will study public health in Senegal.

The other two students who received the prestigious scholarships are Leif Walcutt and Jacob Dyer-Spiegel. Walcutt is a Marstons Mills, Mass., native who studied journalism at UMass. He will travel to Indonesia to teach English. Dyer-Spiegel, from Amherst, finished his undergraduate studies here in 2002 and is now a Ph.D. student in comparative literature. He will pursue further comparative literature studies in Brazil.

According to the University release, the Fulbright program debuted in 1946, and has in that time facilitated international studies for more than 110,000 Americans. The program is active in more than 155 countries worldwide.

Northampton seeks war money

By Sara Jackson
Collegian Staff

On Oct. 7 the mayor and city council of Northampton passed a resolution called, "Bring the War Dollars Home," which calls on the Northampton's congressional representatives to end the wars in Iraq and Afghanistan on the grounds of economic cost to the city.

Six council members voted for the resolution, two voting against it and one City Council member abstained. A copy of the resolution will be presented to Senators John Kerry and Scott Brown along with Representative Richard Neal to urge them to oppose further funding of these wars.

This is the first resolution of its kind to be passed in the state of Massachusetts. The efforts in Northampton were prompted by a similar resolution that was adopted in Portland, Maine.

The resolution was introduced on May 6, 2010 with the recommendations of mayor Clare Higgins and City Councilors Jesse Adams, Maureen Carney, Marianne LaBarge, David Narkewicz, Pamela Schwartz and Paul Spector. Concerns about the cost of the wars in Afghanistan and Iraq were brought to the attention of these public officials by the Alliance for Peace and Justice which led to the drafting of the resolution.

"There is not much discussion in Northampton or the United States about what these wars are costing us. Whether people are for or against this bill, it is important to talk about these wars and what they are costing us instead of being disengaged," said Spector.

A public forum was held on June 23 and 42 citizens from the area expressed their views on the resolution to the Mayor and City Counselors. Marty Nathan, a resident of Northampton's Ward two presented to the mayor 500 signatures supporting the Bring the War Dollars Home resolution at the beginning of the forum. The mayor and city council was present but did not speak.

Concerns expressed at the public forum varied, with Evelyn Robb of Northampton who addressed why Northampton should be concerned with the wars in Iraq and Afghanistan, "A city that spends $40,000 a day is affected in its educational needs, environmental and transportation."

Estimates of how much Northampton is putting towards the war were provided by the National Priorities Project, which calculates the cost of the Iraq and Afghanistan wars based on how citizens taxes fund the wars' budget. The resolution lists the cost of the wars in Iraq and Afghanistan since 2001 as $1.07 trillion and points out that Northampton has spent over $114 million funding this budget.

The loss of life in the Iraq and Afghanistan wars and the sacrifice of the soldiers is another issue that the resolution touched upon. The resolution commended the, "valiant efforts," of US troops. According to the Department of Defense, 4,400 US troops have been killed in Iraq while 1,140 have lost their lives serving their country in Afghanistan. Over 39,000 US troops have been wounded in both conflicts since 2001.

Many people that expressed their viewpoints in the public forum were concerned with how this resolution would be viewed by those serving in these conflicts. "This sends the wrong message to our local military serving overseas. You may say that the resolution doesn't say that we don't support the troops," said Mary Lou Jillson, a Northampton resident who opposed the measure, "It isn't what we say, but what we do that shows our support. Do not insult the troops and reduce the dollar support of the military."

City council members Eugene Tacy and Angela Plassmann opposed the resolution."[I] voted against the resolution because the assertion that the resolution was in support of the troops was not accurate. The resolution is detrimental to the troops, their morale and the mission," said Plassman. "Furthermore, the resolution is purely symbolic and the negative message to our servicemen and women is more significant than the message to our legislators."

Following the June public forum, the resolution went to three subcommittees in Northampton; the committee for social services and veteran affairs, the human rights commission and the committee for economic development and land use. At the Sept. 16 meeting, an amended resolution went through its first reading and as is required underwent its second reading on Oct. 6 where it was passed.

The final clause of the resolution calls for Northampton's congressional members, "to support federal funding for the over 2 million new Iraq and Afghanistan war veterans, particularly the thousands who have become disabled or otherwise physically or mentally wounded, to ensure that they receive the support they deserve on behalf of our grateful nation. This support should also be extended to the military spouses and families of our veterans."

COURTESY NORTHAMPTONROTARYCLUB.ORG

Mayor Higgins voted for the resolution.

According to an August poll by CBS News, 6 out of 10 people in the US oppose the war in Afghanistan.

City counselor Spector gave comment to how he hopes the resolution will stimulate conversation about the wars in the middle east."More people are educated about these issues, and 9 years ago you couldn't find many people who were opposed to the war" said Spector, "This resolution should provide support to President Obama by starting a dialogue and encourage him to leave Afghanistan."

America to fly flag in Northampton

By Justin Gagnon
Collegian Staff

Classic folk rock band America will be celebrating their 40th anniversary at the Calvin Theater tonight, Friday Oct. 15. After a 10-day hiatus since a private concert in San Diego, Calif., America will take the stage at 8 p.m. in Northampton to what is likely to be a full house.

Gerry Beckley, Dewey Bunnell and former member Dan Peek met each other on an American military base in England in the 60s, according to "The Billboard Book of Number One Hits." They originally came together to form a band called the Daze, but changed it to America after seeing the name on a jukebox.

Famous Billboard journalist Fred Bronson wrote, "The name America meant more than the logo on a jukebox to them, it was their homeland – even if it was a place they hadn't lived in for very long."

In 1971, the trio began its now forty-year-long journey riding "A Horse With No Name," the hit song that the band is still most well-known for today. The track was a part of their self-titled first album, "America," which almost immediately won over both their home nation as well as the British one the band was founded in. The album found a home on the United States Billboard charts for forty weeks and was number one for five.

On March 25, 1972, "A Horse With No Name" was the U.S. Billboard's number one single. While not nearly as popular today, "I Need You" also found its way into the Top 10 off their debut album.

One year later, the folk rockers released their second album, "Homecoming," which featured another top-10 track with "Ventura Highway." The song, while still popular as a whole, is known mainly for the famous guitar riff, which was used in Janet Jackson's 2001 song, "Someone to Call My Lover."

Their quick success led to quick recognition, and in 1973, America won the Grammy Award as the Best New Artist of 1972.

It was not until their 1974 "Holiday" album, which featured "Tin Man" and "Lonely People," that the band found its way back onto the charts. The following year brought their "Hearts" album and with it, their second number one hit.

On June 14, 1975, "Sister Golden Hair" reached the top slot on the Billboard singles chart, but only remained there for a week. Along with "A Horse With No Name," "Sister Golden Hair" is still played regularly on classic rock radio stations.

After the release of "Hearts," Peek left the band to become a Christian artist, according to Bronson, and consequently, the band struggled to top the charts again.

Over the course of their long venture on the dusty highway of folk rock, America has released 16 albums, the latest in 2007 titled "Here and Now," among many other anthologies of their hits and live shows.

Founders Beckley and Bunnell are still together and will be performing at the Calvin backed by a full band.

While America isn't necessarily on every college student's iTunes playlist, the melodic and natural harmonies of America would likely be recognized by anyone who has ever owned a radio.

America is performing at the Calvin Theater in Northampton at 8 p.m. on Friday, Oct. 15. Tickets range from $35 - $55 and will likely sell out. Scattered seats are still available and can be purchased at www.NBOTickets.com.

Justin Gagnon can be reached at jgagnon@dailycollegian.com.

Classic rock band America is touring their home nation for their 40th anniversary. America will be playing at the Calvin Theater tonight at 8 p.m.

Max's new book entertains and offends

By Kate Evans
Collegian Staff

You either worship the ground he walks on, or wish to file a lawsuit against him. Tucker Max is easily one of the most simultaneously despised and admired authors of our generation.

Max's first book, "I Hope They Serve Beer in Hell," is a #1 New York Times Bestseller and has scored the alcoholic player a movie deal and a book sequel. The narcissist released a series of 25 true short stories in his second installment of drunken stupors titled "Assholes Finish First." Following the September 28, 2010 release is a nation-wide book tour running through the end of the year.

"Assholes Finish First" attempts to pick up where "IHTSBHH" left off, with an outrageous compilation of sex and alcohol-saturated stories. Max writes of sleeping with every type of female imaginable, his fame, and getting into legal trouble. The real question that looms over his drunken escapades is: at what point does the once-unique idea that made you famous run stale?

A graduate of the University of Chicago and Duke Law School, Max's writing comes as naturally as a fish to water. Though the idea of getting inebriated and womanizing much of the population has somewhat expired, the witty writer shines with much of his diction.

Bordering wildly inappropriate, Max's humor must be perceived with an open mind. When referring to a portly girl in one of his stories, he writes, "On a scale of 1 to 10, she should have hung herself. Her body looked like a nesting doll made of owl pellets."

Max's analogies strike as comical yet offensive, especially when discussing what he and his crew have dubbed "Thug Passion," a mix of two different types of cognac.

"It is Special Olympics in a bottle," he says describing the after effects of the beverage.

The self-proclaimed ladies man exposes his insecurities in "The Midget Story," stating he experienced a foreign feeling upon entering the Little People Convention: nervousness. Though Max successfully sleeps with his "midget princess," it took him hours of courage-building drinking and a sturdy wingman to help seal the deal.

For the same reasons he receives hate mail from little people, Max isn't favorable among all women. Why, aside from taking advantage of and verbally abusing them?

"Sounds counterintuitive, illogical, and borderline retarded? Welcome to women, enjoy your stay," states the smug Max regarding the female gender.

In many respects, it is no surprise that the ill-famed author "grew up in a broken home with an unstable mom, an abusive, alcoholic grandmother, and an absentee father." Max's best friend and common guest star in his works, Slingblade, is just as hostile towards women, if not worse. Slingblade is quoted at a college Halloween party saying, "I know why God gave women mouths…but I am not sure about why they got vocal chords."

In another of his short stories titled "The Tucker Max Experience," Max is asked by the board of the Dallas Heart Ball to participate in an auction for charity, where the highest bidder wins a dream date with him.

Max responds to the email offer with several conditions and warnings for the winner, including, "Depending on how many beers I've had, I may repeatedly point to my crotch and nod approvingly. This is what I call 'a hint.'"

In closing, Max promises the recipient, "I'll give you a night so memorable, it'll help you reach a place addiction specialists refer to as 'the bottom.'"

"Assholes Finish First" surely makes for an interesting and sometimes humorous read, but lacks in depth and creativity. In short, the witty writer should have quit while he was ahead. There is nothing story-worthy about passing out in a bathtub on your 21st birthday, since many in his audience have surely been there before him. With Max's attitude growing increasingly cockier, "Assholes Finish First" won't be finishing first on the New York Times Bestseller list any time soon.

Kate Evans can be reached at kvevans@student.umass.edu.

editorial&opinion

"If we don't believe in free expression for people we despise, we don't believe in it at all." - Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

An exciting, exclusive offer for science

Matthew M. Robare

How would YOU like to lose 100 pounds in just two weeks, build muscle, add to the size of your genitalia and discover the secrets the "pros" use to have sex with beautiful women and pick the stocks guaranteed to triple your net worth overnight, all at the same time?

We've all seen ads like this. We can even imagine the announcer's voice in our mind, and wonder whether he's creepy or just plain cheesy.

They prey upon our insecurities and worries, trying to intensify and exploit them. Some part of us that wants to be able to trust other people, buried somewhere deep in the subconscious, an innocent part of our souls which knows nothing of Original Sin or cynicism or whatever you might call it; it whispers to us, urging us to call that toll-free 800 number, pay in our life's blood or first-born child or whatever the company is demanding, on the off-chance that they can deliver on their promises.

But we don't, because we know that would be idiotic.

But there's another amoral group out there also aiming to propagate fraud as fact, question the findings of hardworking scientists, denigrate all opposing viewpoints as the propaganda of a sinister conspiracy to hide the truth, all while making obscene amounts of money in the guise of educational television.

I'm talking about History Channel, Discovery Channel, Biography, History International, TLC, the National Geographic Channel and A&E, and their line-ups full of content centering on the paranormal, the extraterrestrial, the conspiratorial and the psychic.

History Channel is infamous for this kind of junk. In fact, it's easier to be featured on a History show if you're a raving lunatic than if you're a serious, professional scientist.

None of that matters to von Daniken and his quest to misinform the public.

His "protégé," Giorgio A. Tsoukalos, publisher of "Legendary Times" magazine, is also visible on the "History" circuit. His solemn judgment on issues archeological, historical and supernatural, delivered in front of the cameras for "documentaries" on such subjects as crystal skulls, flying saucers, ancient myths and other sundry and various pseudosciences, take the cake.

It's easier to be featured on a History Channel show if you're a raving lunatic than if you're a serious, professional scientist.

Erich von Daniken, the fraud and charlatan whose book "Chariots of the Gods?" started the "ancient astronauts" craze back in the late 1960s (although it wasn't the first such book) has been exposed as a liar and a cheat so many times it boggles the mind, but he can always get a show on Discovery or History to promote his latest "theory," such as the Mayan and Egyptian civilizations sharing a common precursor civilization, because they both built pyramids.

Never mind the facts that the Egyptians stopped building pyramids over 2,000 years prior to the Mayans starting, that Mayan pyramids were used as temples and Egyptian for tombs, that making pyramids is easier for pre-industrial civilizations than, say, a geodesic dome and that Mayan and Egyptian religion, language and culture are light-years apart.

The only documentary he belongs in is one focusing on patients in mental hospitals.

And then there is "Ghost Hunters." At least von Daniken and Tsoukalos can say they theorize based on evidence other, more credible, individuals have collected (except for the stuff von Daniken had faked, of course). The Ghost Hunters actually claim they're collecting evidence right on the show, however – a total sham.

On the air since 2004, this piece of televised trickery, with its pretension of being science, has been inexplicably popular. The greatest advantage of "Mythbusters" has always been in making science fun and accessible. It's a model that could easily be repeated. But instead, these new waves of paranormal shows use the medium to give credibility to unscientific propositions that are impossible to prove one way or another. The sheer mind-numbingly anti-scientific premises of these shows give the sciences a bad name, and allow nutcases to make millions.

It's the exact same kind of thing as those cheesy TV ads. They promise the Moon, but can't deliver – because it's all a load of nonsense. They even appeal to the same segments of the mind. Who doesn't want scientific evidence of the afterlife? Who wouldn't spend years trying to harness their latent psychic powers if they were at all real? And who wouldn't click on an add promising to add five inches to their penis?

When we willingly suspend our abilities to think critically we do ourselves a grave injustice. If we allow ourselves to be misled out of hope or for any other reason, all we do is set ourselves up to be robbed blind and ruined.

Next Friday is October 22. Back in 1844 a group of preachers who followed a man named William Miller said that Jesus would return to Earth that day. Hundreds of thousands of people across the country believed them, and gave up their homes and businesses and went out to await Christ's second coming.

Unsurprisingly, He Himself didn't show up. Meanwhile, the people who believed Miller's sales pitch lost everything. Miller continued to believe that Jesus was about to return, which didn't work out too well for him.

Don't be a Millerite. Learn about real science, not this fake junk on TV.

THE S.P. SULLIVAN MEMORIAL PRIZE FOR HAIKU WRITING

E-mail us your haikus! The winner each week will be published and receive a prize

S.P Sullivan

A haiku is an old form of poetry from Japan, originating from around the 17th century

In English, haikus have usually been 17 syllables on three lines – five, seven and five

S.P Sullivan, former Collegian Managing Editor, was a major proponent of the haiku.

POINT-COUNTER-POINT

"I disapprove of what you say, but I will defend to the death your right to say it." - Evelyn Beatrice Hall

Hibernate through fall or not?

Falling hard for fall

Chelsea Whitton

The sun is setting a bit earlier these days and soon as students leave classes at 5:15 p.m. it will be dark. But let not the name of the season we are currently in be of any interpretative meaning as to how you feel. Fall is nothing like the verb form of the word. In New England we are in the presence of a season that represents the death of summer and a preparation for the colder temperatures, but no matter how much someone might hate Fall, there is no changing it.

The Earth's axis wins every year.

A couple of weeks ago I realized it was the start of fall, not only because of the wild colors on the trees and leaves peacefully floating to their demise – but because of a $4 pumpkin pie at the market and a mini-pumpkin I found in a cornfield. As I drove by the cornfields in Northampton there were endless supplies of butternut squash. I was reminded of Fall because yet again I brought out my endless supply of sweaters which seem to always make it just one more season, sans a few buttons. I was reminded it was once again my favorite season. Autumn, especially in the United States has such a great amount of culture – and it is my belief that in the states we don't embrace culture enough.

Of course every season conjures up a few words that bring the season to life and evoke senses and memories. But the season that has the most effective way of reminding of the time of year is autumn. Surely every season has reminders – summer in the Northeast has humidity and the beach, spring has warming temperatures and rain and winter has well, just slush and dreary skies. Autumn has for the most part temperate weather. You don't have to worry about how many inches of snow we're going to be getting, how much rain and how many thunderstorms and tornadoes to watch out for.

For me, autumn is peaceful. The Earth is preparing itself in a spectacular way to rest.

Other than humans, most living organisms are slowing down the pace of life – leaves die, animals store up food for hibernation the skies are darker far earlier. After a crazy summer – who wouldn't want some peace and quiet?

The first derivations of the use of the word autumn stem from as early as the 14th Century known then as "autompne." And before the 1500s the season was referred to as "harvest." It was a time to collect food and then slow down the pace of life. When agriculture wasn't the only option for people and cities became more populated, than the terms Fall and Autumn were heard more frequently.

For Fall lovers it is a perfect time nature for walks, bikes and hikes, football and holidays such as Thanksgiving, with its good home cooked food, friends and family. Though "Fall" is the season's informal name it is not a fall towards colder dreaded times. Instead it should be viewed as season of cool crisp air, endless blue skies and zero humidity.

And then there's probably not what I would call the best holiday – but the most entertaining – Halloween. Because not many other countries celebrate Halloween we have the rarity of dressing up foolishly. As children we are able to feed ourselves insane amount of candy for free, stay up later than usual, singing songs such as, "H, a, double l, o, w, double e, n – spells Halloween." Remember you thought it was entirely dumb to have these songs at school Halloween functions – but secretly you loved them.

Then there is the largest constituent of Autumn – food – in which another holiday revolves around. Pumpkin pie, apple pie and turkey. Candy corn, pumpkin bread – even pumpkin ice cream and coffee. You can make a hot drink and carry it around without worrying about your hands freezing off or it being to warm out for a hot beverage. Apple cider is simply amazing and hot chocolate is more than acceptable in the season.

For colleges students we are fortunate enough to have our semester start before the rest that labor day gives, than its Columbus Day weekend and Veteran's Day. Then comes what the University of Massachusetts academic calendar refers to as "Thanksgiving recess." You bet it does. By this point in the semester I'm sure we'll all be needing some mashed potatoes, turkey and cranberry sauce – and visits with the family. Five days of endless food await.

The crisp weather makes activities such as pumpkin picking and apple picking all the much more enjoyable. In our society, for most people food is readily available, so the idea of going to pick apples from actual trees is simplistic and fun at the same time. In what other season can you go and just pick bags full of produce?

My fondest memories of fall stem from my childhood, which involved many camping trips, most of which I was unwilling to go on at the time, mountain summits, various festivals throughout the Northeast, famer's markets, apple picking, corn field walking and just enjoying the outdoors. I've learned that even in college there are still plenty of opportunities to go outside and enjoy it.

So, at this point we are only less a month into fall, so all you really can do if you don't love the season, is lets the leaves fall and go with the flow.

Chelsea Whitton is a Collegian columnist and can be reached at cwhitton@student.umass.edu.

Don't fall for it

Ross Bernhardt

I don't consider myself to be an expert on judgement. I couldn't even get the gig to replace Simon Cowell on American Idol (damn you Steven Tyler!)., but I do know one thing: fall is an awful season. I can understand how on the surface, fall is fairly attractive. The foliage is nice, football and basketball season are starting and you get to celebrate holidays like Halloween and Thanksgiving. But one needs to look deeper when determining how good this season really is.

First, fall goes by two different names: "fall" and "autumn". What kind of nonsense is that? Who was the genius that awarded this season two monikers? It certainly is not so much better than the other seasons that it deserves two names.

It might be because of these competing names that the season sometimes can't decide how it wants to behave.

When conditions are right, temperatures can rise during these fall months. This is called an "Indian Summer." It is an inconvenience to me. Do you know how hard it is to dress during an Indian summer? When you wake up, it's a brisk 45 degrees. By noon, it is a simmering 80. If you wear a sweater or sweatshirt, you are drenched in sweat by midday. At least in the other seasons you can prepare for the weather. You know it's going to be cold in the winter. You know it's going to be hot in the summer and Punxsutawney Phil tells us what weather we can expect during the spring.

Sure the foliage during autumn is beautiful. Many flock to New England during October just to try and catch a glimpse of the various reds, oranges, and yellows that color the landscape. "Family Guy" calls these people "leafers" in a great Season Three episode. I have no problems with admiring the beauty of dying trees. The only things I think about when I see a tree that no longer photosynthesizes are: this tree is dying, somebody is going to have to rake these leaves because I'm not doing it and those rotting leaves smell terrible. Then when I finally get the smelly leaves raked, some kid jumps in the pile and forces me to do all this work again.

Another thing about these leaves: They are dangerous. Wet leaves can lead to reduced traction for both cars and bikes, which leads to accidents.

Thanks for making our roads more dangerous, fall. This definitely isn't the dominant narrative when looking at trees, but it's all I ever think about.

Sure Halloween and Thanksgiving are wonderful holidays. But both are extremely gluttonous and evil holidays.

With America's obesity epidemic, nobody should be letting their children parade from house to house accepting candy from any and everybody. But will we ever learn? No. Halloween has also turned into an opportunity to turn our clean, good-natured girls' costumes (nurses, teachers, etc.) into outfits more suitable for a harlot. No wonder other countries frown upon us when our middle school girls parade around looking like prostitutes just to get candy! Black cats get tortured for Satanic purposes, egging and other forms of vandalism run rampant among youthful pranksters, and some sick freaks still tamper with Halloween candy.

OK, maybe that last part might not be true, but that is a hard stigma for me to break.

Thanksgiving is the glamorous union of the Pilgrims and Native Americans, who combined their food for a marvelous feast. This is just an exploitation of one of the few positive encounters between Native Americans and the invading Pilgrims/Colonists. The good times didn't last long. Native Americans lost their land and were given smallpox in return.

But it's Thanksgiving! Let's stuff our faces and forget about all that stuff! Not on my watch. Pick some more responsible holidays, fall. Something like Christmas, Valentine's Day, Easter or Independence Day.

Here are a couple more things that bug me about fall. Warm breezes turn into wind chill, one of my least favorite terms in the weather glossary. Anyone who has walked past W.E.B. DuBois Library during a cold day knows what I'm talking about. (I know this carries over into winter, but it starts in the fall.) Birds start to fly south for the winter. I am a bird person, and I love hearing the chirping of birds when I am outside, and fall is trying to take away this simple pleasure.

Fall should not be held on any pedestal. It is an inferior season and should be treated as such. Save all your joy and adulation for the good seasons, and don't waste it on fall.

Minutemen competes against ranked teams

JEFF BERNSTEIN/COLLEGIAN

The Minutemen have some nationally-ranked opponents in their competition this weekend, including No. 2 Oklahoma and No. 6 Arkansas.

By Ben Lambert
Collegian Staff

After both competing in the same place at last week's New England Championships, the Massachusetts men's and women's cross country teams are traveling to two very different locations for meets this time around.

The men's team is on its way to Fayetteville, Ark. for the 2010 edition of the annual Chile Pepper Festival, while the women's team is heading to the Rothenberg Race in Warwick, R.I.

The men's team's journey to the Chile Pepper Festival will take them further south than any UMass cross country squad since the mid 1970's. There, the Minutemen will race against stiff competition from all around the country, including No. 2 Oklahoma State, No. 6 Arkansas and No. 7 Indiana. These schools are the highest ranked that the Minutemen have faced off with this year.

Junior Girma Mecheso, who leads No. 2 Oklahoma State, was named the Big 12 Men's Cross Country Runner of the Week for his performance at the Cowboy Jamboree on Sept. 26.

The Ethiopia native led the Cowboys to a first-place team finish at their home track, as his individual time in the 8,000 meter race of 23:46 was more than 20 seconds faster than the second-place competitor.

This is the first time that Mecheso has won this award, and the second time that a member of the OSU team has won the honor this year. Freshman Tom Farrell was awarded the prize after his performance at the Hurricane Invitational on Sept. 4.

The host of the Chile Pepper Festival, No.6 Arkansas, is currently enjoying it's highest ranking of the season. A strong second-place finish at the Sept. 25 Stanford Invitational in Palo Alto, Calif. and an idle weekend was enough to catapult the Razorbacks up two spots in the USTFCCCA national poll.

No. 7 Indiana shot up 18 spaces in the national poll this week, after making a strong statement at the adidas Invitational on Oct. 2. The Hoosiers took first-place in the race, overcoming strong opponents like former No. 6 Wisconsin and former No. 11 Syracuse. Sophomore Andy Bayer was named the Big Ten Runner of the Week after the meet for his second-place overall finish.

The women's team faces a less star studded, but equally formidable field at the Rothenberg Race. Notable schools competing include Connecticut and Brown.

UConn is coming off its best result of the season at the NEC, where they came in second. Freshman Allison Lasnicki was the top finisher for the school, as she came in 14th overall. Their performance was the best ever for the Huskies at the NEC, eclipsing a fourth-place showing in 2003.

Brown finished 21st overall at those same NEC. Freshman Melanie Fineman was first to cross the finish line for the Bears, coming in 86th overall.

The Minutewomen are looking for more strong performances from sophomore Courtney Baldwin, senior Gina Perno, junior Karen Roa and senior Elizabeth Fisk.

UMass coach Julie LaFreniere was very impressed with her team when talking about the performance of this group last week.

"Any of them could be the lead runner. They ran very, very well," LaFreniere said.

After this, both teams return to action at the Atlantic 10 Championships on Oct. 30 in Pittsburgh, Pa.

LOOKING FOR AN ENVIRONMENTAL JOB?

A GREEN INTERNSHIP?

INTERESTED IN THE ENVIRONMENTAL FIELD?

Visit the Environmental Conference Career Booth

The 26th Annual International Conference on Soils, Sediments, Water and Energy

AT THE CAMPUS CENTER
OCTOBER 19 AND 20 FROM 2-5 PM

Are you a Science or Engineering Major?
Learn about the environmental field or find a job/internship

Representatives from Environmental Companies will be available on Tuesday, October 19, and Wednesday, October 20, from 2:00pm to 5:00pm. Students interested in talking with company representatives should come to the Student Career Booth at the conference on the bottom floor of the Campus Center. We hope this will be a great opportunity for students looking for full-time jobs and internships to meet with companies looking to hire.

EVENT: International Environmental Conference on Soils, Sediments and Water and Energy

DATES: Tuesday, October 19 2 to 5 PM
Wednesday, October 20 2 to 5 PM

LOCATION: Campus Center, Bottom Floor, Auditorium

UMass fights for first

By Michael Wood
Collegian Staff

Massachusetts and Lock Haven have never met in competition before, but on Friday, Oct. 15, the top two field hockey teams in the Atlantic 10 conference will play each other at Garber Field for a chance at first place.

Each team saw rough starts to their respective seasons, with UMass beginning with a 1-3 record and Lock Haven losing its first three games, but each has rebounded and now sits atop the A-10.

The Minutewomen (7-6, 1-0 A-10) are in second place in the A-10 and head into the game on an offensive tear, scoring 11 goals in their last three games and seeing production from a variety of players.

Through the first half of the season, senior Katie Kelly led the team in offense, accounting for roughly 60 percent of the goals scored. Yet, in the past three weeks the Minutewomen have received scores from seven different players and hasn't had to depend on Kelly to score every goal. UMass coach Justine Sowry attributes the recent surge in offense to quality practice time and consistency in play, regardless of the opponent.

"It's a little bit of both," Sowry said. "In our earlier games we were playing against higher-ranked opponents where one player may only get one chance in a game. Now we're able to get more players in and give more time and it gives them more opportunity and with that you gain a little bit more confidence."

The Lady Owls (10-6, 1-0 A-10) are currently in first place in the A-10 owning the best overall record, and tied with three other teams for the best mark in A-10 play.

"I've never seen them live, just on video," Sowry said. "They're another good Pennsylvania team. They're very tough, very aggressive and I think they're opportunists up at the front. They'll press well and press hard and they definitely go fast in the attacking 50 [yards]. Our press is going to have to be good and our defensive structure is going to have to be very tough and very poised."

Lock Haven has players in first place in just about every offensive category, and generates the most offensive pressure of any A-10 team. There are two Lady Owls with at least 13 goals on the year, and the leading goal scorer and point leader, Amy Hordendorf, is averaging a goal per game.

Fortunately for the Minutewomen, their defense continues to be the strongest aspect of their game, regardless of the recent rejuvenation to the offense.

Goalkeeper Alesha Widdall ranks first in the A-10 in save percentage (.816), goals against average (1.15) and shutouts (four), and she is currently fifth in total saves with 62. She is one of the most experienced goalies in the conference and the stability and leadership she provides between the pipes figures to be a significant benefit for UMass as the season winds down.

"It's going be an interesting game," Sowry said. "We're expecting rain so it could be an interesting battle in interesting conditions. It's an equalizer. Depending on how much wind and rain we get, it's going be a slugfest."

Michael Wood can be reached at mcwood@student.umass.edu.

UM cautious of weather

By Michael Wood
Collegian Staff

October has arrived in Massachusetts.

As students preoccupy themselves with pumpkins, candy, Halloween decorations and the flurry of color in foliage, cold temperatures have slowly begun to grip the northeast. For most, this time of year means little more than adding an extra layer when going to class in the morning, and changing back into a t-shirt later on when the weather warms up.

For the Massachusetts field hockey team, the stakes are much higher, and weather could play a pivotal role in how the season ends.

When the Minutewomen take on Lock Haven on Friday, Oct. 8, the weather will be less than favorable. Accuweather.com is predicting temperatures hovering around 50 degrees with sustained periods of rain and winds at 18 miles per hour.

Rain is typically not a problem for the Minutewomen, and is sometimes even welcome. With an artificial turf field, it needs to be wetted down constantly to keep it from drying out. Built-in sprinklers coat the field in water before every game and at halftime, creating an ideal smooth playing surface. If the turf gets too dry, the ball can hop and skip unnaturally and cause problems for both teams.

"We have a water-based turf and it makes the ball run flatter, faster, and smoother," UMass coach Justine Sowry said. "It provides a fast free-flowing game. It keeps the ball down and makes it a safer game. We like it but the more wind and rain we get, it can get interesting."

While rain alone won't be much of a problem, combined with cold temperatures and high winds it could wreak havoc with the players and make it difficult to perform even the most basic of functions on the field.

If the temperature is low enough, it can slow down the mobility of hands and fingers and decrease the ability to tightly grip a stick, something that is essential to shooting and, in particular, dribbling the ball. Without a proper grip on the stick, players can see errant passes and shots, and sometimes lose grip on the stick altogether. Some athletes choose to wear gloves for a better grip, but if it's raining, like it is forecasted to on Friday, they are of little help.

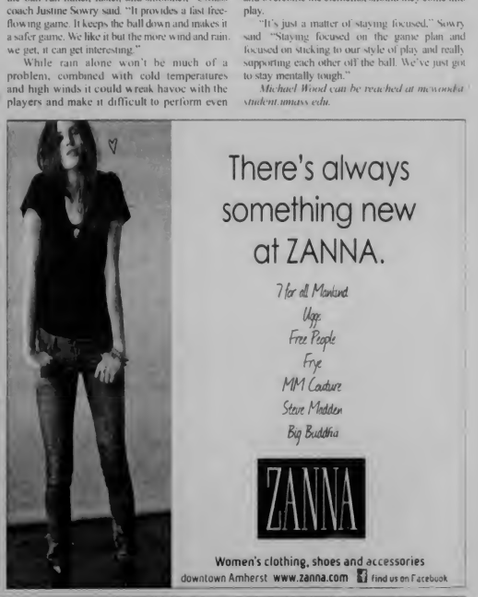
Let's not forget the ball. According to USA Field hockey, a standard ball is about 160 grams of pure hard plastic. When temperatures dip in the cool New England weather, the surface of the ball hardens and striking it with a hard plastic stick is not always the most comfortable activity.

"It shouldn't affect them, but I think it does mentally," Sowry said. "That's something that we'll really try to pay attention to. We certainly can't control it, we've got to play with it."

The Minutewomen have six more games left on their schedule before the start of the Atlantic 10 conference tournament. Five of them will be played here in the northeast, and three of those five will take place in Amherst. With weather conditions in New England notorious for changing at less than a moment's notice, UMass will have to find a way to stay focused on the game at hand and overcome the elements, should they come into play.

"It's just a matter of staying focused," Sowry said. "Staying focused on the game plan and focused on sticking to our style of play and really supporting each other off the ball. We've just got to stay mentally tough."

Michael Wood can be reached at mcwood@student.umass.edu.



Stoll leads UMass to URI

By Michael Counos
Collegian Staff

The Massachusetts women's soccer team will return to action on the road as it travels to play against Atlantic 10 conference opponent Rhode Island on Sunday.

Both UMass (5-8-0, 2-2-0 in A-10) and URI (1-11-1, 1-3-0 in A-10) are coming off losses via the shutout. The Rams closed out their non-conference schedule on Wednesday afternoon with a 3-0 loss to Brown.

The game was a tale of two halves as the Rams shut the Bears out in the first half but allowed three in the second stanza. Brown outshot URI 14-3, with the Rams putting just one shot on goal the entire game.

The Minutewomen split their previous weekend series, with a 3-0 win against Xavier on Friday but most recently lost to 5-0 to Dayton on Sunday. The A-10 conference-leading Flyers picked up their ninth-straight win to move to 12-2-0 and 4-0 in A-10 play.

UMass fell to a strong DU offensive effort, getting outshot 24-8. Freshman Emersyn Pullan played the first half and recorded four saves while allowing three goals. Sophomore Emily Cota came in the second half to turn away two while allowing the same amount of goals.

Sydney Stoll was the difference-maker against Xavier, which was her third game back. She scored two goals on just two shots. Stoll helped UMass to its second two-game winning streak since Sept. 12th when they defeated non-conference opponents New Hampshire and Fairfield. Smith added a goal to her season tally of five. Meghan Collins distributed the ball well with two assists and Pullan recorded her third shut out of her collegiate career.

Ed Matz' offensive tactics have proven successful as the Maroon and White have already scored 21 goals surpassing their 2009 total of fifteen goals in 19 games. The current total is the most by a UMass team since 2007 when it scored 28 goals in 17 games under coach Jim Rudy.

URI's sole victory came against Saint Louis whom the Minutewomen defeated on Oct. 3rd. The Rams also picked up a 1-1 tie against UNH in their season opener. Both teams have suffered losses to Charlotte and Dayton, but the Minutewomen shutout the Musketeers whom URI lost 3-0 to in its most recent conference match. URI is currently on a four-game losing streak.

"URI is a very physical team and we are going to have to concentrate on putting pressure on them the whole game," Matz said.

The Minutewomen fared well against the Rams in 2009 with a 3-2 win on Oct. 17th. Therese Smith scored the winning goal in that match in the 86th minute. Ashley Harnel had an assist while Cota recorded eight saves between the pipes. UMass leads the all-time series 15-7.

The Rams currently sit towards the bottom of the A-10 standings with three points. UMass is tied for fourth with Xavier and Duquesne with six points. After the blowout loss to the Flyers the Minutewomen close out the season against Rhode Island, Temple, Saint Joseph's, Fordham and LaSalle; all of whom currently rank below UMass in the A-10 standings.

UMass is 2-5-0 overall on the road this season. The conference matchup will begin at 1 p.m. at the URI Soccer Complex.

Michael Counos can be reached at mcounos@student.umass.edu.

GEOFF KING/COLLEGIAN

Defender Alyssa Visconti kicks the ball forward in a recent UMass game. Visconti has started all games for the Minutewomen, who compete against URI this weekend.

Pumpkin Head next for UM

By Stephen Hewitt
Collegian Staff

After a solid performance in the Head of the Housatonic in Shelton, Conn. last Saturday, the Massachusetts crew team has returned home and will host the Pumpkin Head Regatta on the waters of the Connecticut River this Saturday.

The Minutewomen will share the waters with Smith College in what will be more of an informal competition, head coach Jim Dietz explained.

The event will serve as a practicing platform as UMass prepares for its biggest race of the fall season on Oct. 24 when it heads to Boston to compete in the Head of the Charles.

Dietz and the Minutewomen will enter in two races on Saturday and will look to improve upon their performance from the Housatonic last week.

Hoping to improve upon its fifth-place performance at the Housatonic, UMass will enter in the Lightweight 8 on Saturday, coxed by senior Carly Payne and of which also features seniors Elizabeth Euiler and Chelsea Wakeham.

The Minutewomen will also enter their Varsity 4 boat that will compete in the Head of the Charles next week, which is coxed by senior Samantha Schnoerr and stroked by senior Ali DiMatteo.

"Those boats have been training solid for the past week in the mornings, and most of them are doing two-a-days just to get ready for the Charles," Dietz said. "And those boats are really starting to become competitive."

As far as expectations go for Saturday, Dietz and the crew are focused on getting all of the details right as they head to the Charles.

"The expectations are going to more like, for example, we rowed the course in 19 minutes at stroke rate 32, it felt good, maybe it was too high and we should back off and row a lower rate, and where are we stronger," Dietz explained.

After its first week postponement at the UMass Invitational two weeks ago due to weather and river conditions, Dietz and his squad were eager more than ever to compete at the Housatonic.

"They couldn't wait to get back on the water," Dietz said. "More of the team wanted to go to the Housatonic last week but we kept it really small, and the Charles is going to be relatively small also."

Due to the aforementioned weather conditions, the Minutewomen did not practice for much of the early part of last week.

However, Dietz said that the weight room and indoor fitness have been strengths for the team and is an important factor as the squad prepares for the Head of the Charles and some other big races in November.

"As far as training goes, we got this new guy Chris Boyko in the weight room that we're working with," said Dietz. "The weight room work is really bringing our fitness and strength up, so that's a positive."

As far as the team's progression is going, Dietz is very enthusiastic and happy about where the team is at, and is confident about the team's chances as they travel to the Head of the Charles next week, even through all of the misfortunes of the weather.

"It's been a good fall. I think the rowing has been going well," said Dietz. "We haven't been doing a third of the racing we normally do this time of year because of the river flooding and everything, but overall I think the fall is going pretty well."

Stephen Hewitt can be reached at shewitt@student.umass.edu.

CNS establishes new program for freshmen

By Melanie Muller
Collegian Correspondent

This semester, the College of Natural Sciences (CNS) launched a new program, the CNS Dean's Research Experience, to give students an authentic taste of research with a CNS faculty member during their freshman year.

A total of 18 students are enrolled for the first semester of the course. The program is structured as a one or two-credit course in which students work with their mentor on a research project related to the mentor's work.

According to the syllabus for the class, students must perform at least three hours of research per credit-hour per week on average. Students may also keep a lab notebook, produce a background and proposal paper, and present the results of their research at a meeting of their research group, depending on the preferences of their mentor.

According to Dr. Julian Tyson, associate dean for academic affairs in the College of Natural Sciences and the course director for the Dean's Research Experience, the idea for the program began when the University of Massachusetts' Chancellor and Provost asked all faculty to come up with ideas for generating more revenue for the University. The key was to generate revenue through programs that would be likely to attract more students, with an emphasis on attracting out-of-state students.

In brainstorming sessions at CNS, the idea was developed for the program that would become the Dean's Research Experience. After determining that about 50 CNS faculty members were willing to participate, a proposal

Sexual report card names top schools promoting sex health

COURTESY | MASS.EDU

University Health Services at UMass Amherst offers a wide variety of tests and screenings which students can use to make sure that their sexual activities are going safe and smooth.

By Ashley Berger
Collegian Correspondent

The good people of Trojan condoms want to protect you from sexual maladies.

Earlier this month, Trojan, the nation's top-selling condom brand, released its fifth-annual Trojan Sexual Health Report. The report card consists of two studies indicating changes in sexual health attitudes and trends on college campuses nationwide.

According to the report, sexual health is increasingly becoming a much larger political and social issue across colleges, and has a much bigger impact on students' lives than ever before.

This year, Columbia University notched the top spot, moving up three spots from number four last year. Much of Columbia's high grade comes from its implementation of a new Internet resource called "Ask Alice," which allows students to anonymously ask sex related questions.

The top five schools included Columbia, Michigan State University, Ohio State University, University of Michigan-Ann Arbor and Brown University. Chicago State University, Marshall University, DePaul University, Brigham Young University, and the University of Idaho rounded out the bottom five.

The research was conducted by independent research group Sperling's BestPlaces.

"These schools do well for a reason. They have good programs and continue to build on those good programs," said director Bert Sperling.

"Schools that don't do well do not necessarily have bad programs, but tend to keep the same programs in place while other schools move ahead," he added

Sperling added that it's almost a competition of sorts; as schools are constantly engaged in races to be at the top of various rankings and categories.

"Students like to see where their school ranks because they are competitive, they want to know what they can ask for from their school," said Sperling.

"Student Health Centers take the study seriously because they want to see what other schools are doing and how they can improve based on that," he added.

When the survey first came out five years ago, it only included 100 schools. In the years since, it has expanded to include 141 schools, which Sperling explained covered over 30 percent of undergraduate students in the United States.

"We want to impact the most students as possible with the survey," said Sperling. "The schools we pick are based on influence, reputation, size, and athletic conference."

The report is organized by athletic conference, and for the first time in three years, the Ivy League has not dominated the top five. However, Ivy League schools jumped the farthest in ratings this year; Harvard climbed 46 spots from 62 to 16 and Princeton rose 53 spots from 61 to eight. This year, the Big Ten reigns supreme, with some of the schools previously mentioned such as Michigan and Michigan State taking over the top five.

The report card categories are: health center hours, availability of patient drop-in and appointments, availability of separate sexual awareness programs, contraceptive availability and cost, HIV testing, cost, and locality, other STI testing and cost, availability of anonymous advice via email, existence of lecture and outreach programs, existence of student peer groups, website usability and functionality.

The University of Massachusetts has individual qualities that fit in with these categories. Though University Health Services' (UHS) website does not have an anonymous question forum, the website provides information that points students in the right direction. UMass offers HIV and pregnancy testing. The University also puts on free HIV testing clinics, and allows students to be screened anonymously.

UMass also provides STI screenings, as well as screening for vaginal and urinary infections by appointment. All services are available at University Health Services.

As well as testing, UHS also offers immediate and convenient emergency contraceptive choices for a significantly lower price than most other pharmacies. The UHS website also offers a litany of information on a variety of birth control methods, all of which are available through UHS.

"I know that you can be screened for sexually transmitted infections, but I don't exactly know where to go," said sophomore Tim LeBlanc. "The University could do more to publicize our options. If I thought I needed to be checked out though, I would definitely figure out how to do it."

Sophomore Kelcie Sarris was impressed with the variety and cost of services on campus.

"It's nice that there are so many options of birth control that are available so close," she said.

"The prescriptions are also much cheaper than places like CVS, which is obviously a huge factor," she added.

Trojan has also paired with Rock the Vote, a service encouraging young people to vote and raise awareness for issues facing their everyday lives. The two partnered to increase dialogue about sex across campuses. According to data released by Rock the Vote, about three-fourths of young Americans think educating their peers about safe sex and birth control would be a better way to reduce teen pregnancy.

Purcell in running for lieutenant gov. position

By Bobby Hitt
Collegian Staff

The Green-Rainbow party candidate for lieutenant governor did not come from a privileged background similar to that of many politicians. Richard Purcell, a 50-year-old resident of Holyoke, Mass., moved to Massachusetts in 1974 from a Tohatchi Native American reservation in N.M., and his family settled in the Holyoke projects.

Purcell's experience with poverty and his mother and grandmother's activism in the Native American movement shaped his political philosophy, which landed him a position as Dr. Jill Stein's running mate in the Massachusetts race for governor.

Purcell, a buck sergeant in Operation Desert Storm, sat down with the Collegian on Sunday Oct. 17 and explained his and Stein's ideas for the Commonwealth.

He is about 5 feet 6 inches, of medium build with peppered white hair and a hoop earring accompanying a diamond stud on his left ear.

Purcell spoke passionately in a close to combative manner unlike the cool diplomatic responses given by politicians like President Barack Obama.

According to Purcell, he and Stein are the "people's voice," claiming that politicians too often hear one thing from the public and do the opposite.

Unlike the Charles Baker, Timothy Cahill, and Deval Patrick campaigns, the Green-Rainbow party candidates have a policy of rejecting any and all donations from private organizations and lobbying groups. Purcell calls his opponents, "corporate candidates." Purcell claimed that he and Stein's grassroots campaign is more legitimate because he and Stein will not owe any favors to corporate sponsors.

Purcell has run for public office several times in Holyoke, but has never won, as opposed to his opponents Richard Tisei and Timothy Murray, who have had extensive experience in elected office. Candidate Purcell has worked on several ballot initiatives in Holyoke.

He claims his leadership skills come from his experience in the military, where he said he learned how to work as a team.

Purcell claims he has been portrayed in the media as a "spoiler candidate" who would take away votes from Governor Patrick. The Green-Rainbow candidate asserts that he and Stein are running to win.

"There was an article in the paper today about the spoiler effect, saying we are going to take votes away from Deval Patrick," said Purcell. "They're absolutely right -we're here to take votes away from everybody," continued Purcell.

Purcell outlined his top three priorities he would focus on if elected: Jobs, health care, and education, in that order.

The Green-Rainbow party candidates plan to tackle their first priority, jobs, by building a green infrastructure.

"Jill and I want to create 50,000 green jobs," said Purcell. "Green jobs put people back to work at the same time as building infrastructure for secure energy, food, transportation, and health.

See PURCELL on page 3

UMass student on the run from police after two alleged assaults

On Friday, the University of Massachusetts Police Department (UMPD) issued a crime alert after two assaults occurred on campus. The two incidents took place at the Isenberg School of Management and the Morill Science Building III.

After UMPD released a shot of the suspect in the two sexual assaults, the campus community responded, and police were able to identify a suspect. The suspect is Luther Gorakhov, who lives off-campus at 47 Fairview Avenue, in Amherst.

UMPD detectives have secured an arrest warrant for Gorakhov, whose age and major could not be immediately determined, on charges of assault with intent to rape, attempted kidnapping, and other charges. Anyone with information regarding his whereabouts is encouraged to call 911.

Police received reports of the two assaults Friday afternoon between 5 and 6:10 p.m. The first reported assault happened at Isenberg. Gorakhov allegedly approached a female student and said, "You need to come with me," while attempting to tug the victim's arm. The victim reportedly resisted and fled. The second incident occurred in a women's bathroom in the Morrill building. Gorakhov allegedly followed the female victim into the bathroom, reportedly blocking her when she attempted to leave. Gorakhov then allegedly pushed the victim against wall, attempting to push her to the floor. She resisted and called for help, and then Gorakhov allegedly fled.

DECISION 2010

Obama stumps for Deval in Hub

BY SAM BUTTERFIELD
COLLEGIAN STAFF

President Barack Obama paid a visit to Massachusetts Saturday, speaking at a rally supporting incumbent Governor Deval Patrick, who is locked in an extremely tight reelection race against Republican opponent Charles Baker.

The free event drew an estimated 15,000 attendees to the Hynes Convention Center in Boston's Back Bay neighborhood, according to a Sunday release from Patrick spokesman Patrick Reath.

The rally was held primarily to forge enthusiasm for Patrick and lieutenant governor Tim Murray's reelection campaign, and in the hopes of spurring a "get out the vote" effort from Patrick's supporters.

At the rally, some 7,500 new volunteers signed up to campaign for the Governor in the final weeks leading up to the election, according to the Oct 17 release

Before Obama took the floor around 1:30 p.m., Gov. Patrick delivered opening remarks, encouraging his base to mobilize to help catalyze his reelection bid.

"Policy only matters at the point where it touches people, and politics is most meaningful at the grassroots," he said. "That's why Tim Murray and I are out talking with people every day about the choices before us as a Commonwealth, and building a grassroots network stronger than ever."

The President encouraged Massachusetts residents to get involved in the reelection effort.

"This will be the largest get-out-the-vote operation in the history of this state, but only if you do your part," said Obama.

In encouraging voter organization, Obama harped back to the grassroots campaign which propelled Patrick to the State House in 2006, telling the Boston crowd they needed to work towards the same goal they had then.

"The reason this is important is because all of you got involved in 2006 and 2008 because you believed that we're at a defining moment in our history," he told the crowd. "You believed this is a time when the decisions we make about the challenges we face, they're not just going to affect us. They're going to affect the lives of our children, and our grandchildren, and our great grandchildren."

Obama also echoed a theme he has spouted on the campaign trail across the country this year that Republican leadership put America into the economic downturn from which it is still struggling to recover, and Democrats need more time to rectify the issues they faced upon assuming a majority in 2006 and then 2008.

"Between 2001 and 2009, we saw the most sluggish job growth since World War II," he said "If [Republicans] win this election, a chair of the Republican Party has already promised that they'd pursue the same agenda."

The Nov. 2 gubernatorial election, now just 15 days away, promises to be one of the tightest races in recent memory. A Sept. 30 Boston Globe poll had Patrick slightly edging Baker, with 35 percent of likely voters' support to Baker's 34 and Independent Tim Cahill drawing 11. Those numbers, however, provide a rather incomplete forecast of a hypothetical election, as the poll's margin of error of 4.5 percent means either candidate could be in the lead.

A more recent Oct. 10 poll from Suffolk University and Boston's NBC 7 News found more encouraging results for Patrick, who has been in office on Beacon Hill since 2006, when he handily defeated Republican opponent Kerry Healey. In the sample of 500 likely Commonwealth voters, 24 percent coming from Worcester and points west, 35 percent from the northeast corner of the state, eight percent from Boston and 33 percent from southeastern Massachusetts and Cape Cod. 44 percent of respondents said they would vote or are leaning towards voting for Patrick. 37 percent said they were leaning towards or would definitely vote for Charles Baker, while 10 percent said they would support Cahill, currently the state treasurer, and one percent said they were leaning towards or planned to vote for Green-Rainbow candidate Jill Stein.

The Suffolk poll, however, produced one curious finding. Respondents overwhelmingly said that if they were hypothetically asked to vote immediately, they would choose Baker. 31 percent of respondents said that if they were in the ballot booth at the moment of being questioned, they would vote Baker, while just 15 percent were so sure of Patrick.

Despite a prevailing anti-incumbent sentiment sweeping across the country this election cycle, Massachusetts voters still seem to believe Patrick is best equipped to be governor, according to the Suffolk Poll. While 51 percent of respondents said Massachusetts is headed in the wrong direction right now, compared to just 36 percent who believed the Bay State is headed the right way, 45 percent said they approve of the job Gov. Patrick has done, compared to 44 who said they disapprove.

In other areas, Patrick seems to harbor a slight advantage in voters' trust. 38 percent believe he would do the best job improving the state's economy of the four candidates in the race, while 34 percent believed Baker would. Baker, who has used his record as an executive at Harvard Pilgrim health care to argue he would best create jobs and handle the state's economy, leads in voters' opinion of who can best stimulate the state's economy. 35 percent said he would create jobs better than other candidates, while 31 percent believed Patrick would. This could be a key point of contention, as the Patrick campaign is making his administration's record on job growth a pivotal point of its reelection bid.

"Because of our hard work, Massachusetts is recovering from the recession and creating jobs faster than the rest of the nation," Lieutenant Governor Tim Murray told a group of college reporters last Tuesday. "Our investments in jobs, education and health care have led to real results - and we now lead the nation in educational achievement for our students and health care coverage for our residents."

In terms of likability and political savvy, voters certainly favored Patrick. 44 percent said he has the best temperament to be governor, compared to 20 for Baker, and 38 percent said he had run the best campaign, with 23 percent responding that Baker had.

Regardless of their political preferences, Bay State residents seem to believe the political winds won't change this fall. 53 percent of the Suffolk poll's respondents said they expect Patrick to be reelected this November, compared to 31 percent for Baker and two percent who believe Cahill will prevail. While Obama's presence has generally helped candidates fighting testy reelection battles in solidly blue states, it failed to deliver one key seat here in Massachusetts earlier this year. In January, Obama visited Boston to promote then-Democratic senatorial candidate Martha Coakley's campaign in the special election to fill the seat left vacant by the death of Edward M. Kennedy in 2009. Despite the President's popularity and appeal in Massachusetts, voters chose Republican Scott Brown to fill the seat.

Sam Butterfield can be reached at shutterfield@dailycollegian.com.

President Obama spoke in Boston Saturday, where he encouraged citizens to organize for Gov. Deval Patrick's reelection campaign.

Gov. Deval Patrick gave opening remarks at Saturday's rally in Boston promoting his reelection campaign.

Raise your voice

Musician Hugh Masekela (left) and his son Sal Masekela, spoke at Bowker Auditorium last Wednesday during a talk sponsored by the Fine Arts Center.

Purcell, Stein go green

Claim public money is not spent properly

PURCELL from page 1

Green jobs will also reduce pollution, improve nutrition, and help us reclaim an active lifestyle," continued Purcell.

If elected, Purcell and Stein plan to endorse biking, saving energy, and waste disposal.

"Half of the state budget is health care," said Purcell, who has worked at Baystate Medical Center for 19 years, "If you start making people's lifestyles healthier, then you are helping the health care system."

Purcell claimed that more recycling workers and a better system of public transportation are important to creating more jobs while improving the environment.

He then claimed that the state has not been able to do this because Massachusetts is still paying the bill for the Big Dig, a project which, Purcell pointed out, had Charlie Baker as among its chief financial architects.

Purcell then went after Baker on his stance on creating jobs. He claims that Baker "turned Harvard Pilgrim around" by laying off 350 people.

"[Baker] made people lose their jobs and now [Baker] is in this race to create jobs," said Purcell, "It's a tongue twister."

Purcell claimed he and Stein are the ones who can improve health care in the state by creating a single-payer system.

"Who better to talk about health care than a doctor?" said Purcell, referring to Stein, "Or should you listen to an insurance executive in Charlie Baker or a corporate lawyer in Deval Patrick?"

According to Purcell, the media has not given Dr. Stein enough exposure, and she has been excluded from several debates. He claims part of the reason for the exclusion is the Green-Rainbow party's lack of funding compared to the GOP and Democratic campaigns.

"There is only one real option for change in this election," said Purcell, "and that is Dr. Jill Stein and Richard Purcell."

Purcell stated that he seeks to get every student in Massachusetts to get the exact same chance at an education, regardless of their financial status.

He claimed the Bay State's public schools and colleges are under attack by "privatization interests," citing the example of charter schools.

"Public money that is supposed to be spent on public schools is going to charter schools," said Purcell.

Purcell also claimed that part of the reason why the University of Massachusetts isn't funded as well as state schools outside of Massachusetts is the privatization of the education system.

The Green-Rainbow party gubernatorial candidate, Jill Stein, will appear at UMass in the Cape Cod Lounge on Oct. 22. Her talk will be followed by a performance by a rock opera titled, "Protest PG," by Amherst performance artist Norman Bie. The event will be hosted by the Cannabis Reform Coalition.

Bobby Hitt can be reached at rhitt@student.umass.edu.

Purcell believes government must work to curb energy use and encourage green development.

New freshmen class offers sci. experience

CNS from page 1

for funding was presented to the Chancellor and Provost. While they did not decide to fund the program, the Dean of the College of Natural Sciences considered it "a sufficiently meritorious idea that he would go ahead with it anyway," Tyson said.

Dr. Tyson said the idea for Dean's Research Experience stemmed from another program he had led for several years, previously called "The Arsenic Project," for students in the introductory chemistry series, Chemistry 121 and 122.

In that program, a group of students from these two courses, generally chemistry majors or from a closely-related discipline, participated in a research project related to Dr. Tyson's research, concerning arsenic levels in rice, groundwater, and other substances.

Besides attempting to recruit students to UMass, the Dean's Research Experience also has goals of retaining students studying science, technology, engineering, and mathematics, or "STEM" disciplines. Organizations such as the National Science Foundation (NSF), Dr. Tyson said, have come to the conclusion that more STEM graduates are needed than universities are currently producing.

One way to increase the number of students graduating with STEM degrees is to keep students in such disciplines, and Dr. Tyson believes that a research experience helps keep students interested in science.

"There is plenty of evidence, at least in the chemistry field, and I think it's probably true across the other STEM disciplines, that a research experience is beneficial in motivating students to stay with the discipline," Tyson said."They keep looking for another research opportunity, and then another and before they know it, they're hooked," he added.

Despite the benefits of such an experience, Tyson says it is difficult for freshmen students to find an opportunity to participate in a research project."There are plenty of programs that aim to give undergraduate students a research experience, but often they are geared toward students in their senior or junior years," Tyson said.

Tyson noted that in the traditional model for undergraduate research, where students spend time with their mentors discussing the details of the research, it becomes quite difficult for large groups of students to participate.

"For 4,000 entering students to have this sort of experience, you would need 4,000 faculty," Tyson said.

While a second Dean's Research Experience class is still being considered for next semester, according to the CNS website, Dr. Tyson expects that the next Dean's Research Experience class, if it is held again, will be held in the fall of 2011. This would provide time to recruit more students and to improve the program, which will be renamed "The First Year Research Experience (FRE)." The future of the program Tyson said, will depend in large part on the feedback of current Dean's Research Experience students and their faculty mentors at the end of this semester.

"One possible question to ask people," Tyson said, "is whether they prefer it to be a two-semester activity, or if they would like to have that option."

Some faculty might think students would be able to perform more meaningful work over a longer period, while others would argue that a greater variety of experiences would be more beneficial. How the program is shaped in the future will also depend on how difficult students find it to fit Dean's Research Experience in with the rest of their course work.

Melanie Muller can be reached at mpmuller@student.umass.edu.

Steve Goodwin, Dean of the College of Natural Science developed the idea that eventually turned into the Dean's Research Experience.

APD host community meeting, hire aid to assist abuse victims

The Amherst Police Department (APD) announced over the weekend that it will host a community meeting this Wednesday to address a spate of break-ins and issues related to student-town affairs.

The community meeting will take place Wednesday from 7 to 9 p.m. in the Immanuel Lutheran Church at 867 North Pleasant Street.

According to Oct. 13 release from Lieutenant Ronald Young, the meeting will concern "the increasing number of house breaks in North Amherst neighborhoods, as well as increased issues concerning students and neighborhood conflicts."

The APD encourage residents to come together to discuss protecting property, as well as "student and neighborhood issues" and "initiatives to improve the quality of life for all residents" of Amherst.

For more information on the meeting, citizens can contact Officer William Laramee or Officer Yvonne Molin at 413-259-3000, or by email at larameew@amherstma.gov and molmy@amherstma.gov.

In other police-related news, the APD announced last Thursday that it had received a grant of more than $170,000 from the Department of Justice, Office on Violence Against Women. The grant was obtained in partnership with the University of Massachusetts Police Department and the UMass Everywoman's Center (EWC).

With the funds, the APD, UMPD and EWC will hire a full-time Civilian Advocate to aid victims of sexual assault and domestic violence. The advocate will be employed by the EWC and will be contracted by the APD and UMPD.

Last year, the APD responded to 164 domestic disturbance calls and 27 sexual assaults, according to the Oct. 14 release, while the UMPD took 27 domestic disturbance calls and responded to 13 sexual assaults. The EWC received 1032 hotline calls in fiscal year 2010, providing "crisis intervention" services to 257 new individuals.

APD Chief Scott Livingstone said of the grant that "having an advocate that has an office within our police departments who can immediately begin to work with survivors for support and resources is instrumental in these cases."

The right to bare breasts

If you've ever been out walking on a hot summer day, you know that sometimes clothes can make you unbearably sweaty and uncomfortable. If you're a man, you can try to cope with this problem by taking your shirt off, and no one will complain.

Sophie Kaner

If you're a woman and you do the same, you're likely to get arrested.

In most parts of the U.S., it is illegal for women to go topless in public. Women may legally do so only in six states, and specific cities and beaches. If a woman goes topless in public anywhere else in America, it is considered indecent exposure. In Massachusetts, the maximum penalty for indecent exposure is up to six months in jail and a $200 fine.

Public toplessness for men, however, is legal everywhere.

Of course, the existence of this law isn't just arbitrary sexism. There are numerous objections that people have made (and will continue to make) to public toplessness for women.

After all, not everybody has attractive breasts, and who wants to see ugly women go topless? Nonetheless, not everybody has a body that is widely considered attractive, and yet we are "forced" to see them every day.

The strongest argument for keeping women's tops on is that women must be protected from men. According to this argument, men simply are not able to control themselves at the sight of a woman's bare breasts and would sexually harass, assault, or even rape them. However, women are expected to cover their hair in certain cultures and religious groups. These groups believe that if a woman's hair - a supposedly sexual part of her body - was to be seen, men would not be able to control their desires. Regardless of religious belief, though, women typically leave their hair uncovered in the U.S., since we don't consider it to be a sexual entity. Even if a woman does have beautiful hair, men are easily able to control themselves. There is nothing inherently sexual about a woman's hair, and similarly, there is nothing inherently sexual about a woman's breasts. Both ideas, in fact, are mere societal constructs.

Other people will say that they aren't comfortable with being forced to see women's breasts in public. After all, not everybody has attractive breasts, and who wants to see ugly women go topless? Nonetheless, not everybody has a body that is widely considered attractive, and yet we are "forced" to see them every day - sometimes in shorts or a bathing suit. Finding someone, male or female, unattractive is not a viable reason for forcing them to cover up, or for arresting them if they refuse to do so.

Still others argue that there is an inherent physical difference between men's and women's chests, and that therefore we should treat them differently. However, the only real, physical difference between men's and women's chests is that women's breasts can be used to nurse children. Yet, women who are nursing children are legally allowed to show their breasts, so why should their breasts be covered up when they are not in use? We would never cover up our hands simply because they were not in use.

Another pervasive argument against women's toplessness is that children must be protected from the sight of breasts. However, breast-fed children grow up seeing their mothers' breasts, and it doesn't seem to affect them adversely. Moreover, European children who go to public beaches see women's breasts, and it doesn't traumatize them. In these situations, breasts are clearly not explicitly sexual. As children grow older, they will experience healthy sexual thoughts and feelings on their own, regardless of whether they see naked breasts on a regular basis or not.

Many people also argue that, while the current law may be unfair and sexist, society isn't ready for a change. In answer to this, I will say that, according to many, society "wasn't ready" for civil rights, or women's suffrage, and still "isn't ready" for gay marriage. In the end, social change will never arise if people continue to cling to tradition for tradition's sake. If unjust laws are changed, society will adjust accordingly.

Finally, some will say that this simply isn't an issue worth worrying about. If one examines the mentality behind this kind of law, however, it becomes clear that it is very important. Although people will cite many objections to toplessness for women, the main reason for its illegality is that our society hyper-sexualizes women's bodies, and particularly their breasts. Covering them up is, at least in theory, meant to protect them from men who won't be able to restrain themselves. But rapes, assaults, and harassment still occur. Even here on the UMass campus, a woman was assaulted this past weekend, and wearing a shirt didn't do anything to protect her.

According to the Sexual Assault Response Services of Southern Maine, one out of every six American women is the victim of an attempted or completed rape at some point in her lifetime. I am by no means saying that the law against women's toplessness is the cause of this, but the fact remains that both the law and the high rate of assaults are the result of a certain societal mindset. This mindset tells us that women's bodies are inherently sexual, and that men are unable to control their actions. However, neither of these things is true. If a woman's body isn't automatically seen as primarily a sexual object, a man is less likely to treat it as such without her consent. If a man isn't taught that his desires are uncontrollable, he won't act as if they are.

Far from preventing sexual assaults, the law against women's toplessness is part of a way of thinking that is harmful to both men and women. If we take steps to change the law, our society's attitudes will adjust and such a change in attitude will protect women far more effectively than a t-shirt ever could.

It's my market and I want it now

The issue of China's fixed exchange rate with the United States has been a target of debate throughout the media. The vast majority of the debate has focused on economic technicalities like exchange rates and balances of payments. It is true that the importance of such discussion is not to be underestimated, but there is another dimension to the topic that has seen little light. The moral dimension that is involved with any decision of policy. The moral question to be considered is: Does a government have any justifications in managing the trade of individuals due to geographic location? Without a doubt, the answer is an emphatic "no" since all that regulation of trade amounts to is the government artificially constructing a boundary and saying that trade beyond this boundary is somehow different in character than trade within it, or that its officials have the right to impose their own judgments on a consensual act between free people.

Harrison Searle

Perhaps the most important lesson in this debate can be provided by individualism. It is individuals alone, not nations, who trade with one another. It is not the United States that trades with China, but rather individuals who happen to live in the United States who trade with individuals who happen to live in China. It is so often that one can get caught in the perils of thinking about the world simply in terms of aggregates without keeping in mind that aggregates are simply methodological constructions. While it may be true that thinking about trade in terms of the United States' trade with China is a comprehensible relationship, there is nothing real behind this concept. The real phenomena the aggregates are describing are the trade of individuals, and so these real actions must be the focus of any ethical inquiry. Ergo, it follows that the moral problems surrounding trade policy cannot be rendered in terms of one nation's trade with another, but must rather take the form of one individual's trade with another, and the government's interference with it.

With this in mind, any moral argument on behalf of protectionist policies must also contend with the fact that such policies are arbitrary due to the fact they are enforced across national boundaries. The reason that they are so is that there is no necessity behind the placement of national borders. Instead, they are an accident of history and could have easily been otherwise if events had occurred differently. There is no ontological distinction between a citizen of the United States and a citizen of China, and the national borders do not separate one community from another. Indeed, it is very likely that many American citizens may very well share more in common culturally with citizens of China rather than the citizens of their own nation. For these reasons any doctrine of nationalist zeal is simply untenable, since such logic must be based on some real differences between nations.

What is considered fair differs from person to person, resists attempts at objectivity and leaves only subjective sentimentality

In fact, human communities are not the result of conscious reason drawing lines on a map, saying: "People over here shall be Nation A and people over here shall be Nation B," much to the chagrin of modern attempts to do so, but are rather the results of an evolutionary process. This process has brought humanity from a tribal existence in which the communities were comprised of individuals who knew each member of the community and were probably extended family members, to the modern community that has not only grown in population, but has also united massive regions. It is not surprising that the ancient Greek word "κοινωνία" means not only "to exchange", but also "to turn an enemy into a friend," for the expansion of trade has been a harbinger for the unification of different peoples into a single community at peace.

Without a doubt, commerce is one of the ingredients for peaceful relations between any two communities, for it is through commerce that the individuals in each will recognize the same human qualities in each other based on shared commodities. As Frédéric Bastiat once quipped, "When goods do not cross borders then armies will."

Since national borders are the result of historical accidents, and they do not communicate any demarcation between separate communities, it follows that any protectionist policy of trade based on national borders is simply arbitrary. If it is just for government officials to regulate trade between America and China because it is the passage of goods through national borders, then why can't the American government regulate the trade of two individuals in the same town? Surely, one could argue that the federal government's role in regulating trade is defined by Article 1, Section 8, Clause 3 of the Constitution, but that argument is lacking. The reason for that is because such an argument implies that the Constitution, and therefore the law, defines what is moral for a government to do rather than what is moral limiting the laws of the government. One would hope that just because the Constitution protected slavery when it was first written that people would not think that slavery is therefore a just law. Instead, one would hope people would demand laws be in correspondence with moral principles. So then, what is the ethical justification of regulating the trade of individuals between borders, but allowing individuals to trade freely within those very same borders?

There is an argument frequently used to defend the morality of trade-regulation that says trade benefits some more than others, and since this is undesirable, regulation is justified. However, there are two critical problems with this argument. Not only does it misunderstand the nature of trade, but it also cannot define "fair." This idea of "fairness" fails to comprehend that what brings individuals together in exchange is not an equality of value between the two goods to be traded, but that the value of what is given is less than what is received at the moment of the exchange. If either of them did not value what they received more than what they gave, they wouldn't have traded. Furthermore, since all judgments of value are subjective, there is no objective yardstick for value. Similarly, there is no objective measurement for fairness. What is considered fair differs from person to person, resists attempts at objectivity and leaves only subjective sentimentality. So is it then right for a politician to decide, based on his own views of what is fair, what actions another human being can freely make? Is it just that the government prevents a free act of trading because of subjective beliefs about fairness? In the end, the argument that the government can regulate an exchange in order to ensure that it is fair for all actors fails because it misunderstands the nature of value and relies on a morally ambiguous concept of fairness.

Overall, the only morally justifiable position is one that accepts each human being's humanity without consideration to place of birth, and views them as free moral beings capable of their own value judgments. Governments simply should not interfere with the exchanges of free individuals, and should begin to view the growth of the community as inextricably linked to the proliferation of trade. Indeed, it can be boiled down to the doctrine that an individual ought to be able to buy the products he desires, and place his money where he wishes without the permission of his government to do so. This is free trade, and while it may be defended through technical economics, its moral case is nonetheless binding, since failure to respect the freedom of trade disrespects our human nature and insults our capacity to decide.

Nap time: not just for babies

Sleep. We all need this essential part of life, and yet more often then not, we go without it. Whether it's because we need to pull an "all-nighter" to finish a paper, are out partying hanging with friends, or simply can't seem to fall asleep, sleep deprivation affects us all.

Leah Mandly

As college students, we need to keep a fresh, sharp mind to stay ahead in our studies, as well as for good health. However, getting our "eight hours" becomes increasingly harder as we get older. I, for one, in high school remember getting a lot more sleep. Maybe it was because I was at home and didn't have as much freedom as I do here at UMass. Hanging out with friends instead of doing homework, watching movies on our laptops, or jamming out to some tunes are some of the reasons why many of us fall behind on sleep. It is very easy to be distracted and let other things get in the way of what's truly important. Sometimes however, not getting enough sleep seems unavoidable. The amount of schoolwork and other activities can seem overwhelming.

Some might ask, what exactly is sleep deprivation? Well, according to the health and medical information site WebMD, it is "a sufficient lack of restorative sleep over a cumulative period so as to cause physical or psychiatric symptoms and affect routine performances of tasks."

Cutting back will be difficult for many, however, the evidence is undeniable; we all need sleep, or else we'd die.

Basically, we don't perform our best when we haven't gotten enough sleep the night before or nights previous.

At many points in our lives, we have felt the effects of sleep deprivation. Being irritable, drowsy, and stressed are just a few of the symptoms. Brain functions such as reaction time suffer, affecting our coordination. Concentrating becomes very difficult, and memory starts to fail. Depression and hallucinations are among some of the more serious consequences. One effect of sleep deprivation that surprised me was weight fluctuation. As I researched, I found that the hormone leptin controls "our feelings of fullness and satisfaction," and the hormone ghrelin triggers our appetite. When one doesn't get enough sleep, ghrelin levels rise, while leptin levels plummet, tricking us into eating more. This sheds new light on "the freshmen 15" phenomenon.

It's scary to think that with just a few days of missed sleep it's possible to gain a few pounds. The health consequences of being deprived of sleep add up to a very serious reality check.

As college students, we have to work very hard to maintain our grades. This requires a lot of studying and time spent on homework. Unfortunately, there never seems to be enough hours in the day to get everything done, so the amount of sleep we get can suffer. How can we change this? Well, the answer is unique to each individual. Some people are involved in different clubs, activities and sports that require a lot of time on top of all the schoolwork. Others have jobs and responsibilities that can occasionally, come before school.

I'm not saying give up all your after-school activities; our social lives are an important ingredient to becoming a more mature and worldly person. Sports and exercise keep us fit and help us lead a healthy lifestyle. One of the most important skills at college and in life is time management. Whether it's cutting down on Facebook, Skyping, or watching TV, there are nonessential areas of our lives that can be cut back in order to get a good night's sleep. Cutting back will be difficult for many, however, the evidence is undeniable; we all need sleep, or else we'd die.

It all comes down to leading a healthy lifestyle by not only eating and exercising but by getting enough sleep so we feel rested, energized and ready to take on the world. If we want to excel in school or just function normally, we need at least eight hours of sleep a night.

Tea Party drops the bag in Delaware senatorial debates

Christine O'Donnell won one major victory in her debate for the Delaware senate seat with Christopher Coons. She did not leave viewers with the impression she was a witch. On all other counts, the debate was a disaster for her. Ariz Governor Jamee Brewer's 10-second pause had nothing on O'Donnell's awkward and stilted debating manner.

Yaroslav Mikhaylov

Coons, on the other hand, was eloquent, poised and - very much in contrast to O'Donnell - well prepared. His delivery seemed at times slightly barbed and sarcastic - something that is expected in a debate between two experts of the art. Faced with an opponent who seemed as if she was participating in a debate for the first time in her life, Coons did seem needlessly cruel - something that wouldn't be noticeable had O'Donnell been capable of fighting back. Her best retort of the debate was an implication that Coons was envious that a caricature of him did not appear on Saturday Night Live.

O'Donnell's own attacks against Coons simply reeked of hypocrisy. In particular, she attacked him for an editorial he wrote while in college. "Chris Coons: The Making of a Bearded Marxist" - implying that he is a professed Marxist. The editorial itself was a joke. As Coons points out "I am not now, and I have never been, anything but a clean-shaven capitalist!" But even had it been a truthful account of how Coons embraced Marxism decades ago, what relevance does it have now? Oh, about as much as O'Donnell's crusade against masturbation or her dabbles in witchcraft - talking points that O'Donnell dismisses as being too far in the past to consider relevant to her current position, despite both of those being far more recent than Coons' silly college-aged editorial.

A debate can be won even without resorting to attacks and parries if one's points are well articulated and well researched. Unfortunately, O'Donnell's were neither.

Clearly, she came prepared for a speech. She did not consider that maybe the debate's moderators would actually ask questions about her prepared and oft-repeated talking points. When asked what federal programs she would cut in order to balance the budget without mentioning "waste, fraud and abuse," O'Donnell responded that she would cut, well, "waste, fraud, and abuse." Upon prodding from moderators, she still was not able to name a single specific program that she would cut besides an opaque reference to "entitlement programs," despite several of her earlier statements mentioning that she did not support cuts in Social Security. To quote "The Princess Bride:" "You keep using that word. I don't think it means what you think it means."

For someone running for office in the federal government, forgetting Supreme Court decisions is akin to a mechanic forgetting how to change a tire...

Coons, in one of the nastier attacks of the debate, also pounced on O'Donnell's lack of fiscal management knowledge. Mentioning his time as a county executive and his county's resulting high bond rating, he finished by pointing out that "Ms. O'Donnell is not familiar with how bond ratings work."

Even worse than her economics slips was her inability to name a single Supreme Court decision that she disagreed with. "Oh gosh, give me a specific one," O'Donnell responded. When the moderators would not, she stumbled some more until promising to put the answer up on her website. I wonder how Rep. John Boehner's statement about the Republican Party's ideological opposition to "Roe v. Wade" applies to a candidate who can't even refer to the decision by name. There is a significant amount of literature about how the Supreme Court is not a democratic institution. It has many opponents. But, until now, there has been no politician who was this ignorant about its workings. "She forgot. It slipped her mind," say her defenders, but that is no acceptable defense. O'Donnell wants to become a United States senator – a crucial part of the United States government. It is acceptable for you or me to forget Supreme Court decisions. But for someone running for office in the federal government, forgetting Supreme Court decisions is akin to a mechanic forgetting how to change a tire – it shows clear incompetence in her professed area of expertise.

Clearly, O'Donnell came to the debate expecting to recite well-known talking points that energize her Tea Party base while Coons sits there and makes comments she can lambast as 'elitist' or 'condescending.' She did not expect to actually debate anyone. She was unprepared for questions. That her notes included nothing on the Supreme Court is appalling. She clearly did not put in the proper time preparing for the debate, or was not aware of what a debate was. All her other faults aside, consider that she was unprepared for a 90-minute debate of a fairly limited scope. Is it right for the people of Delaware then to expect her to prepare sufficiently for a 6-year term in the Senate?

DIY UMass showcases local talents

By Dean Curran
Collegian Correspondent

This past Friday, Oct. 15, DIY UMass hosted its first show of the semester in room 119 of the Agricultural Engineering Building. Since the group hosted its first event in the fall of 2008, DIY UMass has helped provide the Five College community with a space for student-run shows. In order of appearance, Friday's lineup featured Tweak, The Legendary Headaches, El Spectre, Lion Cub, and The Deceivers.

First was a solo acoustic performance by Tweak, the alter ego of University of Massachusetts student Adam Goldstein. Tweak's mixture of wide-eyed earnestness and self-deprecating humor made him a memorable performer. Seeing him play, you really wanted to like him in the same way that you want to like a kindergarten production of "The First Thanksgiving."

Goldstein is truly well-intentioned, heartfelt and can even carry a tune. However, his guitar playing consisted solely of loudly strumming the most predictable chord changes imaginable. His lyrical themes were loveable at times, with songs about having imaginary friends and a Wikipedia article about the cancerous effects of burnt toast. Lines such as, "Momma don't serve me burnt toast/or I might turn into a ghost," and, "Who's your daddy/I'm your daddy?" are enough to make you cringe. At his best, Tweak is UMass's Daniel Johnston. At his worst, he is Raffi for the mentally ill.

The Legendary Headaches, from Palmer, Mass., are a punk rock band with a uniquely progressive playing style. The band's arrangements transition like a car doing 100 miles per hour around a hairpin turn on a Western Massachusetts road. At times, these transitions were not entirely smooth, but they managed to keep all wheels on the road. Their jaggedly heavy grooves experimented in time signatures uncommon in the genre, such as 9/8 and 7/4.

Guitarist Leon Pierce and the drummer exchanged vocal duties, and Pierce's melodic singing contrasted nicely with the drummer's expressive screams. Pierce's guitar style was also particularly impressive, with an atonal yet skillful quality slightly reminiscent of Black Flag's Greg Ginn.

The punk rockers also addressed a variety of socio-political issues which Pierce described as, "Observations of being working class." Though they clearly had something to say, their stage rants were borderline preachy at times, and often longer than the songs themselves. However, overall, The Legendary Headaches are a powerhouse band with an uncommon level of sophistication.

Pittsfield's El Spectre played next. This band describes themselves as punk and screamo with some experimental leanings. Some of the audience seemed really into them, and the band members themselves got really into the music. At times they had some very pretty instrumental arrangements, but most of their set was a wall of chorded noise. At one point, the vocalist asked the rest of the band what song they were playing next, as if it mattered. Most all their songs sounded the same, and the singer was almost completely inaudible the entire time.

Next was Lion Cub, an electro indie-pop duo that was added to the roster at the last minute. Chad Jewett provided guitar and vocals, and Chelsey Hahn played synth, xylophone, maraca and bells. This past year they released their debut album, "Seneca," on Northampton-based Top Shelf Records. Their songs consisted of tired chord progressions strummed indiscriminately, with some simple ornamentation provided by Hahn. Jewett failed to project his voice, and as a result his singing was largely indecipherable. They had the intensity of the linens section of your local Bed Bath & Beyond.

Last to play was The Deceivers. Hailing from Northampton, The Deceivers combine the urgency of American hardcore with the spacey solitude of shoegaze. Fuzzed-out guitars and reverb-laden vocals characterized their introspective jams. There are obvious comparisons to be made with My Bloody Valentine and Husker Du, but these guys have their own unique sound that has generated a buzz in the Western Mass. underground. Jason Vachula does vocals and guitar, Girshwin Chapdelaine plays bass, and Eric Outhuse plays drums.

In the end, it was great that DIY UMass provided a place for local artists to play. This show was the latest in a series of roughly two-dozen shows that DIY UMass has put on over the years. The group has two other events confirmed for this semester: a Halloween show on Oct. 30 and a show with a (loose) Twister theme on Dec. 4.

The group is always looking for more people to get involved. Interested students can visit their website with a calendar of events at www.diyumass.org, and can contact the group at diyumass@gmail.com.

Dean Curran can be reached at dmcurran@student.umass.edu.

Last Friday, DIY UMass held its first concert of the semester, featuring local bands Tweak (pictured), The Legendary Headaches, and more.

Saving Abel rocks Pearl Street

By Tyler Manoukian
Collegian Correspondent

Last week, the Pearl Street Ballroom was electrified by the efforts of Saving Abel and several local indie bands, including One Theory, Hope Lies Within and Jacob's Son. The building was shaking from the intensity of the show.

The show opened up with Jacob's Son of Astoria, N.Y. Two of the band members did not show up, so only Mike and Greg Bean performed. The duo played with a heavy acoustic style.

Jacob's Son really represented what the audience expected – a slow, methodic tonality. "Every Time the River Winds," a slower song, was something to get behind with its acoustic rhythm. The duo really stretched the chord, with long notes and rhythmic lyrics. The lead singer's it was usedused his voice to the fullest at this show, sounding like something between Scott Stapp and Audioslave.

"Lingerie" is one of the group's most popular songs, which has found some success on local rock station Lazer 99.3 FM. The guitar "revved" up this track, which led into a rousing chorus. Jacob's Son put on a great performance even though only two members showed up.

The next act was Hope Lies Within. The quartet has a website where fans can download some free music, www.hopelieswithin.com. The band played some brand new songs titled "Cry for the Weary" and "Solar." The lead vocalist had a nice voice, reminiscent of Green Day's Billy Joe Armstrong.

Unfortunately, Hope Lies Within is not a very good live band. Their music was disproportionately loud compared to the vocals, which made it extremely hard to understand.

The bassist looked like one of the Wild Samoans of WWE fame. His long hair seemed to get in the way the entire time, as he did more hair flipping than actual bass playing. It got to the point where he was knocking over amplifiers and screaming unneccessarily into the microphone. His screamer voice was average, but didn't fit into the songs they played.

One of the biggest pluses of the night was Hope Lies Within's drummer, Steven Padla. He is a terrific drummer, and has a significant fan base that comes out to support him. Those fans included his mom, who came up to me in the front row, snapped a picture and screamed, "That's my son!" Nothing like a little family support for the talented drummer, right?

The song "Too Close to the Sun" was an excellent tune. The drumming in that song was the best of the night, especially paired with the vocals.

Next up was the second-best known act on the evening, One Theory. The band really delivered with their screamer songs and soft punk. They definitely have some Drowning Pool influence in their musical handbag. While they were also very loud, the lyrics were understandable and the crowd really got into them. The band had high energy, the lead singer moved through the audience and the rest of the band broke out some pretty nifty dance moves that sent the girls in the front row into a swoon.

The lead singer performed vocal acrobatics. He was very clearly into the music and very passionate, even dedicating one of his songs to his young daughter. His voice easily transitioned from soft and quick to screams, just as advertised. The drummer of One Theory was also very good, however, he did not stack up against Hope Lies Within's drummer. Still, he was better than expected from an indie-level band.

The headliner, and easily the best band at the show, was Saving Abel. The audience, who had been quiet for the most part, got fired up when the band took the stage.

From the time One Theory disassembled their equipment to the moment Saving Abel struck their first chord, the crowd went wild. Girls were screaming and guys were cheering. The atmosphere Saving Abel created instantly carried them through the show. The audience was into it the entire time, and the concerthall was packed. Some fans were even trying to bulldoze their way to the front row.

Their set list was nothing short of spectacular, featuring popular songs from both the "Saving Abel" and "Miss America" albums. Some favorites included "Bloody Sunday," "New Tattoo," "Stupid Girl" and "Sex is Good." The band sounded great in the live setting. The raucous guitar and thumping bass got the crowd pumped up.

As for some old time music, the popular song "Have You Ever Seen the Rain" by Creedence Clearwater Revival got the crowd singing and clapping along. Jared Weeks, lead singer, played with the crowd, getting them to sing the chorus ecstatically. Their cover of the song was admirable, though it did not compare to CCR's.

"Miss America," a new song off their latest album, "Is about showing support for the men and women who fight for our country every day," said Weeks.

"The song was written in support of the troops, not some f***ing beauty pageant," he also said.

The crowd was all riled up by now and was head-over-heels into the music. For the encore, Saving Abel played "18 Days" and the 2008 radio hit "Addicted." The latter song was also sang collectively by the band and the crowd, in order to show support for the troops who fight for this country.

"Addicted," the ever-popular smash hit, is one long sexual innuendo. The crow went absolutely nuts at this point, threatening to tear down the roof with their energy. The band performed an amazing rendition of the song, which was also the last of the evening. It surely sent the crowd home happy.

Saving Abel stuck around afterwards for autographs and pictures. Overall, it was a great, crowd-pleasing performance. It truly was a rock and roll atmosphere that had everyone on his or her feet. Each band was impressive in its own, unique way, which provided some musical variety. If you did not see this show, then you definitely missed some awesome music with some excellent bands.

Tyler Manoukian can be reached at tmanoukian@student.umass.edu.

Saving Abel, along with fellow rockers One Theory, Hope Lies Within, and Jacob's Son performed at Pearl Street Nightclub in Northampton on Saturday. The show was sponsered by local radio station Lazer 99.3.

Southern Bowerbirds take flight in NoHo

By Ashley Berger
Collegian Correspondent

On a rainy October night, the Iron Horse in Northampton welcomed musical acts Bowerbirds and opener Sharon van Etten. Both performances encompassed the essence of hippie-indie-folk rock.

Van Etten opened the show with songs from her album "Because I Was in Love." Clad in a grey shirt, jeans, and boots, a flaming red guitar was her only accompaniment during the set. After her second song, she made her first interaction with the crowd, telling the audience of flannel-clad Valley-ites that, "Every time I get done with a song I reward myself with a sip of beer."

The audience was very receptive to this up-and-coming artist, whose music is based on the common motifs of love and heartbreak. The Brooklyn-based van Etten's voice is both light and sweet, but also employs an edgy tone in her more angry songs. She played a great rendition of her piece "Consolation Prize," about not being second best to anyone.

Van Etten's appeal came from her simplicity. She defines the "girl-with-a-guitar" ideal. The songwriter looked so completely comfortable on stage strumming and singing that one could almost picture her sitting on her bed, playing her guitar in her own world.

Van Etten was very excited to play with Bowerbirds, and made sure to thank the audience. For her last tune, the audience encouraged her to sing a cappella. The purely vocal track was arguably the best of the entire show. Her lofty yet fierce voice, as well as her girly but simple appearance all came together in a very positive way for the song.

After van Etten finished her performance, Bowerbirds took to the stage. As expected, they brought along some guest musicians to accompany them: on violin, Rachel Rollins and on the drums, John Lesterman.

The five-part group showed an extreme amount of versatility, as each member played more than one instrument at various points in the set, and each member helped back up lead singer Phil Moore.

Opening with a rather slow song, the Birds showed off their big sound. The mixture and variety of violin, xylophone, accordion, acoustic guitar, bass drum, keyboard, and drum set blended surprisingly well. The combination did not deter in the least the soothing medley of Beth Tacular and Moore's voices.

One of the most important instruments was Tacular herself. With a girlish and chilling voice, she entranced the audience with her range and style. Her high pitches offset Moore's deep rasp, and give each song a ghostly, dreamlike feeling. Armed with her accordion, which she taught herself to play, she added a jazzy flair to the indie-rock sound of the Bowerbirds. When she got into a song, Tacular did a little dance and kept all eyes focused on her.

The Birds played about an hour and a half long set, consisting of songs off of both "Hymns for a Dark Horse" and "Upper Air." Some of the set list included "Teeth," "Northern Lights," "Crooked Lust," and crowd-pleaser "House of Diamonds." A highlight was a new song that the Birds played. When an audience member asked them what the name of the song was, Tacular replied, "We don't know. Make one up."

The Iron Horse provides a very intimate setting for any show, and is certainly a forum conducive to bands interacting with the audience. Bowerbirds briefly paused between songs to ask what cool things there were to see in the area and to remark about, coming from North Carolina, how cold it already is here in the Northeast. The band was also very gracious when talking about their opener. Tacular said, "We wish she would move to where we live. It's good for you guys that she lives up here though."

The audience was comprised of mostly college-aged students, and a fair amount of couples, and they certainly made sure to encourage the band to play an encore.

The Birds were very fan-friendly, stopping after the show to hang out while people came up to talk to them. In a brief question session with Tacular, she said that "my favorite songs to play are usually the new ones, but tonight I really like 'Crooked Lust.' I didn't like it when we first started playing it, but now I think it's really great."

Tacular continued to say that she is very inspired by nature and the beauty within nature.

"Despite all the hardships that people endure everyday, the earth is still a beautiful place," Tacular said. "Our songs are enjoying that beauty and wanting to talk about that beauty. Music is just a fun way in which to express yourself. It's a release of emotions."

Minutemen continue conference success

Maroon & White defeat URI, stay unbeaten in Atlantic 10

By Herb Scribner
Collegian Staff

The Massachusetts men's soccer team from a month ago is long gone.

September did not do the Minutemen any favors, handing them just one win through the entire opening month of their season. Midway through October however, UMass remains unbeaten in the Atlantic 10 conference with two victories following a 1-0 shutout victory over Rhode Island.

"Obviously it feels pretty good," UMass coach Sam Koch said. "We're not playing that well, but we're still finding ways to win, and that's a good sign. We've just got to keep improving, because we're not where we want to be as far as winning the entire thing."

Junior Chris Stoker is a key piece of the recent development of the Minutemen. (3-3-6, 2-0-1 A-10). Like midfielders Morgan Brandso and Ben Ankiun did in the first pair of A-10 matches, Stoker earned his first goal of the season, which was also the first of his collegiate career, and the game-winner against URI.

"I'll be honest it was one of those shots that very, very few keepers, I think, could stop it," Koch said. "[It was] in the right spot. It's unfortunate for them."

The game-winning goal couldn't have been more timely, as it came in the 87th minute. Connor DeVivo came in for Stoker in the 84th minute, who returned to the match two minutes later. Just over 30 seconds back onto the pitch, Stoker nailed the game-clincher.

While the substitution might bewilder some, Koch had his own tactical plan behind the quick in-and-out substitution.

"I wanted to go over with him a couple of things that he needed to do that he wasn't doing, give him a little rest, and then put him back in, and he was able to do the rest himself," Koch said.

UMass	1
URI	0

However, UMass wouldn't be able to call this goal the game-winner if it hadn't been for the one constant of the Maroon and White's goalkeeper, Chris Piekos.

Piekos continued to impress between the posts against the Rams on Saturday, recording his third shutout of the year. Piekos made game-changing saves from the beginning of the game right until the end.

"Unfortunately they went against Piekos and Piekos made two very good saves that kept us in the game," Koch said.

The first of these saves came 12 minutes into the first half, when URI senior Greg Balicki rocketed a shot to the far post that was only saved by an extended-arm from the diving Piekos.

In the second half, Piekos saved two tough goal-scoring opportunities that kept the Minutemen from conceding a goal. Freshman Joey Haught's header was nabbed by the Minuteman goalkeeper, as well as sophomore Matt Ribbens' straight on-goal blast.

If it wasn't for Stoker, however, Piekos wouldn't have a win to show for his efforts in net.

Before Stoker's goal, the Minutemen had plenty of other chances to earn the victory. Ankiun fired up his offensive tempo, striking the ball four times, with two of his shots on target towards the net. Defenders David Key and Dominic Skrajewski also had chances at becoming the game's savior, with both of their ill-fated attempts aimed at goal.

"Dominic is in on all the set-pieces, so he's going to get shots on goal," Koch said. "Key is probably our best overlapping back as far as getting into the attack. I'm not surprised that they had a couple of shots."

UMass' leading goal scorer, Bryant Craft, was absent from the offensive push against the Rams, which highlights another change for the Minutemen. Instead of making runs and having shots on goal, Craft dropped in his position and helped out defensively.

"Everybody's got to play defense, and actually [he] did a good job for us defensively by coming back, taking balls off people's feet [and] helping to block the middle," Koch said. "At the end of the game he did a really good job, making it difficult for [URI] to get service in and putting pressure on their backs. So it wasn't something that Craft wasn't doing, he was picking up the other parts of his game."

Like Craft, Koch still thinks the team can work on different elements of its game.

"We're in good shape right now, but in all honesty it doesn't mean that much," Koch said. "We have a tough weekend ahead of us at Philadelphia, at Temple, that's going to be a big game for us. We have a tough game ahead of us, and in all honesty all games are tough, so this isn't particular, but it will be a good indication of exactly where are we in the A-10."

As Stoker picked up the offensive slack, he also lifted the Minutemen up into the top six of the A-10 table, which puts them in the playoff picture.

Herb Scribner can be reached at hscribne@student.umass.edu.

UMass loses lead in 2nd half

FOOTBALL from page 8

On three straight rushing plays, UMass tried one final time to score on the ground, but Hernandez's effort was stopped.

On the next drive, the Minutemen found themselves in another 4th-and-1, this time at the Richmond 8-yard line. This time, kicker Caleb Violette kicked a 25-yard field goal to push the UMass lead to 10-5 with 1:51 remaining.

Morris spoke about his short-distance decision making late in the fourth quarter.

"We thought we could get the touchdown," Morris said. "We were on 4th-and-goal inside the 1 and they made a play to stop us from getting in. In the second set, it was a matter of take the three points. They hadn't done anything all day in terms of threatening to score against our defense, so we made [White] make the plays."

The Minutemen entered the game 10-for-11 on the season in fourth down conversions.

Violette attempted a squib kick on the ensuing kickoff, misfiring out of bounds. The penalty gave the Spiders the ball at their own 40-yard line to begin their drive.

The Minutemen led 7-2 at half-time, but had trouble getting points on the board.

UMass went three-and-out on both of its first two drives. On its second drive, Violette could not secure a snap that flew over his head and out of the end zone for a safety.

The Minutemen recovered the ensuing free kick and drove to the Richmond 22-yard line where Violette missed a 43-yard field goal.

Violette entered the game as one of three kickers in the Football Championship Subdivision who had no missed field goals (6-6). He also punted five times, placing four inside the 20-yard line.

The Spiders went 0-for-5 on third down conversions (2-for-12 total) and gained one first down (nine total) in the first half.

UMass possessed the ball for nearly 34 minutes, moving the chains 13 times compared to nine for the Spiders.

UM commits 8 penalties for 54 yards in loss to Richmond

TURNOVERS from page 8

had the goal-line stand, which was a big play in the game obviously when you look back at the final. Certainly we're going to look at it and be very disappointed in our own effort, not in terms of effort but in terms of execution."

The offense, which had been rolling, struggled to move the chains all game. Neither Jonathan Hernandez nor John Griffin eclipsed the 100-yard rushing mark for the first time since the win over Holy Cross.

Havens had trouble getting it going as well, finishing the contest 12-of-22 with one touchdown and one interception. His 78 passing yards were a season-low and the first time this year that he was held under the century mark.

"They weren't moving the ball, but we weren't moving the ball either," Havens said. "It was kind of a chess match for a while. We wanted to play better but we just didn't get it done."

UMass will look to rebound next weekend against conference foe New Hampshire at Gillette Stadium. Though Morris is concerned that his team came out flat after a bye week, he hopes that they got their worst performance out of their system.

"We have to hope it's a glitch, certainly," Morris said. "A lot of the worst came out today in terms of talking about the yards, the penalties and playing smart football, and we didn't get that done today. It's certainly a concern."

Jay Asser can be reached at jasser@student.umass.edu.

Running back John Griffin tries to stiff-arm defensive back Tremayne Graham during UMass' homecoming game against Richmond. Griffin finished the game with 81 yards.

UMass loses in closing seconds to Richmond

By Dan Gigliotti
Collegian Staff

A late rally by No. 20 Richmond handed the No. 8 Massachusetts football team its first conference loss, stunning a Homecoming crowd in Amherst.

The Spiders (3-3, 1-2 Colonial Athletic Association) rallied on a touchdown in the final seconds to win 11-10 on Saturday.

McGuirk Alumni Stadium welcomed 16,421 people, including 900 alumni, the 14th-largest attendance figure in the stadium's history.

Richmond held the Minutemen (4-2, 2-1 CAA) to 224 yards, including 146 on the ground, halting two fourth quarter drives inside its own 2-yard line.

"It's a bad loss for UMass," Minutemen coach Kevin Morris said. "We certainly let them stay in it all game long and they finally came through and won the football game.

The Minutemen committed three turnovers and faltered on special teams in its first loss in three games.

Freshman quarterback Montel White threw a game-winning pass with nine seconds left in the contest during his first career start for the Spiders.

White and the Richmond offense attempted one pass through the first three quarters, operating primarily out of a wildcat formation. White went 4-for-5 for 47 yards and ran for a first down on the final Richmond drive, which ended with a 15-yard strike to wide receiver Tre Gray.

"We certainly should be able to defend those pass plays when they happen," Morris said. "It wasn't like they lulled us to sleep and then sprung the pass on us. We're going to look at it and be disappointed in our own effort. Not in terms of effort, but in terms of execution.

John Griffin ran for 84 yards on 19 carries and Jonathan Hernandez added 72 yards, as both backs failed to reach 100 yards for the first time this season.

Quarterback Kyle Havens found tight end Andrew Krevis on a seven-yard pass, capping a six minute, 41 second drive in the second quarter to take a 7-2 lead. Havens finished 12-for-22 with a touchdown, an interception and a fumble.

The two teams traded fumbles early in the third quarter. With 3:29 left in the quarter, Havens was blindsided by the Spiders' Eric McBride, who knocked the ball loose. Darius McMillan recovered the loose ball, setting up a Wil Kamin field goal to make the score 7-5.

UR	11

Minutemen defeated on penalties, turnovers

By Jay Asser
Collegian Staff

Following its bye week, the Massachusetts football team struggled to find a rhythm and made untimely mistakes to suffer its second loss of the season on Homecoming weekend.

"We made a million mistakes and we had penalties at all the wrong times," UMass coach Kevin Morris said after the loss.

The Minutemen (4-2, 2-1 Colonial Athletic Association) committed eight penalties for a total of 54 yards while losing the turnover battle, 3-2. The loss marked the third contest in which UMass turned the ball over more times than its opponent and the fifth game in which it committed more penalties than its opponent.

Morris immediately ruled out rust as the cause of the mistakes, citing strong practices earlier in the week leading up to the game.

"We had our three best practices of the year on Monday, Tuesday and Wednesday," Morris said.

Prior to Saturday, the most penalties committed by the Minutemen came in the first two weeks against William & Mary and Holy Cross. Against the Tribe, UMass committed eight penalties for 81 yards but went on to win, 27-23. A similar result came over the Crusaders, despite the Minutemen committing a season-high 11 penalties for 104 yards.

UMass was also immune to turnovers resulting in losses before falling to the Spiders. In its 27-14 win over Towson, the Minutemen lost three fumbles, including one inside their own red zone, which set up a short touchdown pass.

Against Stony Brook on the road, quarterback Kyle Havens threw two interceptions on consecutive drives. The giveaways led to back-to-back touchdowns for the Seawolves, who led 14-7 early in the second quarter. Again, UMass rebounded from those mistakes and came back to win in a game that featured four lead changes.

Aside from the penalties and turnovers, the Minutemen had a chance to take control of the contest against the Spiders in the fourth quarter. In an attempt to make it a two-possession game, UMass ran four straight times from the Richmond 1-yard line, but was stuffed by a stout Spiders defense. The missed opportunity ultimately cost the Minutemen vital points.

"They have a very good defense and they took advantage of all those things," Morris said. "They

UM ties Terriers in Boston

Goalkeeper Teglia steps up for injured Dainton in 1st start

By Steve Levine
Collegian Staff

With young, resilient players, the Massachusetts hockey team succeeded in kicking its season off in exciting fashion.

After losing to No. 15 Minnesota to end non-conference play, The Minutemen (0-2-1, 0-0-1 Hockey East) traveled to Boston to face Boston University for the conference schedule opener.

The game, which featured various momentum swings, ended in a 2-2 tie with BU (2-0-1, 0-0-1 HEA) edging UMass in shots, 35-33.

With Paul Dainton injured, freshman goaltender Jeff Teglia made his first collegiate start for UMass, ultimately receiving honors for his efforts late in the game.

Four minutes into the contest, Teglia let up the first goal to BU's Matt Nieto. Chris Connolly added to the Terriers' lead with a goal in the 10th minute. The period was reminiscent of UMass' poor play in the early stages of games this year, as the Minutemen were outshot, 11-7, and again faced an early deficit in the first.

"We fell behind by two," UMass coach Don Cahoon said. "It was [great] that we were able to climb back into it and get the point."

Teglia kept the Terriers at bay in the second, stopping all 10 shots he faced. BU's Kieran Millan followed suit by stopping all 16 shots through the first two periods.

UMass came out fiing in the third, when the line of Michael Pereira, Rocco Carzo and T.J. Syner created an early chance that gave the Minutemen the momentum for the remainder of the stanza.

Moments later, Darren Rowe put UMass on the board with a goal assisted by Syner and Carzo.

"There were a lot of momentum swings," Cahoon said. "[There was] pretty good goaltending at both ends. These were two teams that desperately wanted the two points."

UMass	2
BU	2

With less than nine minutes remaining in regulation, UMass senior Marc Concannon leveled the score at 2-2.

"He's a competitive kid," Cahoon said, referring to Concannon. "He works really hard and he competes every [shift]. It's nice to see him chip in with a goal. Most of the time he's blocking a shot or finishing a check."

Concannon's goal was the last in regulation, sending the game into overtime.

The Minutemen mustered two shots in overtime, which Millan turned aside. The most important player again was Teglia, who made his presence known by stopping all six Terrier shots en route to a conference-opening draw.

"He's a battler," Cahoon said of Teglia. "He's not your conventional [goalie] but he finds a way to compete and stop pucks."

Cahoon believed the experience Teglia received in Minnesota, when he came in for the injured Dainton staring down a five-on-three penalty kill, prepared him well for his first collegiate start.

"[Teglia's] exciting. He gets after it," Cahoon said. "He's anticipating plays and he's putting himself into position to try and make a difference in the game."

Teglia made a big difference. After relinquishing the two early goals, he was rock solid in net for the Minutemen, stopping all 24 shots he faced after the first period. His performance, coupled with the looming return of Dainton, gives Cahoon and the Minutemen supreme confidence in their netminders.

Cahoon is also pleased with the performances of his young players so far, citing their consistent hard work and resilience as the Minutemen's key successes early on.

Cahoon's main concern right now is his team's inability to establish an early lead, something he would like to see change when BU visits UMass on Oct. 22.

"We have yet to play with a lead. It would be nice for them to get a lead and see what they can do with it."

Steve Levine can be reached at slevine@student.umass.edu.

Rhode Island edges Matz and Co., coach concerned over team

By David Martin
Collegian Staff

The Massachusetts women's soccer team fell just short to Rhode Island, 1-0, in a heavily physical and officiated match on Sunday afternoon.

The Minutewomen (5-9-0, 2-3-0 Atlantic 10) couldn't crack a defensively solid Rams team in the midst of strong physical contact and controversial officiating. UMass mustered just four shots, which ties its lowest shot total of the season, while URI had nine.

The Rams (2-11-1, 2-3-0 A-10) scored the game's lone goal off of a shot by Stephanie Santos in the first 48 seconds of the second half. UMass goalkeeper Emersyn Pullan got a hand on the shot but couldn't knock it down completely. Courtney David picked up the assist on the play.

URI	1
UMass	0

Though the Rams certainly put up a well-played game in hopes of keeping their postseason chances alive, the biggest challenge of the day seemed to come from the referees.

"I don't think that the game was officiated well at all," UMass coach Ed Matz said. "When the URI player clearly elbowed Therese Smith in the head, it somehow escaped the eyes of all three of the officials. I mean, we had to pull her out of the game so she could be attended to, and the URI player even had to go over to her bench to get her elbow taped up as a result of the hit. It was a blatant call that wasn't made."

In defense of his player, Matz argued the call and the team received a yellow card as a result. The team collectively earned five yellow cards on the day, with Minutewoman Kelsey Anderson earning a red card in the 89th minute. The card resulted in her ejection and was the first red card the team has received all year.

"We aren't an overtly aggressive team," Matz said. "We had one of the fewest numbers of yellow cards in the league before this game. That isn't how we play, and I think that the officials were more partial to giving us cards after the elbow incident midway through the first half. It was extremely frustrating for us."

Rhode Island also received two yellow cards on the day, and led UMass in fouls, 16-10. It also led in offside calls, 3-2.

Given the unusual nature of the game, Matz was still disappointed by his team's performance.

"We expected a better performance from ourselves for this game," Matz said. "It was a frustrating game with all the calls, and URI did play great defense, but we didn't play good enough. Our defense did great, but our offense didn't really show up. We've been too inconsistent all year, and it's really hurting our play. We could've pulled ourselves into the upper half of the A-10 with a win today, but we didn't, and now we have to live with that."

Matz called on his team to sharpen its sense of urgency as the season gets closer to the end.

"I don't need to go over anything with them," Matz said. "At this point in the season, they either get it or they don't. We have four games left on the season, and if we want to make it into the playoffs, they have to sense the urgency and step up. This is their time."

David Martin can be reached at dmmartin@student.umass.edu.

Minutewomen stay unbeaten

By Michael Wood
Collegian Staff

The Massachusetts field hockey team went into halftime down by a goal in both of its games this weekend, but battled back to win each game, 2-1, and stay undefeated in Atlantic 10 play.

Thando Zono, in the second game of her UMass career, scored twice on Sunday to lift the Minutewomen over A-10 rival Richmond. Zono returned to action in Friday's game against Lock Haven after being injured for much of the season.

Already trailing 1-0 in the second half, Zono tallied her first goal in the 45th minute of play on assists from Nikki Panciocco and Jamie Bourazers. The goal came as a result of a penalty corner, something the Minutewomen have worked hard on perfecting all season.

Later, with the game tied in overtime at one goal apiece, Zono struck again. Senior Katie Kelly pushed a penalty corner to Makaela Potts, who issued a quick pass to Zono. The defender then hit the ball into the left corner of the net for the game-winner.

UMass	2
UR	1

UMass (9-6, 3-0 A-10) managed three penalty corners and three shots, none of which were on goal. Richmond pressured the Minutewomen early and forced goalkeeper Alesha Waldall to make three saves.

By the end of the match, the Spiders recorded a shot advantage of 16-13, but UMass held a 12-7 advantage in penalty corners, the eventual deciding factor in the game.

UMass	2
LH	1

On Friday, the Minutewomen faced Lock Haven a team that just moved into the A-10 and came out victorious to preserve their four-game winning streak.

"It's really big for us," Potts said. "We've never played Lock Haven before, and we wanted to send them a message that this is our conference. It's good to come out and win our first few games in A-10 play, and a win over a new team is definitely good to get."

UMass trailed early after Amy Hordendorf, the leading point and goal-scorer in the A-10, put a shot past Widdall in the first half. In what has come to be expected from the Minutewomen, their opponent controlled the pace of play in the first half, recording six shots and one penalty corner, compared to just three shots for the Maroon and White.

Nicole Cordero tied the game with her second goal of the season in the 42nd minute. Kelly dribbled past two defenders and sent a cross to Cordero in front of the goal, who promptly tipped it into the corner.

The game-winning goal came on a hard shot from Potts with 16 minutes, 40 seconds left in the game. Panciocco pushed a penalty corner in to the top of the scoring circle and Potts fired a shot inside the left post for her fifth goal of the season.

UMass controlled the pace of play for the entire last half of the game, winning seven consecutive penalty corners, and scoring on one of them.

"It was a pretty good battle," UMass coach Justine Sowry said. "It was a little chaotic for us. We definitely got a little frustrated and started to get frustrated at each other. But we talked about it and we started to play how we should play. It was very pleasing."

The Minutewomen have won five straight games and will face Temple on Friday, Oct. 22 at Garber field.

Off to the races: MA House contests narrow down stretch

By Sam Butterfield
Collegian Staff

Even in Massachusetts, widely considered the bluest of blue states, several incumbent Democrats are locked in heated battles to retain their Congressional seats.

Districts 5 and 10, consisting of parts of the North Shore and South Shore, are shaping up to be the tightest races leading up to Nov. 2's midterm elections.

In District 5, composed of much of the North Shore and some western Boston suburbs, incumbent Niki Tsongas, widow of the late Sen. Paul Tsongas, is engaged in a stiff contest with Republican businessman Jon Golnik.

District 10, which includes the city of Quincy south to Cape Cod, appears to be even closer. There, incumbent Democrat Bill Delahunt is retiring, leaving the field open to a number of challengers. A recent poll from Boston's PBS station WGBH and the polling firm MassINC found a near dead heat, with Democratic candidate William Keating, the former Norfolk County prosecutor, clinging to a 46-43 percent lead over Republican opponent Jeff Perry, a State Representative from the 5th Barnstable District. The poll's margin of error at 4.9 percent, however, as well as the six percent of voters in the 400-citizen survey who said they are either undecided or would not say whom they would choose, means the race in District 10 could still be either candidates'.

In another surprisingly close contest, District 4, long held by the divisive Congressman Barney Frank, is in play this season. Frank, who has held the seat since 1981, is facing a serious threat from former Marine and management consultant Sean Bielat, a younger, more telegenic candidate who, it turns out, is causing quite a stir in this district stretching from Brookline south to New Bedford.

District 5

In District 5, which includes such cities as Andover, Haverhill, Lawrence, Methuen, Billerica, Chelmsford, Lowell and Tewksbury, incumbent Niki Tsongas, who has just completed her first full term in office after narrowly winning a 2007 special election to fill the seat vacated by Martin Meehan, faces off against Republican businessman Jon Golnik and Independents Dale E. Brown and Bob Clark.

No Republican has won in the district since 1972, and Tsongas glided to an uncontested 98.7 percent victory in 2008, but this year's pervasive current of anti-incumbent backlash and Sen. Scott Brown's hearty victory in the district have led GOP strategists to believe this is a race they can win. Further, the Merrimack Valley district has voted Republican in elections past; it supported Republican gubernatorial candidates William Weld, Paul Celluci and Mitt Romney, all of whom won office, and only slimly gave its support to Gov. Deval Patrick in 2006. All of this, as well as the fact that 53 percent of voters in the district are not registered with either major political party have Republicans seeing red in District 5.

Golnik, a former foreign currency trader and licensed Boston College merchandise salesman who lives in Carlisle, has received considerable attention from the national GOP, which considers this seat winnable. The Dartmouth educated 44-year-old has attacked Tsongas on her record of voting in lockstep with the Obama administration and a Democratic Congress. Tsongas has cast 98 percent of her votes along party lines.

On issues pertinent to this election, Tsongas said she will vote against ballot question three, which would scale back the state's sales tax next year from 6.25 percent to 3 percent. Golnik said he would support such a reduction to make the state more competitive against its neighbors like New Hampshire, which has no sales tax.

Golnik recently picked up the nomination of Minnesota presidential hopeful Tim Pawlenty, and has also received support from former Massachusetts governor and presidential candidate Mitt Romney, as well as his predecessor, Jane Swift.

In fund raising dollars, Tsongas is walloping Golnik. According to OpenSecrets.org, which tracks political donations, Tsongas had some $589,000 in her campaign account at the start of the month, compared to Golnik's $65,000. Golnik has collected some $173,000.

UM recognizes three distinguished faculty

By Sam Butterfield
Collegian Staff

The Board of Trustees at the University of Massachusetts voted Sept. 29 to name three UMass faculty members distinguished professors. Professor of chemical engineering Peter A. Monson, English professor Anne Herrington and James E. Young, also in English, received the distinction, which recognizes "outstanding academic distinction in the faculty member's field," according to a News and Media Relations office release, after recommendations by Chancellor Robert Holub and Provost James Staros. Monson has been on the faculty at the University since 1982, and, according to last Thursday's release, is "among the most respected chemical engineering thermodynamicists in the world today." Monson works primarily on the composition of confined fluids, and has been published in leading molecular and chemical physics journals, including Nature, Physical Review Letters and the Journal of Chemical Physics. He has also won grants from the national Science Foundation (NSF) and the U.S. Department of Energy.

Monson has been tabbed to chair the 12th International Conference on the Fundamentals of Absorption, to be held in 2012, and has also worked as a visiting professor at Oxford University in England, Universite Pierre et Marie Curie, Sandia national Laboratory, Technical University of Berlin and the University of Leipzig, according to the release.

Herrington has been on UMass' faculty since 1986, and has authored several works, including the David H. Russell award winning "Persons in Process: Four Stories of Writing and Personal Development in College" for Distinguished Research in the Teaching of English from the National Council of Teachers of English. She also co-edited a collection of essays published last year by the Teachers College Press titled "Teaching the New Writing: Technology Change and Assessment in the 21st Century Classroom."

Herrington also directed the writing program here at UMass from 1990 to 1996, and has served on the executive board of the Western Massachusetts Writing Project since 1999. The former chair of the English Department, serving from 2000 to 2006, Herrington also sat on the Massachusetts Department of Education's English Language Arts Framework Revision Committee from 2007 to 2009.

Young is described in the University release as "a pioneer in the application of modern liter-

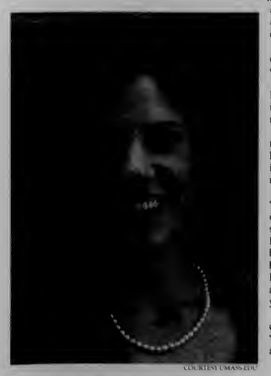
Queenin tabbed as new dir. of regional legislative relations

By Alyssa Creamer
Collegian Staff

Recently, the University of Massachusetts took on Lisa Queenin as director of community and regional legislative relations.

A search was conducted for the position, and Queenin, the former manager of state government relations at Children's Hospital Boston and a former legislative aide was chosen based largely on her previous experience.

According to a University release, Queenin "cultivated relationships with elected officials, staff and community leaders, managed the hospital's 1,700-member grassroots advocacy network, developed strategic alliances with organizations and coalitions on priority issues and directed the hospital's advocacy agenda on state policy."



COURTESY UMASS.EDU

Lisa Queenin has been named the new director of community and regional legislative relations.

"Even though health care and education are different sectors," Queenin said. "I feel I will be playing a similar role at UMass."

"When I saw the position," she continued. "I thought it was an opportunity to first become a director and expand the role into more community relations."

Queenin plans to support several existing and soon-to-be-developed events along with programs that will "foster better relations between the campus and its local neighbors."

"From what I understand of it, it's hard to bridge a connection between the campus and its neighbors. There is a lot of great work the community and students are doing here, and reminding students to be mindful of the neighbors in terms of what they may be doing on the weekends and working with neighbors to let them know all of the positive things that are happening on campus is important."

Queenin hopes to assess existing programs and develop new ways to build positive relationships with neighbors and community groups.

"UMass is such a huge part of the community. It is a major employer, major resource, and it's important to make sure that we're leveraging as much as we can from the area," Queenin said.

Queenin had primarily dealt with state relations at Children's Hospital Boston, but she also had experience within community relations and is making integrating that kind of work into her new position one of her "initial plans."

"I loved my previous job," Quennin said. "So I really wanted to wait until the right thing came along. I was really excited and lucky to see this position posted in the Chronicle of Higher Education." She also stated that since her marriage in June to Jon Queenin, she and her husband had been looking to move out of the Boston area to western Mass. She was employed at Children's Hospital Boston for six-and-a-half years.

Queenin stated there is a "steep learning curve" but she is excited to learn more as she "gets to know the area and its community leaders and residents."

Mass. Congressional elections tighten as midterms draw near

RACES from page 1

in individual donations, while Tsongas has pulled in over $1.3 million from private donors across the country.

District 10

District 10 is likely the state's most steeply contested corridor. The district stretches from Quincy south and includes all of Barnstable, Dukes and Nantucket counties, as well as large tracts of Plymouth County and portions of Norfolk County on the South Shore. The district has been represented since 1997 by Quincy Democrat Bill Delahunt, who announced this March that he would not seek reelection. With Delahunt's retirement in what the Cook Partisan Voting Index ranks as the Commonwealth's most conservative district, the field is wide open.

According to poll released yesterday by WGBH Boston, Keating holds a narrow edge over Perry, leading 46 percent to 43 percent. Like many Massachusetts races this fall, this election could come down to unaffiliated voters. While District 10 has twice as many registered Democrats as Republicans, unenrolled voters account for a larger share of the district's electorate than both parties combined. In Monday's WGBH poll, Perry leads among unregistered voters, 45 to 41 percent, a constituency which could help send him to Washington.

Steve Koczela, president of MassINC polling, which conducted the poll for WGBH, said in a release that the two candidates should focus their efforts the rest of the campaign on luring unaffiliated voters to their side.

"It's essentially a toss-up among the unenrolled, as well," he said. "That for both men is where the last few weeks of the race should lie."

Although the race appears close, Perry holds a distinct lead in favorability among Independents. In the WGBH poll, 41 percent of unregistered voters said they had a favorable view of the State Rep., while just 26 percent said they had a favorable opinion of Keating. Overall, 37 percent had a favorable opinion of Perry and 33 percent looked favorably at Keating.

According to the Federal Election Commission, at the close of last month, Keating held a slight fund raising edge, with $278,675 on hand, compared to Perry's $265,588.

Local and national Democratic organizations have attacked Perry for his handling of an incident regarding the questionable search of two teenage girls when he was a Wareham, Mass., police officer. Allegedly, then Wareham officer Scott Flanagan strip searched two teenagers in 1991 and 1992 under Perry's command. In a sworn deposition in 1990, then Wareham Police Chief Thomas A. Joyce said "Perry had not been 100 percent truthful to me," noting that Perry initially denied the searches ever took place. The families of the two girls sued the Wareham Police Department, with the jury finding in favor of the victim in one case and a pretrial settlement in the other.

FACULTY from page 1

ary criticism to narratives of the Holocaust." Further, the release states he is among the world's foremost Holocaust scholars regarding "its historical, political, literary, artistic and cultural aspects."

Young has authored three works on the Holocaust, among them "The Texture of Memory: Holocaust Memorials and Meaning," winner of the 1994 National Jewish Book Award. In addition to the books he has penned, Young has been a prolific academic writer, publishing 136 articles and chapters of collections, as well as more than 35 critical reviews and hundreds of lectures.

He will soon serve as editor in chief of the Yale University Press-published Posen Library of Jewish Culture and Civilization, which will encompass 10 volumes.

Along with his other accolades, Young has received fellowships from the Guggenheim Foundation and the American Council of Learned Societies. He has also been a visiting professor at Ivies Harvard and Princeton University, and at the University of Washington in Seattle.

Young has been on UMass' faculty since 1988 and has chaired the Department of Judaic and Near Eastern Studies since 1998.

UM adds new liaison for regional relations

QUEENIN from page 1

"I've met a lot of people who have been in the trenches, and they are helping me learn about the area," Queenin said.

Another challenge Queenin acknowledged is her goal to become well versed in issues surrounding higher education.

"It's not to say that I haven't followed the issues of higher education, so the information is not all new," she said. "But I am certainly getting know the culture of the University… I expect there are a lot of people to learn from, and I won't be shying in asking them for help."

"In Boston, I had a similar orientation when I first started and it's a similarly complex organization. And here with nurses and faculty, and with staff and students, I think there are a lot of parallels, so I'm ready to dive and really learn."

In hiring Queenin, the role of director of community relations has also been expanded to include regional legislative relations. She will be focusing on western Mass. delegation and local staffs.

According to a University release, from 1994 to 2004, Queenin worked in the office of state Senator Therese Murray (D-Plymouth), who chaired the Senate Ways and Means Committee and is now Senate president. She was the Senate liaison to the Joint Committee on Human Services and Elderly Affairs and eventually secured a position as the senator's legislative director.

"With her work at Children's Hospital and the Massachusetts State House, Lisa brings the right mix of experience and skills to this critical position," said Nancy Buffone, executive director of external relations and university events at UMass Amherst in a release. "As UMass strengthens its ties to the local communities, Lisa will play a key role in working with civic and business leaders, community members and local legislators. She is a great addition to our team and I look forward to having her represent the campus."

Global warming: the biggest scam ever

Shane Cronin

Professors routinely lecture on the imminent threat of global warming/climate change, and take for granted that every student sitting before them is drinking their liberal Koolade. I, for one, am sick of it. The "general consensus" among the scientific community that your all-knowing college teachers and the leftist media love to tout doesn't exist. Global warming is the biggest farce of our time, and if President Obama and the sycophant Democrats in congress have anything to do with it, we'll all pay dearly for it.

According to the Heritage Foundation, if a cap-and-trade measure is signed into law, like the one the House of Representatives passed in 2009, by 2035 the average family of four would pay an additional $6,800 in annual taxes. By the way, dinosaur Representative Edward Markey, who has held his congressional seat in Massachusetts' seventh district since "Lavern and Shirley" were on the airwaves, co-sponsored the bill titled the Waxman-Markey "American Clean Energy and Security Act." He's up for reelection on Nov. 2, which means those of you in the seventh district have the opportunity to vote him out, and save yourselves and your fellow Americans tens of thousands of future tax dollars.

Global warming is the biggest farce of our time, and if President Obama and the sycophant Democrats in congress have anything to do with it, we'll all pay dearly for it.

The con-artists congressmen behind this bill know nothing about science, and refuse to listen to those who do, such as Climatologist, Dr. Timothy Ball. Dr Ball wrote in the Canada Free Press in 2007, "...I insist on saying that there is no evidence that we [humans] are, or could ever cause global climate change." That's not something you hear at the University of Massachusetts everyday. Furthermore, as recently as the 1970s, Time magazine reported the Earth was heading toward another ice age. Dr. Ball confirms many of his peers held this scientific view during this time. Twenty years later, however, all the liberal media outlets reported the planet was melting. How is it that in such a short span the Earth managed to change course so drastically?

Answer: it hasn't. Think about it. Fact: The Earth exhibited at least five ice ages before the Industrial Revolution. Fact: Ice, at one time, almost reached the equator. Therefore, I pose the question to you, Global Warming Zealots. How did planet Earth emerge from five ice ages without hundreds of millions of "greenhouse gas producing" cars on the road like there are today? Or hundreds of millions of methane-producing cows? Or jet engine planes (of which Madame Speaker, Nancy Pelosi is so fond), and every other thing the libs attribute to the world's eventual demise? Answer: Mother Nature. Dr. Michael Savage's New York Times best selling book "Trickle Up Poverty", which debuted earlier this month, devotes an entire chapter to the subject.

Still don't believe me? Log on to petitionproject.org. Professor of chemistry Arthur Robinson has compiled a list of signatures of more than 31,000 scientists - 9,000 of whom hold Ph.D's - who are convinced that, "the human-caused global warming hypothesis is without scientific validity and that government action on the basis of this hypothesis would unnecessarily and counterproductively damage both human prosperity and the natural environment of the Earth."

If you can't come to terms with the fact that human-caused global warming is an utter lie, certainly you must agree that if 31,000 scientists disbelieve it, it is worth doing some of your own research.

This is what Kevin Knobloch told me when I questioned some of his talking points yesterday at his "Climate Change: Profiles in Paralysis" lecture. Knobloch, who is the President of the Union of Concerned Scientists, spoke of nothing we haven't heard before to a large audience in the Student Union Ballroom. No one was impressed when he warned of planet Earth literally melting before our eyes. Nor did many of them buy the "It's up to Barack Obama and the Democrats to save us all from the evil Republicans" routine. The talk was utterly unspectacular. It certainly didn't have the theatrics of "An Inconvenient Truth."

Therefore, at the end of the lecture, I couldn't help but to get my two cents in at the question and answer segment. Most of the crowd immediately cleared out before I had my turn at the microphone, but I feel confident that my remarks nudged a few brain cells. And so I asked Mr. Knobloch, "If the world is warming, how is it that snow fell in all 50 states last winter including in the mountains of Hawaii?" He answered with a rehearsed statement before informing me that, "this is the hottest year on record." I'm sure that's what the residents of Wylie, Texas were thinking when they awoke on the morning of Feb. 23, 2010 to find their community covered in snow.

Walking out of the room after asking my question, a voice called out to me, "Good question." It was a student who also attended the lecture. We chatted for a few moments, and I shared where I got my information on global warming. I was glad someone in there was paying attention. Being a climate change "denier" isn't easy. Many scientists who disbelieve the theory remain silent. They fear repercussions from their colleagues - especially in the university setting. Well I won't be silenced. I won't tailor papers to compliment some zealot professor's views, and neither should you.

Shane Cronin is a Collegian columnist. He can be reached at scronin@student.umass.edu.

"SORRY, I DON'T HAVE ANY IDEAS ON HOW TO ENERGIZE A DISAFFECTED ELECTORATE... HOW ABOUT A CLARK BAR?"

The beneficence of symmetry

Dan Stratford

Sun-Tzu once said in his treatise on military strategy and tactics "The Art of War" that, "He who advances without seeking glory and who retreats without fearing disgrace is the jewel of the kingdom." This mindset, like the countless other standards of patience and prudence share a single great maxim – that of unparalleled symmetry.

Amongst my close-knit group of peers, we share what some consider to be a peculiar internal joke – we compliment each other on our collective "symmetry," and, specifically, we praise each other on the shape of our heads, especially with regards to their symmetry. Though those outside my friends may view this practice with disbelief, we know that this truly unique observation and tribute to each other's "symmetry" is, in fact, one of the best compliments that can be afforded to someone.

People often ask me just what I mean about symmetry, and what I am implying when I compliment people on their "symmetry" or their "symmetrical" brain. Simply put, giving the title of "symmetrical" to someone is much more than merely a shocking comment designed to ruffle feathers. It is an appreciation of that person's intense inner carefulness, tolerance, patience, and courage – principles that have been taught for centuries by numerous great thinkers and leaders, from Thucidydes to Sir Thomas More, Marcus Aurelius to Machiavelli, and Edward the Confessor to Edmund Burke.

Simply put, bestowing the title of "symmetrical" on someone is much more than merely a shocking comment designed to ruffle feathers.

There are many historical examples of this storied "symmetry" in action to corroborate the musings on the subject by the great thinkers of the ages. This includes, amongst other things, the emperor Hadrian's management of the Roman Empire at the height of its greatness, especially the consolidation of its borders after a period of reckless expansion by his imprudent – and thus, "asymmetrical," – predecessor Trajan. For this reason, leaders such as Hadrian can be considered, by virtue of their intense prudence and inner symmetry, some of the most talented leaders to ever grace the Earth.

Another example of symmetrical leadership is the sixth Governor of my home state of New York – and a personal hero of mine – DeWitt Clinton. Though he narrowly lost the Presidential Election of 1812 to James Madison, he was in large part responsible for the construction of the Erie Canal, much to the chagrin of his political opponents, who derided the project as "Clinton's Ditch." However, Clinton, as a testament to his own inner symmetry and personal grit, personally saw to it that the funds for the canal project were allocated, thus ensuring its construction. This, in turn, permitted the metamorphosis of New York into the great commercial powerhouse of the early American Republic.

Yet another example of prudent, and therefore symmetrical, political leadership is from our own time – Our own eminent Student Government Association President, Brandon Tower. Throughout his tenure, he demonstrated many of the traits shared with the other two executives, as made evident by his efforts towards creating a clever and competent cabinet dedicated solely to constituent services. These include Ben Levine, Secretary of Finance and the steward, along with the SGA Ways & Means Committee, of the Student Activity Trust Fund, whose treatment of said trust fund has been unequivocally symmetrical. These two public servants and helmsmen of the ship of state further demonstrated their tremendous symmetry by staying here over the summer to make sure that said helm was not left unattended. This is especially crucial in President Tower's case because he was here not only to ensure a continuity of SGA operations, but also to oversee the review of the SGA Constitution & Bylaws.

The result of this vast expenditure of time and effort is, to say the least, a more efficacious, transparent and politically stable SGA – one devoted to meeting the needs of its constituents rather than appeasing the untenable passions of its countless members.

These three aforementioned figures illustrate real examples of symmetry – not just by virtue of their complicity in some trivial internal joke, but rather by how commensurate their practices and politics are to the time-tested virtues of prudence, fortitude and foresight. These examples demonstrate, for good and all, that referring to someone as symmetrical or complimenting one's symmetry is not just the domain of the amusement of a group of friends. Symmetry is not just a compliment – it is a viable political philosophy and a venerable perspective on politics in general. To govern is to be symmetrical.

A quiet shift in GOP stance on gay marriage

John Cowan and Evan Wolfson

As the "tea party's" outsider challenge to Republican Party orthodoxy grabs headlines, another, quieter revolution is unfolding inside the GOP. This rebellion has at its heart a truly surprising issue, one that could have long-term consequences for the party: gay and lesbian couples' freedom to marry.

The latest evidence of this quiet revolution came with the release of the Republicans' midterm-campaign "Pledge to America." Though the pledge gives a perfunctory nod to "traditional marriage" (in a single line in a list of things, like "families," that it supports), explicit opposition to marriage for same-sex couples is conspicuous in its absence. The document never uses the word "gay" (or "homosexual") - a stark contrast to past party platforms, which have made opposition to gay equality a centerpiece of their social agenda.

Is this an isolated development? After all, the 1994 "Contract With America" was also focused solely on fiscal issues and government reform. But in 2010, there is compelling evidence that the shift is deep, and possibly lasting.

The GOP, in large part, isn't displaying its usual anti-gay election-year demagoguery, and not just in the "pledge." As recently as 1995, a Republican-controlled Congress was holding hearings investigating "homosexual recruitment" and the "promotion" of homosexuality. During the George W. Bush administration, the party used its fervent opposition to marriage for gay and lesbian couples as a get-out-the-vote strategy, encouraging more than a dozen anti-gay state ballot initiatives geared at driving turnout in the 2004 election and engineering repeated efforts to pass an amendment to the Constitution.

No state is facing an anti-gay initiative on the ballot, and marriage has not been a focus of the national conservative agenda.

This year is the first election year in recent history in which anti-gay rhetoric has been significantly muted: No state is facing an anti-gay initiative on the ballot, and marriage has not been a focus of the national conservative agenda.

Beyond that, the Republican establishment is stepping up - and coming out. In just the last few months, leading Republican heavyweights have begun to announce their support for the freedom to marry. Ted Olson, Bush's solicitor general and a longtime Republican power broker, took the lead, writing articles ("The Conservative Case for Gay Marriage," in Newsweek) and, with co-counsel David Boies, filing, arguing and winning the first federal court case to uphold gay and lesbian couples' constitutional right to marry. Cindy McCain and former first lady Laura Bush have both spoken out in support of marriage.

In August, Ken Mehlman, former Republican National Committee chairman and campaign manager for Bush in the 2004 election, revealed that he is gay and supports the freedom to marry. Mehlman hosted a fundraiser in support of Olson's lawsuit, with a guest list that would have been unheard of five years ago.

It included numerous well-known Republicans such as former New Jersey Gov. Christine Todd Whitman, former McCain strategist Steve Schmidt, former Bush White House communications director Nicolle Wallace and former RNC counsel Benjamin Ginsberg. Bush's daughter Barbara made an appearance.

Perhaps even more telling, the proudly right-wing GOP Sen. John Cornyn of Texas appeared for the first time at a reception for the Log Cabin Republicans, a leading gay GOP organization. Cornyn had turned down invitations and even contributions from the Log Cabin group in the past. In September, he weathered significant criticism from the anti-gay Family Research Council. Because Cornyn is chairman of the National Republican Senatorial Committee, and thus tasked with getting Republicans elected to the Senate this fall, every move he makes is watched for ballot-box implications.

What's driving this insiders' insurrection? Perhaps a sense that a libertarian-leaning belief in fully extending the freedom to marry to all Americans does not, in fact, clash with a conservative commitment to holding together the social fabric, as marriage entails personal responsibility and social stability. Or perhaps these GOP leaders are beginning to see an alignment of their rhetoric about individual liberty with public opinion; in the last month, two national polls, by CNN and the Associated Press, showed that a majority of Americans nationwide now support marriage for gay and lesbian couples.

The implications of such a historic shift in the GOP establishment's stance on marriage should not be underestimated. For Republicans, it means they could become less moored to their socially conservative base and may get back in touch with the cautious but forward-looking American political center that is vital to GOP hopes of cobbling together a governing majority. For the country, it is evidence that we are inching ever closer to a national consensus that gay and lesbian couples should have the freedom to marry under the law.

Franco impresses in Ginsberg portrayal

By Andrew Cogan
Collegian Staff

"Howl," titled after Allen Ginsberg's most famous poem, opened this weekend at Amherst Cinema. On Saturday night, writers and directors Rob Epstein and Jerry Friedman were on hand to present the movie and answer questions afterwards.

The film recalls the 1957 obscenity trial of Lawrence Ferlinghetti, who was charged with publishing Ginsberg's controversial volume, "Howl and other Poems." The film explores the historical significance of the trial, critically examines the poem and its legacy, and opens a window into Ginsberg's artistic mind.

James Franco stars as Ginsberg. Jon Hamm plays Ferlinghetti's defense attorney, Jake Ehrlich, and Aaron Tveit plays Peter Orlovsky, Ginsberg's fellow poet and life-long partner.

Franco's portrayal of Ginsberg is natural and reserved, and believably represents what the poet might have been thinking and feeling at the time of the trial. It's important to note that every line of dialogue is taken verbatim from court records, interview transcripts, and other historical documents. Everything Ginsberg says in the movie he said so himself at sometime in his life, adding to the authenticity of Franco's portrayal.

The story follows multiple threads wound together in non-linear fashion. Filmed in black and white is Ginsberg's debut performance of "Howl" at the Six Gallery, a night later remembered as a historic moment for the Beat Generation. Also in black and white are scenes from Ginsberg's young life, and an interview in his apartment in which he reflects upon his artistic muse and the process of writing poetry. The obscenity trial is filmed in color, as are several animated sequences that interpret the poem that connect it to specific events in Ginsberg's life.

The different parts of the film flow together smoothly, each serving its own purpose in the larger framework of the story. But although the film would arguably be incomplete without all of them, some parts are considerably more compelling than others. The trial scenes in particular are among the most satisfying. In these scenes, Ehrlich heroically defends Ferlinghetti against the ignorant prosecution.

Not only are these scenes entertaining, they provide context by depicting the general social and political mood of the times. They also serve as a platform for raising universal questions about freedom of speech and the nature of art: what is and what isn't art, and why and to whom is it important?

Another intriguing part of the film takes place in Ginsberg's apartment, where he comments on his own personal meaning of "Howl." These scenes provide illuminating insight into Ginsberg's personal life. However, the film is not a traditional biography, where Ginsberg's life is presented in chronological order, from birth until death. While there is plenty of biographical information to be had, it is discovered according to how it is revealed in the poem. In fact, "Howl" is as much about the poem itself as it is about Ginsberg.

James Franco stars as Allen Ginsberg in the movie based on the poet's most famous work. Franco's script contained only things that had been directly quoted from Ginsberg in interviews and court records, giving the film a much more authentic feel.

In "Howl," the poem becomes a lens. It is a means of accessing the emotions that inspired Ginsberg to write the poem in the first place. Through his thoughts and feelings, the film illuminates the oppressive social environment he was experiencing, and reacting to in his poetry. The main point of the film is to ask the essential question, in the words of Friedman, "why this poem, then?"

The film succeeds in this task. It captures in many parts a moving portrait of the poem, the poet, and the generation that received them. It does so with meticulous attention to detail and authenticity. From Ginsberg's early life and his struggle to get published, to the trial that launched his popularity, the film explains why "Howl" is still a relevant work of art. Not only is the poem the masterwork of one of the 20th Centuries greatest artistic minds, it inspired a universal freedom of speech debate in the public consciousness, a legacy that endures today.

Big-name actors star in comic book movie

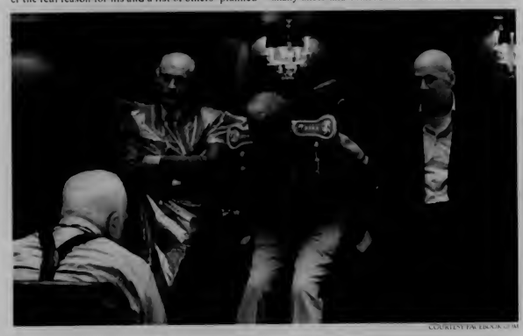
By Tyler Manoukian
Collegian Correspondent

Bruce Willis invades the big screen once again in his latest action film, R.E.D, standing for Retired and Extremely Dangerous. Released this past weekend, the movie features the high-impact and explosively bullet-ridden scenes everyone is looking for.

Frank Moses, a retired black ops operative, became an assassination target as a result of his lethal past. When a New York Times reporter is murdered, Moses reassembles his old unit to uncover the real reason for his and a list of others' planned murders. His mission leads him to classified documents that will reveal the truth behind the ordered hits.

The action film is directed by Robert Schwentke, who directed "Time Traveler's Wife," and features a star-studded cast. The movie is based off the graphic novel "Red," a three-issue comic book miniseries released by D.C. Comics written by Warren Ellis with art by Curly Hammer.

The movie features a mix of great scenes, with intense action and a cool flow. Schwentke's directing is impressive in the film. His interchanging of shaky shots and blurred scenes became a cue for an impending firefight. The direction the film took was predictable, of course. However, the movie took an interesting turn towards the end that really intensified the interest of the viewers. What was believed to be an ending that could already be distinguished, the movie surprised with an unforeseen ending.



The star-studded cast of "Red" includes big-name actors John Malkovich, Morgan Freeman and Bruce Willis, all pictured above. The movie is based on the three-part comic series "R.E.D." by Warren Ellis.

"Red" is one of those movies that leads the audience in one direction, and then totally blows the expected conclusion out of the water. Though it is not one of the most original films released (it is similar to redemption stories such as "S.W.A.T."), it does still deliver.

Bruce Willis, of "Die Hard" fame, takes the role Frank Moses in one of his most action-packed films since "Live Free or Die Hard." Moses, a retired operative with an "ultra top secret file" must fight his way out of a government cover-up. His role in the film is nothing short of spectacular. His deep voice and polished demeanor worked hand in hand together to create a very dramatic performance.

Morgan Freeman and John Malkovich also star in the film. Freeman plays the role of Joe Matheson, a former member of Frank's team living in a retirement home only to be dragged out by his lust for high-risk situations. Freeman's performance in "Red" is not unlike his other performances. Seen as the wise man with a secret humorous side, Freeman delivers as an 80-year-old plagued by stage-four cancer. Freeman supports Willis and his team with a passionate performance throughout.

Malkovich, or Marvin Boggs in the film, plays the role of a paranoid, old ex-team member. Boggs believes that the government is watching him through satellite and that they are trying to kill him. As an operative part of the W.E.T team, Boggs is "the crazy one." His line delivery is simply hysterical. His awkward comments at the most precarious times got a few chuckles from the audience, which is always good in an action film.

The female stars, Mary-Louis Parker and Helen Mirren, play an integral role in the adventure Parker is cast as Sarah Ross, the pension clerk from Kansas City who is essentially stalked by Moses. Moses drags her into the mess because of his romantic interest in her. Moses' budding romance in the beginning steers full swing towards the end when he will stop at nothing to save her. Parker's breakout performance in the film was unexpected. She transitioned well from television to big flick, and she had an all-star cast to work with.

Mirren plays Victoria, the last member of the old unit who is mysteriously introduced well into the movie. As part of her mystique, her life is just as secretive as the rest of her team members' lives. Her efforts as part of the cast were well admired. However, she was the one person in the film who should not have been in it. It seems as if she was dragged around, frequently playing second fiddle to the others. However, she does contribute some hysterical one-liners that will have you laughing with the rest of the cast such as, "I haven't killed anyone in years. That's sad." She is redeemed towards the end with a brilliant final scene.

Karl Urban, most notably from the "Lord of the Rings" films, also gives a stellar performance. Usually cast as a supporting actor, his role as primary antagonist in the movie was amazing. His growth throughout the plot was probably the most underrated performance. It is time for this guy to breakout – he can definitely act. While not the best, a little more polish and he could be one of the most popular stars in the industry.

Overall, this movie is a must-see. If you've read the graphic novel, you definitely want to see this. The interconnectedness in this flick is something to embrace. Things really come together throughout the movie. With the intertwinement of the characters and the budding romance, this movie is a must-see for Willis fans. For anyone who wants to see some good old-fashioned action and a truckload of explosions, take the time to sit down and watch.

'Jackass' crew takes it up a notch with latest installment

By Ian Winship
Collegian Correspondent

It's not hard to say you might know what to expect when you go see "Jackass 3D." You think you are going to see insane bone-crushing stunts, vomit-inducing pranks and a bunch of dudes who are very, very comfortable with their sexuality doing things that will make most guys go "what the ..." All of this in 3D nonetheless. Well, you might be completely correct. And you will still want to go anyway.

The guys at Jackass have jumped on the 3D bandwagon. It was really only a matter of time. Some would say that Jackass was made for 3D. The best thing about the 3D element is that the movie is not about the 3D qualities. It would be just as insane and cool without it. It almost gives the movie a more home video feel. You forget the movie is even in 3D and you feel like this is just a video a bunch of dudes down the street made. Now don't forget that these dudes have a lot of money to spend on their shenanigans, and they know a lot of people who will help them.

This new "Jackass" goes back to its roots. In the first "Jackass," things were totally new. Nobody had really done this stuff before. All it was back then was a bunch of skaters and daredevils doing things that they thought were awesome or hilarious. They were doing things that were totally insane and they got it all on film.

In their next movie, after they had received a good deal of fame, things almost got out of hand. Everything had to be bigger and better. This took away from the "Jackass" that we all knew, loved and were told repeatedly not to be when we were younger. "Jackass 3D" brings it back to the good ol' days. They went back to doing simpler things that were still hilarious and awe-inspiring. They still have a good amount of stunts that are complex and on a larger scale, but these don't take over the movie. Instead these stunts add up with the smaller scale things to create something better than ever. So, while you have stunts like Steve-O getting bounced high in the air in a porta-potty attached to two huge cranes you will also see the guys hanging out in someone's yard with a ramp that goes into a pool and a slingshot system for speed.

The most interesting technology taken advantage of in this movie, besides the 3D feature, was the use of slow motion. Slow motion played a big part in this movie. Hearing this about pretty much any other movie might make people moan and groan, but "Jackass" isn't like other movies. The things these guys do deserve to be slowed down so that you can see all of what is happening. You get to see everything from every flinch to every aftershock ripple of skin. From every mouthful of vomit to every flying dildo, these guys did not leave much at a normal speed. They had obvious got their hands on some top of the line equipment, and if you think it's funny fast, you will be falling out of your seat when you see it slow.

Instead of simply seeing stunt after stunt, you see reactions to these stunts from actors and crew, and a lot of the time you see what is going on before the stunt. The latter is a huge part of what makes this movie interesting. If you have been following the "Jackass" movies, you know that a lot of the time these guys will jump right into a stunt without a second thought only to react to how bad it really is after.

In this movie you see a great deal of hesitation not just from some of the guys, but from everyone involved. It is becoming obvious that these guys are getting older, and although they are now clearly the professionals that they always claimed to be, they are growing more and more wary.

Johnny Knoxville takes the cake for being one of the toughest guys in the crew. He always seems to be the one that will do the things that nobody else wants to do. You see him talking about how bad a stunt might hurt and you know that he knows what is coming and he still goes for it every time with a smile on his face. It's hard to say how long these guys will be able to keep up what they are doing but for now they have still got it and it is hilarious.

Now this may go without saying for the experienced Jackass fan but some of you may not be. Let it stand that if you are extremely disturbed by poop, vomit, male genitalia or animals slamming into human beings this may not be the movie for you. Otherwise go see for yourself what these guys have cooked up in "Jackass 3D."

Ian Winship can be reached at iwinship@student.umass.edu.

Johnny Knoxville, left, and Jeff Tremaine pulled out all the stops with "Jackass 3D." Knoxville starred in the film with Tremaine directing.

Mooren's offense leads Dukes

By Jackson Alexander
Collegian Correspondent

Duquesne's Michelle Mooren and La Salle's Anna Dolhansky were named the Atlantic 10 Conference Women's Soccer Player and Rookie of the Week, respectively, as announced by the league office on Monday.

Mooren recorded two game-winning goals and guided the Dukes to a 2-0-0 record in conference play last week.

The sophomore started the weekend with the opening goal in a 2-0 victory versus Fordham. She scored her first collegiate goal in the 32nd minute providing her team with a 1-0 lead.

A-10 Women's Soccer

Mooren followed that performance with her second game-winner of the week in a 2-1 win against La Salle. With 15 minutes left in regulation, Mooren drilled a free kick by the Explorers' keeper.

The two wins improved the Dukes overall record to 7-6-1 and 4-1-0 in conference play.

Dolhansky registered both goals in La Salle's 2-1 double-overtime win over St. Bonaventure.

The freshman entered the game goalless through her first 14 matches, but that changed shortly after half-time.

Less than two minutes into the second half, Dolhansky scored her first collegiate goal, gathering the rebound on Jess Hopton's errant shot. The Bonnies would tie the game later in the half, but solid goalkeeping and defense on both sides sent the game into overtime.

Forty-five seconds into overtime, Dolhansky scored her second goal of the game and gave her team their first A-10 victory of the season.

La Salle (7-7-2, 1-3-1 A-10) will finish its regular season with a four game away series.

SLU offense improving

The Saint Louis women's soccer team rejuvenated its once dormant offense with a 3-0 blowout against George Washington.

On Sunday, Emily Kryzer, Ashley Brazill and Jessie Jarrett scored three first half goals to lead the Billikens to victory on Senior Day.

Kryzer, a senior, kicked off the scoring 13 minutes into the game on a feed from freshman Jenny Hummert.

At the 31 minute, seven second mark, Brazill, also a senior, extended the lead to two after capitalizing on an error by the Colonial defense.

Jarrett, a freshman, provided the final insurance goal minutes later on a feed from Brazill.

SLU goalkeeper Katie Walsh made four saves and recorded her eighth shutout of the season.

The Billikens (3-8-5, 2-4-0 A-10) suffered through severe scoring slumps throughout the first half. Five games this season have ended in 0-0 ties and at one point SLU had three goals in its first 12 games and a 1-6-5 record during that stretch.

Since that drought, the Billikens have five goals in their last four games and a much improved 2-2 records to show for it.

SLU travels to face Charlotte this Saturday.

Weinraub ties record

Charlotte's Whitney Weinraub tied the schools career goals scored record last week.

The senior scored the golden goal against George Washington on Friday night. The game-winner, her 36th career goal came in the 46th minute of the 49ers 1-0 win.

She temporarily joins former Niners Courtney Cook and Hailey Beam as top goal-scorers in school history.

Her decorated career is highlighted by her 36 goals, 22 assists, 94 points, two A-10 Championships and a pair of A-10 Offensive Play of the Year Awards.

Charlotte also beat Richmond 1-0 last week to vault itself into second place in the conference. Brooke Mulloy came off the bench to score the game's only goal, while Oni Bernard provided Mulloy with the assist.

The team has put themselves in position to compete for its third A-10 Championship in four years. Weinraub, and junior Macky Wingo lead the 49ers potent offensive attack.

The 49ers (12-4-0, 5-1-0 A-10) will celebrate their Senior Night on Saturday against Saint Louis.

Jackson Alexander can be reached at jtalexan@student.umass.edu.

Courtesy Duquesne Media Relations

Defender Kathleen Wolff defends the backline in a game earlier this season. Wolff's defensive presence has kept Duquesne in the third spot of the Atlantic 10 table behind Dayton and Charlotte.

Villanova continues to speed through CAA

Wildcats open up Maine defense to take a 48-18 victory, Witney earns accolade

By Scott Cournoyer
Collegian Staff

Villanova quarterback Chris Witney put on a passing display Saturday, as the Wildcats scored their way to victory on the road against the Maine, winning, 48-18.

Villanova's (4-2, 2-1 Colonial Athletic Association) second conference win of the season put it into a two-way tie for third place, nipping at the heels of Massachusetts and William & Mary.

Witney lit up the scoreboard early in the game, connecting with receiver Angelo Babbaro for a 63-yard touchdown catch in the first quarter, but not before Witney ran in a one-yard touchdown on the previous offensive drive.

The Wildcats scored four touchdowns on five offensive drives in the first half, with Witney posting a career-high 322 passing yards on the day and racking up five total touchdowns on his way to CAA Offensive player of the Week honor.

Villanova recorded 559 yards total offense, including 223 yards on the ground with three players rushing for 45-plus yards in the Wildcat's shootout over the Black Bears.

Hens remain undefeated

Behind another second-half lockdown performance Delaware remains undefeated on the year, beating Rhode Island, 24-17, Saturday, staying at the No. 2 spot in the Football Championship Subdivision Coaches Poll.

CAA Football

Delaware (7-0, 4-0 CAA) was offensively sound to start the game, scoring on its first two offensive possessions.

The Rams (2-4, 1-2 CAA) had a chance to put some points on the board early in the first quarter, but had a field goal blocked, then recovered by the Delaware's Darryl Jones, keeping the game at 14-0.

Andrew Pierce ran for 57 yards on an 11-play, 80-yard drive touchdown drive just before the end of half, but the Rams' 75-yard ensuing kickoff return for touchdown made it 24-14 Delaware at halftime.

Although no touchdowns came in the second half, Blue Hen's Marcus Burley provided the difference, intercepting two passes on defense. One came early in the third quarter, and the second came with just under five minutes left to play in the game with the Blue Hens up by seven points.

Running back Andrew Pierce ran for 143 yards and two touchdowns on the ground on 26 touches, on his way to a CAA Rookie of the Week honor. The win marks Delaware's seventh victory on the season, four coming in-conference.

Evans, Hurd honored

Matt Evans provided the hammer for New Hampshire as they went on the road to defeat higher-ranked James Madison Saturday, 28-14, while Evans earned a CAA co-Defensive Player of the Week honor.

Evans recorded a game-high 14 tackles, a sack and two-and-a-half tackles for losses for the Wildcats (4-3, 2-2 CAA) in victory, as JMU (4-2, 1-2 CAA) converted four third downs all game, with zero in the second half.

URI's Travis Hurd provided a spark for the Rams with a 75-yard kickoff return for touchdown just before the close of the first half against Delaware on Saturday, earning him a CAA Special Teams Player of the Week honor. Hurd provided the Rams versatility in multiple phases of the game, returning three kickoffs, rushing the ball seven times for 20 yards and caught two catches for another 36 yards.

Senior Angelo Babbaro darts down the field during the game against Maine this past weekend. Babbaro caught a 63-yard touchdown.

Swimming swept by Terriers

Maxwell Sparr, Collegian

The men's swimming and diving team was swept at Boston University this past weekend. The men lost 154-146 as the women's side lost, 177-115. Both teams will travel next to face Army.

By Ben Lambert
Collegian Staff

(This article was originally published Oct. 17 on Dailycollegian.com).

The march towards another championship started with a misstep on Oct. 16, as the Massachusetts swimming and diving teams both fell to Boston University. The men's team lost a close one that was decided in the final race of the afternoon, 154-146, while the women's team lost, 177-115.

Despite these results, both teams had several bright spots to keep them moving forward towards their home opener next week.

Freshman Derek Hursch was one of those bright spots for the Minutemen. He won three events in his first-ever collegiate meet. Hursch won the 200-yard freestyle in 1 minute, 44.89 seconds, the 100-yard freestyle in 47.36 and the 200-yard IM in 1:54.96.

Several other able competitors stepped up for the Minutemen during the meet. Junior Jason Cook continued his run of strong performances, as he captured the three-meter and one-meter dives with scores of 326.03 and 298.80 respectively. Senior co-captain Adam Duffield took second in the one-meter and third in the three-meter dive, as well.

On the swimming side of the aisle, junior Joey Sbordon won the 1000-yard race in 9:51.30, as well as the 500-yard freestyle in 4:46.91.

After the teams battled evenly throughout the meet, the Terriers snatched the win with a four-second victory in the 400-yard relay, just edging out UMass. Sbordon, senior Chris Howard, freshman Troy Nichols and sophomore Eric Zeimetz could not quite capture the victory, despite a valiant effort.

Despite a less than ideal result, the women's team also met with some success against BU. Senior Jessica Starosielec earned the victory in the 200-yard breaststroke in 2:27.99, and placed second in the 100-yard breaststroke, 200-yard IM and the 200 medley relay, teaming with senior Gillian Bank, junior Sarah Kanellas and sophomore Amina Meho to come up with that result. Kanellas also won the 100-yard butterfly in 59.07.

The Minutewomen also swept the medals in the 200-yard IM, as sophomore Ingrid Woelfel, freshman Kaitlyn McKenna and Starosielec finished first, second and third respectively. Senior Meghan Nowak finished just out of the medals as well, clocking in at fourth for the team. Freshman Anna Cavanaugh, senior Katie English, senior Tavis Potter and Meho also teamed up to snatch the 400-yard freestyle relay win.

For the diving team, sophomore Molly Elkins finished fourth, and junior Hannah Swift finished fifth in both the one-meter and three-meter dives.

Both teams return to action next week. The home opener against Army will take place at 2:00 p.m. on Oct. 23 in Joseph Rogers Pool.

The Massachusetts men's cross country team placed eighth overall at the Chile Pepper Festival in Arkansas. The Minutemen battled against top schools including No. 2 Oklahoma State.

Temple rebounds from 2-1 loss by shutting out Golden Rams

Saint Louis woes continue in winless season

By Jackson Alexander
Collegian Correspondent

The Temple field hockey team rebounded from a loss earlier in the week to blank West Chester, 3-0.

The Owls suffered their first Atlantic 10 loss of the season when they traveled to face La Salle last Friday.

Temple controlled play throughout the majority of the game, outshooting the Explorers, 18-7, but could not find a way to capitalize on those opportunities. La Salle made the best of its chances and won the match, 2-1.

Two days later, the Owls regrouped and blanked West Chester 3-0.

Once again, the Owls came out shooting early in the game, but this time they recorded two first half goals to show for their efforts.

A-10 Field Hockey

Bridget Settles scored her second goal of the week, and Caryn Lambert provided the second goal of the half. Lambert picked up where she left off in the second half, notching her second goal of the afternoon.

Temple (7-9, 2-1 A-10) will do battle this week with Massachusetts. This game will likely determine positioning for the upcoming A-10 tournament.

SLU woes continue

Saint Louis dropped a 4-0 contest last week versus Richmond to drop the team's record to 0-15.

The Billikens currently sit in last place in the A-10 standings and are the only team without a victory in the conference.

Many of the team's problems revolve around its inability to score. The team has scored six goals in 15 games thus far.

A lack of senior leadership can also be attributed for the team's struggles. With 15 freshman and sophomores and four seniors, the Billikens are one of the younger teams in the conference.

SLU's struggles date back to last season when they finished with a 1-16 record and failed to win a conference game. The Billikens have lost their last 29 games, and their last A-10 victory was Oct. 21, 2009.

The Billikens (0-15, 0-2 A-10) will search for their first win on the road this week when they travel to face Lock Haven, Saint Joseph's and Temple.

St. Joe's triumphant

A dominant win over West Chester and a 3-2 win against La Salle capped a strong week for the Saint Joseph's field hockey team.

On Sunday, three different Hawks scored, helping the team come out victorious on Senior Day.

La Salle stunned St. Joe's right off the bat with a goal in the first minute of play, but less than five minutes later the Hawks equalized with a goal from junior Theresa Testa.

Later in the half, junior Therese Doyle netted the game-winner to give the Hawks a 2-1 lead going into halftime.

Nicole McCreight added an important insurance goal at the start of the second half. McCreight broke away from the Explorer defense and made a move around goalkeeper Anna Ruth for her 11th goal of the season. McCreight also had an assist in her final regular season home game.

The Explorers countered with a goal of their own but goalkeeper Kelly Swanick and the rest of the Hawk defense stepped up and stopped La Salle's late push to ensure the victory.

Earlier in the week, the Hawks were backed by another three-goal game to defeat West Chester.

McCreight, Ellen Rowe and Casey Fry all scored in the 3-1 win.

St. Joseph's (5-9, 2-1 A-10) has Penn, Saint Louis, and UMass on the schedule this week.

Minutewomen take 4th place at Brown's Rothenberg Race

By Eric Mansfield
Collegian Staff

(This article was originally published Oct. 17 on Dailycollegian.com).

The Massachusetts cross country teams competed this weekend at separate venues. On Friday, the Minutewomen took fourth place place out of seven teams at the Rothenberg Race in Warwick, R.I., hosted by Brown. The Minutemen traveled to Fayetteville, Ark. for the Chili Pepper Festival, and finished in eighth place out of 50 teams among some of the country's best competition.

Crossing the finish line first for the Minutemen were senior twins Kevin and David Johnson. In a field of 470 runners, Kevin took a 50th place finish with a time of 30 minutes, 54.91 seconds, while David took 53rd place in a time of 30:57.23.

Following the Johnson's were seniors Andrew Mulvaney and Scott VanderMolen. Mulvaney took 60th place in a time of 31:05.30, while VanderMolen took 114th in 31:52.85.

Rounding out the top five for the Minutemen was another senior, Daniel Barry, taking 121st with a time of 31:58.73.

The meet included some of the top programs in the country. No. 2 Oklahoma State took first place, No. 7 Indiana took second and No. 6 Arkansas took third. Rounding out the top five for the meet was Adams State and Texas A&M.

Senior Kevin Johnson thought the race went "pretty well" and that the team felt fairly good about their performance.

Johnson said the team is "pretty pumped up" for the upcoming Atlantic 10 Championships. The team will pick up the intensity and have faster workouts leading up to the race.

Johnson said he thinks Richmond will be a heavy favorite leading up to the race, as it will be bringing back a few talented fifth-year seniors.

Johnson also mentioned that senior Daniel Barry turned an ankle during the race.

The top finisher for the Minutewomen at the Rothenberg Race was sophomore Courtney Baldwin, taking 19th place out of 92 runners in 18:29.9. Senior Gina Perno came in right behind Baldwin in a time of 18:30.2., taking a 21st place finish.

Senior Elizabeth Fisk took third for the Minutewomen, and finished 26th overall with a time of 18:34.6. Freshmen Mary Cole (42nd place) and Sarah Barrett (46th) rounded out the top five for the Minutewomen, with times of 19.03.4 and 19:09.4.

Brown took first place, with four of its runners finishing in the top five. Boston College took second with six runners in the top 25. Fellow A-10 competitor Rhode Island took third. Harvard, Connecticut and Bryant took fifth, sixth and seventh place finishes respectively.

The Minutewomen were coming off of an 11th place finish out of 47 at the New England Championships, where Baldwin led the way, while the Minutemen were coming off of a 30th place finish of 47 at the same meet at Franklin Park in Boston.

Both teams will have the next week off before competing in the A-10 Championships at Schenly Park in Pittsburgh, PA.

In last year's tournament the Minutemen left with a

Collegian Staff

Nov. 2, Election Day is fast approaching. Aside from the highly-contested congressional races throughout the state, three questions will appear on the ballot for the Commonwealth's electorate's vote. The first initiative is a proposed law to repeal the 6.25 percent sales tax on alcoholic beverages and alcohol. The tax went into effect on Aug. 1, 2009.

Democratic incumbent Ellen Story, State Representative from Amherst, opposes the repeal, stating that she believes alcohol, like other goods, should be taxed.

"For years, for some reason, the alcohol industry got a tax break, I don't know why or when," she said. "During the financial crisis, the Governor and legislature were looking to increase revenue, and one way they sought to do that was to get rid of the exemption on alcohol tax."

Story asserted that the legislature didn't actually raise the sales tax on liquor, they just abolished the exemption.

Representative Story cited figures presented by groups opposing the question which hold that repealing the sales tax would cut about $110 million of tax revenue out of Massachusetts' $28 billion budget. Story fears that the

Speaker Jean Johnson discusses new research

By Simone Shenny
Collegian Correspondent

Yesterday, Jean Johnson, director of education insights from Public Agenda, visited the University of Massachusetts to discuss the organization's research on the public's perspective on the environment, energy and science education.

Johnson's discussion involved an analysis of the first of Public Agenda's series of surveys titled the Energy Learning Curve. The group, which is a non-partisan and non-profit organization, conducted a national random sample of 1,001 adults over the age of 18 to be asked a series of 90 questions regarding the environment, energy and science education.

The main conclusions drawn from the study were Americans are mostly concerned with the price of energy and the reliance on foreign oil. Findings also stated Americans were aware of the problem of this reliance, and felt it will not be solved as gas prices decline. The survey highlighted that U.S. citizens were less troubled about the issues involving climate change.

According to Johnson, parents are open-minded when it comes to improving science and mathematics education, but "[parents'] hairs weren't on fire about the issue."

Johnson explained that the study demonstrated an existence of a lack of understanding of renewable energy

See CLIMATE on page 4

Courtesy Public Agenda Org.

Johnson concluded from her findings that Americans' main energy concern is the price of oil.

Mass Attack is back

DAILY COLLEGIAN 2010 Hockey Preview

Cahoon and Co. to start campaign

By Pete Vasquez
Collegian Staff

Every season is unique and withstanding from past seasons. Don Cahoon, coach of the Massachusetts men's hockey team, understands this concept. As the Cahoon Era enters its 11th campaign, the UMass coach looks at his group of 30 Minutemen and sees the difference this season will bring.

"I don't think that I've ever had more fun coaching a group of [players] than I'm having right now," Cahoon said.

Although the Minutemen (0-2-1, 0-0-1 Hockey East) saw two of the best offensive players in the country graduate last May in Casey Wellman and James Marcou, Cahoon has his players believing in a team first concept this year, in which contributions will come from everyone.

"I've got everyone's interest," Cahoon said. "People aren't thinking 'my role is less

New faces headline inexperienced team

By Steve Levine
Collegian Staff

The Massachusetts hockey team looks nothing like it did just a year ago.

The Minutemen lost four of their star players to the NHL and others to graduation following last season's campaign. Now, UMass will lean on its young core, which includes 13 freshmen to provide scoring on offense and leadership on defense.

Forwards

Unlike last year, UMass coach Don Cahoon expects scoring to come from all of his forwards. With such a young corps, Cahoon will look to his few upperclassmen and select underclassmen to provide veteran-type leadership. Of the upperclassmen, seniors Marc Concannon, Brian Keane, Chase Langernap, Mike Lecomte and Shawn Saunders will all share the responsibility of carrying the offense.

Last year as a junior, Lecomte proved to be one of the Minutemen' s best centers through the first 20 games, scoring four goals and adding six assists, winning 53 percent of faceoffs. Provided he can stay healthy, Lecomte should expect a career-year statistically.

Juniors Danny Hobbs and TJ Syner, who both played

Dainton leading UMass in goal

By Dan Giglotti
Collegian Staff

The Massachusetts hockey team has one player wearing a jersey stitched with the letter "C" and it is worn by a player in an unlikely position.

Senior Paul Dainton is one eight goalies since the beginning of the UMass hockey program in 1909-10 to have donned the lettered outfit, starting with David Buttrick in 1917.

He is the first goalie since Brian Reagan in 1997 to be elected as captain and the honor was a surprise, even to him.

"That was not something I could even fathom happening," Dainton said. "It's a huge honor that the guys voted for me and the coaching staff as well and it's still something that I'm working on each day, trying to be better at doing it."

UMass coach Don Cahoon issued his team a questionnaire in which players were asked to put themselves in a position of captain and pick whomever they felt would be the best fit as their assistant.

Dainton voted for Danny Hobbs, who is one of three players named as assistant captains, along with T.J. Syner and Michael Marcou three of his teammates that picked him.

"I think Paul is a tremendous leader," Syner said. "He's a great vocal guy out there that really can respond to his teammates. I know definitely guys look up to him, his work ethic."

"Pauly is a really good leader off the ice," Marcou said. "He's always doing the right thing, taking the younger guys and showing them around. On the ice, he's always working, doing extra stuff. Guys see that and want to build off of him. See his competitiveness and how much he wants it and build off of it."

Typically, the position of captain is left to those who play outside of the crease. Forwards and defensemen have a better opportunity to communicate with their teammates on the ice and more importantly, on the bench.

Since Dainton spends the whole game between the pipes, he finds other ways to motivate, such as in the locker room.

"Usually it's because you're not allowed to cross the goal-line and talk to the refs," Dainton said. "The goalie has a specific job, where you're on the ice for the entire game and you have to worry about stopping the puck. Between shifts, you can't go and talk to the ref. You can't micro-manage."

Dainton was recently named as a Lowe's Senior CLASS Award nominee, one of 20 on a list of collegiate hockey

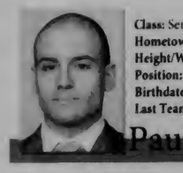
players who excel on and off the ice.

Cahoon has a track record for producing excellent student-athletes, having coached 73 Hockey East Academic All-Conference performers, including five Distinguished Scholars and six Academic All-Star members in his eight seasons on the Minutemen bench. Dainton is a classic example of one.



Class: Senior
Hometown: Iqaluit, Nunavut
Height/Weight: 5-11 / 190
Position: G
Birthdate: 12/09/1986
Last Team: Fort McMurray (AJHL)

Paul Dainton

"He was a much better student than he realized. He was a much more interested student than he realized and he got into a university setting and all of the sudden, he was really stimulated by the environment and he really responded to certain classes and teachers."

Dainton works as a teacher's assistant for an abnormal psychology class and volunteers at Hampshire County Court, assisting inmates in decisional training, helping them readjust to life outside bars so they don't make the same mistakes. He is also a member of the Big Brothers/Big Sisters organization and his involvement in these programs is an illustration of the mentoring qualities that his teammates respond to in-between hockey and class periods.

Dainton currently ranks second all-time at UMass in career goals against average (2.70), save percentage (.908) and wins (39). In 2009-10, he played 30 games with a 3.08 GAA and a .901 save percentage.

He made 29 saves and gave up four goals in his first game at Minnesota on Oct. 8 before coming off the ice with an undisclosed injury in the Minutemen's next game the following night.

Freshman Jeff Teglia manned the net in his place on Saturday at Boston University, shutting out the Terriers for the final two periods and overtime in a 2-2 tie.

Dan Gigliotti can be reached at dgiglio@student.umass.edu.

Team effort needed for Minutemen in '10

ROSTER from page 1

significant roles on the team last year as sophomores, were named co-captains coming into the year.

Hobbs played in 33 games last year, registering three goals and six assists. He is expected to log a lot of minutes this year as he anchors the offense with Syner.

Last year, Syner played on the same line with James Marcou and Casey Wellman, who were both among the nation's leaders in scoring and have since signed contracts with NHL teams.

Sophomore forward Rocco Carzo, who was named the team's Rookie of the Year, is also expected to contribute this season. Carzo tallied six goals and six assists in 32 games last year on the team's second power play unit.

Last year, Cahoon employed a rigid power play unit which featured various players no longer with the team. With a revamped roster, Cahoon does not have set power play units as of yet as the Minutemen have struggled to score goals on the man-advantage thus far.

"I think we're going to have to make up for [the loss of our veterans] by committee on the power play," Cahoon said. "I can't see anybody coming in and doing exactly what [Marcou] and [Wellman] were able to do."

As for the freshmen, there are a few who have made an early impression. Michael Pereira and Conor Sheary have played in each of UMass' three games this season, both registering a goal and an assist. Brandon Gracel has also contributed early on with an assist. All have impressed Cahoon thus far and are expected to log substantial ice time this year.

Defense

Since 2000-01, when Cahoon began his head coaching tenure with UMass, he's stressed the importance of the defense contributing offensively.

"We play five-man defense and five-man offense," Cahoon said.

This year, Cahoon will look to junior defenseman Michael Marcou to lead the young defensive core as well as being a man blue-liner on the power play.

"Mike is certainly going to be given a big opportunity to contribute on the power play," Cahoon said. "Mike has adapted to [our system] well and we started to really see him contribute on the offensive end of things last season and I think he'll continue to do that."

Sophomore defenseman Darren Rowe is expected to join Marcou for the majority of power plays. Described as a very gifted offensive defenseman, Rowe shares the team lead in scoring with two goals and an assist through three games along with Syner and Marcou.

Freshman defenseman Conor Allen has played in all three games this year, warranting Cahoon's attention with his style of play.

"You can see the physical make-up of Allen just by looking at him," Cahoon said. "He plays at over 200 pounds and he has attributes not so unlike Justin Braun. He handles the puck [well]. He's in the initial stages of his college career and I think he'll make a real nice fit."

Going deeper in the defensive unit, Adam Phillips, who stands 6-foot-6, has gotten early playing time, but is expected to be further integrated down the road. Cahoon said he expected to work with Phillips as they try to add up to 20 pounds to his 180-pound frame in the next 18 months.

Goaltending

Perhaps the most comforting aspect of this year's squad is its goaltenders. Senior Paul Dainton was named captain during the offseason and will return as one of the league's premier netminders. With freshman Jeff Teglia opening eyes as his backup, the Minutemen are confident between the pipes.

On Oct. 9 against Minnesota, Dainton was injured and was relieved by Teglia, who came on during a 5-on-3 penalty kill. He went on to make 18 saves in the contest. In UMass' last game against Boston University, Teglia received first star honors after stopping 31-of-33 shots en route to a 2-2 draw, as well as the Pro Ambitions Rookie of the Week by Hockey East.

"Dainton has been a real good goaltender for us for three years now and he's certainly a huge piece to this program," Cahoon said. "It's nice to know we have a backup guy in Jeff Teglia that can go on in and play at a high level as well."

It is believed that Dainton will command the majority of the starts this season.

"I can't make a statement on [Teglia's role when Dainton comes back]," Cahoon said. "You watch these guys play day-in and day-out and you make a decision game-to-game based on their performances in practice."

Kevin Moore is the team's third goalie. Cahoon considers him more of a presence in the locker room as a superior leader and also received team votes for captain during the offseason.

Dainton holds supreme confidence in his young team this year.

"We do have a young team and there are some pros and cons to that. The cons being that you lack experience that an older team would have. But the pros would be that you don't have that sense of entitlement. We've had the skill before, but it's been that skill with an ego."

With a young team fighting for ice time, Dainton believes that this could be the hardest working team he's ever been on. Cahoon echoes that sentiment as well.

"Nobody is thinking that their role is less significant than anyone else's role," Cahoon said. "We don't have that star quality. Some players might develop into star players, but this year is more of a group thing than it is an individual thing."

Steven Levine can be reached at slevine@student.umass.edu.

Rough schedule on tap for UM

PREVIEW from page 1

significant than someone else's role." We don't have that star quality. We have some really good players. It's more of a group theme than it is individual."

Right now, the group is still working on getting its 13 new freshmen into the mix. The Minutemen have had to mesh on the road for their first three games. It's the first time in the history of UMass hockey that a team has started its first three games away from home.

While UMass was swept during a two-game opening weekend trip to No. 15 Minnesota, the Minutemen showed resilience in their next game at No. 10 Boston University, after trailing 2-0 and coming back to salvage a tie.

"I'm happy with the way the team battled and preserved," Cahoon said. "They're passionate about what they're doing and that suggests that they're gritty. I like that competitiveness."

The competitiveness of the Minutemen makes their goals for the season no different than any other, despite the influx of youth into their system.

"Our goal, as any team's goal, is to go all the way," junior T.J. Syner said. "Once we find our team concept and everyone buys into it, we're really going to be a great team that can do special things. Making it to the Garden is one of [our goals], then go from there; hopefully win a Hockey East championship. They're all steps that you work towards and it starts with identifying ourselves with our team concept."

The concept of team will be the blanketing motif around this season. There could be struggles as well as triumphs this season, but Cahoon believes in his players and knows no matter how far down his roster he goes, he will be able to depend on men with strong character and concentration.

"At any given time I'm going to be able to find 20 guys out of those 30 where the net result can be high level of energy and good level of focus and a team that's really eager to play," Cahoon said. "I don't care which 20 I play, I just want to play the right 20 that night."

The schedule offers plenty of tests for the Minutemen. They will face the top four teams in the Hockey East, according to the preseason coaches' polls, a total of 12 times. Those four teams include Boston College, Maine, New Hampshire, and BU respectively.

Most of those matches are sprinkled evenly around the schedule, except at the end of the regular season. From Feb. 25 to March 5, UMass will play a home-and-home against BC and then host the Black Bears for two games the following weekend.

The Minutemen host Army on Nov. 5 for one game before squaring off against the Swedish National Under-20 team in an exhibition game the next day at the Mullins Center.

Other non-conference games include a home game against Quinnipiac on Nov. 27 and a two-game road trip to Wisconsin just before New Year's on Dec. 30 and 31.

UMass will take it all in stride, with the traditional one-game approach. However, there's still a certain amount of development that needs to happen before the team seriously threatens for the conference and national title.

"It's the constant grind of getting through a season and trying to get your team to be perfect," Cahoon said. "There's only one perfect team at the end of the year and that's the one that's still standing in April."

Crime Log 10/13–10/17

Wednesday, October 13

Arthur Lewis Kell, 21, of 164 Main Street, Westford, Mass., was arrested for disorderly conduct. At 1:27 a.m., an officer patrolling North Pleasant Street witnessed a male suspect urinating at a bus stop with several observers in the vicinity. The suspect fled on foot when the officer approached and was later spotted in the area of McClure Street. Kell was then arrested on the charge of disorderly conduct. Kell is a member of the Massachusetts men's lacrosse team.

At 8:43 p.m., police received a report of an unarmed robbery. The reporting party stated that after getting out of his car in Lot 22, what was described as a "tall black male" approached him and grabbed his backpack, demanding money. After a brief scuffle, the victim was able to flee back to his dorm and subsequently called the police. Due to the suspect's meager description, police were unable to investigate further.

Thursday, October 14

Adam R. Newell, 24, of 7 Bee Street, Natick, Mass., was arrested on several motor vehicle violations. At 6:52 p.m., an officer on Mass. Ave. spotted a car with an expired registration. In addition, a check of the license plate revealed that the car was uninsured. Subsequently, Newell received a summons to court for operating an uninsured vehicle and an expired registration.

Friday, October 15

At 4:45 p.m., a plainclothes detective patrolling Mass. Ave. observed a vehicle leaving the vicinity of Liquors 44 that he believed to be transporting alcohol. After pulling the vehicle over and making contact with the five occupants, alcohol was indeed found to be inside. Two of the occupants were summonsed to court.

At 6:10 p.m., officers took a report of an assault in Morrill Science Center. Allegedly, the female victim was followed into a women's bathroom by a male suspect, at which time he blocked her escape, grabbed her and slammed her against a wall. The suspect then tried to force her down onto the ground as the victim screamed for help. The two struggled for nearly a minute, until he eventually fled.

As officers were taking this report, another report of an earlier assault by the same suspect was called in. In this incident, the suspect allegedly walked into Isenberg School of Management, engaged a lone female in conversation and tried to force her to come with him.

When she resisted, the suspect fled, presumably directly to Morrill where he attempted another assault. An SOM security camera photographed the suspect, which subsequently led to his identification as Luther Gorahkov, 23, a University of Massachusetts student, of 23 Ray Street, Providence, R.I. University of Massachusetts Police Department (UMPD) detectives were then able to secure an arrest warrant for Gorahkov and began searching for him after discovering he was on the run.

Gorahkov turned himself in early Monday morning to a police officer in Holyoke, Mass. He is awaiting transfer to Belchertown District Court to face charges of assault to rape, assault and battery, kidnapping, assault and accosting and annoying a person of the opposite sex. According to UMPD Deputy Chief of Police Patrick Archbald, UMPD is also moving to trespass and remove Gorahkov from campus.

Saturday, October 16

Thiago Hoffman, 20, of 266 Straight Way, Hyannis, Mass., was arrested on charges of unlicensed motor vehicle operation and one-way street violation. At 3:47 a.m., officers allegedly witnessed a black Saab 900 Turbo pull into the Southwest Horseshoe against the flow of traffic. After pulling the vehicle over, it was discovered that the driver did not have a license. Hoffman was subsequently arrested for operating without a license and the one-way street violation. His car was towed from the scene.

Amanda R. Kelley, 19, of 54 Woodcliff Road, Quincy, Mass., was arrested on charges of assault and domestic battery. At 5:30 p.m., officers were summoned to Washington Tower for the report of a domestic disturbance on the 11th floor of the building. The reporting party stated that a female was grabbing a male and that both were shouting and arguing with each other. Upon arrival, officers found that Kelley was indeed the aggressor and that she had inflicted several injuries on the victim. Kelley was then taken into custody for assault and domestic battery.

Sunday, October 17

Spenser S. Rose, 18, of 75 Spring Grove Road, Andover, Mass., was arrested for disorderly conduct. At 1:46 a.m., an officer monitoring traffic on Eastman Lane allegedly observed a group of males on the side of the road shouting at passing vehicles. At one point, the officer observed one of the subjects pick up a bottle from the side of the road and throw it at the rear windshield of a passing vehicle. Rose was then arrested on the charge of disorderly conduct.

Daniel Caron, 21, of 29 Crestview Lane, Westminster, Mass., was arrested on charges of OUI-liquor and unsafe operation of a motor vehicle. At 3:19 a.m., an officer on patrol pulled over a white Acura RSX that he suspected of being driven by an intoxicated individual. Upon making contact with the driver, the officer noticed an unresponsive male passenger in the vehicle, for whom he requested an ambulance. A field sobriety test performed on the driver revealed that he had a blood alcohol content (BAC) of .147. The legal limit in Massachusetts is .08. Subsequently, Caron was arrested for OUI -liquor and unsafe operation of a motor vehicle. His car was towed from the scene

UM assailant hands himself over to police

Luther Gorahkov, the University of Massachusetts who is suspected of assaulting two female students at Morrill Science Building III Friday Oct. 15, turned himself into Holyoke police at 10 p.m. Monday night.

Patrick Archibald, deputy chief of the UMass police department, described the method Gorahkov used to turn himself in as, "unorthodox." Gorahkov confessed to a police officer detailing the Holyoke Crossing Mall that he was wanted by the UMPD.

The officer arrested Gorahkov on the UMPD warrant and brought him to the Holyoke district court and then transferred to the district court of Belchertown.

Two UMPD detectives questioned Gorahkov in Holyoke.

Gorahkov was arraigned at the Northampton house of corrections where he underwent a mental health evaluation.

Gorahkov will be held at the house of corrections until Friday when a dangerousness hearing will take place. The hearing will determine whether it is safe to release the suspect into the community while his case makes its way through the court system.

The UMPD has released a shot of the two assaults since the incident and Gorahkov was identified as the suspect in the video.

Gorahkov was arrested on charges of assault with intent to rape, attempted kidnapping and other charges.

STEM hosts lecture about climate crisis

CLIMATE from page 1

energy among Americans. For example, Johnson cited that four in ten Americans cannot name a single fossil fuel, and six in ten Americans cannot name a single renewable energy source. According to Johnson, scientists should stop trying to make mini scientists out of the public. Instead, they should treat civilians as civilians and educate U.S. citizens about science in a way that is comprehensible for the average American.

Johnson used the analogy of one's experience going to the oncologist. She described this interaction as one in which the oncologist uses terminology that explains what is happening to one's body, but does not offer an understandable solution to the problem for the patient. Johnson stated that scientists are guilty of doing the same as the oncologist - explaining the existence of problems in the environment regarding energy and renewable resources, but not explaining what solutions people can work towards accomplishing immediately.

Johnson said that people in positions of leadership in scientific fields focusing on these issues have a role to play in educating the general public on how the public can help make changes and solve these issues.

According to Johnson, there are a few key ways to improve the public's lack of understanding. Stating that a connection needs to be made between the climate and the energy challenges people are concerned with, Johnson said there needs to be focus on helping the public see the existing choices, gather ideas and assess the new and old ideas in order to create and crystallize solutions.

Johnson also stated that by focusing on making choices seem as though they fix more than solely climate problems, such as issues involving the economy, people are more likely to desire to make necessary changes to help fix both issues.

Additionally, Johnson spoke of the sanctions, rewards and potential tax cuts that many Americans would be interested in for making positive life choices that would help the environment simultaneously.

"People who are concerned are coming together to try to figure out how to move society," said Johnson, when asked by an audience member what she is trying to do to make people understand about the issues facing the environment and society. "People are vulnerable now as gas prices go up."

Johnson's lecture stressed to its audience the importance of understanding the values of Americans in regard to how much a citizen would be willing to change.

"You need to think about the lives of most Americans. Many Americans need their cars," said Johnson of the unlikelihood of the possibility of getting rid of all fossil fuels.

The lecture was sponsored by the Science, Technology, Engineering and Mathematics Institute (STEM).

Simone Shenny can be reached at sshenny@student.umass.edu.

Fossil fuel dependency is one of the problems Jean Johnson lectured about during her talk on the public's lack of understanding of environmental issues.

DECISION 2010

Day, R&P Liquor manager in favor of alcohol referendum

the loss of revenue with the state already facing a $2.8 billion budget gap, will cause the state to cut funding from human services, fire, police and public higher education because those programs are an easy target.

Nathan Day, manager of R&P Liquors and Fine Wines located at 505 West Street in Amherst is strongly in favor of the referendum.

"Alcohol is already a heavily taxed item," Day said in a telephone interview. "Tacking on a sales tax to alcohol is in effect doubling the tax."

Day, along with all other liquor store owners, experienced the sales tax jump from zero percent to 6.25 percent overnight added on top of the existing excise taxes. Excise taxes are levies on goods purchased for sale. Other examples include excise taxes on gas and tobacco products.

When Day purchases liquor from his wholesaler, he is essentially paying extra because of the hidden excise taxes added to the price of the product. When R&P Liquors retails the goods, it has to make up for the excise taxes, plus the additional sales tax. The customer is consequently charged more.

Presently, Massachusetts' excise taxes on alcohol lie near the middle of national rates. For spirits, the Bay State's rate of $4.05 per-gallon makes it the 28th-highest excise tax. The state's wine excise tax of $0.55 per gallon places it at 26 nationally, and it imposes an excise tax of just $0.11 on beer, the 41st highest rate, according to the Tax Foundation.

Republican Donald F. Humason Jr., a state representative from Westfield, is also in favor of the repeal.

"This has had a real impact on the northern part of our state," he said, echoing the argument that the tax has driven business across Massachusetts borders to New Hampshire, which does not have a sales tax. "The liquor tax completely killed the liquor business there," Humason continued, "consumers can go ten miles north to New Hampshire to buy alcohol, and while they're there, they end up buying other things because it's a tax free state."

Nathan Lamh, a junior political science major at the University of Massachusetts, also a supporter of the repeal, believed the imposition of the sales tax on the liquor industry is hurting the state's economy in other areas.

"In a time where, as a state, we are struggling to attract businesses and create jobs, we do not need another tax to stifle the economic growth in Massachusetts," he said.

Humason estimated that Mass. taxpayers spend about six months out of the year working to pay all the taxes Mass. citizens are required to pay.

"People ask why we continue losing population year after year," Humason said rhetorically. "It's because kids graduating college can't afford to pay the taxes here, so they move out west or down south."

Further, some debate the merits of the "sin tax argument," that vices, for instance tobacco, lottery tickets, alcohol or other items of indulgence, should be taxed more heavily than other goods.

Democrat Harriett Stanley, a state representative from West Newbury, was quoted in the Newburyport Daily News as backing the sin tax logic, stating that the taxes should compensate for what she sees as the harm the items create.

"It's appropriate to use money generated by sin taxes. Almost all families have had a brush with alcoholism or addiction and the toll it can take."

Health associations across the Commonwealth are pushing for the tax to stay in place. The Massachusetts Hospital Association, the Massachusetts Association of Health Plans and the Massachusetts Association of Community Health Centers agree that repealing the 6.25 percent tax on alcohol would result in funding being slashed for substance abuse prevention programs.

Representative Humason countered this opinion stating that he believes while funds from the alcohol revenues should go to alcohol-related programs, he feels they merely end up padding the state's coffers.

"The revenues from sin taxes are supposed to fund programs like Alcoholics Anonymous, that's how the leadership sold it to the members of the legislature."

The Committee Against the Repeal of the Alcohol Tax states on its website that taxing alcohol may help curtail teen drinking.

"Numerous studies have shown that the alcohol tax is among the most effective ways to deter underage drinking," their argument reads.

Although Story opposes the repeal, she said she does not feel the tax serves as much of a deterrent from drinking.

"The sales tax does not prevent someone from buying a six pack of beer or a bottle of wine at the liquor store," she quipped.

Lamb strongly disagreed that sin taxes benefit behavioral health programs.

"Does anybody recall an outcry for this tax because people needed help from the state to combat their behavioral health problems? I certainly do not."

According to an Oct. 14 poll from Suffolk University and Boston's NBC 7 News, 44 percent of respondents said they support cutting the tax, while 49 percent were opposed to the repeal and the remaining six percent said they were still undecided.

UMass political science professor Michael Hannahan presumed most voters who would like to see fewer taxes next year will vote yes on Question 3, a referendum rolling back state sales tax to 3 percent. In doing so, Hannahan said he believes Bay State voters may be likely to feel somewhat guilty, causing them to vote not to repeal the sales tax on alcohol.

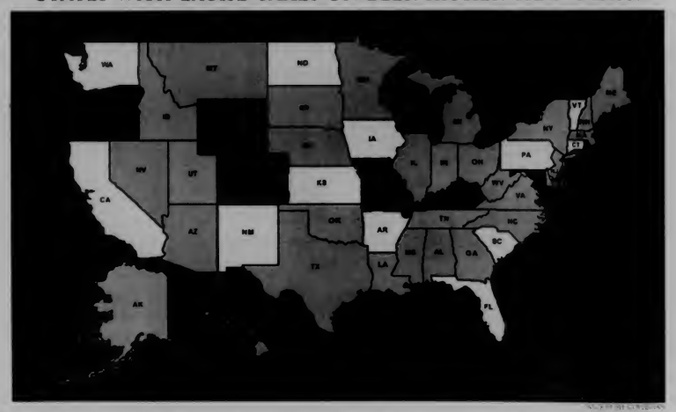
"Everywhere we go, we are taxed," cried Day. "When are we going to stand up and say enough is enough?"

Day said he plans to start a campaign in the coming days advocating for voters to vote yes on Question One.

The complexity of this tax initiative is cause for contentious debate among colleagues, business owners, scholars and citizens around the Commonwealth. Nov. 2 is the electorate's chance to engage in a direct democracy and affirm a position on Question One.

Katie Byrne can be reached at kebyrne@student.umass.edu.

STATES WITH EXCISE TAXES ON BEER HIGHER THAN MASS.



Forty states have higher excise taxes on beer than Massachusetts, which levies a tax of 5.11 per gallon. While the Bay State's sales tax of 6.25 percent is tied for ninth-highest in the nation, just three states, Kansas, Minnesota and Nortna Dakota do not impose sales tax on purchases of beer.

WEDNESDAY, OCTOBER 20, 2010 EDITORIAL@DAILYCOLLEGIAN.COM

Kicking butts and a bad habit

On the University of Massachusetts campus today, you don't have to be a superhero or know martial arts to kick some butts. In fact many of us kick butts without even noticing it.

Simply take a look around and you will notice the vast amounts of cigarette butts courtesy of smokers campus-wide. Not only do smokers affect our physical environment, but they also affect everyone's health. Second-hand smoke is the third leading cause of preventable death in the United States, racking up 53,000 deaths a year.

Curtis Bloomfield

If you think second-hand smoke is bad, imagine the effects of first-hand smoke. Worldwide tobacco is a major cause of death with one in 10 adults dying from tobacco use or exposure. Five million people die every year because of tobacco. In recent years, tobacco has been deemed a Class-A carcinogen. In other words, there is no safe level of exposure to environmental tobacco smoke.

The only way to completely ensure the health of the students is to take the advice of organizations such as the American College Health Association and go 100 percent tobacco free indoors and outdoors.

It is very clear that cigarettes are a serious health hazard which we all need to be more aware of. Some believe since they are young, tobacco can't be too bad for them, however this notion is incorrect. Every time you smoke even one cigarette, you are shaving off years from your expected lifespan. Tobacco use may help some people relieve their stress, or help them focus, but the negative side effects largely outweigh the positive.

Smoking leads to shortness of breath, greatly hampering an individual's participation in athletics or even normal day activities as simple as walking to class. Smoking also may cause lung cancer, tooth disease, gum disease, colds, the flu, bronchitis and chronic obstructive pulmonary disease. This list isn't even a handful the effects of smoking and tobacco use.

Why does smoking have so many negative possible health hazards? Have you ever taken the time to research the chemicals used to make the cancer sticks you use? A single cigarette contains 4,000 chemicals and 43 carcinogens. Some chemicals used are ammonia (used in many cleaning products), formaldehyde, arsenic (also known as rat poison), methane (rocket fuel), butane (lighter fluid), cadmium (found in batteries), hydrogen cyanide (gas chamber poison) and carbon monoxide (car exhaust).

Regardless of all the bad effects cigarettes have on people's bodies and on those around them, there is still a significant amount of students on campus who smoke. According to the United States National Library of Medicine, 30 percent of college students smoke cigarettes.

With that said, I believe it is safe to say that 98 percent of all students campus wide are effected by tobacco, whether it be first-hand or second-hand.

I can recall countless times when I was enveloped in a cloud of cigarette smoke on the way to class, as many of us can and the very smell of it is unpleasant. Smokers are slowly killing themselves and others around them. What can we do as fully aware students to create a healthier environment for everyone? They are a number of different routes that we can take.

December of 2009 was when 365 campuses declared or at least planned some form of smoking ban, with many more to follow in their footsteps. Some of the schools include Salem State, the University of Maine and the University of Kentucky. UMass has signs posted on most buildings which state no smoking within 20 feet, however this rule is rarely enforced and most smokers do not follow it at all.

Most ash cans where cigarette butts are supposed to be disposed are placed directly in front of the buildings that have these signs. In addition, although we might be able to avoid walking through a cloud of smoke when entering buildings, we still will not be able to completely avoid the second-hand smoke. Maybe the smokers themselves notice that no matter where the smoking is done, the effects on people around will not differ. The only way to completely ensure the health of the students is to take the advice of organizations such as the American College Health Association and go 100 percent tobacco free indoors and outdoors.

Not only would this aid in student health but would also help in the health of our environment. Some of the chemicals released by smoking have a negative effect on our ozone layer. We have cigarette bins but still have to deal with smokers littering, which takes away from the beauty of our campus. University Health Services has implemented its annual "No Butts About It Day" where a number of volunteers go around picking up cigarette butts.

In November 2008 12 pounds of cigarette butts were collected in just three hours. These butts are put on display to make our community more aware of smoking and are later disposed of. Maybe instead of picking up butts every year, the university should offer a class for credits that makes students aware of effects of tobacco and offer them help in quitting. Rather than picking up butts every year, we should focus on kicking this habit to create a tobacco free environment for all.

Curtis Bloomfield is a Collegian columnist. He can be reached at cbloomfi@student.umass.edu.

Traveling in the wilderness

I spent the summer before my junior year of college working for the Appalachian Mountain Club's professional White Mountain Trail Crew. My summer on Trail Crew was the most wonderful, the most physically and the most mentally challenging three months of my life. We hiked around 20 miles a day cutting out fallen trees. We carried loaded pack boards up mountains to work sites where we would spend the week quarrying rock to build staircases on the trail.

Natalie Beittel

The constant challenge was exhausting but liberating.

I returned to the University of Massachusetts the following fall, feeling withdrawn and that everyone and everything around me at school was superficial and inadequate after trail crew. I was also frustrated with being pushed onto a career path at the university so that I would be prepared to graduate, while all I really wanted was to be back in the woods. I searched the Internet looking for something I could do for the spring semester instead of going to school, wanting to escape the University's structure. I did not want a traditional abroad program, where I would be in another country but still in a classroom.

I came across the National Outdoor Leadership School (NOLS), and was immediately drawn in by the pictures of students hanging out in high mountain peaks and paddling down wild looking rivers. NOLS offers wilderness leadership and education programs all over the world ranging from a few weeks to yearlong expedition. The goal of NOLS is to have students become technically skilled in outdoor travel, whether in mountaineering, backpacking or backcountry skiing and have them lead expeditions in the future.

I was also frustrated with being pushed onto a career path at the University so that I would be prepared to graduate, while all I really wanted was to be back in the woods.

I approached the UMass abroad program office but they would not accept NOLS for credit because there would be no "classroom time." Dead set on doing this, I took a risk and withdrew from the university.

In January I took a plane to California and then to the South Island of New Zealand (my chosen NOLS destination) with just one backpack containing everything I would need for the next four months. I carried my boots onto the plane, wearing my bright orange Crocs, which got some funny looks.

Upon arrival I met the 10 other students I would be traveling with. In the first few days, we packed up all of the food we would need for the entire semester as well as all of our gear because we would not return to civilization again for four months. We weighed all the food (everything dried to save weight) into 250- or 500-gram bags. Food would be delivered to us as the course went on in designated ration periods. We were split into three expeditions: sea kayaking, white water canoeing and backpacking.

I was in a tent for 99 days (except when it was clear skies and I slept out on a beach, or field, or in a mountain valley).

The South Island of New Zealand is extremely unpopulated, with only two major roads up traveling the length of the coastlines and nothing in between. I went anywhere from two to three weeks without seeing a person except those I was traveling with. I traveled in hot sunshine down the river wearing zinc oxide on my face to protect against the sun, because even the highest SPF sunscreen was just not good enough at that latitude along with the reflection of the water.

The days on the river were hot but the nights were cold, like being in a desert.

I paddled and hiked in pouring rain and crossed rivers linked arm-in-arm with my fellow students to avoid being swept away. I squeezed in with 12 people in a four-person tent for class because of hail coming down on us.

We navigated mountain ridges and thick bush using a map and compass.

All of our travel was done off trail, so we bushwhacked through trees so thick you would loose sight of the person in front of you if they got more than 10 feet away. We camped by hot springs and while there had an astronomy class one night under the stars.

We camped near hidden waterfalls inhabited by glowworms transforming the night into a mystical fairy-like land. I even had the pleasure of waking up in the middle of the night to a storm and my tent floating in water because the nearby lake flooded. Yes, 99 days without a shower wearing the same clothes over and over, but only 30 without a proper wash in a river.

As for the academics, we had classes everyday during and after travel on environmental science, one method of travel, resource management and related subjects.

During both kayaking and canoeing we had a large barrel full of books with us, a collection we'd downsize for hiking since we would be carrying the weight on our backs. The instructors would often stop us during a steep uphill climb to point out and explain a plant or animal that had some significance.

Backpacking was the most challenging, with travel taking from 8 a.m. to 6 p.m. some days, cooking dinner and then class. In New Zealand I learned more academically, technically and socially than I have anywhere else.

As it turns out, I was able to transfer credit back to UMass from the University of Utah, through which NOLS is based. I received 16 credits for the semester.

Upon return to the United States, I seriously thought about not returning to UMass for my senior year. How could I go sit in a classroom and be lectured after New Zealand?

After some heavy thought I decided it was best to tough out one more year and get a degree. I luckily had only a few weeks to mope around the house before I headed back up to New Hampshire's White Mountains to again run wildly around the trails, chopping out fallen trees with my axe and being surrounded by my fellow trail crew workers.

So if it's a beautiful day and I don't show up to class, if I'm wearing a torn wool sweater and dirty boots instead of a cute tight shirt and heallings, if I don't share your concern because you got wet in the rain? Forgive me because I belong in the woods.

Natalie Beittel is a Collegian columnist. She can be reached at nbeittel@student.umass.edu.

Five Reasons Why you should go to a hockey game

1) Admit it, you have a crush on the Zamboni, too.

2) Sometimes you just can't resist the urge to tell people to "Shut the puck up."

3) Need to practice singing "Sweet Caroline" for baseball season.

4) Like the Bruins are going to win anything this year.

5) Where else are you going to promote your theory that a hat trick is a conspiracy perpetrated by haberdashers?

A rotten ideology once more seeks to overwhelm us

Matthew M. Robare

Well, it's that time of year again. Yes, "Humans vs. Zombies" starts up once again today and the imperialist, sexist, racist "game" will be thoroughly disruptive to this campus' true business of being robbed blind by the administration.

Back in the day, when I was still a physics student and a member of Commonwealth College (back when it was called Commonwealth College, in fact), I attended a lecture which was part of the "Pizza with a Prof." program.

Unfortunately I've forgotten the professor's name, but it was a good lecture.

He had an interesting theory: Hollywood uses the different components of horror films to express those fears felt by society when the movie was made. The more successful a horror film, the better it conforms to the subconscious fears of people-at-large.

The classic film "Invasion of the Body Snatchers," for example, is widely recognized today as the archetypal Cold War film, with the pod people representing how the Communists invaded secretly and used subversion to gradually take control of a liberal democracy. Of course, everyone involved in the movie's production denies it.

That's the point: it's all subconscious.

The lecture I attended was specifically about hybrids in vampire films as a metaphor for interracial sex.

In a number of '90s vampire film franchises (to my knowledge the motifs first appeared in role playing games in the 1980s), such as "Blade" and "Underworld," vampires were portrayed as being upper class, powerful, rich and aristocratic. They were, according to the theory, the white people of the horror film universe. Humans were inferior in many respects, though possessing certain advantageous physical characteristics (being able to live in the day, for instance).

In "Underworld" the werewolves were also considered "inferior" by vampires and had once been enslaved by them. In "Blade" a human-vampire hybrid was supposed to save humans from the vampires while in "Underworld" a vampire-werewolf hybrid was going to bring peace between the two peoples.

The professor contrasted the worlds of "Blade" and "Underworld" with earlier examples of the theme: racist anti-miscegenation literature which argued that white and black people intermarrying and having children would destroy civilization among other apocalyptic scenarios.

This "game" from the darkest, most depraved reaches of the subconscious also serves as propaganda. "Humans vs Zombies" somehow always manages to time their games for maximum exposure with prospective students.

Anyways, by applying this idea to "Humans vs Zombies" it is clear that this "game," which is supposed to be fun and carefree and harmless, is racist and imperialist to its rotten, decomposing core. It's so obvious — when does the game take place? After the apocalypse. In other words, after a mixed race child was born. Or, in this case, became President of the United States.

"Humans vs Zombies" started in the fall of 2007, after Barack Obama was elected to the United States Senate from Illinois, but by which time presidential speculation surrounded him like a hurricane.

Yet there is still another, more insidious interpretation: George A. Romero, director of many of the most popular zombie films – indeed he is the creator of much of the modern zombie image – is of Hispanic descent and the swarming, constantly reproducing zombies, replacing humans in their evolutionary niche.

Clearly, the zombies are a metaphor for the white elite's view of Mexican immigration. On the other hand, the humans represent white Americans afraid of the zombies, trying to stave off what they perceive as an invasion with the stark consumerism represented by the use of Nerf guns and marshmallows and unwilling to coexist with the newcomers.

This "game" from the darkest, most depraved reaches of the subconscious also serves as propaganda. "Humans vs Zombies" somehow always manages to time their games for maximum exposure with prospective students. For instance, this semester's "game" will coincide with Family Weekend, when parents will be visiting their students on campus.

Undoubtedly they will bring with them their younger children, who are not yet college-aged.

The children are not only our future, they are the most impressionable members of society. One's experiences and lessons stay with an individual for their entire life, on both a conscious and a subconscious level.

More importantly, the young are more sensitive to the subliminal messages communicated by symbolism and metaphors. Indeed, a child would pick up on the hidden meanings in "Humans vs Zombies" better than most adults.

How many children must be condemned to the cycle of hate and violenee perpetuated and encouraged by this regressive "game?"

Only through education, through the use of our brains, can we overcome this putrid mass beneath our civil veneer.

Yes, by brains we will be saved and enter a new era of peace and prosperity. Remember, brains. Brains.

'Catfish' proves to be a great doc

Nev Schulman stars in "Catfish," an experimental and emotional documentary playing this week at Amherst Cinema. Its fascinating account of an online correspondence will keep viewers everywhere captivated.

By Austin Dale
Collegian Correspondent

You've probably heard a thing or two about what has become known as "the other Facebook movie." Let it be known that it is every bit as important to our generation as "The Social Network," despite the fact that they tell two completely different stories about a website that has helped define our demographic more than just about anything.

This film describes itself as a documentary, but works best as a thriller, simply because the way it reveals the truth is not only completely suspenseful, but jarring to anyone who has ever used social networking. Also, "Catfish" contains so many secrets that one can't reveal in a review without spoiling the film's emotional impact that it's next to impossible to write about the story it tells. One can only reveal the basic setup, and tell you to see this amazing film as soon as possible.

The film begins as a light and humorous documentary about a young New York dance photographer named Nev Schulman, a charismatic and friendly guy, made by his filmmaker brother Ariel and their friend Henry Joost. One day, on his Facebook, Nev receives a gorgeous oil painting of one of his published photographs, made by an 8-year-old prodigy from Michigan named Abby.

Nev is understandably touched and he begins a casual online friendship with Abby and her proud mother Angela. He also begins corresponding with Abby's beautiful 19-year-old half-sister Megan, a musician, dancer and horse trainer. Slowly but surely, friendship turns into flirtation, which turns into a long-distance relationship. Nev is smitten by her. This is all documented by the filmmakers, who inadvertently strike gold with what happens, all of which shocks and surprises not only their audience, but the filmmakers themselves.

All is well until they find out that the MP3s of Megan's "original" songs are all taken from other peoples' amateur YouTube performances. There turn out to be other false claims. While the three are in Vail, Colo., making a film for a dance festival, they decide to take a trip up to Michigan to surprise what they call the "Facebook family" and, of course, they bring along their cameras. There, they do indeed find the family, and they are welcomed as respectfully as can be expected given the circumstances, but what they find turns their film upside down.

Of course a film like this has garnered as much controversy as it has praise. Plenty of people argue that it's not really a documentary, but an elaborate hoax. Others, who must believe that the film is completely factual, argue that its outcome is exploitative of the family involved, especially Angela, the mother. What Joost and the Schulmans end up with is an exciting cautionary tale about privacy in the age of the internet. Sure, the facts are as slippery as a catfish, and must be taken with a grain of salt. This does not lessen the film's effect.

In addition, "Catfish" doesn't come off as exploitative because the filmmakers treat the subjects with as much courtesy as possible. They gradually become aware that what they are documenting is incredibly important and will expose what must happen to countless Facebook users every day, so they don't have a choice but to see the situation out to its finish, no matter the cost. The film's conclusion, and the filmmakers' treatment of it, is remarkably human, and the characters they uncover are complex and beautifully sobering. What appears to have begun as a light-hearted project about a 8-year-old prodigy becomes both an engrossing morality tale as well as a wake-up call.

If you have a Facebook, don't miss Catfish, which is playing at Amherst Cinema. The minute you find out the meaning of the title might be one of the most moving things you'll see in a cinema this year.

America plays beautiful set

By Justin Gagnon
Collegian Staff

They've played over 100 shows a year for nearly 40 years. Over those four decades, they've released 16 albums, and produced two chart-topping tracks among many other top 10 hits. It's likely that you know at least three of their songs, but it's just as likely that you have no idea who they are.

You should.

The band, as timeless as their name, is America. Led by original members Dewey Bunnell and Gerry Beckley, the folk rockers pleased a lively Calvin Theater crowd with more than 20 of their greatest hits last Friday night.

Starting with one of their more popular songs, "Tin Man," they immediately won over the nearly-packed house. The vocals were slightly drowned out by the music, but after being notified by an eager crowd-member the correction was made and the microphones were turned up.

From there on, the band took full advantage of the acoustics of the Calvin, and the crisp, stringy guitar-work was a perfect complement to Bunnell and Buckley's fine voices.

The two front men looked like they were fresh off their American military-base school, and while they've lost a bit of their Simon-and-Garfunkel-esque voices, they still sounded amazing. Time has clearly been kind to the group.

"It started in 1969 after we graduated high school. Before we knew it, we were opening for Pink Floyd, the Who and Traffic," Bunnell said to the crowd.

And as far how their songs hold up today, Buckley said, "These are not oldies; they are classic rock." The crowd vivaciously agreed.

They followed-up their first song with a top 10 hit that only avid fans would recognize, "You Can Do Magic." It set the tempo for the rest of their lesser-known songs leading up to the ones that put them on the map.

Typically, classic rock bands that don't have enough hits to fill a two-hour set struggle to keep the crowd interested throughout the show. But that wasn't the case Friday night. They performed emotional ballads like "Daisy Jane" and "Don't Cross the River" like they were chart-toppers.

Both "Riverside" and "Three Roses" from their self-titled first album, America, stood out among the filler songs. It seemed like the two were among their favorite songs to play and the guitar work was first-rate. Like the majority of the set, these two songs were lyrically and instrumentally gripping.

Bunnell and Buckley were great, but the band behind them made songs like "Riverside," "The Border," and "Sandman" truly stand out. Drummer Willie Leacox, who has been with the band for 38 years, guitarist Michael Woods, 33 years and rookie bassist Rich Campbell played a tight set and seemed to have a great chemistry with Bunnell and Buckley.

One of the more comical points of the evening came when the band performed their song, "Hollywood." The track's music video, even featuring the VH1 Classic icon in the bottom corner rolled on the massive projection screen behind the band. The video featured Bunnell and Buckley playing some futuristic game that seemed like a trippy combination of Chinese checkers, Risk and Battleship.

After the song, Bunnell said, "If you have any idea what that video had to do with the song, please, let us know," which provoked an eruption of laughter throughout the crowd.

Noting the Mamas and the Papas as big influences on the band, they covered "California Dreamin'" as if it were their own.

They ended the set with a flawless rendition of "Sister Golden Hair." Joined by alternative rock band Fountains of Wayne, America came out for the encore shortly thereafter and ended the night with the song that started it all, "A Horse with No Name."

The show was just short of two hours long, and seemed like half that. The night was amazing and for a classic rock band with only a few well-known hits, America performed with the humility, grace and aptitude of Rock 'n' Roll Hall of Famers.

The instrumental sounds of Rhode Island-based group A Troop of Echoes are sure to interest fans of raucous, intelligent music.

A Troop of Echoes releases solid album

By Tappan Parker
Collegian Staff

"Days in Automation" is the first full-length album from experimental indie rock band A Troop of Echoes. The band hails from Rhode Island and cites Sonic Youth and John Coltrane as influences on their sound and style. The band is certainly a combination of these two distinct sounds with heavy use of both rock and jazz in their music.

"Days in Automation" is an entirely instrumental album, relying on the power of the saxophone alongside traditional rock instruments, such as the drums, bass and guitar. The saxophone tends to steal the show throughout most of the album with some fantastic melodies, receiving a large amount of backup from some very interesting guitar riffs that vary from soothing to driving. The drums and bass provide a lot of interesting beats that sync together well and provide excellent background for the sax and guitar melodies throughout the album.

Out of all the songs on the album, the heaviest is "Providence Public Defender," a highly compelling rock track that manages to groove along with the rest of the album. "Analog Astronaut" immediately stands out for its distinct guitar riff that goes in and out of time with the rest of the song, providing a very cool touch to the song. The song also has some awesome licks on the sax, which sound even better when playing around the guitar riff. The rest of the album remains highly engaging with a few more standout songs such as "Little Bird" and "End Over End."

If you can possibly imagine what the smooth rhythms of jazz and the heavy beats of rock sound like together, that would be the sound of A Troop of Echoes. But if you can't, I encourage you to check them out. They have their entire album available on bandcamp.com, where you can stream the album and buy it if you like it for $5.

Tappan Parker can be reached at rtparker@student.umass.edu.

Apple harvest festival at DCs

UMass students had a delicious selection of apples to choose from on Oct. 13. These included Red Delicious, Gala, Macintosh, and Honeycrisp apples. All of these, of course, were perfect for students to munch on in the beautiful fall weather.

Chaplin retrospective continues at Cinema

By Kevin Mele
Collegian Staff

Out with the old and in with the new-except if the old is really good. In the case of Charlie Chaplin, whose "The Kid" and "The Idle Class" enjoyed afternoon showing at Amherst Cinema on Sunday, it seems that there are still many who aren't quite ready to let him go.

A number of Chaplin fans, both young and old, filed into the theater in anticipation of an experience that was probably not unfamiliar to them. If you've seen one Chaplin film, you haven't seen them all, but you know what to expect. The experience is usually one of vicarious anarchy, mixed with a healthy amount of cheek-smarting laughter.

This was certainly the case at Sunday's show. It might have been an incongruous intertitle, a fight scene that consists of more dodging than hitting or Chaplin delivering a quick look of awkward acknowledgment to a nearby policeman-it might have been any of these and laughter broke out in the crowd. Just about every shot gave the viewer a reason to laugh. Of course, this is always the way with Charlie Chaplin. Once the laughter starts, it doesn't stop.

In "The Kid," the Tramp stumbles upon an infant left in an alley and raises him to become his partner in crime. The film, totaling 54 minutes, was Chaplin's first foray into feature-length storytelling. When it came out in 1921, it was a huge success. "The Idle Class," also released in 1921, is just a half hour long. It tells a simple tale of mistaken identity at a masked ball.

As any true fan of Chaplin knows, the secret to his comedy resides not in his slapstick, but in his characters. The greatest of these was the Little Tramp, whose black-and-white image is still branded in America's-and a good chunk of the worlds-memory 96 years after his debut in Chaplin's first film, "Kid Auto Races at Venice." We can all picture him, a lonely-looking fellow with a little moustache, mooning about some park, perhaps twirling a cane.

The Tramp occupies an iconic status mainly due to his popularity-he was a huge success during the silent-film era and even during the rise of the talkies-but also to his unforgettable appearance. Dressed in a tight coat and baggy pants, a dark derby and oversized shoes, he wobbles to and fro with a strange air of confidence that seems inappropriate for such a helplessly silly man.

While the physical comedy in these films, praiseworthy for its naturalness and ingenuity, is enormously entertaining to watch, what makes Chaplin's work timeless is its simple premise: the story of a good-natured man who doesn't fit in. His eccentricities make him the frequent object of interest of policemen. The Little Tramp can't tramp far without either inspiring, often quite innocently, absurd amounts of suspicion, or else winding up in the arms of an authority figure-from which he invariably escapes.

Chaplin once said, "All I need to make a comedy is a park, a policeman, and a pretty girl." In fact, this is typically how one of his films came into being, starting with these bare components. Chaplin's directorial process consisted almost wholly of improvisation. He would start with a character and an environment and then let them naturally interact. With a character like the Tramp, a funny-looking man who does as he pleases, how could this simple formula fail? It's in the Tramp's unbounded liberty that the comedy-as well as the anarchy-lies.

After "The Kid" and "The Idle Class" finished screening, there were no credits. When the screen went blank, the lights went up, and the sense that reality was interrupting was great. As Chaplin fans returned unwillingly back to the world, remembering their membership in society as decent, law-abiding politrooms, they must have felt the limit of their freedom.

Kevin Mele can be reached at kmele@student.umass.edu.

Amherst Cinema's massively popular Charlie Chaplin retrospective is continuing this week with screenings of both "The Kid" and "The Idle Class." Viewers of all ages will certainly be entertained by the comic antics of the Little Tramp.

Rookies making presence felt in road games

FRESHMEN from page 10

captain. The point is, there's solid, young depth at the position. Dainton getting injured is a bad, bad thing.

The Hockey East, though, is a difficult place to grow up, as the Minutemen and their 13 freshmen will have to face off against the likes of reigning national champion Boston College, which only graduated four players, on a regular basis.

That isn't to say that UMass will be a doormat this season. The Minutemen have a talented young squad with two solid options in net and a depth of scorers that could be in position for a breakout season. The troubles, however, will come early on as the young players adapt to the college game and Cahoon's system.

The results so far have been promising. UMass did not go quietly against Minnesota, one of the country's premiere teams and forced a tie after falling into a 2-0 hole against ranked Boston University. And they haven't even played a home game yet.

What remains to be seen however, is what the Minutemen do in the second half this season. In recent years, UMass has gotten out to a fast start, but struggled during the second half. Last season was no different as the Minutemen went 0-for-February, losing all six games that month.

This year's team, though, could be UMass' best chance in a while to buck the trend. With such a large freshman class, players are talking about a warmer, tight-knit locker room that will be a welcomed change as the season progresses. The 2010-11 season could also likely feature significant growth from a freshman class that Cahoon says has already showed great effort so far this year.

There are no guarantees with the Mass Attack this season. Where there were once locks for all-conference nods, there are new faces trying to adapt to the college game. Time will tell, though, whether or not the team's enormous freshman class will be remembered for its inexperience or potential.

Nick O'Malley is a Collegian columnist. He can be reached at nomalley@student.umass.edu.

JEFF BOSTIC/COLLEGIAN

Junior T.J. Syner skates the puck up the ice in a game last season. The forward will have an increased role in this year's offense after the departure of James Marcou and Casey Wellman. In the three road games, Syner has three points, well on pace to double his 13 points from last year.

Big shoes to fill

SYNER from page 10

Syner has taken a team-high 11 shots this year and is tied with sophomore Darren Rowe with a team-high two goals in just three games into the season. Last season, Syner had seven goals, tied with two other players for sixth on the team in goal scoring.

"That's one thing I've spoken about with my coaches, just getting a little more confident around the net," Syner said. "If a play is not there, don't force it, [rather] throw it on net and try to create something off of it. I think it's worked out pretty well so far."

"[Syner] is one of the top performers in the league and that makes him one of the top Division I players in the country," Cahoon said. "His [next] step to make is with the bottom line production, his ability to score a few more goals over the course of the year than he has in the recent past."

While Cahoon anticipates Syner's goal scoring statistic to jump, he knows that what Marcou and Wellman cannot be replaced. However, Cahoon considers the value that Syner offers in other areas of the game to be equally important.

"He's been a great performer for us, but he hasn't had the tag of 'goal scorer' or the responsibility of being one of our most productive players," Cahoon said. "[While Marcou and Wellman] were putting up big numbers, he was making a nice contribution and probably doing a lot of the grunt work quite frankly."

This grunt work means executing the little nuances of the game that get unnoticed: the back checking, the fore checking and getting on loose pucks. That aspect of the game does not get credited on the back stat sheet but can be just as important.

So far this season, Syner has almost one-third of his total goals from last year. His three points in three games is well on pace to double his 13 total points from a season ago.

Now, as an upperclassman on the forward line, Syner is hoping to make his own mark by the end of the season.

Pete Vasquez can be reached at pvasquez@student.umass.edu.

Marcou carrying legacy

MARCOU from page 10

assists. Thus far this season, he has three points in three games (one goal, two assists), all of which came in two games at Minnesota.

As much as Mike is likened to his brother, he isn't phased by the comparisons. The two have a good relationship and Mike sees James as an outlet to talk about playing better on the ice, although, neither prefers to have hockey be the focal point of discussion.

"Mikey's definitely not jealous," James said. "He's trying to do the same thing as every hockey player. He's working towards that and he had a good year last year. He's an assistant captain this year, so he's pretty happy about that."

"We kind of just joke around when we talk to each other," Mike said. "We talk about how we play and the things we could have done differently. [James has] got pretty big shoes to fill. We've been playing different positions, so we've never really been competitive with hockey, just who gets the front seat of the car."

James plays forward, so Mike doesn't feel that the direct comparisons between he and his brother are entirely accurate, but nonetheless, his legacy still matters. James plays right wing for the Sharks and whether it is his position on the ice or his vaunted status as a professional hockey player, he has been the more well-known Marcou when it comes to hockey.

Yet, UMass coach Don Cahoon has watched Mike mature over his two plus seasons with the Minutemen and is impressed by his level of growth, saying that Mike exhibits qualities that go beyond his brother's accomplishments.

"I think Michael has always been in James's shadow, in that James is the more interesting of the players growing up, in terms of the dynamics," Cahoon said. "Michael has made great gains in the last three or fours years and has improved at a faster rate than James or most people around him. He has really surpassed my expectation in terms of what I thought we would get out of him game in and game out."

"I don't think Mike pays a lot of attention to those comparisons. Michael's very much his own man. He's comfortable in his own skin. He's got a great sense of humor, a strong personality. Michael's going to do just fine on his own. James knows that, his family knows that and that's one of the reasons he is wearing the 'A' on his jersey. He is his own man and he's going to make contributions on his own merit."

Mike was elected as an assistant captain by his teammates before the season, along with T.J. Syner and Danny Hobbs. The honor is a sign of Mike's elevated role and growth as a player and a leader on a young team.

With 13 freshmen on this season's roster, including seven defensemen, Mike is expected to perform at a high level. As his brother did for him, he hopes to set an example for the younger players while maintaining the level of play becoming of a Marcou.

"I like to get up in the offense, but I also have to show some of the younger guys that you still have to be a solid defensemen. I also have to lead by example on and off the ice."

Dan Giglotti can be reached at dgiglott@student.umass.edu.

MAXWELL SPARR/COLLEGIAN

Junior Michael Marcou goes on the attack in a contest last winter. The forward is the only Marcou remaining on the Minutemen after the graduation of his brother, James, who is the all-time leader in assists.

The names are gone, but the talent remains

DEFENSE from page 10

rookies Anthony Raiola, Colin Shea and the 6-foot-6 Adam Phillips.

The chances of the Minutemen producing a Hobey Baker Award winner aren't great this season. Goalkeeper Paul Dainton is the closest thing the Minutemen have to a star on the roster. But on the flipside, the huge class of freshmen and attitude of the team has done wonders in the locker room.

The team's leaders have noticed a change from the sometimes-cliquey atmosphere that has existed in the past. Such a thing is easier when the spotlight's nice and wide like it is right now. It works for Cahoon, who says he's going into this season with whatever guys emerge as his top 20.

NHL prospects for the Minutemen are down this season. However, it may help them focus on their prospects in the Hockey East.

Nick O'Malley is a Collegian columnist. He can be reached at nomalley@student.umass.edu.

Former Minutemen making AHL mark

NHL from page 10

ated a Twitter account with teammate Dan DaSilva, as they engage in a friendly battle to see who can get more followers.

Marcou was UMass' leading scorer last year, registering 51 points in 36 games, setting a UMass' single-season record with 40 assists.

Before the start of the season, Marcou reflected on his time working out with the big club in San Jose.

"We had training camp in San Jose for two weeks and I played an exhibition game [on Joe Thornton's line]," Marcou said. "It was cool to be around all the guys in the big club after watching them on TV. Thornton was a pretty fun guy to be around. He's just like a kid basically."

"A kid" might not be the best way to describe the 31-year-old with a nickname of "Jumbo Joe" that fits his 6-foot-4, 235 pound frame. Thornton is a perennial all-star who has amassed nearly 1,000 points in his NHL career. Needless to say, the presence of Thornton and other stars have left an impression on Marcou, Braun and Irwin.

"Just seeing them go about their stuff at the rink is pretty cool," Marcou said. "They're teaching us how to play [our style] and hopefully in the future we'll get called up and show them our skill and what we've learned."

Through it all, the big four of last year will never forget their time skating in the Mullins Center in front of thousands of passionate fans.

"The games at the Mullins Center were pretty cool with all the students that came we had a really good following. I will definitely miss the atmosphere," Marcou said.

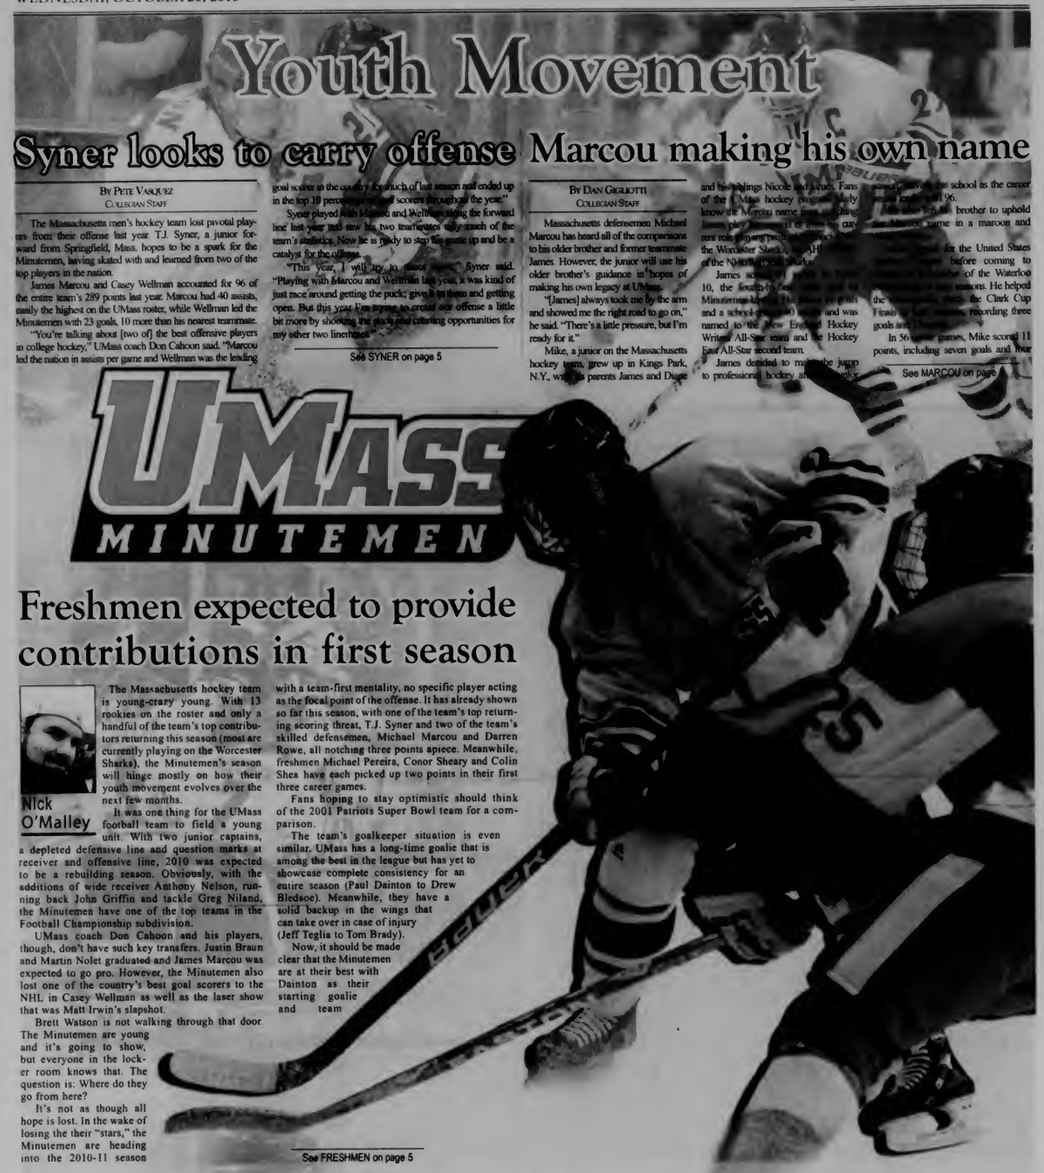
Youth Movement



Syner looks to carry offense

By Pete Vasquez
Collegian Staff

The Massachusetts men's hockey team lost pivotal players from their offense last year. T.J. Syner, a junior forward from Springfield, Mass. hopes to be a spark for the Minutemen, having skated with and learned from two of the top players in the nation.

James Marcou and Casey Wellman accounted for 96 of the entire team's 289 points last year. Marcou had 40 assists, easily the highest on the UMass roster, while Wellman led the Minutemen with 23 goals, 10 more than his nearest teammate.

"You're talking about [two of] the best offensive players in college hockey," UMass coach Don Cahoon said. "Marcou led the nation in assists per game and Wellman was the leading goal scorer on the cooley [much of last season and ended up in the top 10 percent in goal scorers throughout the year."

Syner played with Marcou and Wellman along the forward line last year and saw his two teammates play much of the team's statistics. Now he is ready to step his game up and be a catalyst for the offense.

"This year, I will [go to school on]," Syner said. "Playing with Marcou and Wellman last year, it was kind of just race around getting the puck; give it to them and getting open. But this year I'm trying to create our offense a little bit more by shooting the puck and creating opportunities for my other two linemates."

See SYNER on page 5

Marcou making his own name

By Dan Giglotti
Collegian Staff

Massachusetts defensemen Michael Marcou has heard all of the comparisons to his older brother and former teammate James. However, the junior will use his older brother's guidance in hopes of making his own legacy at UMass.

"[James] always took me by the arm and showed me the right road to go on," he said. "There's a little pressure, but I'm ready for it."

Mike, a junior on the Massachusetts hockey team, grew up in Kings Park, N.Y., with his parents James and Dawn and his siblings Nicole and James. Fans [illegible] of the UMass hockey program likely know the Marcou name from [illegible] brother to uphold [illegible] name in a maroon and [illegible] role [illegible] the Worcester Sharks [illegible] for the United States [illegible] of the Waterloo [illegible] before coming to [illegible] of the Clark Cup [illegible] Finals [illegible] recording three goals and [illegible]

James [illegible] 10, the fourth-[illegible] Minutemen [illegible] and was named to the New England Hockey Writers' All-Star team and the Hockey East All-Star second team.

James decided to make the jump to professional hockey after [illegible]

In 56 career games, Mike scored 11 points, including seven goals and four

UMass Minutemen

Freshmen expected to provide contributions in first season

Nick O'Malley

The Massachusetts hockey team is young-crazy young. With 13 rookies on the roster and only a handful of the team's top contributors returning this season (most are currently playing on the Worcester Sharks), the Minutemen's season will hinge mostly on how their youth movement evolves over the next few months.

It was one thing for the UMass football team to field a young unit. With two junior captains, a depleted defensive line and question marks at receiver and offensive line, 2010 was expected to be a rebuilding season. Obviously, with the additions of wide receiver Anthony Nelson, running back John Griffin and tackle Greg Niland, the Minutemen have one of the top teams in the Football Championship subdivision.

UMass coach Don Cahoon and his players, though, don't have such key transfers. Justin Braun and Martin Nolet graduated and James Marcou was expected to go pro. However, the Minutemen also lost one of the country's best goal scorers to the NHL in Casey Wellman as well as the laser show that was Matt Irwin's slapshot.

Brett Watson is not walking through that door. The Minutemen are young and it's going to show, but everyone in the locker room knows that. The question is: Where do they go from here?

It's not as though all hope is lost. In the wake of losing the their "stars," the Minutemen are heading into the 2010-11 season with a team-first mentality, no specific player acting as the focal point of the offense. It has already shown so far this season, with one of the team's top returning scoring threat, T.J. Syner and two of the team's skilled defensemen, Michael Marcou and Darren Rowe, all notching three points apiece. Meanwhile, freshmen Michael Pereira, Conor Sheary and Colin Shea have each picked up two points in their first three career games.

Fans hoping to stay optimistic should think of the 2001 Patriots Super Bowl team for a comparison.

The team's goalkeeper situation is even similar. UMass has a long-time goalie that is among the best in the league but has yet to showcase complete consistency for an entire season (Paul Dainton to Drew Bledsoe). Meanwhile, they have a solid backup in the wings that can take over in case of injury (Jeff Teglia to Tom Brady).

Now, it should be made clear that the Minutemen are at their best with Dainton as their starting goalie and team

See FRESHMEN on page 5

Former stars make the leap

By Steve Levine
Collegian Staff

With their college careers behind them, the stars of last year's Massachusetts hockey team are now facing up for shifts in professional hockey.

Casey Wellman, James Marcou, Justin Braun and Matt Irwin were the foundation of the Minutemen last year. Perhaps no one appreciates their experiences at UMass more than they do. However, as children, their goals surpassed playing for a collegiate powerhouse like UMass. Their dreams lie with the NHL.

Wellman, 23, played his second and last season for the Minutemen last year, tallying a team-leading 23 goals in 36 games, good for ninth in the nation with a 0.64 goals per game average. With 22 assists, Wellman finished his sophomore campaign with 45 points in 36 games.

Following the season, Wellman signed an entry-level contract with the NHL's Minnesota Wild. He made his NHL debut on March 19, recording an assist in the Wild's 4-2 loss. Wellman recorded his first goal on April 10, when he netted a loose rebound in front of Dallas goalkeeper Kari Lehtonen.

"It's tough to describe, it was an unbelievable feeling," Wellman said about the goal. "To not only be playing in the NHL, but scoring that first goal was unbelievable. There's a picture on my desktop of me after with a huge smile on my face."

It was an unforgettable moment for the California native, who is now trying to solidify a spot on the Wild for this season.

"I went from being one of the top guys at UMass to one of the lower guys with the Wild," Wellman said. "I just have to get used to that and try to work myself up again to the top."

After playing in Minnesota's second game of the regular season, a 2-1 shootout loss to Carolina, it appeared that Wellman secured a spot on the team. On Oct. 9, however, Wellman was sent to the Wild's AHL affiliate, the Houston Aeros, where he has scored a goal and an assist in three games.

The perks of being an NHL player are hard to pass up, like when Wellman was invited to Joe Mauer and Justin Morneau's suite in Target Field to witness the Minnesota Twins clinch the American League Central in September. But through all the glamour and his budding NHL career, Wellman will never forget his time dressing in maroon and white.

"I really just miss playing for the school," Wellman said. "Sometimes guys go and play for juniors and stuff like that but they don't get the experience of playing for a community. It was so fun to play in front of all the students and see all my peers in class and stuff like that. I miss it a lot and I miss my teammates; they were great and the coaches were great."

Marcou and Irwin both signed entry-level contracts with the San Jose Sharks on March 23, with Braun signing with the team a day later. The trio met up and played the final three games of the regular season with San Jose's AHL affiliate, the Worcester Sharks.

Their impacts were felt immediately, as they combined for six points in three games.

Although Marcou has yet to play an NHL game since turning pro, he is making quite an impression with the Worcester Sharks. He picked up right where he left off last year by scoring two goals and an assist in the team's first four games this year, including a game-winning goal against the New York Rangers' AHL affiliate, the Hartford Wolf Pack.

Off the ice, Marcou has cre-

See NHL on page 5

Minutemen look for identity

Nick O'Malley

The 2009-10 Massachusetts hockey team was a unit with an identity.

Offensively, UMass was at its best when on the power play and feeding the puck to James Marcou and Casey Wellman. Those two elite scorers were the focal point of the Minutemen offense as well as opposing defenses. It worked.

Marcou and Wellman had monster seasons, putting up 51 and 45 points apiece, respectively. Behind them, defensemen Justin Braun (31 points) and Matt Irwin (24 points) would come up to the offensive end to help production, particularly on the power play. Those things, coupled with the breakout season of Will Ortiz (26 points), encompassed the bulk of the Mass Attack on offense.

Those top-five point-producers from last season, however, are long gone.

Now, UMass coach Don Cahoon must find a way to make up for the loss of Marcou's passing wizardry, Wellman's offensive rush, Irwin's slapshots and Ortiz' speed. That, along with the countless things Braun and forward and former captain Brett Watson did on both ends of the ice.

When addressing the team's new approach to offense, Cahoon used a term that's going to be used quite often this season: "by committee."

While the Minutemen lost point-scorers one-through-five, they retained five-through-nine and a solid amount of experienced depth behind them. They also bring in 13 freshmen this season, who are going to do a whole lot of growing up, whether they're ready or not.

Heading into the season, the Mass Attack is not going to have any "stars." There's no one player that's going to keep coaches up late at night. No one knows who's going to step up and score on a particular night.

That, however, is UMass' strength.

While Cahoon loses his top scoring threats from last season, those losses open up the options of what he can do on offense. He does retain his fourth, fifth and sixth-ranking scorers last season in T.J. Syner, Danny Hobbs and Michael Marcou, who made their roles quite apparent, making the three the team's assistant captains.

Their role, however, will not involve trying to replace what the team lost. Instead, their focus will be to incorporate as many other players in the offense as possible. This means incorporating sophomores Rocco Carzo and Darren Rowe in the offense more than they were during their freshmen seasons. It means making sure senior forwards Mark Concannon, Mike Lecomte and Brian Keane get to use their experience. Most importantly, though, it'll mean that freshmen forwards Mike Pereira, Conor Sheary, Eric Filiou, Conor Allen and others get their looks on the offensive end.

While the new infusion of forwards will set the pace on the offensive end, Cahoon preaches a "five-man offense, five-man defense" philosophy that features a lot of movement on the ice. While the Minutemen lost Braun and Martin Nolet, they retain a solid group of blue-liners that make up for their lack of size with a wide skill set.

No longer "the other Marcou," Michael Marcou will take the A on his jersey that his brother wore last year and lead a defensive unit that will put the emphasis on putting pressure into the offensive zone. Marcou, along with Rowe, who have already put up three points apiece this season, bring the ability to perform on both ends of the ice to make up for the size that the unit lost with Braun and Nolet.

The key for the defense, though, will be in maintaining communication and working within Cahoon's philosophy of working both ends of the ice along with

UMass Graduate Fair

Students lined up to see the representatives from other schools to discuss their various options after graduation during this year's Science and Graduate School Fair.

The University of Massachusetts will host the Five College Graduate and Professional Schools Information Day 2010 will be held on Oct. 27 in the Student Union Ballroom.

Any students interested in applying to graduate school are highly encouraged to attend this fair.

Representatives from over 125 different schools, including Boston University, Northeastern University, Western New England College and the University of Massachusetts will be attending.

Representatives will be available to speak one-on-one with students, informing them of their various options available to them as they leave college, including a variety of fields both abroad and in the United States.

The fair is being put on by UMass Career Services, located in Goodell Hall. Students may also visit their office to plan internships, prepare for graduate school, or help students build up a solid resume for use in applying to potential employers.

The graduate school fair will run from 11:00 a.m. to 3:00 p.m.

Knobloch talks about solving climate change

By Tim Jones & Jessica Jankowski
Collegian Staff

Kevin Knobloch, president of the Union of Concerned Scientists, addressed the crowd about people in power worsening climate change.

Kevin Knobloch, University of Massachusetts alumnus and president of the Union of Concerned Scientists spoke on campus on Oct. 18 with his lecture, "Climate Change: Profiles in Paralysis."

Warning the crowd about how governments are contributing to global warming, Knobloch spread the word about how further actions past those of "going green" were necessary to fighting the climate change.

Reminiscing of his past, Knobloch remembered a time where the temperatures were much cooler, and claimed that in today's age, the number of 100-degree days could easily jump from about two a year to almost 24.

To relate the topic of climate change to the crowd, he provided insight into the agriculture of Massachusetts, stating that beeause the state heavily relies on the output of farmed goods, climate change will destroy crops and negatively affect the economy.

Knobloch's focus was on governmental figures, ranging from their inaction against certain obstacles, and actions that he claimed are making the obstacles worse.

"Our political leadership is indeed paralyzed," said Knobloch, indicating that those in power are not contributing solutions for various reasons.

He claimed that the problems that were contributing to climate change included economic hardships, primarily the recent recession, the continual burning of fossil fuels and ineffective leadership among members of congress and the White House.

"The Congress and administration has failed over the past two years to enact comprehensive climate and energy legislation for our country," Knobloch said.

He also said that Republicans are a factor in climate change today.

The Republican party regrettably decided to make climate

Online classrooms offer new and different college choices

By Stephanie Anjos
Collegian Correspondent

Recently, a faculty member at Kentucky's Jefferson Community and Technical College, adjunct professor Ford T. Smith, manufactured a program that allows students to begin and end a course whenever they wish to do so. Students are permitted to study at their own pace.

The program, known as Learn Anytime, doesn't turn a single student away for the common reasons of missing a deadline or the class lacking availability. Since the program has been launched, the number of courses available has gone up due to increasing popularity. The current sensation often serves as a gateway for opportunity in a society where careers now require familiarization with the internet and fast-paced living. However, individuals may question when or where limits are drawn.

Smith's salary is one that may be envied by other professors, reaching about $120,000 a year. However, he isn't paid in salary, but by each student who enrolls in the online classroom.

Considering its small origin the system has yet to be determined as controversial or beneficial across the nation. While the typical college students may have varying degrees of stress and work, Smith's system is acclaimed for providing less pressure on students, enforcing them to feel more motivated to build a better performance, and produces ease for the average student's schedule.

Negative feedback for the program has included how the program may not prepare students for the real world, and that there is no adjustment made to habits or lifestyle. It was also noted that the students who take the course don't have interactions with other peers, losing social values.

Several University of Massachusetts students don't like the idea.

"I like timed work because it helps us get our stuff done. Deadlines help avoid procrastinating," said freshman Jaritza Alecon.

"I disagree with the program, because in this manner, students will put off their work," she added.

Freshman Sara Konda also likes having discipline among her work.

"I disagree with the program because then there would be procrastination and work wouldn't be done," she added.

Freshman Clarrisa Afum said, "Timed assignments make me feel good, because they give the students something to do. Deadlines serve as means of moving forward in the course materials."

"I disagree with the program because there is no consistency of attendance in class and the teachers seem to be receiving more money for this," she added.

Sophomore Mazen Hamza said that the negative aspects of having online classes really show through the program.

"I don't agree with online classes, to me a class should be taught so there's eye contact between student and teacher," she said.

"The teacher will clear any misunderstandings and such in

See ONLINE on page 4

Online classes eliminate the need for actual classrooms, leaving ones like this completely used by students who use such programs.

Lecture about climate warns crowd of future

CLIMATE from page 1

change a partisan issue," he said.

Knobloch added that the recession caused by the stock market collapse in 2008 caused unemployment rates to increase and that people are less likely to trust in a new plan while the economy is down for fear of losing even more than we already have.

Along with this, the Republicans party has created a filibuster that requires a 2/3 vote for anything to pass through senate, which Knobloch said could make passing a climate change bill difficult.

As well as the Republican party, Knobloch said that President Barack Obama's administration has yet to obtain a filibuster to tackle a bill for climate change laws, and should be taking the initiative.

However, he didn't entirely blame political figures and said that there is influence from outside sources that are keeping things in the order they want.

"The fossil fuel industries and their allies retain a powerful grip over federal legislators, our federal legislatures," he said.

Knobloch added that the influence held over legislatures has created problems. He made an example of how the Clean Air Act was suspended, which enables companies to release mercury, soot, smog and other chemicals into the air with no consequences.

In order to help tackle the topic of climate change, Knobloch recommended several solutions and actions that he thought should be taken.

His suggestions included substantial payments on greenhouse gas and emissions reduction, weakening political power and opposition, establishing fuel economy rules on rigs and cutting down on oil use and shutting down major coal burning facilities, which has been proved to create pollution that causes asthma, respiratory disease and premature death.

He also included the example of the 10 miles-per-gallon increase in cars in 2007, and said that this can easily increased from 10 miles-per-gallon to 60 miles-per-gallon.

Knobloch said that despite political figures not taking appropriate actions in his opinion, that people do have the ability to make a change.

"The inability of our political system to address a complex and difficult problem is, on its face, overwhelming," Knobloch said.

"But to me, the clarity of what we have to do is liberated, and calls to the better ranges of our nature," he added.

Knobloch finished his 48-minute lecture with an open question-and-answer session, further sharing his insight into more specific areas.

His final words were ones of inspiration.

"We can do this. To make a better world for us, it is our turn now."

According to their website, The Union of Concerned Scientists "combines independent scientific research and citizen action to develop innovative, practical solutions and to secure responsible changes in government policy, corporate practices, and consumer choices."

Tim Jones can be reached at timothyj@student.umass.edu. Jessica Jankowski can be reached at jjankows@student.umass.edu.

Knobloch said that climate change will have a heavy impact on states reliant on agriculture for the economy, naming Massachusetts in specific, saying that the state would undergo serious changes.

A walk of horror

Walking alone through the tunnel by Southwest at night can be quite the intimidating experience, which is why it is one of the top 10 scariest places of UMass.

Your degree can't wait.
Discover the competitive advantage of a Saint Rose graduate degree.
Do you ever wonder if your degree is going to be enough in these challenging economic times? Do you want to be a force for positive change? The answer is simple—earn a Saint Rose graduate degree.
With 45 graduate degrees and 19 graduate certificates to choose from in education, business, computer information systems, and the arts and humanities, a Saint Rose graduate degree provides the employment credentials to boost your earning power and enrich your career. Apply today!

College graduates advised to grab any job they can obtain

By Claudia Buck
McClatchy Newspapers

SACRAMENTO, Calif. Baby, it's cold out there. And we're not just talking about the weather.

At the University of California, Davis, and California State University, Sacramento, where hundreds of graduates picked up diplomas this month, it's a decidedly chilly job climate.

With unemployment still hovering in double digits, December graduates are facing one of the grimmest job environments in decades. They will need fortitude, college job counselors say.

"I constantly remind students: They only need one job," said career adviser Marcie Kirk-Holland with the UCD Internship and Career Center. "There may not be as many offers out there, but you only need to find one."

But no one's saying it isn't tough out there. "It's a very soft market – the toughest I've seen in 27 years," said Eva Gabbe of the CSUS Career Center. "We've been through recessions, but it would hit only one sector. But this one's hit all of them."

For the 2,600 CSUS and 900 UCD students who graduated this month, there are glimmers of hope.

"There's still no massive movement to increase (college student) hiring, but there's a slight shift. Each month has been slightly better than the previous month," said Edwin Koc with the National Association of Colleges and Employers.

An estimated 33 percent of employers surveyed in December, according to Koc, said they expect to hire more college graduates in the next quarter. That's up from 17 percent in August.

"This is first time I've seen more employers say they're going to increase, rather than decrease, hiring since August 2008," Koc said.

One of those hiring is Triage Consulting Group, a San Francisco-based health care consulting company. "We hire young, bright minds straight out of college," said Principal Andy Stemmler. "They are very trainable, very motivated and incredibly willing to learn."

Triage, which hires mostly business and economics majors, is actually upping its 2010 hiring. With health care a relatively robust job sector, Stemmler said Triage is recruiting 75 or 80 students next year, compared with 70 this year.

But that's not much consolation for the many young people with freshly printed diplomas and no jobs.

For the iPhone generation, accustomed to following a scripted path through school, finding a job takes some new thinking, say career experts. "It's a very messy, unclear system," said Duncan Mathison, a San Diego career consultant and co-author of "Unlock the Hidden Job Market."

This crop of graduates may be Web-savvy and accustomed to social networking online, but those connections may be ill-suited for finding jobs, he said. "What do you do when your network is the same as you: unemployed?"

Yet the holidays, when friends and family are gathering, can be an ideal environment for getting a jump on jobs, he said. Mathison recommends the "100-person rule," which means creating a list of 100 people you want to contact.

And don't overlook anyone. "It can even be your uncle's poker group," he said. "That seed you plant today can pay off two months from now."

Another short-term solution is temp work at a staffing agency. Far from a dead end, it can plump up a resume and help define your career path, UCD's Kirk-Holland said.

"By going on placements in a lot of different industries and working in different corporate cultures, they can see what kind of career resonates with them," she said.

More so than in previous years, new graduates need to be willing to take jobs that aren't their ideal fresh-from-college posts, but are the first rung up the ladder.

Instead of getting hired as a staff accountant, for instance, many CSUS accounting majors are starting in training-level positions, such as accounts receivable/payable, Gabbe said.

Plenty of history, sociology, psychology and English majors are "jumping in wherever they can," including jobs in insurance claims and underwriting departments. "Their communication and writing skills, organizational abilities and computer (savvy) can lend themselves to any (position)," said Gabbe.

Some December grads are getting hired, though. One of the lucky ones is Brian Henrikson, a 23-year-old December graduate from California Polytechnic State University, San Luis Obispo. The industrial engineering major has two job offers, including a scheduling supervisor position at Diamond Foods Inc. in Stockton.

"I was open to moving anywhere and doing anything that was applicable to my major," said the Sacramentan, who's now home for the holidays. "It may not be your first choice, but you have to be open to doing anything with that first job. Some of my friends who graduated in June are still looking."

Sometimes it takes pushing yourself forward. Kathryn McDaniel, 23, graduated earlier this year from UCD with a double major in English and biology. After months of job searching, she applied for a receptionist position at the Glenn County Office of Education, near her hometown in Orland, Calif.

"When I didn't hear back, I called HR. They said, 'Oh, you're overqualified,'" McDaniel said. But the staffer put her into another pool of candidates for a part-time job as a records clerk for a Glenn County foster youth program.

"During my interview, I pulled out my college experiences," such as dorm resident adviser and a math-and-science camp counselor. That led to a second part-time job offer as a high school lab technician for chemistry and biology classes. As of November, McDaniel is happily working both jobs.

Her advice to fellow 2009 grads: When you're interviewing, ask about other opportunities. Talk about your job-related college experiences. And do your homework. In her case, she went online and researched the foster youth program ahead of time, so she could discuss it confidently during the interview.

And if you don't hear back, get through to a person, she advised. "You need to have a human contact. With so many online applications, you can get lost in the muddle."

Students need to remember that employer rejections are inevitable "but don't let it keep you from continuing to search," said UCD's Kirk-Holland. "Every grad is anxious, and that's been true even when the economy's the best it's ever been. Take a job. Even if it's not what everyone wants, it's better than sitting at home."

Online classes shape college

ONLINE from page 1

the classroom," she added.

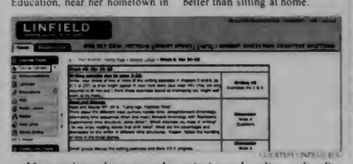
Despite complaints about the old-fashioned system, it seems favored over the new, high-tech program which has been said to be "total remedial.", and have "no learning" involved, said Vicki Smith, a participant in Learn Anytime.

"I agree with the online course program. Everyone learns differently and some are capable learning independently," said sophomore Amanda Nguyen.

With the option of being able to complete their work whenever, students have access to control their college lives how they want, yet the downsides of programs like this continue to show.

Ford Smith may have assisted students to the point where they transcend even stepping into a classroom altogether, and technology is helping programs like his shine through even more. Online classrooms may soon become even more prominent in future years, and programs like Learn Anytime will get them there.

Stephanie Anjos can be reached at sanjos@student.umass.edu.



Many professors have resorted to assigning and grading work online to be more collected, and this soon may become more common.

As well as taking online courses, students can also visit Career Services in Goodell Hall to get help with their college path.

THE BRYANT
GRADUATE PROGRAMS

The Bryant University Graduate School of Business prepares students for success in their chosen professions. As a graduate, you will join an impressive alumni community that includes industry leaders across the country and around the world.

THE BRYANT MBA ONE-YEAR PROGRAM
Full-time, day program for all majors
- No professional experience necessary
- Distinguish yourself in a competitive job market
- Gain hands-on experience with the Business Practicum

THE BRYANT MBA TWO-YEAR PROGRAM
Part-time, evening program for professionals from any field
- Develop high-level business skills for long-term career success
- Enter and progress through the program with a supportive team
- Build your network while enhancing your resume

THE BRYANT MASTER OF PROFESSIONAL ACCOUNTANCY (MPAC)
Full-time, day program for accounting majors
- Meets the 150 hour requirement for CPA licensure
- Complete in Summer/Fall, Summer/Summer, Fall/Spring or Spring/Summer
- Tax concentration available with Summer/Fall or Summer/Summer plan

THE BRYANT MASTER OF SCIENCE IN TAXATION (MST)
Part-time, evening program for tax professionals
- Build an expertise in all areas of taxation
- Network with tax executives and industry professionals
- Flexible scheduling options

LEARN MORE ABOUT BRYANT UNIVERSITY AT THE GRADUATE AND PROFESSIONAL SCHOOLS INFORMATION DAY ON OCTOBER 27TH FROM 11:00AM – 3:00PM IN THE STUDENT UNION BALLROOM

THE MASSACHUSETTS DAILY COLLEGIAN

EDITORIAL OPINION

THURSDAY, OCTOBER 21, 2010

"If we don't believe in free expression for people we despise, we don't believe in it at all." -Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

Three-year degree scam

Beginning next fall the University of Massachusetts will officially allow qualifying students to graduate in three years as opposed to the standard four. Some colleges and universities are already doing this, and many more plan to over the next few years. We agree that it looks good on paper, but we'd like to address some concerns.

First, an education "bubble" looms in the near future. The three-year degree is universities' response to the bubble. They've figured out how to maintain credit inflow while permitting a few students the benefit of the slightly more affordable accelerated track. In actuality, only about half of students will graduate in four years. Many are taking up to an additional two years to complete their degrees. The students likely to capitalize on the three-year program will enter college with advanced placement credit or college credit by other means. They will also need to bulk up on credits during the regular semesters and take summer courses (which can be more expensive than fall and spring courses depending on the university). There won't be much time for switching majors either (a rather frequent occurrence for undergraduate students). Some colleges with three-year degree programs require students to choose their majors during freshman year without allowing them to change.

Like in the case of the housing bubble, the United States government and taxpayers are funneling hundreds of billions of dollars annually into higher education predicated on the notion that a college degree secures jobs and future wealth. College and university administrators, already drunk from this huge credit infusion, ask for more and more each year. After tallying tuition, fees and housing, college is nearly a $50,000 per year investment (if you choose the private school avenue), which means many graduates carry home mortgage-like debt. This is unsustainable.

The National Center for Policy and Higher Education reports that a college education has outpaced the rate of inflation and the cost of healthcare. It has risen more than 400 percent on average over the last 25 years. The question is, like it was for the housing market, "When will everyone realize that the value of a college degree is continuously falling?"

Community colleges and online degree programs, such as those offered at the University of Phoenix, are attracting middle class students who cannot afford an exorbitantly-priced traditional education. Considering the job outlook for the next few years, these alternative educational paths are practical, if not genius. Holyoke Community College is still a better deal than a three-year degree from a traditional four-year university. When you factor in that research shows most college graduates aren't even proficient readers and study much less than the class of yesteryear, the luxury four-year route is almost absurd.

Furthermore, the three-year degree program may appear cheaper at first glance. However, we want to know how many years of 400 percent inflation will it take for it to reach the cost of the four-year track? Take at look at Florida State University, for example. Roughly 40 percent of students enrolled in their three-year program remain for an additional year, thus eliminating expected savings.

This page also noted earlier this semester that a serious disconnect exists between what the administration says about the University's finances and what the visible reality is. Recently UMass Amherst Provost James Staros told the Boston Globe, "As the state backs out of support for public higher education, and families take on a bigger chunk of the burden, we need to try to mitigate that."

If the state has backed out of support for higher-ed, someone else is filling out his shoes very well. Instead of implementing a three-year degree track, perhaps a better way to "mitigate the burden" would be to halt the $375 million in construction projects the University currently has under way.

In 2009, when UMass instituted a $1500 fee increase, it noted in a talking points memo that, "If... the fee increase remains in place, families at or below the state median of $78,500 would have the effects of the increase offset by additional grant aid."

In other words, they raised the price of attendance knowing the feds (via taxpayer money) would pick up the tab. Colleges and universities are in cahoots with each other. Federal financial aid is a $200 billion per year racket, and every college president, chancellor and lingering administrative bureaucrat wants a piece of the very large pie. Unfortunately, it may take a bubble burst to put the brakes on the scam.

We support a three-year degree only if it will tangibly reduce student fees and debt. We remain leery of a program that will overburden students with coursework and inhibit them from enjoying college life outside the classroom. Is it really worth rushing through undergraduate school to potentially save a few thousand dollars? We hope UMass and its fellow universities are not trying to pull another fast one on their students and the taxpayers.

Unsigned editorials represent the majority opinion of The Massachusetts Daily Collegian's Editorial Board.

Lost opportunity

Mike Tudoreanu

It is common knowledge that the Democrats can expect a disaster at the polls next month.

The only question is, will the Republicans sweep into power or will the Democrats hang on with a much smaller majority? I do not know the answer, but I believe it matters less than most people think. Judging by the behavior of the Democrats so far, even if their majorities survive in the House and Senate we can still expect conservative policies – because they will argue that the Republicans need to be appeased rather than confronted. So let's put aside the question of what will happen in November and talk about how we got here.

For one year, 2009, the Democratic Party had absolute control of the executive and legislative branches of government, complete with a supermajority in the Senate. That supermajority was lost after Scott Brown was elected in 2010, but the Democrats still held more seats in the Senate than the Republicans ever had at any point since the 1920s.

But the Democrats did not help working people, did not pursue any meaningful reform of health care or Wall Street, and did not punish those who caused the Great Recession (in fact, they rewarded them).

And what did they do with this once-in-a-lifetime opportunity?

Well, they spent the first half of 2009 making hard choices about Obama's new dog. And bailing out banks – just like Bush did. Then they finally got around to discussing some real "change we can believe in" over the summer – the health care reform – and spent the next six months crafting a non-reform bill that was far more right-wing than the health care policies of conservative parties in Canada, Western Europe, Australia and Japan.

Let me emphasize that, despite all the crazy talk from teary-eyed conservative talk show hosts, "Obama-care" is more market-oriented and involves less government intervention than anything supported by mainstream right-wing parties anywhere else in the developed world. In fact, it is even less progressive than a health reform proposal once made by the Nixon administration.

Finally, after they were done pretending to reform health care, the Democrats gave Wall Street a slap on the wrist and told them to play nice next time. I can definitely see their logic here: After this terrible recession, we can rest assured that the banks will never again be so reckless as to take huge risks that might crash the economy and force the government to give billions of dollars to the banks... Oh wait, never mind.

Throughout all this, the Democrats did very little to help working people who had lost their jobs or homes. If they were going to bail out the banks anyway, they could have done it by buying up all the foreclosed homes and letting their occupants stay there.

Not only would this have been the right thing to do from a moral perspective, but it would have also helped the economy. After all, it's a lot easier to find and keep a steady job if you have a home to live in. To deal with the record levels of unemployment (officially hovering around 10 percent, but unofficially around 16 percent when you count the underemployed and the "discouraged workers"), the Democrats could have started a massive government jobs program like in the New Deal. The government could have employed people to build public transport networks, which are sorely needed in this country. Or there could have been a jobs boom in health care if they actually created a public option.

To pay for it all, they could have raised taxes on the wealthy. There are two main reasons why the U.S. government is experiencing record deficits right now, and one of them is that taxes are absurdly low by historical standards (the other reason is the bloated defense budget).

The top marginal income tax rate – the tax rate paid by the richest Americans – was 63 percent during FDR's first term, 79 percent during his second term, 91 percent under Eisenhower, 70 percent under Nixon, and 50 percent under Ronald Reagan.

It is 35 percent under Obama. Don't tell me that taxes are too high. They are at their second lowest point in almost 80 years.

But the Democrats did not help working people, did not pursue any meaningful reform of health care or Wall Street, and did not punish those who caused the Great Recession (in fact, they rewarded them). So now they are going to be swept out of office by a wave of public anger, and they have only themselves to blame.

Right-wing commentators insist that the mistake of the Democrats was going "too far to the left," but that is absurd.

On all the key issues, the Democrats were too far to the right; they could have secured more votes by going further left. For example, does anyone really believe that the American people would have been opposed to the government inflicting severe punishment on Wall Street?

If the Democrats had taken a more left-wing stance against the banks, they would have won more popular support, not less.

Or imagine if Obama actually created a system of "socialized health care" like the British NHS, meaning that anyone could walk into a hospital and get treatment for any serious illness at little or no cost. Is there any doubt that he would have earned the eternal support – and votes – of the tens of millions of uninsured, and the other tens of millions of people with bad insurance, high deductibles or co-pays, or pre-existing conditions? And if the Democrats created a government jobs program that put millions of people back to work, is there any doubt that all those people would have voted for them this November?

Whatever you think about which policies are best, there can be no doubt that more progressive policies would have earned the Democrats more votes.

But instead, they chose to fiddle while the economy burned.

MARIJUANA PROPAGANDA

Dear Editor,

Re: "Prohibition is not working," Daily Collegian 9/28

If health outcomes determined drug laws instead of cultural norms, marijuana would be legal. Unlike alcohol, marijuana has never been shown to cause an overdose death, nor does it share the addictive properties of tobacco. Like any drug, marijuana can be harmful if abused, but jail cells are inappropriate as health interventions and ineffective as deterrents.

The first marijuana laws were enacted in response to Mexican immigration during the early 1900s, despite opposition from the American Medical Association. Dire warnings that marijuana inspires homicidal rages have been counterproductive at best. White Americans did not even begin to smoke pot until a soon-to-be entrenched federal bureaucracy began funding reefer madness propaganda.

Marijuana prohibition has failed miserably as a deterrent. The U.S. has higher rates of marijuana use than the Netherlands, where marijuana is legally available to adults. The only clear winners in the war on marijuana are drug cartels and shameless tough-on-drugs politicians who've built careers confusing the drug war's collateral damage with a relatively harmless plant.

Students who want to help end the intergenerational culture war otherwise known as the war on some drugs should contact Students for Sensible Drug Policy at www.SchoolsNotPrisons.com.

Sincerely,

Robert Sharpe, MPA
Policy Analyst
Common Sense for Drug Policy
Washington, DC

POLITO BAD FOR THE DIFFERENTLY-ABLED

Dear Editor,

Representative Karyn Polito (R-Shrewsbury) is playing a dangerous game of political roulette with the health and welfare of thousands of individuals with disabilities at stake. In her transparent attempt to be fiscally prudent she is endangering vital funding for residential, employment and family support programs. After the combined efforts of The Arc of Massachusetts, ADDP, the Governor, and most of the Congressional delegation, the critical FMAP (federal matching Medicaid monies) extension passed. It will bring our state an additional $500 million, but Rep. Polito stands in the way of these dollars reaching Massachusetts families who are struggling.

Citizens who have written to her in the past few days have gotten the response that the bill is being "pushed forward during informal sessions of the House when there is no meaningful opportunity to debate, amend and vote on the bill." This doesn't make sense, because last June both the House and Senate did approve a 2012 budget with FMAP dollars and most of the very line items that are in the spending bill. The line items were reduced by the Governor, but it was agreed that if the new FMAP dollars did materialize, they could be added through a supplemental bill.

Why object now?

Sincerely,

Leo Sarkissian,
Executive Director
The Arc of Massachusetts
Waltham, Mass.

LOOKING FOR 9–11 TRUTH

Dear Editor,

Last week, I attended a talk by Michael Arad, the designer of the World Trade Center's September 11 Memorial called "Reflecting Absence." This talk was sponsored by the Architecture and Design program at the University of Massachusetts and it touched on many aspects of the design evolution from conceptualization through the nuts and bolts of construction and on to which trees would provide the best canopy for pedestrians.

He related his belief in the power and appropriateness of his design during the competition even though the odds against it selection had been daunting. He related the frustrations and triumphs in working with other stakeholders to achieve a design that would be meaningful, enduring and most important, meet the building codes and public safety requirements.

He talked about concepts he had learned from his professors and how he had synthesized them. He emphasized that everything needed to be addressed in the design stage, because once it is finalized, you can't be told, for example, that it needs a railing, because that would change the perspective of the entire memorial.

After the formal talk, he asked for questions and I took the opportunity to pose one that intrigues me. I began my question stating that "the meaning of memorials change as the understanding of the event evolves over time."

The event that this memorial recalls is the death of thousands of people after planes hit the building, creating fires that led to their complete and catastrophic collapse down into their basements." I identified myself as a registered professional engineer and one of over 1300 architects and engineers that believe that the evidence is overwhelming that the three skyscrapers were, in fact, destroyed by controlled demolition using pre-planted explosives. I continued, "How will the meaning of this memorial change as those irrefutable facts become more well-known?" Arad declined to answer that question stating his disagreement with my premise.

While disappointed with his response, I sat half-listening to other questions while I silently recounted my own evolving experiences with another memorial – the Vietnam Memorial. My first visit was in 1985 shortly after its completion. At that time it was a place to remember individuals; to touch the small voids in the wall that spelled their names; to reflect on the void that their sacrifices left in their world. It was a place to remember individual losses and sacrifices.

Over the years as I learned more about the Vietnam War including the deceit behind the Gulf of Tonkin incident, the meaning of the memorial shifted to the immensity of the tragedy. In recent years as I have advocated for veterans with Post Traumatic Stress Disorder (PTSD), and learned that if the wall were to be expanded to include veterans that committed suicide upon their return, it would need to be two to six times larger. So now, to me, the meaning of that memorial has become a symbol that calls out for peace, truth and justice so that such a senseless war never occurs again.

As I reflect on the design that Michael Arad has brought forth, I believe that because of its focus on loss and remembrance it will be an enduring design whose meaning can grow and adapt as our understanding of the events of that day in 2001 evolve. I look forward to experiencing it once it is open to the public.

Stars shine in autism benefit show

By Garth Brody
Collegian Staff

Comedy Central will be airing its third biennial "Night of Too Many Stars" autism benefit show tonight at 9 p.m.

The event is a joint effort by Comedy Central and "Daily Show" host Jon Stewart's Busboy Productions, aimed at raising money for autism education and research programs. Comedy Central's press release boasts "a celebrity phone bank, allowing viewers to call in during the airing to donate while speaking with additional comedic heavyweights."

The night's programming will be divided between a live telecast from Los Angeles (where the celebrity phone bank will be seated visibly behind the performers, if previous iterations of the event are any indication) and a pre-taped New York show from the evening of Oct. 2, which was hosted by none other than Stewart. The Massachusetts Daily Collegian attended the latter, ambushing celebrities outside the Beacon Theater on the red – it was more of a blue, actually – carpet.

The first star gullible enough to talk to our humble publication was "Daily Show" correspondent John Oliver. He spoke to recent comments about Jon Stewart made by CNN pundit Rick Sanchez (over which Sanchez was fired).

"In no way is Jon a bigot, deep down I think Rick Sanchez knows that," Oliver said.

On a lighter note, he quipped on his aspirations for the night to follow.

"I'd like to try to upstage the rubber dog – and fail," he added. "It will be difficult."

Next down the line, comedian and "Daily Show" colleague Lewis Black touted the importance of the night's cause, asserting that people in positions of power should do "whatever it takes" to advance autism research.

"It's not a new phenomenon, it's just that most of the community just found out – just like they just found out our school system is crumbling," said Black.

In typical Lewis Black style, he took the opportunity to blast a right-wing mouthpiece, lamenting, "but then Sharron Angle goes and opens her mouth and says something that boggles the mind."

Black also stated that he has finished writing his latest book, and that it will be hitting shelves soon.

Olivia Munn, another "Daily Show" correspondent, also had some sharp words for Rick Sanchez, suggesting that maybe, "Rick just missed his nap, and I think that if you've ever been in a position where you miss napnime – I get cranky too – he just needed a little bit of a privacy blanket and then some nursing time. That's it."

Leonard Maltin, the guy behind those 1,000-page movie guides that have been made completely obsolete by IMDB.com, expressed his excitement for the "Too Many Stars" lineup. "I like all of them." In particular, though, he admitted that he would "like to meet Tina Fey. I love her show."

Temple Grandin, a massive figurehead for the autism community (famous for her development of humane cattle slaughter techniques), was enthusiastic about the high profile of the event; she called it "really wonderful" and claimed that "it's gonna get awareness out there."

Perhaps the most memorable moment of the night was a final timeless message meant for all of us students, delivered by the now-legendary Tay Zonday (of "Chocolate Rain" fame): "Stay in school." Well, maybe Tay's presence was not more poignant than Temple Grandin's, He is probably more obsolete than Leonard Maltin at least.

The show airs on Comedy Central tonight at 9 p.m., and donations will be accepted throughout.

Garth Brody can be reached at gbrody@student.umass.edu.

Comedian and "Daily Show" host Jon Stewart hosted the New York segment of the "Night of Too Many Stars" autism benefit show airing tonight at 9 p.m. on Comedy Central.

The Books crack a new sound

COURTESY FLICKR.COM/MAX BLAU

The Books band members Nick Zammuto and Paul de Jong discuss the band's history and future after the release of their latest album, "The Way Out." The Books will be performing at Pearl Street on Friday at 9 p.m. with The Black Heart Procession.

By Garth Brody
Collegian Staff

The Books, one of the most exciting and perplexing groups currently making music, will be performing at Pearl Street this Friday. The duo is comprised of Nick Zammuto and Paul de Jong, who cobble together their patchwork compositions from discarded media, field recordings and their own recorded instrumentals and vocals. They are touring in support of their latest record, "The Way Out," which is the first album they have released in five years.

Zammuto started from the beginning with their fated union "in New York City in the year 2000 or so – about 10 years ago." Purely by coincidence, they "happened to live in the same apartment building, and a mutual friend introduced us down there."

According to the two, they had dinner at de Jong's apartment one evening, and it took off from there. "I kind of introduced him to what was then the beginnings of what we call the sound library," de Jong explained. "The sample library – that's kind of the basis – the instruments – that the music usually starts from."

Before they had started collaborating extensively, "it was comprised mostly of samples from LPs and out of movies," but, he asserted, "since then it's really kind of grown with all the media."

Reflecting on their mutual artistic genesis, de Jong cited an "interest in found sounds and newly created sounds," which turned out to be "weirdly and interestingly complementary."

Since they began making music together, their tastes and methods have expanded as part of what Zammuto called "sort of a natural progression of what of what we've been interested in," adding, "of course, the sound library is the thing that defines the direction of the new work most."

He went on to relate this progression to their latest record; "There's always this kind of moment of critical mass within the sample library, where all of a sudden you have a lot of related recordings."

For "The Way Out," he gave the example of "the hypnotherapy stuff" that comprises the bulk of the first and last tracks, as well as a few in between.

"There was just an avalanche of that material to work with, given all of the thrift shopping that we did on our previous tours. So it became clear that that was a promising direction, early on," he said.

Beyond thrift stores, de Jong described the source of The Books' sounds as "boundless."

"You play your own instruments," he explained. "You find obsolete media; there are libraries. You can go out with a good recorder or a crappy recorder, out in shops or in nature."

The incredible breadth of the duo's sound is immediately noticeable in their music. On "I Am Who I Am," the mere first seven seconds go from a six-note woodwind comment to a fuzzy recording of a small group of quietly laughing adults to a single female voice declaring: "nuttiness." All of this before the song really even starts, and it still feels coherent.

At live shows, The Books promise even stranger coherency. Zammuto described a Books performance as "halfway between a concert and a film. The visuals are used in a very rhythmic way, and they're very much in sync with the music in – I think – an unexpectedly integrated way."

The visuals hold so much weight at the live show that he went so far as to describe them as "the lead singer of the band." According to Zammuto, they are looking to create with the live performance "this kind of synesthesia, like a real thoughtful combination of sight and sound."

"Synesthesia," which refers to a blending of senses (sight and sound being only two of the seemingly infinite dimensions of experience explored by The Books) is a word you will hear again and again in any discussion of their music. This idea is reflected in their attitude toward music-making. "It's really, in the end, what your ears pick up," said de Jong, "and how your brain is processing it – what you want to hold on to, what really piques your interest."

To call their approach open-minded would be an injurious understatement. De Jong expressed, "It's all around us, and we are kind of trained to tune out things that you just have to live with, to protect your ears for what really seems to be worth it."

The Books subvert this subconscious training with their music. This secretly anthemic lyric from "We Bought the Flood" seems to corroborate that notion: "Let's notice everything. I mean every grain of salt."

When asked about how listening to his own music makes him feel, Zammuto replied that "what makes it really interesting music is that it's never the same experience twice when you listen through it. Your ear has freedom to follow different lines every time." This is what makes The Books so exciting. The clarity of their musical lens is so crystalline that it can be an almost spiritual experience to realize the technique involved in its implementation. As Zammuto put it: "Sometimes it's just kind of sleight of hand, where you have one thing that you think is the foreground sound, but then you realize later on there's this other thing that maybe means even more, but it's just behind it."

"There's this kind of sense of epiphany," he added.

"Intricacy," chimed in De Jong.

The Books will be playing at Pearl Street this Friday at 9 p.m., supported by music-hall indie rockers The Black Heart Procession.

Roth's 'Humbling' draws from real life

By Mark Schiffer
Collegian Staff

Philip Roth has long intertwined his literary world with his personal. From the Zuckerman novels, whose titular character's past and profession closely mirrors that of his creator, to the frequently used New York/New Jersey settings cribbed from his childhood and adolescence, this Pulitzer Prize-winning novelist has practically built a name for himself by mining his past for the sake of art.

Consequently, it comes as no surprise that Roth's latest work, "The Humbling," also features an artist protagonist. What is surprising is the newfound sense of bleakness that fills this all-too-brief novel. One thing readers can be assured of is this 77-year-old author hasn't lost his edge.

We follow the decline of 65-year-old actor of stage and screen Simon Axler. Rather, we would be following his decline, if the novel didn't already begin with him seemingly having hit bottom. Having acted from a very young age, he is startled one day to find that he has apparently lost his talents, and is unable to honestly deliver a single line on the stage. He breaks down, and admits himself to a psychiatric hospital for one month's time. Upon his exit, he finds himself abandoned by his friends, family and colleagues. After a year of solitude, Simon finds himself in a sexual relationship with 40-year-old Pegeen Stapleford, the daughter of two of his long-time colleagues and friends.

It is here that the real meat of the novel lies. The sexual subjugation and degradation experienced by Simon in this relationship seemingly gives the novel its title. Pegeen, upon being left by her lesbian lover of six years, is distraught enough to "try men." The sexual power games and emotional traumas inflicted by these characters on each other are both incredibly arousing and unsettling. Although the relationship at first seems to be the one element of Simon's life that can lift him from his suicidal state of mind, it ends up being his undoing.

The issue of suicide is never far off in this text. When awfulness comes from both the outside and within, despair seems the only feasible reaction for Simon. With regard to his acting problems, the frustration he feels stems from the fear that "people would laugh because it was him." Later, he lists off the many plays he has performed in which contained suicide. The torturous, but almost too readable passage takes up a solid two pages.

Although one could fault it for its relative humorlessness, "The Humbling" is a very important book for Philip Roth. Its dour mood reflects the world of an artist in decline. When a person's one means of coping with the awfulness of reality is removed, what is left? For a time, maybe there is romance. But in the long run that may just be more acting for some. The fact that these incredibly vital issues are addressed with such intelligence and craft show that Philip Roth, far from declining, remains, in fact, one of the truly great American writers of our time.

Mark Schiffer can be reached at mschiffe@student.umass.edu.

Author Philip Roth draws from real life experiences in portraying a character battling depression in his new book, "The Humbling."

'Guardians' soars with stunning graphics

By Garth Brody &
Mark Schiffer
Collegian Staff

Whether or not you enjoyed the violence-pornography hybrid that was "300," it was undeniably the film through which director Zack Snyder created his own kind of visual signature. Snyder's most recent film, "Legend of the Guardians: The Owls of Ga'Hoole," proves to be a product of his post-"300" hyper-directed style.

Without so much emphasis placed on visual flair, the film would be a rather rote adaptation of the Kathryn Lasky-penned series of children's novels from which it mines its source material. But with Zack Snyder at the helm, the audience can more easily switch off its cynicism and go along for the ride.

Right from the opening scene, the audience is treated with the Snyder special - a slick action sequence seamlessly transitioned into super smooth slow-motion for a few seconds, before the scene snaps back to full speed and continues to hurtle along. This technique comes back more than a few times throughout the film, each time producing some stunning visual tableau or another.

Be sure to watch the visuals closely, because you have already heard the story thousands of times before.

The tale is of a fabled army of owls, the titular "Guardians," who are the only ones who can save the owl kingdom of Ga'Hoole. It is the mission of Soren (enthusiastically voiced by Jim Sturgess of "Across the Universe" fame) to find and retrieve these fabled Guardians, for the purpose of saving the owl kingdom from the clutches of the "Pure Ones," an evil army of barn owls headed by Nyra (voiced by, of all people, Helen Mirren of "Red" notoriety), and Metalbeak (Joel Edgerton).

This isn't new material by any means, but with three novels compressed into an hour and a half, it would be an impressive feat for Snyder to allow any part of the movie to drag or feel stale.

Rather, the film moves along at a blistering clip, never lingering for more than 10 minutes or so in any one location. While the characters are never really allowed to develop because of this, they are such identifiable types that thoughtful development would feel unnecessary. At one point, the character Twilight even labels each protagonist's role in turn - and then they proceed to cross an ocean in about five minutes.

Between all of this, we see callbacks to the classic fantasy/action clichés of brother-fighting-brother and believing in the power of storytelling. The film feels like one long allusion to fantasy tropes of old, bringing to mind echoes of "Lord of the Rings" and "Star Wars." The basic difference seems to be - besides all the panache that the director brings to the table - that every cliché is spoken and acted out by an owl, which as an object of ridicule never really loses its fun.

But Zach Snyder knows this, and allows the film to unfold with little-to-no winks. Every slow-motion, hyper-stylized sequence feels entirely in-the-moment. If you haven't seen these clichés acted out before, here they are depicted with apparently almost dogged earnestness. This makes "Legend of the Guardians: The Owls of Ga'Hoole" everything it should be - namely, a very solid fantasy-based children's adventure film. While it is perhaps a little troubling that Snyder still must rely on highly efficient killing machines to power even his children's movie, his heart is in the right place here.

Garth Brody can be reached at gbrody@student.umass.edu. Mark Schiffer can be reached at mschiffe@student.umass.edu.

Zack Snyder's new film "Legend of the Guardians: The Owls of Ga'Hoole" lacks original plot, but stuns audiences with Snyder's signature crisp graphics and beautiful imagery.

Transfer hitting holes in classroom, on field for Minutemen

GRIFFIN from page 12

finally found out what this meeting entailed.

Their curiosity mounted and an eerie silence set in.

"I remember it like it was yesterday," Griffin said. "We were sitting there, everyone was having fun, cracking jokes and when he got to talking, you could hear a pin drop in the basketball court."

When Roby finally spoke, he revealed that the Northeastern football program had been cut. His message reverberated through the open gym walls and sent waves of shock and disbelief through the minds and souls of the Husky players.

Griffin was reflective, trying his best to digest the unsettling news that he had just heard.

"Some people reacted, some people got up and left," Griffin said. "Kids were asking him 'Why?' I kind of sat back and took it in and listened to what he had to say and seeing how everyone else around me felt, also."

Northeastern President Joseph E. Aoun decided that the university would no longer fund the $3 million dollar program annually. Northeastern agreed to honor all scholarships and any player who transferred maintained his eligibility, yet 67 students and 10 coaches were left without jobs and a place to play football this fall.

The news began to register with each player and initial disbelief turned to disappointment and in some cases, panic.

For some players, football was the reason why they went to Northeastern. The thought of life without it was worrisome.

Griffin's choice to go to Northeastern was mainly due to its academics, but his passion for football and recent success left him searching for an alternative way to combine the two.

Transferring to a new school would force Griffin to adjust to a brand new setting, schedule and routine. In addition, he would need to learn a fresh system of football, including a new playbook, new terminology and new teammates, but it seemed like the natural thing to do.

Griffin's stepfather was in the military doing work that demanded his family move often. Having relocated over 13 different times in his life, his adjustment to the University of Massachusetts was smooth, but not seamless.

With seven other transfers at UMass, including two teammates from Northeastern and three Hofstra players who experienced their program's demise, Griffin wasn't the only one needing to adjust.

"It's a feeling you never forget. I almost didn't believe it, it didn't seem like reality," senior Minutemen wide receiver Anthony Nelson said, a former Hofstra player. "It was heartbreaking, knowing that in a couple more weeks, you have to cut loose and say 'bye' to some of those relationships you built with people."

As one of the leading rushers in the conference, Griffin's teammates welcomed him, knowing that he would help the team accomplish its goal of reaching a national championship.

Griffin left Northeastern as the fifth Huskie to rush for over 1,000 yards in 2009. He finished with 1,009 yards on 207 carries, a First Team All-CAA performer and member of the 2009 New England Football Writers All-Star Team.

The end of the Northeastern football program brought many suitors to the Boston, Mass., campus, and more who tried to court the star tailback over the phone.

When Minutemen coach Kevin Morris caught wind of the situation, he made sure he was the first to meet with Griffin and his immediacy was a big factor in the coveted player's decision.

Word spreads quickly throughout the college coaching circle and the rumor was that the Northeastern program might be cut later, while Hofstra's decision to cut its program on Dec. 2, came as a complete surprise.

Following Northeastern's demise came an immediate slew of coaches hoping to court the available players. Within 10 minutes of hearing the news, he made arrangements to go to Boston the following day, which impressed Griffin.

"His actions of being there the next day showed that he really cared and he was on top of it," Griffin said. "He sat down with me man-to-man and it didn't really feel like we were talking about college football."

Griffin also received numerous offers from other coaches, including playing at Football Bowl Subdivision programs, so his decision, though opportune, was that much harder to make.

According to Griffin, anywhere from 15 to 20 coaches met with him in person regarding football, along with another 10 to 15 who spoke with him over the phone. These schools represented the Colonial Athletic Conference, Conference USA, and the Mid-Atlantic Conference, including Miami of Ohio, who made a strong case.

After the two-week open house for Griffin subsided, he sat down and weighed out all of his options.

He spoke with his immediate family, who currently reside in Massachusetts and their proximity was a strong factor in UMass's favor. He wanted desperately to play at a higher level, but a decision to play FBS likely meant less playing time, which he was certainly weary of.

However, his credits would need to be cleared for transfer before he could decide on any school.

He spoke with his teammates at Northeastern, some of whom decided to stay at the school and finish their degrees and others who were searching for somewhere to play football as well, including senior lineman Greg Niland and sophomore linebacker Chad Hunte.

Niland was always admired by Griffin as a leader and decision-maker. After finding out that two of his teammates were making the move to Amherst, along with the strength of the UMass program and his respect for Morris, Griffin's mind was made up.

"It's definitely made the transition a lot easier," Nil and said. "We were going through the same things at Northeastern after the program got cut. It made us a lot closer and it was great to see him here with me and Chad."

With the conclusion of football season came a disheartening month for Griffin. The Northeastern campus felt unusually cold, even for December. Everywhere he turned, there were constant reminders that he was no longer a Husky football player and he yearned to leave the campus as soon as he could.

He enrolled at UMass beginning in Spring 2010, beginning his acclimation from a big city to a small town.

Griffin lives in Westminster, Mass. and has lived in 13 different places including California, Texas and Germany. He has lived in the hustle-and-bustle of city life and felt the quaint atmosphere of small-town living.

For Griffin, the biggest adjustments were made in his academic life, but even those weren't anything he couldn't handle.

"It was different, but at the same time, it was just school with a different atmosphere," Griffin said. "Putting on the same book bag, going to the same classes, grabbing my pens and notebooks. I've been doing it for three years, it feels like second nature."

The class sizes at UMass are much bigger than those at Northeastern and professors have less time to offer one-on-one assistance to students. Griffin, a sociology major, found it hard to fit in with students whom he felt already had rapport with each other.

Yet, besides the old-fashioned buildings and furniture, Griffin sees nothing different from the education he receives at UMass than he did at Northeastern.

He has classes he enjoys and those he doesn't. He relates to some professors and not to others.

"If you can work independently and have a knack for going out and finding stuff out for your own, it's the exact same education," Griffin said. "It's not necessarily the education, but how you apply yourself."

Griffin takes solace in the fact that some of his teammates faced the same adversities, easing his transition on and off the field. The feeling was mutual, shared by the six other transfers on the team.

"At first, it was nice; we all gravitated towards each other because we really didn't know anybody. After that first week, or so, everyone mixed around with the whole team and there were no 'transfers,' only UMass guys."

When he wasn't enveloped in school work, Griffin made time to study football, including the new offensive system that the Minutemen run.

He trained with the team in the spring, practicing schemes, learning the terminology and picking his coaches' brains.

"In the beginning, everything was a little slow, seeing things in live speed," Griffin said, "but I think it's picking up for me. The game's starting to slow down a bit for me."

"It wasn't like we had to teach a old dog new tricks," Morris said. "These guys were ready for the challenge and ready to be immediately integrated into the offense."

He took after his new teammates in practices, imitating them on field while heeding their advice. He was welcomed by the Minutemen players and was immediately considered a leader on the team as a senior and an experienced player.

Before the 2010 season's start, Griffin was named to the Phil Steele Second Team Preseason and the CAA Preseason First-Team by league coaches.

Currently, Griffin is the team's leading rusher with nearly 96.8 yards per game and is on pace to compile over 1,000 yards rushing on the season. He ranks second in the CAA in rushing yards per game and 25th in the Football Championship Subdivision.

Griffin ends his typical day of classes and readies himself for another day of practice. He emerges from the locker room with his bulking shoulder pads, his high socks under his cleats and his helmet in hand.

He walks onto the field turf at McGuirk Alumni Stadium like he had at Oakmont High School, with the same piece of mind he left Northeastern with.

He dons the same focus and determination that he has carried with him throughout his collegiate career, with a national championship in the back of his mind.

He ducks and weaves through his running back drills, coaches preaching ball security per usual, yelling in his ear, "high and tight!"

These football tenets are not things he hasn't heard before, though they are being taught in a unique way, with different terminology.

While his coaches drill him, he takes it all in, glad to be playing football again and taking things as they come.

Dan Giglotti can be reached at dgiglio@student.umass.edu.

SAMANTHA WEBER / STAFF PHOTOGRAPHER

Quarterback Kyle Havens prepares for the snap against the Spiders in last weekend's homecoming game. The Minutemen look to rebound against UNH at Gillettee Stadium Saturday.

After loss, UMass to rebound

COLONIAL CLASH from page 12

first win at JMU since Sept. 28, 1996. Linebacker Matt Evans led the defense, recovering a fumble for a touchdown, forcing another and totaling a game-high and career-high-tying 14 tackles.

"Defensively, they're playing really well," Morris said. "They really shut JMU down last week and Matt Evans was the all-performer player of the week at linebacker for them. They have kids on all three levels that have played the game for a long time. They have fifth-year seniors that are running that crew."

While UNH ranks second-to-last in the CAA in rushing offense at 124.7 yards per game, the strength of the team lies in the passing game. Quarterback R.J. Toman is averaging 231.0 yards per game, good for first in the conference, just ahead of UMass' Kyle Havens (210.0).

"Offensively, it starts with the quarterback [R.J. Toman]," Morris said. "He's an outstanding player. He's been the player of the year in our league, so it all starts with him and he's an outstanding player still. We have to make sure we keep him under wraps as much as possible."

The rivalry between the Minutemen and the Wildcats dates back to 1897, making it the longest dated active series. The teams have matched up every season since 1952, with UMass holding a 43-26-3 all-time lead.

After UNH ended a three-game losing streak with a win in 2008, the Minutemen claimed a 23-17 victory on homecoming at McGuirk Stadium last season.

Then-sophomore Jonathan Hernandez filled in for Tony Nelson and amassed a career-high 166 yards, including the game-winning 42-yard run with five minutes, 23 seconds remaining in the contest. Defensive back Kumar Davis sealed the win with an interception in the end zone on the game's final play to upset Wildcats.

"This has been a rivalry forever," Morris said. "UMass never wants to lose to UNH in any sport, particularly in football. We've been very successful over the years here and look to continue to be so."

The last time the Minutemen played a game at an NFL stadium was on Nov. 2, 1991, at Foxboro Stadium. UMass topped Northeastern, 27-12, in front of a crowd of 4,620.

After UNH, the Minutemen will take on conference foe JMU on the road before hosting Maine and Delaware in their final two home games of the year.

A member of the UMass club hockey team moves past a defender in a game last season. After a 4-3 overtime win, the Minutemen take on Westfield State and Sacred Heart this weekend.

UM wins 4-3 in OT

By Robert Hanlon
Collegian Correspondent

After being held scoreless in a game last week, the Massachusetts men's club ice hockey team held on and fought back to beat Rennsalaeur Polytechnic Institute in a thrilling 4-3 come-from-behind overtime win at the Mullins Center on Friday night.

The game-winning goal for UMass came from freshman Rielly Cavanaugh in the overtime period to shock the Engineers and hand them a loss in their first road game of the young season.

During practice this past week, UMass coach Mike Atkinson said the team focused on getting away from playing with too much style by getting back to the basics and just playing to win the game.

"All week we talked about shooting to score and shooting for rebounds," Atkinson said. "As a team, we all wanted to score the highlight-film type goals, and we really needed to get back to the basics of shooting for rebounds."

All of the things that the team worked on in practice began to settle in during the second period for the Minutemen. That turning point occurred when sophomore Dan O'Quinn scored a goal with 19 minutes remaining in the period.

"From that point on in the game we were rolling and we really began to click," Atkinson said.

Sophomore Craig Charest and senior captain Matt Coughlin both stepped up and played key roles on defense side of the ice for UMass to get the win over RPI.

"Charest and Coughlin really held down the defensive end for us and forced our offense to push the puck forward," Atkinson said.

The overtime victory and four goals came after a scoring drought at the Houston Field House against the Engineers kept UMass from putting any goals on the board last weekend.

"The biggest thing that changed from last Saturday was our mind set," Atkinson said. "We went in to the game last weekend thinking that we could win and on Friday night we knew we would win."

After the win, UMass' record in the Northeast Region of the American Collegiate Hockey Association now stands at three wins and two losses. The team currently has a goal differential of plus three, with 21 goals for the team thus far in the season.

The strongest play for the Minutemen has occurred during their play at home in the Mullins Center where the team has won all three of their games. UMass' road games have been a different story, where they have lost their first two games and have only amassed three goals.

After receiving their first loss of the regular season, RPI's record stood at four wins and one loss, which placed them one point ahead of Vermont. The Engineers took on the Catamounts on Saturday and were handed a major loss, getting shutout 5-0.

This weekend, the Minutemen will travel to Sacred Heart University in Fairfield Conn., home of UMass senior forward Nick Crowley and Westfield State on Friday and Saturday respectively, to play a pair of games. In previous games this season, UMass has beaten the Pioneers 8-4 and the Owls 6-3, respectively.

Robert Hanlon can be reached at rhanlon@student.umass.edu.

Minutewomen host MSU Fri.

Chris Gardner
Collegian Correspondent

The Massachusetts men's club lacrosse teams skills are going to be put to the test this weekend, when the Minutemen head to Keene State for a tournament.

UMass will have games against the varsity team of local rival Western New England College as well as Keene State's varsity squad.

The Minutemen will start the tournament at noon on Sunday against Keene, followed by their second game against host WNEC.

Team captain Robert Morsi, along with the rest of the Minutemen, feels confident about their chances this weekend.

"We will need to have an edge in the groundball stats and do well in rides and clears," said Morsi. "We will need to capitalize on any extra man opportunities and try to limit penalties."

WNEC ended their season last year with a 12-6 record in the highly competitive Commonwealth Coast Conference, picking up wins against Bowdoin and Curry. The Golden Bears past perfonnance is not necessarily indicative of a loss for the Minutemen. WNEC is dressing just four seniors, putting the experience advantage in the hands of the senior-heavy UMass roster.

Meanwhile the Minutemen cannot rely on Keene State to have issues with inexperienced personnel. The Owls are dressing nine seniors this year, and after a 13-6 finish to last year's season, Keene State is demanding respect around the Little East Conference.

Co-captain Brendon Eckhoff is aware of the challenge the upcoming tournament presents, however Eckhoff is preparing for this weekend like it's just another day of lacrosse

"Both Keene and WNEC are really good programs," Eckhoff said. "It's hard to know what the weekend will bring, but we're just going into it as another chance to play more lacrosse."

Eckhoff has been on an offensive tear this year, scoring three goals in UMass' victory over Rhode Island earlier this month.

The co-captain, however is quick to give credit to the other members of the Minutemen offense. Much of the co-captain's confidence comes from senior midfielder Jeff Capello

"Capello is one of our best shooters with the fastest shot on the team," said Eckhoff.

Along with Capello, seniors Mike Baker and John Farquharson are some of UMass' most dangerous threats in the offensive zone.

"Baker is a real threat on the crease. If he gets the ball you can count on it going in the net," added the co-captain.

On the other side of the field, the Minuteman defense has been in transition this season. Junior Julian Miller has taken over goaltending duties for the Minutemen, while Morsi continues to be a dominant presence as a defenseman.

"Morsi takes it upon himself to do much of the leg-work behind the scenes to make sure the team continues to function," said Eckhoff.

The tournament will provide a setting for many of the new starters to prove themselves, as well as an opportunity for younger players to earn their way onto the starting roster.

Chris Gardner can be reached at cgardner@student.umass.edu.

Do you guys know about T-Rex's Three Laws of Parties? I hope you do, because oh snap! This dude just went eponymous!
T-REX'S THREE LAWS OF PARTIES
Law one: a sweet party may not injure sexy times or, through inaction, allow sexy times to come to harm. Law two: a sweet party must allow admittance to any sentient being who is totally sweet, except where such admittance would conflict with the First Law. Law three! A sweet party must protect its own existence as long as such protection does not conflict with the other Laws.
Aren't these just super-fictally altered Asimovian laws of robotics?
How is that a bad thing? Hello?! The laws worked for friggin' ROBOTS.
In fiction!
In real life they're super vague! How does a robot classify "harm"?
But identifying sexy times at a party is EASY, Utahraptor! Any sweet party that obeys my laws is known as a T-Rexian Party and it has my full support, okay? AND they get my stamp of approval too:
T-REX STAMP OF APPROVAL
I can't see that I ass-ume you're imagining

Dixon and Co. earn big victory over Rams

By Scott Cournoyer
Collegian Staff

The Massachusetts tennis team (2-0) dominated Rhode Island last Wednesday, 6-1, winning all three doubles matches and five of six singles.

"I'm very proud of them," UMass coach Judy Dixon said. "I think we're finally winter-ready."

With doubles play remaining a big question heading into the match, senior Candynce Boney and sophomore Julia Comas set the tone early, winning 8-5.

"Our seniors definitely stepped up and brought in a ton of energy early on," Dixon said. "They know how important these matches are, because they set us up for the future."

Other doubles teams in senior Tanisha Hodgson and freshman Jessica Podlofsky (8-6) and Kaitlyn Carpenter and Jocelyn Providence (8-0), won their doubles matches convincingly. Dixon believes that her players are starting to finally come together and that her younger players are learning how to play UMass tennis.

"I think Jocelyn's been huge for us, playing consistent and the way she needs to play to help the team," Dixon said. "Jess has come in as a freshman and really provided us with that depth needed to beat teams like Rhode Island."

With freshman Yuliana Moyl out again with illness, everyone moved up a spot in the lineup, meaning Comas once again competed at the No.1, but lost to the Ram's Pam Emery in straight sets, 6-2; 6-2.

"[Julia]'s had to step in this season and compete at the No. 1 for us which is always tough when you have other players out," Dixon said. "She works hard, and when called upon, she gives us the best effort she possibly can, and I appreciate that as a coach."

The rest of the team came away victorious in singles, with only one match coming close. Freshman Clara Matias again was pushed to the limit, as she was against Fordham the match before. After going into a tiebreaker, Matias took the first set, 7-6, then the next set at the same score.

"She played another close match," Dixon said. "She's really young, but is showing a lot of grit, standing tall and not backing down."

Boney competed at the No.2 and won in straight sets, 6-2; 6-2, providing the spark near the top.

The bottom half of the lineup produced encouraging results, playing to Dixon's philosophy of winning from the bottom-up.

"In college tennis, you have to work from bottom to the top to be successful, in terms of winning from your number six, to your number one," Dixon said. "Most teams aren't as successful in playing this way, but we're lucky that we have a lot of depth, allowing us to work that way."

Carpenter won with ease, 6-0; 6-2, at the No.4. Podlofsky and Providence, competing at the number's five and six cruised to their own victories, winning, 6-0; 6-0, and 6-0; 6-2.

Dixon always looks to improve, but believes that she finally has her set double combinations for the rest of the season, hoping that the energy and leadership continues to set early tones in upcoming matches.

"It's really important to come out strong every time," Dixon said. "Our seniors really provided what we needed early on ...I feel like we're winter-ready, our combos are set ... With just over three weeks left of the fall season, this is where we fine tune our skills, and I think we're starting to live up to our potential."

Scott Cournoyer can be reached at scournoy@student.umass.edu.

Senior Candynce Boney prepares for a shot in a match last season. Boney, along with Julie Comas won their doubles match 8-5 last Wednesday against the Rams.

Members of the UMass tennis team observe their teammates in a match last season. UMass defeated URI last Wednesday 6-1, winning all three doubles matches and five of six singles matches.

Minutemen claw with Wildacats

UM takes on UNH at Gillettee Saturday

By Jay Asser
Collegian Staff

The Massachusetts football team will look to have a short memory as it meets New Hampshire in the inaugural Colonial Clash in the first-ever match-up between the two teams at Gillette Stadium on Saturday.

Despite the building anticipation and likeliness that this weekend's crowd will set a record, UMass coach Kevin Morris is getting his team to concentrate on the Wildcats (4-3, 2-2 Colonial Athletic Association).

"Well, it's UNH, that's what we're thinking about, that's what we're focusing on," Morris said to UMass Athletics. "That's always a lot of excitement, it's the New England rivalry and it's been a great game year after year. It's going to go right down to the wire and our kids are ready for a big one, we need to bounce back after last week, so we're excited about playing."

The No. 12 Minutemen (4-2, 2-1 CAA) are coming off a last-minute heartbreaking loss to Richmond on homecoming weekend. Despite failing to complete a pass until the final drive, the Spiders offense put together an impressive game-winning march to defeat UMass, 11-10.

No. 10 UNH, meanwhile, is looking for its third-straight victory after defeating Richmond, 17-0, on Oct. 9 and James Madison, 28-14 last week.

The Wildcats outscored the Dukes, 18-0, in the second half to earn their

Defensive end Courtney Jackson makes a tackle against the Spiders Saturday. UMass heads to Gillettee to face UNH Saturday.

RB Griffin embraces role with new team

By Dan Gigliotti
Collegian Staff

On an average Sunday during the fall semester, Northeastern University football players gathered for a meeting on the basketball court, as they customarily did in the day or two following each game.

Players chatted familiarly with each other, cracking the usual jokes while sharing stories about their weekends. They awaited the arrival of their coach for what they assumed was a typical recap of their most recent game, a 33-27 win over Rhode Island in their season finale on Nov. 21 of last season.

Junior running back John Griffin arrived at the gym as he did in week's past, expecting an assessment of his own and the team's performances amidst analysis of game film.

Yet, something about this meeting seemed a bit peculiar.

On this day, Huskies coach Rocky Hager was not in attendance. Instead, athletic director Peter Roby came prepared to speak to the players about something, alarming Griffin and his teammates that something may be wrong. Perhaps, he thought, this wasn't going to be a normal meeting after all.

Griffin believed that Hager might have been let go.

After all, the Northeastern football program had suffered six-straight losing seasons.

As Roby entered the gym, the jovial players began getting anxious until they

Terriers head to Amherst Fri.

Teams meet for 2nd straight week week at Mullins Center

By Steve Levine
Collegian Staff

At 7 p.m. on Friday, the Massachusetts' hockey team will christen the Mullins Center for the first time this season by welcoming in No. 8 Boston University for an always-exciting Minutemen-Terriers matchup.

UMass (0-2-1, 0-0-1 Hockey East) and BU (2-0-1, 0-0-1 HE) opened their conference schedules last Saturday, when the two teams met for the Terriers' home opener. The contest ended in a 2-2 draw and featured the collegiate debut of UMass rookie goaltender Jeff Teglia, who stopped 33 of 35 shots.

Teglia's debut came at the expense of senior goaltender Paul Dainton, who is still recovering from injury. It is unknown who will get the start on Friday.

On Saturday, BU jumped out to a 2-0 lead in the first 11 minutes. After a scoreless second, UMass responded with two goals in the third from sophomore defenseman Darren Rowe and senior forward Marc Concannon.

The power play has been a problem for the Minutemen so far, who are 2-16 for the season on the man advantage. After losing key power play members from last year, UMass coach Don Cahoon has yet to decide which forwards will start power plays this year. Cahoon plans on starting defensemen Rowe and junior Michael Marcou on the blue line on the power play.

UMass' penalty kill has been effective of late, going 8-10 in its previous two games including a 4-4 effort against BU.

A main concern for the Minutemen is their uninspiring first period play. In three games this year, opponents have outscored UMass, 6-0, in first periods. The same cannot be said about UMass' performance in the second and third periods, outscoring opponents 4-3 and 5-3, respectively.

The Minutemen cannot afford to fall behind early to the Terriers, who, like always, feature some of the most skilled players in the country.

BU's Joe Pereira, a senior forward and brother of UMass' freshman forward Mike Pereira, was named co-captain of the Terriers for this season along with junior forward Chris Connolly. Both have worn the 'C' very well so far, combining for four goals and three assists in three games.

The Terriers' David Warsofsky, a junior defenseman, currently shares the team-lead in points with freshman forward Sahir Gill. Gill has logged important minutes for BU so far, and figures to be one of the Terriers' marquee rookies this year.

With 13 freshmen, the Minutemen have no choice but to rely on their rookies to provide scoring production. So far, they have gotten just that. Three of UMass' top six scorers are freshmen, including forwards Pereira, Conor Sheary and defensemen Colin Shea.

Scoring might be hard to come by for the Minutemen on Friday. Already troubled with an ineffective power play and inexperienced forwards, UMass will have to beat BU goalie Kieran Millan, who became a staple in net for the Terriers ever since his freshman campaign in the 2008-2009 season when he went 28-2-3 en route to numerous accolades. Millan has stopped 52 of 57 shots in two games this year for a 1-0-1 record.

Although considered the underdogs of the contest, UMass' play in the Mullins Center has something to say about that. The Minutemen are 43-25-8 over their last 76 games at home, including an 8-7 mark set last year.

UMass expects a big turnout for Friday's contest. Last year, when the Minutemen upset the Terriers, 3-2, the Mullins Center drew 8,123 people out of a possible 8,387. Friday night could break that mark, creating an unforgettable atmosphere for the young Minutemen team.

Steve Levine can be reached at slevine@student.umass.edu.

MAXWELL STARR/COLLEGIAN

UMass coach Don Cahoon coaches practice earlier this year. The Minutemen host BU this Friday.

MAXWELL STARR/COLLEGIAN

Freshman goalie Jeff Teglia takes a break from practice. If Paul Dainton cannot play, Teglia will start against the Terriers.

With captain questionable against BU, Teglia possibile to start in place of Dainton

By Pete Vasquez
Collegian Staff

With goal keeper Paul Dainton's status still uncertain for Friday's home opener against rival Boston University, the Massachusetts men's hockey team is confident sticking a 19-year-old freshman in front of the net.

But Jeff Teglia, of Bloomingdale, Ill., is no stranger to such a daunting task. It was only last Saturday that he faced the No. 8 Terriers in Boston, in front of almost 6,000 people in his first career collegiate start.

The end result: 33 saves, just two goals allowed, first star honors and a well-earned tie.

"We got a major-league performance from him on Saturday night," UMass coach Don Cahoon said. "I'm really happy with the way he handled himself and the fact that he competed. I think he was the difference in us getting a point."

However, Teglia's performance did not come as a shock to his coach. In fact, Cahoon anticipated that his first-year goalkeeper would be successful.

"We knew when we recruited him that he was going to be very much prepared in marquee type matchups, coming off of a high profile program in the USHL like Omaha," Cahoon said. "So going into BU and for [him] to play as well as he did, although it was a surprise to outsiders, didn't surprise me so much because he's been in the big theatre before. He's played in front of 6,000 people on a pretty regular basis. Every game that they play in that league is pretty well orchestrated and well spirited."

With less than 20 seconds remaining in overtime, Teglia didn't budge when BU forward Matt Nieto raced toward him on a breakaway. The play mirrored Teglia's gritty performance the entire match.

After allowing two goals early in the first period, Teglia stopped the following 27 Terriers shots as his teammates ignited their first comeback of the season.

His efforts also earned him the honor of Pro Ambitions Rookie of the Week, as announced by Hockey East on Monday. Teglia is just one of three freshmen goalies in the conference and he leads his class with a 3.25 goals against average and a .895 save percentage.

"The proof is in the performance itself," Cahoon said. "We've gotten some great effort out of the freshmen as a whole. Teglia is the classic example."

Although UMass made it a point to get a goaltender in its recruiting process last season, acquiring Teglia was not easy.

"At the beginning of the year, our priority was we had to replace Dan Meyers with a player that was prepared to play in this level," Cahoon said. "It was the most critical position for us to secure. We didn't get it done, because there were three or four people involved in the process. We had to do visitations, determine who was available and what the interest on the other end was going to be. So [Teglia] wasn't taken care of until later in the year, because of the juggle that goes on with recruiting."

Last season, Teglia played in 45 games, playing 2,700 minutes in goal and posting a 30-10-5 record, boasting a 2.27 GAA and a .921 save percentage. Teglia also received the USHL Scholar-Athlete Award the same year.

Teglia will get the challenge of facing BU twice in two weekends when both teams square off on Friday night at the Mullins Center.

In the larger scope of things, it's likely that he will see a decent amount of playing time this year, even when Dainton comes back. If Teglia continues to impress the way he has so far, the Minutemen may have found their goalie for the next few years to come.

Pete Vasquez can be reached at pvasquez@student.umass.edu.

Cuero, Nagel and O'Connor rewarded Atlantic-10 accolades

By Stephen Sellner
Collegian Correspondent

Charlotte's Andres Cuero was chosen as the Atlantic 10 Men's Soccer Player of the Week, while Fordham's Julian Nagel and St. Bonaventure's Emmett O'Connor received the A-10 Rookie of the Week honors.

Cuero scored a pair of game-winning goals to help ignite the 49ers (9-4, 4-0 A-10) to a 4-0 start in conference play.

The free-kick score against George Washington and overtime strike at Richmond has Charlotte riding a six-game winning streak, while Cuero's two goals give him a total of four for the season, which leads the team.

Nagel's pair of assists sparked Fordham's undefeated week in league competition, as the freshman recorded the game-winning assist in a 1-0 triumph over Duquesne on Friday, before assisting the game-tying goal for the Rams (7-5, 0-2-1 A-10) in a 2-1 come-from-behind overtime thriller against St. Bonaventure on Sunday.

O'Connor tallied four points in St. Bonaventure's 3-0 beat down of La Salle.

The midfielder capitalized on a La Salle miscue, ultimately leading to his breakaway goal in the 13th minute of play. O'Connor added two assists in the SBU (7-6, 2-2-0 A-10) victory, giving him nine points for the season, good for second on the team.

A-10 play continues this week as teams continue to fight for the six spots in the conference championship.

Duquesne, Saint Louis Grab 1-0 Decisions

Duquesne claims its first A-10 victory of the season, blanking La Salle, 2-0 on Sunday.

Tyler Tompkins kicked off the scoring in the 21st minute with his third goal of the year, with freshman Simon Gomez credited with the assist. Stefan Lundberg sealed the Dukes' win on a breakaway goal in the 57th minute, with Gomez tallying his second assist of the contest.

Lundberg's four goals in 2010 places him second on the team, while Gomez' four assists is tops on the team.

Chris Torres earned his third shutout of the year, making five saves in the match.

Duquesne (5-6-2, 1-3-0 A-10) continues conference play with a showdown against Dayton on Wednesday, while La Salle (3-6-2, 1-2-0 A-10) travels to Richmond on Friday.

Saint Louis' Devon Newport scored his first career goal as the Billikens edged past GW, 1-0.

Newport scored in the 17th minute of the game off Alex Sweetin's team-leading third assist of the season, while Mark Pais earned the shutout on only his second start of the season.

SLU (4-5-2, 2-2-0 A-10) face a tough test on Friday night, as they travel to nationally ranked Charlotte, while GW (2-10, 0-3-0 A-10) hosts Fordham.

Xavier Wins Double Overtime Thriller Over Temple

Brandon Bucher found the back of the net in the 103rd minute to propel the Musketeers past Temple, 2-1 in double overtime.

The golden goal was set up on passes by Matt Walker and Luke Spencer, who found Bucher in the middle of the box for the game-winner.

Xavier (6-3-3, 3-1-0 A-10) took a 1-0 lead on Justin Jarvis' first goal of the season in the 72nd minute of play.

The Owls (4-6-2, 2-1-0 A-10) tied the contest with three minutes left to play on Cody Calafiore's penalty kick.

XU earned their third conference win of the season, placing them second in the A-10 standings behind Charlotte.

Xavier hosts St. Bonaventure on Friday night, while Temple hosts Massachusetts.

Murray sees jobs as key for state success

By Bobby Hitt
Collegian Staff

With the November 2 elections fast approaching, Lieutenant Governor Tim Murray will be turning up the heat on his campaign schedule, as he visits towns across the Commonwealth.

The incumbent Lt. Gov. spoke with the *Massachusetts Daily Collegian* late Thursday afternoon to talk about his work on Beacon Hill, and his future plans if reelected.

"My top priorities would be jobs, healthcare, and education," said Murray. "We will continue to focus on these issues if reelected."

According to Murray, he and Governor Deval Patrick have overseen one of the most accessible healthcare systems in the country. 80 percent of Mass. citizens are covered by the healthcare law passed under the Romney administration.

"We're going to work on making healthcare more affordable," said Murray. The Lt. Gov. seeks to bring all the "stake holders" to the bargaining table to negotiate reasonable rates. This will be made to include doctors, insurance companies, and government officials.

"[The people of the Commonwealth] cannot afford a double digit increase in their insurance payments every year," said Murray.

Murray started his political career in a two-year stint as a city counsel member in Worcester, where he spent his childhood attending public schools. He followed up that performance with a three-year term as mayor of Worcester, and subsequently tabbed as Governor Patrick's running mate in 2006.

"You can only change things by getting involved," said Murray, explaining his reason for running for public office.

Considering the recession during his term, Murray believes that the Commonwealth has faired well under his watch. He noted that Massachusetts has had the highest job growth rate in the country, and said that if he is reelected he expects this trend to continue.

Murray stated that over the past four years the state has invested in green energy, infrastructure, and the biotech industry.

According to Murray, the investments have paid dividends. The Patrick administration has supported five pieces of legislation incentivizing the growth of these industries, which Murray cites as the reason for a doubling of the number of jobs in these fields.

Murray also stated that the Patrick administration has "fought hard to increase funding in K-12 education."

In the realm of higher education, Murray and Patrick have supported the Bond Bill, which has helped fund construction projects in both public and community colleges across the Commonwealth. The $1.2 billion allotted by the bill was distributed in varying degrees to the construction projects of dorms and science facilities at 29 different public higher education facilities.

"[The bill] has funded $90 million of the $420 million Life Sciences Building at UMass Medical School," said Murray. He also noted that the Bond Bill helped fund a $100 million science building at Bridgewater State College.

According to Murray's opposing candidate for Lieutenant Governor,

Tisei wants aid for small businesses

By Bobby Hitt
Collegian Staff

Minutes after an interview with Lt. Gov. Tim Murray, the Massachusetts Daily Collegian spoke at length over the phone with state senator and candidate for Lt. Gov. Richard Tisei the running mate of Charlie Baker.

Tisei grew up in Lynnfield, Mass., and is now a resident of Wakefield, Mass. He has been in the state senate for over 20 years. Since 2007 Tisei has been the minority leader of the Massachusetts State Senate.

He and candidate for Governor Charlie Baker are making jobs and economic growth the purpose of their campaign.

Tisei has stated two main experiences that contributed to his political views.

The first was the disability of his sister, which gave rise to his belief in the government's role in helping those in unfortunate circumstances.

The second is Tisei's experience as the owner of a real estate brokerage company.

According to Tisei, full economic turnaround for the Commonwealth can only come from deregulation and tax cuts to small businesses.

"As a small business owner I was at ground zero of the economic collapse," said Tisei. "Over the last four years I've talked to a lot of people who have lost their jobs, their life savings and homes."

"They feel that government hasn't responded to things," continued Tisei.

In response to Murray's comments about the high rate of economic growth in Massachusetts, Tisei stated, "That's not true."

According to Tisei, who cited Department of Labor statistics, Massachusetts lost 27,000 jobs in Sept., the most since Michael Dukakis was governor.

"[The Patrick administration] has raised taxes eight times," said Tisei, who argued that these tax increases have cost the Commonwealth jobs.

"[Charlie Baker and I] want to establish a 5 percent tax across the board for sales tax, income tax, and corporate tax."

According to Tisei, these measures would make Massachusetts friendlier to businesses and lead to more competition.

Under the current administration, Tisei argues,businesses of all sizes do not feel comfortable hiring new help. He cited that unemployment is at its worst in 30 years.

Candidate Tisei is in favor of repealing the sales tax on alcohol, which is currently at 6.25 percent. He argues that liquor stores are being taxed twice, at both the wholesale level and the retail level.

"New Hampshire has no sales tax," said Tisei. "[Massachusetts residents] who live near the New Hampshire border will cross over to buy liquor."

Tisei contended that the Patrick administration has not been spending taxpayer money wisely, citing the $76 million Evergreen Solar in Marlboro. According to Tisei, instead of the company creating jobs in Mass., Evergreen Solar shipped its jobs to China.

"The governor should not be acting like a venture capitalist," said Tisei, who claimed that even the best venture capitalists back a successful company only 22 percent of the time.

If elected, Baker and Tisei plan to put a moratorium on all new regulation for businesses in Mass. and review regulations currently in place.

Tisei cited three examples of regulations he believes have hurt businesses.

The first is a redefinition of an independent contractor which, according to Tisei, makes it harder for companies to hire these contractors. According to

Murray remains focused on jobs

MURRAY from page 2

Richard Tisei, Gov. Patrick and Lt. Gov. Murray have overseen $140 million in cuts to education over the last two years. Murray claims that across the entire budget, education has been cut less than many other areas of the budget.

In a recent Collegian interview Green-Rainbow party candidate for Lt. Gov. Rick Purcell called Murray and Tisei "corporate candidates." Murray responded by stating that in Massachusetts it is illegal for politicians running for office to receive any money from corporations.

In his closing remarks over the phone Murray claimed that he and Governor Patrick managed to bring the Commonwealth of Massachusetts through the recession in tact.

"There are still too many people out of work," said Murray, who claims that despite the hurting economy Massachusetts has faired significantly better than other states in the Union.

The Lt. Gov. does not support any of the referenda up on the ballot this election season. In his view, if the sales tax on alcohol is repealed it would come at a cost of a cut in services, including education and police.

Bobby Hitt can be reached at rhitt@student.umass.edu.

Tisei talks more careful spending

TISEI from page 2

Tisei, under the current laws a company would have to hire the contractors as a full time employee and give them benefits.

The second example given by Tisei detailed inconsistency of zoning laws. According to Tisei, there are no standard regulations for septic tanks in the Commonwealth, and towns have used it to prevent housing development.

Lastly, Tisei stated that there is no standard regulation for zoning of multi-family homes, which has caused Mass. to be near the bottom of the country in amount of housing permits given out.

"Massachusetts is not headed in the right direction now," said Tisei. "The governor has overspent more than the state takes in."

"The business climate is terrible," Tisei went on. "If people want four more years of that they should vote for Deval Patrick."

Rick Purcell, the Green-Rainbow party candidate for lieutenant governor, criticized Charlie Baker for cutting jobs when he was CEO of Harvard Pilgrim.

Tisei responded to this criticism by claiming that Baker did what he had to do to save the company.

According to Tisei, Baker had to lay off 2,500 employees and close Harvard Pilgrim operations down in Rhode Island.

"[Baker] was able to save the company in 10 years," said Tisei, "Now Harvard Pilgrim is the number one health insurance provider in the country."

Furthermore, Tisei believes, the healthcare system should be made more affordable so small businesses can afford to cover their employees.

Bobby Hitt can be reached at rhitt@student.umass.edu.

Point-Counter-Point

The quest for the State House

Tim is a fearless fighter

Shanaz Kerr

As November draws nearer, I find myself getting more and more excited for the upcoming gubernatorial election. As students we sometimes live in the college bubble, oblivious to the world that surrounds us, but this election is worth waking up for.

As a current senior and soon-to-be Massachusetts taxpayer, I know my luck is running out and college will soon draw to a close, so I've studied up and done my homework in an effort to educate myself so next year I can be a happy citizen of the commonwealth.

The 2010 gubernatorial election is important considering our state's current financial situation. And although most tend to favor the party with which they affiliate I urge a more open-minded approach. Traditionally, independent candidates are over-looked — but not this year, because our independent candidate, Tim Cahill, who currently doubles as our State Treasurer, has Massachusetts running in his blood.

Cahill has served our state since 2002, and has proven himself to be fighter for the people. He has had a strong hand in governing our state and therefore understands our financial needs better than any candidate in the race. He runs one of the most successful lotteries in the country. If you attended a high school that has recently been renovated or rebuilt, Cahill has also been behind that. And if you're really upset about the increase in taxes, rest assured, he's not behind that. He has established himself as an individual by freeing himself of the restraints set by associating with a particular political party and instead leads this state by drawing on his morals and values. He is the only candidate that will fight for us, soon-to-be-graduates looking for a job. He is fearless, and this November you should be too — so lead, don't follow — it's time to vote Tim Cahill for Governor.

Shanaz Kerr is a University of Massachusetts student. She can be reached at skerr@student.umass.edu.

Jill Stein for Governor

April Lachapelle

With the rest of the world "going green," shouldn't you consider the same on November 2? Green-Rainbow Party candidate Jill Stein firmly believes in the voices of real people on real issues on which the other candidates shed little light.

As a doctor, she advocates overall health physically, economically and democratically. She is a strong supporter of sustainable living and believes that local farming will lead to better nutrition and healthier lifestyles. A cleaner, better, and greener future can be possible through her progressive plans for the people of Massachusetts.

Many people are uninformed or ignorant of the detrimental effects of our energy crisis.

Biomass energy has been viewed as a carbon neutral source of energy, but this is far from the truth. Biomass requires a large increase in logging and the burning of the wood not only releases air toxins, but also releases more carbon dioxide per unit of energy than coal. The long term effects of this practice are rarely examined, as it is harmful to the soils and natural agricultural processes. She hopes to incorporate more renewable energy sources into our state, such as solar, hydro, and wind power and plans to work closely with the Department of Environmental Protection in order to do so. "I will make it a priority to pursue decisive energy conservation efforts, to improving efficiency, and to investing in environmentally sound renewable energy. Biomass must play no more than a very limited role in our energy future."

College students should look to Jill Stein concerning her views on higher education. As a Harvard graduate, she realizes that everyone deserves the right to an education. She plans to put an end to the continuously rising costs and fees within public universities. She is in favor of changing the ways that MCAS scores are used in elementary education, as they have a tendency to focus more on higher scores instead of the individual students. Primary education is the foundation for the rest of these children's lives; we should be in support of allowing them to participate in the process of learning instead of focusing too intently on the results.

She opposes big business and believes that small communities will thrive if small businesses are provided the funding to make it possible. She hopes to provide 50,000 green jobs in small communities in order to reduce the unemployment rate to stop the increasing gap between rich and poor. She doesn't advocate funding for the multibillion dollar a year war in the Middle East and believes that we should bring the soldiers home and fix our economy here.

One issue barely touched by the other candidates is a sensible reform on marijuana laws. She is in favor of the legalization of marijuana in Massachusetts, and advocates doctors prescribing medical marijuana for those who benefit from its use. Her views on marijuana reform are clear: "Our current approach to the regulation of marijuana is a failure. It has resulted in a massive black market that is creating violence in our communities and pouring hundreds of millions of dollars each year into the pockets of criminal supply networks ... And the most that can be achieved is to keep a few people from purchasing an herb that appears to be much less harmful than alcohol or tobacco."

Running alongside Deval Patrick, Tim Cahill and Charlie Baker, Green-Rainbow Party candidate Jill Stein goes the extra mile to improve the overall well being of the people of Massachusetts. She ties together the issues that affect us; from environment sustainability to general health to stimulating economic growth; all to to benefit the people.

Democracy once was a way to voice the opinions of the people, and Jill Stein does exactly this. She is in support of the people and provides real solutions to real problems. Referring to the current government positions, she states "Business as usual has not been delivering for the ordinary people." Yes, ordinary people like you and me.

Jill Stein will be speaking at University of Massachusetts on October 28 at 4 p.m. in the Student Union Ballroom, endorsed by the UMass Cannabis Reform Coalition. All are encouraged to attend and ask questions. The elections are November 2.

April Lachapelle is a UMass student. She can be reached at alachape@student.umass.edu.

"I disapprove of what you say, but I will defend to the death your right to say it." - Evelyn Beatrice Hall

The quest for the State House

Baker butchers bureaucracy

Dimitriy Schapiro

Year after year, our university faces enormous budget problems. The buildings have unrepaired leaks and our programs are vastly underfunded. To many, it may seem like the politicians in Boston have forgotten us.

In a state where Democrats pay so much lip service to public education, one might think we would receive more funding than large public universities in conservative states such as Texas or South Carolina.

Unfortunately, this is not the case.

Our lack of funding does not only occur here at the University of Massachusetts, but affects every level of Massachusetts public education. Even worse, state agencies such as the Registry of Motor Vehicles are notoriously inefficient and require lots of red tape and unneeded fees to get anything done, many of which don't need to exist and don't in many states that are faring far better in this economy.

Taxes on businesses are some of the highest in the country and a majority of the people we educate at the high level our prestigious Massachusetts institutions allow for go to other states with better business environments.

If this picture is bleak, another term of Governor Deval Patrick, who has so far been ineffective, would only further destroy hope for the future of this state.

Deval Patrick is seeking reelection and leading, according to the polls, even though his administration has been a complete failure. The Democrats' love of big government and the complete lack of checks and balances from Republicans, who hold only 13 percent of the seats in both houses, have caused our government to spend its inordinately high tax revenue, giving Massachusetts the nickname "Taxachusetts."

If you believe that these polices aren't debilitating then you also believe that corporate executives are incredibly stupid and don't know what to do with their investment. There are whole colonies being set up in Southern, Midwestern and some Western states that are populated solely with Northeast, eastern Midwest and Pacific Coast expatriates. The companies are leaving these "old" places of business in search of the greener pastures provided by state governments that offer them incentives; the skilled workers of America are forced to follow.

This wouldn't happen if Massachusetts was able to provide these firms with the same benefits and be competitive for industry, since we already have a structural advantage with our highly educated population. As we have seen, Governor Patrick will spend more time pandering to union thugs, bloating government agencies with political patronage and begging the president for more bailouts. All the while distracting the efforts of the legislature and occupying the voters' time with such sham proposals as casino legalization — something that will not make a drop of difference in our unemployment rate. It is time for Massachusetts to follow the break with tradition started when we elected Scott Brown to the United States Senate and dismiss Governor Patrick's administration.

Lawyers, like Governor Deval Patrick, make up a large percentage of politicians and might be effective as legislators, but being a governor is an executive position, which I believe should require executive experience. Deval Patrick lacked executive credentials before becoming governor and having been in the business of law, had no legislative experience either.

The way the state is being run through diplomatic deals shows this tendency. Conversely, Republican nominee Charlie Baker and his running mate, Richard Tisei, have both extensive legislative and executive experience. Charlie Baker's takeover as CEO of failing Harvard Pilgrim Health Care in 1999 and its miraculous turnaround through restructuring is the greatest testament to his executive skill. From the very beginning of the campaign, both he and Tisei stressed the need to restructure Massachusetts' government.

Inefficiency is caused by pervasive redundancy in the state bureaucracy. Baker and Tisei vow to put an end to this and privatize certain jobs the state currently does, which could be better handled by private firms due to economies of scale. Some may say that cutting government jobs will cause higher unemployment. On the contrary, these private firms will be able to hire more employees, even the same ones that may have been let go from their nice government jobs. The state will then reap the benefits of streamlining, enabling it to pay off its debt.

Therefore those at our university who are concerned about losing their jobs in these cuts have no reason to fear. In universities such as ours, elementary, middle and high schools throughout the state, where funding currently gets lost in wasteful programs and to bureaucrats' salaries at the capital, buildings could be rebuilt, research will be funded, professors and teachers could be paid more and students would have all of the after-school programs that are such an important part of our country's education system.

Baker and Tisei have promised to cut taxes that are currently preventing businesses from making Massachusetts their home. Making Massachusetts a haven for firms and start-ups again, which include those firms the growing medical and "green" technology fields, would improve our unemployment rate and allow us to keep the highly educated citizens whom the state has already spent resources educating within our institutions.

Charlie Baker and Richard Tisei are Republicans and although they are sympathetic with many of the complaints of the Tea Party, their positions are focused on improving how the Massachusetts government works. Their ideals resound with all Republicans, Tea Party or otherwise, independents and those Democrats who feel the pain of this economy and feel that our state is on the wrong track with Patrick's Administration. Charlie Baker and Richard Tisei are highly educated, loyal Massachusetts citizens, not the clowns that are pushed through by the Tea Party, like Christine O'Donnell of Delaware or Carl Paladino of New York, among many others. Charlie Baker's election as Governor of Massachusetts will put checks and balances back into Massachusetts' runaway politics and create the environment that will get the state out of debt and bring it back to the foreground as an economic competitor.

Dimitriy Shapiro is a Collegian columnist. He can be reached at dshapiro@student.umass.edu.

Stay the course with Deval

Mike Fox

What ever happened to facts? I know politics have long been derided for lying and deceitful action, but for awhile at least, people accepted reality and made judgments based on it. If something works, it works. If someone does their job successfully, they did their job successfully. Sure, statistics can be massaged, but at a certain point, there is an unquestionable reality. Former Senator Daniel Patrick Moynihan put it simply, "Everybody is entitled to their own opinions, but not their own facts."

Through a perfect maelstrom of discontent, frustration, media manipulation and preying on people's emotions, Republican candidates around the country have convinced people to ignore facts and accept conjecture or even outright opinion as reality. For example, if a conservative pundit says Democratic politician is failing at his job because the ideals of the Democratic Party are doomed to fail. Suddenly, people just start believing this without any real evidence.

Here in Massachusetts Governor Deval Patrick and Lieutenant Governor Tim Murray have performed an incredible job surrounded by circumstances which have plagued elected officials across our country. We are growing up under the specter of one of the worse economic crises in United States history, due to no small part of the previous Republican presidential administration, but Massachusetts has persisted through it with incredible results.

The Bureau of Labor Statistics has released data showing that Massachusetts is leading the nation in job growth. Let me repeat that: We are leading the nation in job growth. Nearly 65 thousand jobs have been added to the state's economy since December 2009.

A recent University of Massachusetts report stated that the Massachusetts economy is growing at a rate twice the rest of the nation. And we're supposed to believe that the Patrick administration is failing at managing our state during this crisis. It seems pretty damn obvious that they're doing one of the best jobs in the country and considering the circumstances; I will take the best job over with something working then hollow anti-incumbent rhetoric that is simply trying to capitalize on popular sentiment.

Outside of basic economic indicators, Governor Patrick's record speaks for itself. Criminal Record Offender Information, or CORI, reforms have made it easier for people to move on in life and rehabilitate from past mistakes. People who need jobs, who need stability, now have a better chance at being welcomed back into society. This shows a level of compassion and understanding of the circumstances of individuals rarely shown today by elected officials. This is real change.

Massachusetts' K-12 programs were among the top-rated in the Obama administration's "Race to the Top Program." The program awarded grants to states whose students performed the best and were able to meet core curriculum guidelines chosen to measures attainment of practical skills and deeper academic knowledge. With questions over the effectiveness of public education brewing through the attention to the documentary "Waiting for Superman" among other pressing studies, Massachusetts has shown the nation that it is a leader and provides a working model. Not to say the fact that a commitment to public education is essential for building a stable future.

People are moving back into the state and higher proportions of students are staying in Massachusetts, not leaving "Taxachusetts." The Patrick administration has figured out how to use state money wisely and effectively to make Massachusetts thrive and be a place to live.

Considering that while I was growing up, our state had a reputation for a population in exile and businesses fleeing for all other points, the facts again speak for themselves. Not to mention, Deval Patrick has been the first Democratic governor since Michael Dukakis in 1990 and suddenly the state's economy is working. And it hasn't been through cuts, it has been through responsible and deliberate leadership.

A while ago I realized that if I were to run for office against someone doing their job well, it would demonstrate a certain selfishness or at least egotism.

I do not doubt that Charlie Baker is an intelligent and capable man, but the question stands that what kind of doublethink must be employed to ignore clear signs of success and call someone a failure simply for their beliefs.

Even though I consider myself liberal and I am a registered Democrat, I understand that conservative ideals have as much of a place in society as liberal ones. They can act as an effective check when governance becomes too radical and starts hurting those being governed. These are difficult times, but Governor Patrick's actions are doing nothing, but helping the people of our state as much as possible.

Halfway through my last fall semester of college, I am a bit afraid of the world I am graduating into. So much of the country is suffering and change seems a little bit more difficult and something needing real work and progress now, not just hanging a poster or decrying beliefs. Income disparity is growing, luxuries are fading, and intelligent choice is becoming more and more of a necessity over actions that bring emotional fulfillment but no real results.

When all signs point to Massachusetts persevering better than almost all states, credit is due where credit is due. Governor Deval Patrick, Lieutenant Governor Tim Murray, and the rest of their administration have and are providing us with the leadership to make the future more secure each day.

arts&living

YOUR WEEKEND GUIDE TO ART, MUSIC, FILM & CULTURE

ARTS@DAILYCOLLEGIAN.COM

Josh Ritter & the Royal City Band
PG. 7

Something smells Phishy

By Ben Silverman

Phish will be playing a two-night concert at the Mullins Center on Saturday and Sunday as part of their 3.0 2010 tour. Phish is a four-piece band from [illegible] with a sound that ranges from progressive rock to jazz-fusion and beyond. This will be their first Mullins Center appearance since 1995.

Phish is known for popularizing long-form, elaborate light shows and stage antics, but what sets them apart the most from other "jam bands" like Moe. or The Grateful Dead is the classical form of their compositions. Guitarist Trey Anastasio is a classically trained musician, and this training can be heard in many of his compositions such as "You Enjoy Myself" and "Reba." While Phish is sometimes referred to as a continuation of The Grateful Dead because of their live improvisation, their classical and jazz-fusion style is often compared to that of Frank Zappa, Igor Stravinsky, Yes and The Mahavishnu Orchestra.

Formed in 1983, Phish has dramatically evolved over the decades. Early in their career, they play old bebop standards as avant-garde and progressive compositions, such as "Dave's Energy Guide" and "Fluffhead." By the early 1990s, Phish began adding more elements of rock to their repertoire, and by the mid 1990s, they had reached a peak in the energy of their jamming, heard in shows such as Halloween (1994) or Madison Square Garden from Dec. 31, 1995. Phish jams in this era were furiously energetic, cohesive, and moving, using many elements of jazz-fusion. The band had perfected their unique brand of jamming, which consisted of falling into louse, frenetic, musical chaos, followed by gradual molding of each instrument's part back into the structure of the jam before climaxing in a sustained, triumphant release.

Anastasio crafted his now famous style consisting of abstract tonality, ascending chromatic passages, feedback, climaxes, teases, and sustain, using his unique, rich, semi-hollowbody, tube-amp tone.

By 1997, Phish began to incorporate more elements of funk into their songs, and played more groove-oriented jams (check out The Morna Dance from Oct. 3, 1998 or Down With Disease from Oct. 31, 1996). Phish celebrated the millennium by playing Big Cypress, an 85,000 person festival in Florida, but soon after, announced their first hiatus.

After working on solo projects for two years, the band members reunited on New Year's for two more years of tours. Their performances during this era were marked by flubs and mistakes, and was much less tightly performed than before, possibly due to Anastasio's recent heroin use. Phish continued for two more years before finally calling it quits after performing at Coventry, a 2004 Phish Festival with over 65,000 fans.

Over the next five years, all four band members' side projects continued to produce music and tour, but amidst the touring, Anastasio was arrested for multiple drug-related infractions. After rehabilitating, practicing, and composing, he was ready to reconstitute the band, which eventually took place in March of 2009, and lasted three nights at the Hampton Coliseum in Virginia. Since then, the band has been touring almost every season, selling out arenas around the country. Phish's new sound is [illegible] tired by their strict attention to details in compositions. Anastasio's new tone, and the overall cleanliness, sobriety, and professionalism of the performance, [illegible] which they almost never make mistakes or lose their energy.

Phish is famous for its elaborate [illegible] audience participation, and running themes throughout a show. During a part of "You Enjoy Myself," Anastasio and bassist Mike Gordon always do a choreographed dance on trampolines, in "Divided Sky," Anastasio and Gordon jump in a synchronized pattern while playing in odd time signatures. In a tour in 1995, Phish played games of [illegible] during the festive audience. Moments after the [illegible] were rescued, Phish played "Light." [illegible] from the Bottom," and "Free," and [illegible] cover a different famous album [illegible]

But above all other features of a Phish [illegible] are the lights, programmed by Chris Kuroda, [illegible] referred to as Phish's fifth member. Kuroda has been working with the band for decades, [illegible] the light show with both the compositions [illegible] improvisation, creating chaotic, colorful strobe effects for building tension, white fluid lights for sustained releases of tension, and gentle, [illegible] for mellower, soothing sounds. Phish [illegible] Perhaps [illegible] interesting set lists, full of surprises, [illegible] play at the University of [illegible] Perhaps we should [illegible] at the University of Vermont, or maybe [illegible] the Mullins Center to a relatively [illegible] and intimate 10,000 [illegible] year, the more [illegible] they [illegible] popular here for us, the sooner they'll return to [illegible]

Ben Silverman can be reached at [illegible]

Josh Ritter joins up with Winterpills

By Angela Stasiowski
Collegian Staff

This Saturday, Oct. 23, Northampton welcomes Idaho's Josh Ritter, who will be supported by the Northampton-based Winterpills for an evening of unforgettable folk.

Fronted by singer-songwriter and guitarist Philip Price, the four-piece opening act performs a storm of poignant folk rock. Earning comparisons to the likes of Elliott Smith, Red House Painters and Simon and Garfunkel, the band has clearly come a long way since their days in growing up in the Pioneer Valley.

In a recent interview with the Daily Collegian, Price discussed the release of their latest EP, "Tuxedo of Ashes," and the promise of a new album on the horizon.

The Winterpills are a band based on harmonies, but no song displays this more powerfully than the EP's title track. The song concludes in a gorgeous conglomeration of familiar voices, including Grant-Lee Phillips and Erin McKeon.

"When we wrote the song, I had this idea of a chorus happening at the end, but I couldn't really get everybody together all at once," Price explained. "I just had people come in one at a time to record their tracks in our studio and asked some of the people on the other side of the country to email their tracks in. It just sort of built over the course of a couple of months until we had enough tracks, and it sounded like a lot of voices. It is a lot of voices."

The EP is a gold-star effort and a sure sign of things to come, especially with a new record in band's the near future.

"We're going right from this to recording a new full-length album. We've got a whole album ready to go. We haven't started recording it yet, but it's already written and we're going to be doing that over the winter," said Price regarding some of the new material the band has played at recent performances. The new album will mark the Winterpill's forth full-length studio release.

Of course, one cannot forget the true talents of the evening's headliners, Josh Ritter and the Royal City Band. The alternative-Americana outfit is fronted by the guitar-toting Ritter, who is now a veteran of the touring scene.

His style is easy on the ears, with a sound that is often compared to the likes of Bruce Springsteen and Bob Dylan. Surely, Ritter must blush at the comparisons, as these American greats were his inspiration as a young man.

The product of two neuroscientists, Ritter was not always on track to become a musician. However, he began his musical career on the lute after being exposed to the likes of Dylan's "Girl From the North Country" as a young child. Thankfully, Ritter graduated to guitar and became the singer-songwriter he is today, though he does break out the lute from time to time. In fact, Paste Magazine named Ritter one of the "Top Living Songwriters of All Time"

Ritter has released five studio recordings over his 13-year career. His latest album 2010's, "So Runs the World Away" cements the songwriter's status as one of the modern greats of the music industry.

Tracks like, "The Curse," about the burdens of eternal life in the eyes of an unlikely ancient Egyptian protagonist, show off Ritter's stunning knack for songwriting. Paired with a sad-eyed piano hook, the song is sure to makes hearts melt.

"Change of Time," a single off Ritter's latest album trumps all other songs on the record. The song combines pop approachability with the kind of inherent musical ease that can only be achieved through experience.

Ritter's songs have also been featured on many movie and television soundtracks including "House, M.D." The musician's gift for words does not just end with songs, however. His first novel, "Bright's Passage," is due for distribution next summer.

It is rare to find such a well-rounded show in which both headliner and opener simply cannot be missed. This is one performance you will want to get to on time.

Josh Ritter and the Royal City Band will be performing at the Calvin Theater on Saturday, Oct. 23 following an act by the Winterpills. The show starts at 8 p.m. and tickets range from $25-$35.

Angela Stasiowski can be reached at angelas@dailycollegian.com.

Contemporary folk singer-songwriter Josh Ritter is performing at the Calvin Theater this Saturday night at 8 p.m. The Northampton-native Winterpills will open the show.

'Shadows' deeper than cliché thriller

By Andrew Cogan
Collegian Correspondent

Despite what James Bond would have us believe, the real-life games of espionage often have little to do with fast cars, beautiful women, and unnecessarily large explosions – but that doesn't mean the work is dry, either. As Mark Lamster's new book "Master of Shadows" attests, international espionage can be deeply engrossing and entertaining in its own way, especially with the unusual twist that Lamster puts on it.

"Master of Shadows," is by no means an ordinary spy-thriller. It's a true story that takes place in late 16th to early 17th Century Europe – no fancy gadgets to be had here. But the really interesting thing about "Master of Shadows" is the spy himself – Peter Paul Rubens, the renowned painter considered at the time to be the greatest artist of his day. His skills with a brush gave him access to the most prestigious courts in Europe, and earned favor with powerful monarchs and political leaders. Combined with his natural diplomacy and keen political astuteness, Rubens was the perfect spy.

However, being the perfect spy in this case might not seem all that grand. The espionage Rubens practiced basically amounted to a lot of letter writing, waiting a long time for a response, and then discreetly traveling to foreign cities to negotiate with other diplomats. These acts in themselves do not seem that exciting. Or do they? That depends on whether readers appreciate the enormous stakes at hand, and also the tremendous skill and tact required by Rubens to mediate clandestine negotiations between say King Philip IV of Spain and King Charles I of England.

For anyone interested in the subtle art of statecraft and diplomacy, "Master of Shadows" is an excellent read. The book talks in great detail about the nuanced and precarious relationships between European governments and spies like Rubens, operating on their behalf. Many of Rubens' original correspondences are referenced and analyzed in order to explain what he was trying to accomplish and how.

To support this analysis, the book takes a comprehensive view of history. It paints a fascinating and thorough picture of the social, political, and religious landscapes of the time. This is not only useful context for Rubens' exploits; it also serves to broaden understandings of what life was like when he was alive. There is so much to learn from "Master of Shadows" about history and politics it falls in the category of works like Machiavelli's "The Prince."

Another of the book's main strengths is Rubens, a compelling and charismatic hero. Lamster does an excellent job of capturing his charming personality. Born into a struggling middle-class family in the Spanish Netherlands (modern-day Belgium), he rose to the upper echelons of European aristocratic society solely on his own artistic merit. All the while he remained a steadfast advocate for humanist and progressive ideals. He devoted his diplomatic career to securing peace between England, Spain, and Holland, and a treaty to end the devastating Eight Years' War that ravaged his homeland.

Besides his moral character is, of course, Rubens' art. His painting is a major subject in the book, since his diplomatic and artistic careers were so intertwined. All of his major commissions and greatest works are analyzed and explained, from his days as a humble court painter in Italy, to when his workshop was the most renowned in Europe. Alongside his art, the book gives a full account of Rubens' life, enough to be considered a comprehensive biography on the man.

Thanks to the book's unusual premise "Master of Shadows" caters to a wide variety of interests, but though it's full of interesting information, it's most likely to appeal to aficionados of its three main subjects: diplomacy, history, and art. Other readers may find the book inaccessible just because of the sheer quantity of information to wade through. The writing is generally clear and easy to understand, but it's sometimes weighed down by historical names, dates, and the like. Furthermore, the book has a distinctly scholarly tone. It doesn't exactly qualify as leisure reading.

Even so, "Master of Shadows" is still an achievement. It recovers the life and reputation of one the greatest artists in history. As a painter, Rubens has been overshadowed by his contemporary's like Rembrandt and Caravaggio, and his important role as a diplomat is typically just a footnote in European history, if that. Though unquestionably a genius, his extravagant and sensual allegorical paintings appeal almost exclusively to the tastes of his age. Most likely nothing can be done to restore Rubens' popularity, but his masterful skill is better appreciated thanks to this book.

The one thing to remember about "Master of Shadows" is not to be fooled by its melodramatic title. Rubens bears exactly no resemblance to Bond, and the book is devoid of all the cheap entertainment the name implies. What the book does have though is subtlety and complexity, and a wealth of information on politics, history, and art. Even if this makes for a challenging read at times, "Master of Shadows" has plenty to offer in reward.

Looking to remain unbeaten on road

By Steve Levine
Collegian Staff

The Massachusetts soccer team looks to continue its hot start into conference play when it heads to Philadelphia, Penn. this weekend for games against Temple and Saint Joseph's.

After a 3-3-6 start to the season, the Minutemen opened Atlantic 10 play with a 2-0-1 record, good for third in the conference.

UMass now looks to add to its momentum for Friday's match against Temple. The Owls (4-6-2, 2-1 A-10) sit just behind the Minutemen in the conference and are most recently coming off a 2-1 double overtime loss against Xavier.

Temple's strongest aspect is its defense, which has allowed 12 goals in 12 games and no scores in five of those games.

With his team playing well of late, UMass coach Sam Koch isn't looking too deep into the Owls' defense.

"Indiana's defense is great, UConn's defense is great," Koch said. "We've gone against good defenses. We just have to finish on chances that we create. We're finishing on those opportunities at times very well and other times we're not. We've worked on it this week and hopefully it will pay off on Friday."

Offensively, the Owls boast two strong players in midfielders Cody Calafiore and Tyler Witmer. Calafiore has five goals and two assists in 11 games, while Witmer has three goals and two assists in 12 games.

Last weekend, Calafiore scored all three of Temple's goals during its two-game stretch in which the Owls went 1-1. His offensive prowess earned him Philadelphia Soccer Six Player of the Week honors. Calafiore's five goals currently rank him third in the conference.

Still, Koch prefers to focus on his own players instead of worrying about the opposition.

"We've been sending messages to them about No. 7 and No. 4," Koch said, referring to forward Bryant Craft and midfielder Ben Arikian, who are currently leading UMass with 10 and seven points, respectively. "They're going to have to worry about us."

Considering the similarities between both teams, Friday's game promises to be a good matchup.

Both teams are very aggressive and hard working. With 185 fouls, UMass ranks second in the league, while Temple ranks fourth with 177.

"They're a hard working team and they're going to put us under a lot of pressure," Koch said. "They work extremely hard defensively and they're going to try to make us make mistakes."

A way around that, Koch said, is by staying focused and using effective one-touch and two-touch passes in order to prevent the Owls defense from keying in on one particular area of the field. Koch also stressed the importance of playing quickly and moving without the ball.

Defensively, UMass is getting better week by week. Before conference play, the Minutemen saw their defense break down at times, usually during critical points in games. In three conference games, UMass has allowed just one goal.

"[The defense] is getting better every week," Koch said. "I think we should talk a little bit more [on the field] but it's a lot better than it has been and that's partly because the forwards have been doing a really good job defending."

UMass goalkeeper Chris Piekos has certainly held his own on the defensive end as well. For the season, Piekos boasts a 0.87 goals against average and a .855 save percentage. Since conference play began, though, Piekos has stopped 16 of 17 shots, registering two shutouts.

"We expect [Friday's game] to be hard-fought," Koch said. "We have to play quickly and pass and move; we'd be foolish not to."

On Sunday, the Minutemen will remain in Philadelphia to play Saint Joseph's.

The Hawks (1-10, 0-3 A 10) have had a difficult time this year. If the Minutemen can defeat the Owls on Friday, a weekend sweep could be quite attainable.

"We're worrying about Friday's game first," Koch said. "But Saint Joseph's is not an easy place to play. We need to put our early chances away so that we can take control of the game. The longer the game [remains close], the tougher it is to beat them."

Steve Levine can be reached at slevine@student.umass.edu.

Final home games

By Pete Vasquez
Collegian Staff

It's come down to the last home weekend for the Massachusetts field hockey team with what has been a very promising season thus far.

Temple and Saint Joseph's will visit Garber Field on Friday and Sunday as they take on the top-seeded team in the Atlantic 10 standings.

"We've put ourselves in a good position within the Atlantic 10," UMass coach Justine Sowry said. "From the games last weekend, I don't think we necessarily played our best hockey. But we were able to come out with wins. We succeed in how we possess the ball. We've got a long way to go but we've also set ourselves up quite nicely."

After two close conference wins last weekend over Lock Haven and Richmond, UMass (9-6, 3-0 A-10) remains the only undefeated team the A-10.

Although Temple (7-9, 2-1 A-10) and Saint Joseph's (5-10, 2-1 A-10) have sub-500 records, both teams are one win behind the Minutewomen and can potentially equalize the playing field in the conference.

"It's only halfway through [the A-10s]," Sowry said. "We can't relax, we have to keep our foot on the accelerator, keep working hard at practice and not take any opponent lightly. Hockey is a strange game [where] you can dominate a game and not win it. We have to make sure that we work hard enough that we will get more opportunities than our opponent."

Even with a struggling team like the Owls, UMass is well aware of the history it's had with Temple. The last two years, the matchup between the two teams have needed at least two overtimes to declare a winner.

Last season, the Minutewomen lost 2-1 in double overtime. The year before that, UMass had to win a stroke-off, 3-1, after the score remained tied at one by the end of two overtimes.

"Every time we come up against Temple, they're a hard-nosed Philadelphia team," Sowry said. "They work hard and just bring a whole other level when they play against us. I don't think their record necessarily represents how tough they are. We're expecting a really tough battle. Temple has always given us trouble. Always."

Besides the battles that UMass has encountered with Temple, this weekend offers a variety of motivational factors. First, both the Owls and Hawks rudely welcomed the Minutewomen into conference play last season as UMass dropped both games in its opening A-10 weekend, being outscored 5-1.

Secondly, it's the last time the Minutewomen will get to play in front of their home crowd this year and the team will celebrate Senior Day on Sunday to honor those who will be graduating in May.

Sunday's Senior Day, however, will have an extra special feel to it. It will mark the culmination of Sowry's first recruiting class. Seniors Katie Kelly, Makaela Potts and Jamie Bourazeris all came into the program alongside Sowry, who is in her fourth year at UMass.

"It's kind of bittersweet that it's coming to an end but they've been such a pivotal threesome for this program and getting the program back on track," Sowry said. "I'm sure it's going to be an emotional game but at the end of the day, hopefully we can play some good hockey as well."

Temple comes into Friday having won three of its last four games after eight straight non-conference games. St. Joseph's, meanwhile, has won two out of three after dropping five consecutive contests.

Now that UMass has positioned itself atop the conference standings, each A-10 team will be looking to knock it off its post. The Minutewomen are prepared for that and hope to make their last home stand of the year a memorable one.

Pete Vasquez can be reached at pvasquez@student.umass.edu.

UMass hosts Army in home opener

By Ben Lambert
Collegian Staff

The Massachusetts men's and women's swimming and diving teams have a tough test ahead of them this weekend as they host Army in Joseph Rogers Pool on Saturday in the season home opener. Both the men's and women's teams are looking for redemption in this upcoming meet after losing to Boston University last weekend.

The men will have to look out for senior Bill McCarty who paced the Army squad on Friday, helping to defeat Marist and Syracuse. McCarty took the gold medal in the 100-yard, 200-yard and 500-yard freestyle events. He also teamed with junior Byron Plapp, sophomore Dan Foley and freshman Kenny Yacynych to win the 400-yard freestyle medley.

Another notable competitor for the Black Knights is junior Brody Blickle, who placed in a variety of events at the meet. He won the 100-yard backstroke and 200-yard individual medley, and teamed with Foley, senior Matt Leegan and sophomore Alex Ford to win the 400-yard freestyle relay as well.

Foley and Ford each contributed to three wins for the Black Knights on Friday. Foley won the 50 free in addition to his medley victories, while Ford swept both butterfly events in addition to his medley win.

The Minutemen will counter with freshman Derek Hursch, who led the charge last week against BU for the Minutemen, winning the 200-yard freestyle, 100-yard freestyle and the 200-yard medley. He will face off against McCarty in the 100-yard and 200-yard freestyle events, and Blickle in the 200-yard medley this weekend.

The Minutewomen have their own set of competitors to prepare for. Sophomore Alyssa Tran led the Army women last week, winning the 50-yard freestyle, 100-yard breaststroke and the 100-yard butterfly to pace the team. She was an All-Patriot League selection as a freshman last season and is only one second behind the all-time Army record for the 100-yard breaststroke.

Tran also teamed with senior Cortney Heaps, sophomore Juliana Lynch and freshman Anna Lan to earn the bronze medal in the 200-yard medley relay.

Senior Corri Payne also came up big for the Black Knights last week. She earned silver in both the 500-yard freestyle and teamed with Heaps, Lan and sophomore Megan Metts to earn a bronze medal finish in the 400 freestyle relay.

In last year's edition of this meet, UMass earned a split. The men's team fell 183-117, while the women's squad snatched the victory, 166.5-127.5. Sophomore Julie Magyar led the Minutewomen, winning the 1000-yard and 500-yard freestyle events.

Candidates debate the night away

By Matthew M. Robare
Collegian Staff

Incumbent State Representative Ellen Story (D-Amherst) debated both her challengers, Republican Dan Sandell and Independent Dan Melick last Wednesday night at a candidates' night hosted by the League of Women Voters of Amherst at the Amherst Regional Middle School.

Incumbent Congressman John Olver (D) and his challengers, Tea Party-supported Republican William L. Gunn and Green-Rainbow Party-endorsed Independent Michael Engle also debated, as did the Tea Party-supported candidate for Governor's Council, Republican Michael Franco and Democratic incumbent Thomas T. Merrigan, and the two candidates for Hampshire County Sherriff, Democratic incumbent Robert J. Garvey and Republican challenger Stephen Chojnacki.

The race to represent the Third Hampshire District, which includes Amherst and Granby, had an element of bitterness to it. In his opening remarks, Sandell criticized Story for accepting $7,000 "to drive to work." She retorted by telling him that "in order to get good people to run for office, you have to pay them well. I feel quite comfortable taking that money."

Story promoted the work she did with the legislature in this past session, saying they had cut $4.3 billion from the state's budget, did not raise taxes and saved $1 billion by reorganizing the transportation administration. However, this information could not be corroborated.

Melick touted his experience working with the Amherst Planning Board and at Town Meetings. He also criticized the nation's prevailing two-party system, blaming it for many of the state's problems.

Their first question posed to the candidates was on ballot Question 2, which would repeal a law "that allows a qualified organization wishing to build government-subsidized housing that includes low- or moderate-income units to apply for a single comprehensive permit from a city or town's zoning board of appeals," according to the Elections Division of the Secretary of the Commonwealth's office. "I'm strongly against Question 2," Story said. "I think it's important to make it easy to have affordable housing." She also noted that the Massachusetts Association of Realtors opposed the question.

Sandell said he also opposes Question 2 and praised the law it seeks to repeal. "It has enabled low-income people to obtain affordable housing," he said. However, he did say that if he were elected and the question passed, he would support the repeal because it was the will of the voters.

Like the others, Melick said he opposes the question, but would work on alternative affordable housing strategies if it passed.

All three candidates have previously said they also oppose Question 3, which would lower the sales tax back to three percent. Story and Melick oppose Question 1, which would repeal the sales tax on alcohol, while Sandell endorses it.

There was more division over municipal health insurance relief, where cities and towns are allowed to place their employees in the state's Group Insurance Commission (GIC) for health care. Sandell said that towns where unions refused to join the GIC have saved millions of dollars and that municipalities should be able to place employees in the GIC without union approval. Currently, the approval of 70 percent of unionized municipal employees is needed to join. According to The Melrose Free Press, the city did save money, but the GIC raised its premiums in February. "Why isn't Massachusetts signing compacts with other states to allow them to sell health care packages here?" Sandell said.

Melick disagreed. "We shouldn't compromise our ethics because of financial straits," he said. Melick also expressed support for a public option or single-payer system. Story said that she was a strong advocate of single-payer health care, but that

See ELECTION on page 3

Ellen Story (D–Amherst) is the incumbent state representative from the Third Hampshire District.

Dan Melick is running as an Independent for the state representative seat in the Third Hampshire District.

Dan Sandell is the Republican candidate in the race for the Third Hampshire District's state representative seat.

UMass Police increase alcohol-related arrests

By Sam Hayes
Collegian Staff

The next time you walk into a large lecture hall for a class, say one with more than 40 students in it, pause and look around for a minute. The odds are that if there are more than 40 students in your class, at least one of them was arrested by the University of Massachusetts Police Department in the last year for drinking law violations.

489 arrests were made at the University of Massachusetts for "liquor law violations" in 2009, up from 266 arrests in 2007, according UMass Amherst's Annual Security Report.

"Liquor law violations" include supplying alcohol to minors, transporting alcohol illegally, drinking in public, using a still or bootlegging liquor, and do not include operating under the influence.

"Alcohol is at the foundation of our problems on campus," said Deputy Chief of the UMPD Patrick Archbald. He explained that drinking can lead to violent behavior, damage to property and other crimes.

The UMass police have increased their level of staffing and the number of patrolmen, which makes them "more productive while they're here," said Archbald.

"We're an active department," said Archbald, explaining the spike in arrests. "We take action on whatever we see... and there is an expectation to interdict alcohol."

Some members of the student body, however, see the increased UMPD activity as a crackdown on students, not a response to a growing problem.

"Nobody is drinking or partying more; [the police] are just cracking down," said Student Government Association President Brandon Tower.

The SGA is starting a program to help students better understand criminal offenses and their rights.

"It's a student initiative to let students know their rights," explained Tower of the program, called "Know Your Rights."

Tower said it will help students know what to do when police are at their door or if they are arrested. The program with also include a Facebook page with important information about student rights so that students can easily refer to it, said Tower.

In response to the rise in arrests Tower said he and his administration want to "build better relations with the Town of Amherst."

Tower said that the SGA's Secretary

Grad fair showcases educational options

If fears of an impenetrable job market have you down, or if you just really like to study, then following your college education up with a graduate degree might be the route for you. For students who plan to seek a graduate education, the University of Massachusetts will be hosting a graduate and professional school information day this Wednesday, Oct. 27 in the Student Union Ballroom.

The event will bring together representatives from 148 institutions, spanning fields as diverse as dentistry and divinity, according to the day's website.

Among the schools in attendance will be some you've likely heard of and some about which you may not have heard.

Locally, American International College will be recruiting for all graduate majors, Assumption College in Worcester will be recruiting all majors, Babson College will be present, recruiting students for its prestigious schools of management, accounting, pre-MBA, and other business-related fields, Bay Path College in Longmeadow will be tabling, as will Bentley University in Waltham's notable business programs, and several of both Boston College and Boston University's graduate schools will be sending representatives to the event.

Brandeis University in Waltham will be sending a delegation from its graduate school of arts and sciences, which encompasses studies from history to microbiology, Bryant University in Rhode Island will be recruiting for all graduate majors, as will Clark University in Worcester, Emerson College in Boston will have information about all graduate majors, as will Emmanuel's business programs, and Endicott College on the North Shore will be sending representatives from its Loan School of Graduate and Professional Studies.

More local schools at the event include Fitchburg State University, Gordon College of Graduate Education, Harvard's Graduate School of Education, Lasell College, Lesley University, the Massachusetts General Hospital Institute of Health Professions, the Massachusetts School of Law, Mount Holyoke's College Post-Baccalaureate Pre-Health program, New England College, New England School of Acupuncture, Northeastern University's graduate programs, all of Quinnipiac University in Connecticut's graduate programs, Roger Williams University School of Law, Sacred Heart University

Saint Michael's College in Vermont, Salem State's graduate programs, Simmons graduate offerings, Smith's School for Social Work, all of Springfield College's programs, Suffolk's graduate programs and law school, Tufts School of Medicine, and a range of the University of Massachusetts' graduate offerings, both in Amherst and elsewhere, University of Connecticut's law school, all majors offered at the University of Harford, all majors at UMass Dartmouth, the University of New England's colleges of Osteopathic Medicine and Graduate and Professional Admissions, University of New Hampshire's schools of law and business, University of New Haven, the Vermont Law School, all majors at Western New England College, some of Westfield State's offerings, Wheelock College in Boston, and many of Worcester Polytechnic Institute's programs.

Among the most prestigious institutions in attendance are Bard College, Bryn Mawr College, Columbia University's School of Continuing Education, Cornell University's Master of Management in Hospitality program, the Dartmouth Institute for Health Policy Clinical Practice, Harvard's Graduate School of Education, New York University's Silver School of Social Work, Rensselaer Polytechnic Institute, Rochester Institute of Technology, the US Marine Corps, the US Navy, the University of Pennsylvania School of Social Policy and Practice, the University of Pittsburgh biomedical graduate programs, Washington University in St. Louis and Wesleyan University's graduate liberal arts program.

The event will run from 11 a.m. to 3 p.m. this Wednesday.

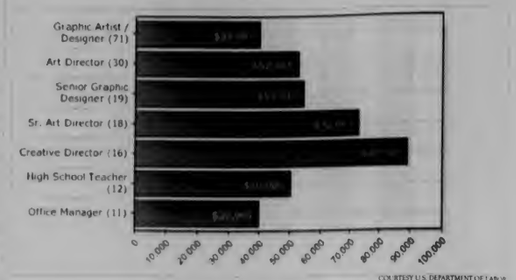
Fine arts degrees soon to be in rapid demand



COURTESY U.S. DEPARTMENT OF LABOR

Experts consider graphic arts to be a rapidly growing field, and expect that as the number of jobs increases, salaries will increase as well.

MIDDLE TENNESSEE STATE UNIVERSITY SIDELINES
VIA COLLEGE NEWS NETWORK

The last career field an incoming college freshman would probably consider financially viable is art, especially with an economy that seems to be getting worse and a job market that seems to be oversaturated.

But this view could not be further from the truth, according to Seth Johnson, an associate professor of graphic design in the art department of Middle Tennessee State University..

"We have literally hundreds of students with a Bachelor of Fine Arts with a concentration in graphic design working in the Nashville design and advertising community," Johnson explains.

According to the Bureau of Labor Statistics, a division within the U.S. Department of Labor, an estimated 37,000 new jobs relating to graphic design are projected to be created by 2018. Graphic design artists earn an average of $45,000 a year, while corporate design directors earn more than $95,000 annually.

"Studios, galleries and individual clients are always on the lookout for artists who display outstanding talent, creativity and style," according to the Labor Statistics website.

Janet Higgins, a professor of letterpress printing in the art department of MTSU, says a graduate with a Bachelor of Fine Arts is not limited to art-specific careers.

"We are trained to be creative problem solvers – how to observe and how to see unlike things come together in a variety of ways," Higgins said.

This makes individuals, trained in art, valuable in business and other seemingly unrelated fields, offering different insight into problems and providing unique solutions, Higgins said.

Though specialties like multimedia and animation are experiencing the fastest rate of growth, commercial and industrial design is another way for artists to express themselves, while working directly with business executives and engineers. The income for commercial designers can exceed $97,700 a year.

The MTSU art department offers many classes and workshops in graphic design for video and DVD production. Other classes include interactive design, digital illustration and a workshop in professional practices for artists. Fine art students in studio and graphic art are also required to exhibit their work in the Todd Art Gallery, which provides students a chance to gain real experience in the display and promotion of their own art.

Alumni of the MTSU art department include the Emmy-winning and internationally respected, Wayne White. White's resume includes art direction for music videos for musicians like Peter Gabriel, as well as set design for "Pee-wee's Playhouse."

Just like every other degree and career, it's very hard work, according to Melody Vaughan, a junior majoring in printmaking.

"You start the program thinking it will be easy, but you have to be ambitious to succeed," Vaughan says, "but I really like the program a lot, [and] I haven't met a teacher who wasn't willing to step out and help me outside of class."

Arrest made in Sept. assault with weapon

The Amherst Police Department announced Saturday that they had made an arrest in a Sept. 12 case where a Worcester man was beaten with a baseball bat.

According to an Oct. 23 release from the Amherst Detective Bureau, the APD determined that 20-year-old Erik Reyes of 40 Gibson Street in Medford, Mass., was responsible for the incident, which took place at a party on Grantwood Drive, near the University of Massachusetts campus. Reyes was charged with assault and battery with a dangerous weapon, and will be arraigned today at Eastern Hampshire District Court in Belchertown. Neither the unidentified victim nor Reyes are members of the Five College community.

In other police-related news, the APD responded Friday to an incident involving a University of Massachusetts student. At approximately 2:34 a.m., officers were dispatched to an apartment at the Chestnut Court complex, where an 84-year-old woman reported that someone had attempted to force their way into her apartment.

Following a brief investigation, the officers located a male matching the woman's description not far away. The man, Benjamin J. Cambell, 21, of Marshfield, Mass., was apparently disoriented, and officers suspected he had been drinking. He was arrested and charged with breaking and entering in the nighttime, and was arraigned Friday morning, also at Eastern Hampshire District Court.

This test may be taken only once.

Students do not need to register for the test.

Candidates debate as the election draws near

ELECTION from page 1

she doubted she would see it in her lifetime and that she was in between Sandell and Melick. She said that she would like to see a reduction in the percentage of union workers needed to approve joining the GIC.

Melick said he opposes legalizing casinos in Massachusetts because he believes they would not create jobs, he feels they would amount to three regional monopolies and smaller businesses would suffer. Story said that while she initially opposed them, the more she "studied the issue, the more it seemed inevitable" that Massachusetts would have casinos. She added that every time the legislature debated the issue, Beacon Hill was filled with unemployed construction workers begging legislator to vote for casinos so they could have jobs.

Sandell criticized Story for changing her position, noting that the Boston Herald reported she had done so at the request of House Speaker Robert DeLeo and quoting The Herald as reporting that Story "jumped when her party told her to jump." He added that he supports casinos because he believes in what he called individual freedom, and concomitantly believes people should be allowed to spend their money however they see fit, as long as they do not harm anyone else. He also noted that Massachusetts loses millions of dollars each year to Connecticut's casinos.

All three candidates expressed support for alternative energy. Story and Melick agreed that small-scale, local projects were best, while Sandell said he supports a market-based approach.

"We should be striving to search for ways to lower the energy costs for everyone in Massachusetts," he said.

In her closing remarks, Story said she was proud to be the incumbent and that "Beacon Hill doesn't hear from people like us often enough." Sandell stressed his commitment to fiscal restraint, saying, "When the money runs out, everyone loses and we will have nobody to blame but ourselves." Melick reiterated his opposition to the two party system and promised that "if elected, I'll work to make a more open government for everyone."

All three candidates for state representative will participate in a debate at the University of Massachusetts next Tuesday. The general election is Tuesday, November 2.

Matthew M. Robare can be reached at mrobare@student.umass.edu.

HANNAH COHEN/COLLEGIAN

During Candidate's night last Wednesday, each candidate discussed topics ranging from casino legalization to alternative energy. The three candidates for state representative will speak at UMass next Tuesday.

Worried about mounting debt? UMass student has the answer

UMass senior Zac Bissonnette has written about how to graduate debt free in his new book. He was invited to speak on the Today Show and CNN.

BY MELANIE MULLER
COLLEGIAN CORRESPONDENT

University of Massachusetts senior Zac Bissonnette has published a book, "Debt Free U: How I Paid for an Outstanding College Education Without Loans, Scholarships, or Mooching off My Parents," and was interviewed in August about his work by Ann Curry on NBC's "Today Show."

As of this fall, Bissonnette is a first semester senior here at UMass majoring in art history. He writes for AOL's WalletPop.com, and his work has appeared in the Daily Beast and the Boston Globe.

In his book, Bissonnette argues that taking out loans to pay for college, which many currently believe to be a necessary evil of the college experience, can and must be avoided. Not only does he believe that students can get an equally good education without going into debt, but feels it is absolutely necessary for them to do this to ensure future success.

He describes in detail in "Debt-Free U" how difficult it can be to discharge the debt once a borrower goes into default, as well as how the necessity of servicing the debt even when not in default can cause students to make detrimental career decisions like staying in a job they hate. Moreover, the interest payments on the debt can keep students from saving for retirement and other important expenses.

One expert quoted in "Debt-Free U" estimates that the long-term default rate on student loans is nearly 33 percent. Given the risks associated with student loans, Bissonnette argues that taking them out simply does not make sense. Speaking about stories he has heard, Bissonnette said, "If you borrow $55,000 to go to Emerson, you're an idiot."

Instead, Bissonnette argues that students should choose less expensive options, such as in-state public colleges, universities, and community colleges.

He attacks the two main beliefs he believes cause students to make bad decisions: That students will not be successful unless they go to a prestigious college, and that students will not be successful unless they find the right college "fit."

Bissonnette told the Collegian that there is "absolutely no evidence" to suggest that elite colleges provide a better education than public universities. According to Bissonnette, graduates of elite schools don't report greater satisfaction with their education, either.

In the book, Bissonnette says that studies indicate that more public school students report satisfaction with their education than their counterparts at private schools, with 59 percent of community college graduates satisfied as opposed to 53 percent of those at four-year public universities and 52 percent of those at four-year private institutions.

"Some people will still insist that the private schools are better, but at that point, you might as well be talking about God," he quipped.

As for the idea that it is essential to find the right "fit" to be successful in college, he argues that the factors causing students to make decisions about whether or not college is a good fit do not justify taking out loans and possibly jeopardizing one's future.

In "Debt-Free U," Bissonnette quotes a section from a book that promotes the idea of "fit," "Acceptance," where a student makes a college decision based on "the way the light filtered through the trees."

"College is too big an investment to make emotional decisions like that," Bissonnette said.

When Bissonnette made an appearance on the Today Show, Ann Curry said a study conducted by the National Association of Independent Colleges and Universities, or "the voice of America's private colleges and universities" as it is described on the association's website, found that students at private schools show more satisfaction with their education than those at public schools. Bissonnette said that

The College of Saint Rose

Are you debt-free?

BOOK DEAL from page 3

the majority of studies showed the opposite, and in an interview with the Collegian, he said that study is the only one that he has seen which indicates that private school students are happier with their education.

At times, Bissonnette said that he has been "screamed at" when he suggests that student loans are not necessary.

"I think that a lot of it is sour grapes," he said. When asked what he thought it would take to change people's opinions, Bissonnette replied that he thought most people who had not already invested in loans were smart enough when presented with the evidence to come to what he sees as the right decision.

He believes that it is also very important for students to choose a major that truly interests them, and said that he found in doing research for "Debt-Free U" that choice of major is much more important than many believe. This discovery influenced him to change his major from legal studies to art history.

In a 2008 interview with CNN, Bissonnette argued that it would be a mistake for students to radically change their majors in response to the recession.

Although Bissonnette believes that the social experience that residential colleges provide can be very valuable, he believes that students should have a choice whether or not to pay for this experience, and envisions possible future institutions that, like community colleges, would only contain academic facilities. He thinks that students should have more power in choosing what services to pay for.

"It's stupid for students to be taking out loans to pay for a new gym," Bissonnette said.

Bissonnette says that he has plans to write a new book which he recently made a deal for. That book will be a guide to help recent graduates manage their finances.

"Debt-Free U" can be found on Amazon.com, and is also in stock at the University of Massachusetts U-store in the student center.

Melanie Muller can be reached at mpmuller@student.umass.edu.

Undergrad majors fair draws decent-sized crowd

MARSHA GELIN/COLLEGIAN

The Undergraduate Advising and Learning Community Department will host its annual majors fair on Wednesday, Oct. 27 in the Campus Center auditorium and its first floor concourse.

By Alyssa Creamer
Collegian Staff

On Wednesday, Oct. 27, the University of Massachusetts Undergraduate Advising and Learning Community Department is sponsoring its annual majors fair.

The majors fair brings in representatives from nearly all departments on campus to talk to students about their programs prior to the beginning of spring registration.

According to one undergraduate academic advisor, Tamatha Gaumnitz, "the majors fair is a great opportunity for students to come and talk to anyone they would want to talk to about potential majors, minors and certificates."

The fair will take place in the Campus Center auditorium and its first floor concourse between 5:30 p.m. and 7:30 p.m.

Gaumnitz said that representatives from the International Programs Office, Domestic Exchange, Commonwealth Honors College, Career Services and the Center for Multicultural Advancement and Student Success (CMASS) will also be tabling at the fair.

"I think students like the fact that so many different departments are represented, and that the department representatives are so friendly and helpful," said Gaumnitz. "I think students also enjoy the convenience of the fair. The fact that there are so many departments in one place."

At the fair, departments are located based on what college or school they are part of.

"Journalism is going to be at the fair this year," said Gaumnitz. "And I'm really happy about that, because a lot of students were asking about them last year."

Gaumnitz also mentioned there will be several certificate programs sending representatives who have not done so for past fairs, including representatives from religious studies, culture, health and science and international agricultural studies.

The UMass majors fair has been going on for over 15 years, according to Gaumnitz.

This year, Gaumnitz is working alongside academic advisors Chanthava Chanthavong and Tonya Blundon on the committee to decide on the logistics of the fair, and Commonwealth Honors College will be printing the signs and posters for the event.

Undergraduate advising will also have an advising room at the fair in the campus center's room 162 for students with general advising questions, such as hiccups with SPIRE or issues within their current major.

Alyssa Creamer can be reached at acreamer@student.umass.edu.

Student arrest rates rise for liquor law violations

LIQUOR from page 1

of External Affairs is working with the Amherst Select Board to amend the $300 fine for an open container to community service in order to both help students and the town.

"It is ineffective to wage a war of attrition against drinking and partying," said Tower. "We need to make more of an effort to bolster relations, both parties [students and the town and police] have a role to play."

"It is uncomforting," said Barry Dalin, head judicial advisor for the SGA, about the increase in arrests.

CITE: KATE'S UMASS CLUB

UMPD are amplifying their efforts to decrease drinking and partying on campus.

Dalin, a political science major, said that his job involves taking "students through what the University judicial system entails."

"If [a UMass student] gets in trouble at any of the Five Colleges or in the Pioneer Valley, the Dean of Students will find out," said Dalin, "and that's a double whammy," meaning that the student will face criminal charges and University sanctions that stay with a student's record for seven years.

"It is not an increase in student indulgence," said Dalin, echoing Tower's sentiment.

Offering advice to students, Dalin said, "do not walk around with solo cups or water bottles, regardless of its contents. Any cup, can, or bottle gets cops' attention."

Dalin also cautioned that Liquors 44 is "staked out" and remunded students that driving around with alcohol in one's car when one is under 21 is a crime.

"You are going to get caught," said Dalin, "there is a heavy presence on and off campus. Know your rights."

Drug law violation arrests went down from 260 in 2008 to 97 in 2009, likely having to do with the $100 fine for marijuana possession under one ounce, according to the Daily Hampshire Gazette.

Sam Hayes can be reached at sdhayes@student.umass.edu.

Baffled by the bracket?

Nicholas O'Malley

Every year, around the early going of March, they come out. Fresh, clean and full of potential, the Men's NCAA tournament brackets are your chance to be Nostradamus for a day.

It's an amazing annual event where the everyday fan becomes part of the action by selecting who he or she believes will win each tournament game, and who will reach the Final Four and eventually, win the national championship.

With the millions of bracket creations that emerge each year come the promises from Web sites and companies for the reward of good predictions. Companies often offer millions of dollars, or even a million pizzas, for a perfect bracket.

You think that going for that perfect NCAA tournament bracket for a million dollars is a good deal? Forget it, you're better off trying to win the lottery fives times. You can try as hard as you can and research the teams as much as you want, but after 2 rounds, your bracket is just as ruined as everyone else's. ESPN received thousands of online submissions this year for its "ESPN Tournament Challenge," but not one survived the first round. One would think that, with the millions of brackets made annually, somebody would have to get it right; but the odds have shown why the opposite has occurred.

If you took each of the 63 tournament games and gave each team a fifty percent chance to win, you'd be looking at about 1:2^63 odds of picking a perfect bracket (that's one in 9 quadrillion).

The most generous odds of flawlessly selecting your college hoops teams is about one in 150 million.

Of course, the seedings and favorites of the tournament make many picks much easier and increase the chances of perfection exponentially. The numbers, however, are still staggering.

According to Carl Bialik of the Wall Street Journal, the most generous odds of flawlessly selecting your college hoops teams is about one in 150 million. Other predictions, however, have put the chances upward of one in 240 billion.

We live in a world fueled by expert opinions: Wall Street, politicians, researchers and the likes. We often take the opinions and estimates of others as fact. So it's a wonderful diversion when something as simple as the brackets come along that are fun, engrossing, relevant and most of all, absolutely random.

This is what makes pools based off of the brackets so much fun. Even if you choose on the basis of which school's name sounds cooler, you're probably going to get as many picks correct as some professional analysts. So if you happened to have thought Siena, Villanova and Davidson were cool names this year, you looked like a pure genius.

You could also take the popular mascot route and look at college teams based upon what masked entertainer happens to be dancing up and down the court. You think a boilermaker is better than a bear? A badger beats a titan? Or that a bulldog will succumb to my personal favorite, the hilltopper (which is actually some sort of red blob)? You'd be right this year.

But then again, there's always the problem with repeat mascots. In this year's tournament, you'd have to choose among the Villanova, Kentucky, Kansas State, Davidson and Arizona Wildcats and the Georgia, Drake, Mississippi State, Gonzaga and Butler Bulldogs.

This bracket experience would be much better if only a team with a Minuteman mascot had been invited to the big dance – but that's a story for the back page.

In a world of pampered, "show me the money" athletes, the NCAA tournament is a wonderful change in that the athletes are just as young and poor as the rest of us college folk. The stars of the show are students rather than filthy rich stars that flood the rest of television. So if you're enjoying a Men's NCAA tournament game, but have a big exam to study for, don't worry. So do they.

Nicholas O'Malley is in it to win it. He can be reached at nomalley@student.umass.edu.

Right to left: a treacherous accusation

Michael Phillis

On the day when practical jokes and foolish behavior run rampant, Dinesh D'Souza, a prominent conservative author, will speak at UMass.

The back cover of one of D'Souza's latest books, "The Enemy at Home," informs the reader of his radical beliefs concerning the cultural left in America. According to D'Souza, "the cultural left in this country caused 9/11."

Having forced myself to read his tirade against a major group of Americans, I was quite unaware that there was an audience for this kind of rubbish at our University.

In short, the explanation given by D'Souza is that the cultural ideas of the left as he sees them, such as feminism, gay rights, the destruction of the patriarchal family, sex education, abortion and the withdrawal of troops by liberal presidents, are major reasons why the World Trade towers fell and the hijacking of American commercial flights occurred. The horror of the Islamic world at the fact that a vile American culture has bred such unthinkable ideas as feminism and equal rights for gays is the apparent root of the liberal role as instigator in one of the greatest days of murder in American history.

I guess it could have been worse. Criminal Scooter Libby or the future felon Tom Delay could have been invited. Maybe it's just a matter of time. UMass may just have to wait until their speaking fees come down a notch.

While the arguments themselves are destructive and hurtful to a large portion of the population, what I find to be the biggest fault in D'Souza's argument is that, whether or not he is aware, he is fundamentally attacking the First Amendment of the Constitution. By citing the cultural left and specifically naming individuals such as Hillary Clinton and Ted Kennedy as accomplices to murder, D'Souza is marginalizing free thought and debate.

Somehow I do not believe the towers fell because of the liberal embrace of the gay or feminist movements.

The practical conclusion to be reached, if an individual is to take Dinesh D'Souza's claims to heart, is frightening. The belief that leftist Americans are causing the violent deaths of the nation's citizens leads to the thinking that they should no longer be allowed a place in government or even the right to voice their dissent. After all, who would trust the enablers of murderers to hold office? There are two separate arguments that have been made against the behavior and ideals of the left since 9/11. The first point of view held by many Americans is that while in personal disagreement with the cultural left, they do not consider them to be unpatriotic but instead simply in some disparity with conservative thinking about the path in which America should follow.

The second and far more radical of the two is held by individuals such as D'Souza, who believe that the evils of the leftist agenda and its immorality is literally killing Americans. This idea proposes that people on the left are not only unpatriotic but enemies of America. The founders that drafted the Declaration of Independence and the Constitution believed instead that not only was educated dissent necessary for the success of the American experiment in democracy to work, but it was entirely essential.

Dinesh D'Souza is out of touch with reality and is part of a group that is seeking, as Karl Rove so aptly stated, "a permanent majority." The idea of a permanent majority however, is destructive to a democracy because it can only be established if the dissenting opinions are stifled and made to appear as dangerous, traitorous or even treasonous.

By going about his writing with the aura of scholarship and superior intellect, D'Souza masks his shortsighted knowledge of the fundamental principles of American democracy. In no way is dissent unpatriotic or harmful. On the contrary, dissent is brave and beneficial. For D'souza not to realize this simple, profound fact that has enabled the United States to boast the longest living constitution in the world demonstrates the profound shortcomings of his narrow-minded worldview.

Often, to truly understand the fallacy of an argument, the argument must be boiled down to its most fundamental state. To dismiss D'Souza, all that must be asked is whether or not the more-than-three-thousand dead from 9/11 were killed because people in the Islamic world hate people like Michael Moore, who advocate teaching women proper condom use as well as arguing that two men should be able to be in a romantic relationship without fear of harassment and violence. Somehow I do not believe the towers fell because of the liberal embrace of the gay or feminist movements, or for that matter the fundamentalist Christian movement. America owes herself a far better explanation for terrorism than the one offered by D'Souza.

Even if an individual's own political persuasion does not place them in allegiance with the ideas of people like Michael Moore, it should not be difficult to understand that at the very least the opposition is not responsible for murder.

The world has a way of presenting ironies that when realized, should at the very least provide some entertainment. Therefore, UMass should be sure to observe this irony. As the Republican Club plays host to an author who accuses a major political group of enabling terrorism, it is fitting that he should arrive on the day of fools. The campus should understand that they have a joker in their midst, to be laughed at one day and forgotten the next.

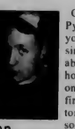
This is the election that has no end



Dan Nicastro

One of my favorite Monty Python skits is a faux "do-it-yourself" show offering painfully simple advice to very complex, abstract problems. In explaining how to rid the world of diseases, one of the hosts explains that first you should "become a doctor and find a marvelous cure for something, and when the medical world really starts to take notice of you, you can jolly well tell them what to do and make sure they get everything right so there'll never be diseases anymore."

As the Democratic presidential primary extends to what seems like its second year, maybe we should utilize some Monty Python-like logic (a painfully ironic term) to make sure a situation like this never happens again.

There can be no doubt that this will be one of the most historic (if not most important) presidential elections the United States has ever experienced. I feel obligated by law (and my mother) to point out that in our 232-year history, our presidential leadership has only reflected a portion of our population.

Thus, when both Hillary Clinton and Barack Obama appeared to be strong, viable candidates, it was clear that the Democratic nomination would be a long contest. Few, however, envisioned a primary season that would have remained competitive into April, exposing divisions that threaten to split the Democratic party into several factions.

Following the Monty Python "do-it-yourself" model, the complex question we must face is how to prevent the primary season from dragging on to a point that endangers the harmony of a political party.

The painfully simple answer is to have everyone vote at the same time.

I would like to note that this is not a novel solution and I am certainly not the first person to suggest an overhaul of the electoral system. We have not, however, faced a situation quite like the current primary fiasco and we have very rarely entertained the idea of serious, dramatic changes to our electoral system.

I feel obligated by law (and my mother) to point out that in our 232 year history, our presidential leadership has only reflected a portion of our population.

A mythological ethos surrounds the founding of our country. At some point, laws, statutes and general principles about American government were established for certain logical (or illogical) reasons. Over the course of history, they transitioned from their position as rationally formed laws or principles and were re-codified as part of American tradition. This transformation discarded any context for the formation of these laws or principles, leading to governmental structures that were elevated to a semi-mythical status, seemingly untouchable by the general populace.

Because of this, we are stuck with an electoral system mandated by the 50 states and the national party committees that requires 50 separate primaries to take place over the span of five months.

There are legitimate reasons to keep the current primary system the way it exists, but even most of these can be chalked up to unwillingness to change the existing system.

Yes, smaller states like New Hampshire are able to receive more attention from politicians than a national primary would provide, but that does not mean that a nationwide primary day would only steal focus away from smaller states. Instead, it would more evenly distribute attention, creating a more widespread consensus about the effectiveness of a candidate. Candidates would need to focus on localities while not alienating their bases of support.

Defenders of the current primary system also maintain that individual state primaries allow candidates to interact with local people and give them a chance to speak to local issues. This forgets, however, that modern campaigns begin months (and in some cases, years) ahead of primary dates. Why can't we move the primary date further back, leavin g plenty of time for candidates to speak to local issues and interact with locals during fundraising appeals?

The current primary system also takes a huge toll on candidates, draining them of both money and energy before the general election even begins. A single primary day could cut down on costs (as candidates would be able to use the national media for their advertisements and not have to spread their money over five months of primaries) and cut down on mental anguish, as travel time and campaigning would have a specific end point.

The benefits of a one-day primary outweigh the costs. There may be states that do not receive the attention they currently enjoy because of their importance as symbolic icons of the primary season, but overall, candidates will have both the time and the need to address local issues, much more so than in the general election. Primaries are meant as an appeal to a candidate's base of supporters and a measure of the candidate's general attractiveness to that base.

As we are currently seeing with the Democrats, primaries that drag on expose factions and divisions, damaging the party even before the primary season is complete. While we may like to defer to tradition and keep our governmental structures the same as they have functioned for years, it may be time for a change. Don't be worried about the future, however. Everything will work out if we always look on the bright side of life.

Phish Bowled

By Ben Silverman
Collegian Correspondent

UMass hasn't looked or felt like this since 1995, when Phish last played here. Thousands of fans gathered outside the Mullins Center to try to buy, trade, and sell Phish tickets before the show began. A dreadlocked family of four stood together with a sign that read: "Who's got our Saturday tickets?" A grown man stood, crying in the box office after losing his tickets, and not being able to get any more. A young Hampshire student waited eagerly at the front of the line after arriving at noon to buy an original poster and t-shirt.

At least fifteen minutes before Phish even came onstage, thousands of audience members stood peacefully, eyes closed and smiling, nodding their heads to the invisible, but present energy that they were collectively experiencing. Phish refers to this energy as the "vibration of life," the steady buzz of seven beats per second that energize you...for the rest of the evening." When Phish played the Mullins Center in 1994, guitarist Trey Anastasio took a break in a song to explain the "vibration of life," adding that "you gotta be careful with this stuff… it's powerful stuff." Whether it is coincidental that seven beats per second equals 420 beats per minute is still unknown.

About an hour after the show was scheduled to begin, guitarist Trey Anastasio, bassist Mike Gordon, keyboardist Page McConnell, and drummer Jon Fishman made their way to the stage, greeted with uproarious rejoicing, laughter, applause, and the shouting of nicknames and song titles. Trey scratched a few sounds out of his guitar, Fishman loosely followed him, and the rest of the band gradually joined in with the upbeat, chirpy chord progression of "Meatstick," which segued into Fishman drumming the introduction to "Party Time," a new song that he wrote for their 2009 album "Joy." It was a festive, simple, even silly song of boisterous drums, organ, and the repeating line "Party Time! Party Time!" Perhaps they played it because of UMass' party school reputation; more likely, it was to let us all know we were in for a party all weekend.

As soon as it ended, Phish dove into more familiar territory with "Golgi Apparatus," written by Anastasio in eighth grade. A short, energetic gem of a composition, "Golgi" has been a crowd pleaser since its 1986 debut. Next came "Kill Devil Falls," a new, simple, rock-based song that Phish has insisted on playing frequently over the past year.

Next up was "Tweezer," an old classic, as if to say "sorry for all the new stuff!" Debuting twenty years ago, "Tweezer" is a simple, pentatonic-based riff that evolves into a lengthy jam, often reaching abstract, atonal points at peaks. After the crooning, lounge-jazzy "Lawn Boy," sung by McConnell, a speedy, bluegrass tune, "Sparkle," and a furious and punk rock "Big Black Furry Creature From Mars," came Phish's famous rendition of "Hold Your Head Up," featuring Trey on drums, and Fishman on vocals.

Next came a rare moment, surely one that will go down in "phishtory." Fishman, famous for playing not only drums, but also the Electrolux vacuum cleaner, played a vacuum solo over Syd Barret's "Love You," using the hose of the cleaner as a mouthpiece while changing the size of the opening of his mouth to alter the pitch. After a few self-deprecating remarks he made about the abrasive sound of his vacuum and annoying nature of his solos, he sat back down at the drums.

Trey picked his guitar back up and began "Possum," causing the audience to whip out their tickets (which have a painting of an ugly possum) and wave them around while chanting the lyrics. The "Possum" jam lasted five energetic minutes, but never climaxed quite as powerfully as it has in the past (listen to the August 17 version for an example). The set ended with "Tweezer Reprise" with lyrics from "Meatstick" substituted in.

After a 15-minute break, the lights dimmed for the second set, and the quartet once again took their places on the stage. Noise poured out of the stage and filled the room with the bubbling, murky wail of sound that could only mean "Down With Disease" is first up. An old favorite, "Down With Disease" is a funky rock tune with an extended, meandering jam, which rocked nicely for a few minutes, but never quite found its energy last night, as it has in the past. Any concerns about Phish's energy quickly subsided when they began "My Friend, My Friend," a delicately constructed piece that begins as a triumphant, classical sounding piece suitable for an action movie soundtrack. It continued into an unsettling, dark segment, possibly referring to Shakespeare's Macbeth.

A few more songs passed, including a notably high energy "Maze" and an always appreciated "Piper," but it wasn't until "Harry Hood," an extensive complexly arranged classic, that the audience knew the night would end in glory. After a long, palette-cleansing jam, Phish segued into the familiar intro arpeggio to "You Enjoy Myself," arguably the band's most beloved and interesting composition. Through several tightly composed sections, a choreographed trampoline dance, and a fiery jam, "YEM" ended with the usual vocal jam, an eerie line sung a cappella that finally [illegible] unison screams, then it [illegible]. Right one was over.

Night two began with "A Day In The Life" which confirmed the predictions of the audience: who had been expecting it as the opener all day. Phish moved into "Camel Walk," another eagerly awaited and predicted early set piece, but shocked the crowd by segueing into "Divided Sky," an old, emotional, and incredibly precise composition followed by an intricately structured jam with a wailing, sustained solo.

More beloved pieces followed, including the simmering, Latin-influenced "Stash," "Fee" (sung through a megaphone) and the new, multifaceted progressive rock composition, "Time Turns Elastic," which took Phish fans a year to learn to embrace and enjoy. Next was "Cavern," an anthemic celebration that convinced the audience the set was closing until the opening doodles of "Run Like An Antelope." By the crowd knew then, was still more life in this set. Starting with a heavily arranged instrumental introduction, "Antelope" suddenly begins itself with a jagged crescendo of distorted chords, and launches into a building minor jam, which peaked with pure energy and cacophony before ending on a dime and reverting to the original chords.

"Set the gear aside for the high gear of your soul! You gotta run like an antelope… Out of control!" was what Trey left the Mullins Center with before the set break.

Set two began more modestly, with simpler, more standard rock songs. While the songs were less imaginative than the previous set's, the following jams did not disappoint. It wasn't until "The Lizards", a long masterpiece that explored the history of the mythical land of "Gamehenge," that the set took off.

More high energy tunes followed, and the show ended with the long awaited "David Bowie," which mixed tightly composed jazz with improvised heavy metal shredding, climaxing in the biggest peak of the tour. The encore of "Chalkdust Torture" a blisteringly intense song about the woes and stresses of education, served to remind UMass that after all it is a school night, and it's time to get some sleep. The "Chalkdust" jam sealed the deal on this show's place in history, and left fans deeply satisfied and ready to download their copy of the show to cherish for years to come.

The Books school Noho in 'folktronica'

New York folktronica duo The Books played Pearl Street Nightclub this past Friday. Combining avant garde footage with their distinct sound, the band was a big hit with the Northampton crowd.

By Garth Brody
Daily Collegian Staff

There are concerts and there are great concerts, and then there are Books Concerts. Friday night, the universe was treated to a Books Concert in Northampton and it was good.

The night commenced without much fanfare, starting with a pared-down lineup from Black Heart Procession. Their gothic folk sound, though soulfully delivered, did not translate very smoothly to the venue. Especially considering their percussionless setup, the band's subtle, brooding balladry fell a little flat.

The two band members (plus Gene Back, the third, touring member of The Books) remained seated for the entire set, and the projected visuals above them seemed to be a slide-show of every image contained on a band member's MacBook. It was an apathetic set, to say the least.

The apathy dried up pretty quickly as The Books took the stage. The musicians and their audience entered immediately into the kind of harmonious unity only achieved with home field advantage. The atmosphere was – to use a perfectly applicable cliche – electric.

The opening three or four songs, all from the latest album, "The Way Out," were accompanied by some of the most intricately layered video art ever set to music. The display was also relentlessly funny, not to mention surprisingly full for a performance by one cellist (Paul de Jong), one guitarist and vocalist (Nick Zammuto), and one multi-instrumentalist (Gene Back),albeit supported by some prerecorded tracks.

The first track off the album, "Group Autogenics I," which is comprised largely of manipulated hypnotherapy samples from old New Age instructional VHS tapes, opened the show. The dozens of different soothing speakers, each making a statement more absurd than the one before, became floating heads traversing a dated looking psychedelic backdrop. Said one of the absurd voices, "On this recording, music specifically created for its pleasurable effects upon your mind, body, and emotions is mixed with a warm, orange-colored liquid." The editing was gloriously amateurish, hurling a barrage of simple but effective techniques that were sequenced and combined so delicately that the effect was inescapable.

The Books's Zammuto described the concert visuals in a previous interview as something akin to the band's lead singer (which would otherwise be his role). Not only does this description explain the way the projections functioned, as the visual focus of the audience, but it frames them in a fascinating way. How many more dimensions are available to the artist through projected visuals than through merely standing at a microphone? The Books know the answer to that question pretty well.

What was really stunning about the visuals on the first few tracks was how something seemingly incongruous with the sampled lyrics, which themselves were often incongruous with one another, would be thrown against yet another arbitrary image. And just when the effect should have disintegrated into nonsense, something indescribable would resonate so sharply that it pierced through the obfuscation. A hand would point to an ear as a glass on the other side of the speaker's head is filled with the aforementioned orange liquid as the speaker tells the audience that they can smell what they are being shown.

The high watermark of this opening section was "I Didn't Know That," a very funky track about enthusiasm. As Zammuto wryly put it, "What we didn't know about was that it's about golf." What followed was (and this can't be overstated) one of the funniest three-and-a-half minute segments ever produced. Hilariously earnest golf instructional tapes were rhythmically cut and their endless parade of grimacing golfers were given the rainbow exaltation they undoubtedly knew they deserved. If this doesn't make sense, it shouldn't. Just try to picture the hallucinations of a mid-90s amateur golfer after hitting a ball really far while holding his club in one hand. Genius.

The set cooled down a bit after the opening salvo. A video-free rendition of the soft and folky "Free Translator" marked a transition to the more euphonic side of The Books. The visuals from that point forward were, for the most part, much older and therefore much less obsessed over. The simple techniques were more repetitive; a series of clips would play backwards in slow motion or a thin horizontal strip of one video would be dropped unceremoniously in the middle of a larger video as they played simultaneously.

Still, the visuals were always beautifully matched to the music. "We Bought the Flood" featured recovered footage from the depression alongside the song's somber death march for a chillingly poignant effect. The dramatically slowed clip of an elderly woman, in hysterics, standing by the side of the road was particularly moving.

A gorgeous rendition of "Take Time" closed the main set, accompanied by a collection of somewhat silly images whose outdated aesthetic felt intimately human. The encore was a foregone conclusion, revealed by the DVD menu set-list projected for all to see, but surely the Northampton crowd would have dragged the band back out on stage either way.

Love was in the air; the very special kind of love felt by a municipal population for a folktronica duo. Every note was warm and orange. It has been five years since The Books have released an album, and the world is ready. Everything was right. The Books are back.

'Paranormal Activity' sequel: new family, same scare tactics

By Tyler Manoukian
Collegian Correspondent

It started with the automatic pool cleaner finding its way out of the pool every night, but "Paranormal Activity 2," the recently-released sequel to the most profitable film of all time, given its low production costs, horrified audiences with its bone-chilling shots and supernatural occurrences.

"Paranormal Activity 2" tells the other half of the "true story" of Micah Sloat's death, serving as a prequel to the first movie. The movie occurs 60 days before Micah's death and focuses on his girlfriend Katie's sister, Kristi, and her family.

After experiencing what the family believes to be a series of break-ins, they set up a complex security system of hi-tech cameras. Through these cameras, the family is shocked to see what is truly transpiring at night when they are sound asleep. The film gives viewers the other side of Katie's mysterious life by focusing in on her sister, Kristi and her new family.

"Paranormal Activity 2" is a housebound creeper story that takes place entirely in one location, similar to other films of its kind, like "Phone Booth." The film cleverly ties into the first movie while producing some original footage. Instead of reproducing the "Blair Witch" style camera angles like last year's mega-hit, director Tod Williams, writer Michael R. Perry and producer Oren Peli, who wrote the first film, went with a more complex style of cinematography.

With the adaptation of multiple cameras placed throughout the family home, viewers are always attentive and are able to see each scene from multiple angles. The family room could be seen from two different perspectives, the front door was shown, the pool virtually every room in the house. Williams and Peli really got creative with their ideas in this prequel.

The movie will surprise you with its scare tactics, as one of this year's most anticipated horror hits. Released one week before "Saw 3D," the movie grossed nearly $100 million its first weekend due to some excellent build up and killer scares. One particular scene in the kitchen, when Kristi is boiling tea, shows the cabinets start to shake and burst open – that alone will have you jumping out of your seat. The best part is that the scares take place during the day, rather than primarily at night. This way, the audience won't be thinking, "Well, why don't they just check it out during the day?" It adds a new element to the film when even the daytime is no longer safe.

Every time the screen shots of the family's pool in the backyard flashed on the screen, 'paranormal activities' really started. This scene was like a cue for the "what happens next?!" moment we all experience. This time, however, the unnatural invades the walls of an innocent family with more frequency and more intensity.

The surprising tie-in to the plot of the first movie was something to enjoy. You may not think that the movies are connected at first, but avid "Paranormal" followers will quickly recognize the recurring cast and intriguing interconnectedness.

Fans will remember Katie, played by Katie Featherston, as the innocent girl in the first film who is sucked into a whirlwind of the bizarre. Viewers can sympathize with her, leading us to desire her safety and praying she will make it out of this mess alive. In a surprising twist that will surely scare the pants off of the casual moviegoer, Katie takes the role of mysterious and weird. While not expected, Katie's presence in the film is entirely necessary to put the film in perspective.

Her role is spectacularly performed. Fans will not expect the twists and turns she brings to the film. Katie''s character comes out of nowhere to amaze the audience.

Unexpected events will knock the audience out of their seats. Silence serves as a precursor to a soon-to-be major scare. Huge "Paranormal" fans will learn to desensitize themselves to these scenes, because they do become predictable. Nonetheless, they are still very shocking and scary.

Overall, the film was very good. Like all sequels, though this is technically a prequel, "Paranormal Activity 2" never does as well as the original. You can expect the same type of scares in this movie, but it gets repetitive and does not achieve the same mystique that the first movie had. Its purpose to please the crowd was overshadowed by the intent of the sequel to be a huge financial success, much like the original.

While it gets redundant, the film definitely impressed with its plot. This movie solidified the original story, putting all the pieces together. Like any horror film, a plot only adds to the suspense and makes for a better overall experience. "Paranormal Activity 2" did just that, making up for the usual lack of originality in a sequel.

If you are a huge fan of this series and are too scared for upcoming blockbusters such as "Saw 3D," this is the perfect film for you. Casual movie watchers beware of breath-taking footage and a killer plot.

Havens sets passing record

FOOTBALL from page 12

and took advantage of two early turnovers, taking a 15-0 lead in the second quarter.

The Minutemen forced a UNH punt on its first series after an eight-play drive stalled at the UMass 48-yard line. Wildcat punter Kyle Auffray lofted a kick right, landing just inside the 20-yard line.

Strong safety and special teams player Shane Viveiros engaged in a block near the right sideline and got in the way of the ball, muffing the punt, which was recovered by New Hampshire's Nico Steriti.

The Wildcats scored four plays later on a Toman touchdown rush from the 1-yard line. A Kevin Decker throw to Chris Chandler gave UNH a two-point conversion and an 8-0 lead.

Tailback John Griffin and the UMass running game struggled all day, gaining 43 net yards and fumbling away the ball in the second quarter, leading to a second Wildcat score.

Next, a UNH three-and-out gave the Minutemen the ball back with 10 minutes, 58 seconds left in the second quarter and the ball at their own 41-yard line. After a 21-yard Havens completion on 1st-and-10, he and Griffin mishandled an exchange in the backfield and Brian McNally picked up the fumble.

The turnover led to a three-yard touchdown run by Dontra Peters (23 carries, 98 yards, two touchdowns) at the 5:44 mark.

The Minutemen were held to under 100 yards for the first time this season by a Wildcat team which ranks seventh in the CAA for rushing defense (136.1 yards allowed per game).

Junior Jonathan Hernandez led UMass with 50 yards on 12 carries while senior John Griffin managed five yards on seven touches.

The Wildcats had their longest drive of the game in third quarter, marching 99 yards in 10 plays for a one-yard Toman touchdown run with 7:37 to go.

UNH pushed its lead to 29-0 later in the quarter on an 11-yard Toman pass to wide receiver Joey Orlando.

UMass scored its first touchdown with 10:28 left in the game. Tight end Rob Blanchflower scored a touchdown off a fumble by Nelson at the Wildcat 1-yard line, but the Minutemen failed on their two-point conversion attempt.

Saturday's crowd was the largest ever in attendance for a CAA football game at 32,848. It was the second time that UNH played at a professional stadium this season (Heinz Field on Sept. 11 being its first) and the first for UMass since it played at Foxboro Stadium on Nov. 2, 1991.

Junior linebacker and captain Tyler Holmes (12 tackles, one sack) spoke to his team's excitement for playing in the venue and their dissatisfaction with the result.

"Most of us could only dream about playing in an NFL stadium," Holmes said. "We're [disappointed] that we didn't live up to the hype today."

Dan Gigliotti can be reached at dgigliot@student.umass.edu.

Jeff Bernstein/Collegian

Running back John Griffin (28) tries to escape a tackle from Alan Buzbee (54) at Gillette Stadium on Saturday.

UMass struggles on ground vs. Wildcats

FUMBLE from page 12

the game with 43 rushing yards – the lowest rushing total of the season. To make matters worse, a fumble by senior John Griffin eventually led to one of the Wildcats' touchdowns.

"We're not finishing our blocks, and our backs aren't seeing the holes they had been," UMass coach Kevin Morris said of his team's lack of production in the running game.

It's not only that the Wildcats rushed for more yards than UMass, it's also how they utilized the running game inside the red zone. Toman totaled two yards rushing throughout the game, but scored twice on quarterback sneaks.

The player who really made the difference on the ground for UNH was Dontra Peters, who finished with 98 yards on 23 carries. Although he didn't make any big plays this longest run was 13 yards), he still managed to break through the defensive line of the Minutemen in the red zone and picked up two touchdowns.

Miscommunication creates penalties

For the second game in a row, Morris can point to penalties as one of the problems his team encountered in the loss to the Wildcats.

The Minutemen lost 56 yards on eight penalties during Saturday's game. In last week's loss to Richmond, they gave up 54 yards with the same number of penalties.

While the numbers are very similar, the cause of those penalties is not. Two of the flags came for having 12 men on the field, and another two penalties game on delay-of-games.

One of the delay flags ended up costing UMass a field goal opportunity with two minutes, 15 seconds left in the first half. Instead of a chance to put three points on the board, it turned the ball over on downs. After the game, Morris took the blame for both flags.

With four games left in the season and a competitive CAA conference challenging the Minutemen the rest of the way, Morris knows things have to change for his team.

Next week, the Maroon and White head to James Madison, where it will play a team that is also on a two-game losing streak, but is still very capable of defeating UMass.

At this point in the season, the Minutemen have very little wiggle room. Last week's stunning upset by the Spiders certainly didn't do them any favors, and with a two-game losing streak, are going to face long odds if they don't win out.

"In our league, your back is against the wall," Morris said. "You've got to win these games."

Adam Miller can be reached at amiller@dailycollegian.com.

Minutemen total 23 points since bye week

OFFENSE from page 12

Griffin eclipsing the 100-yard mark. UMass was one of the top rushing teams in the nation for the first half of the season, but after two sub-par performances, the Minutemen sit in third in the conference at 175.9 yards per game.

"Our offense is drastically different in terms of our result in the last two weeks as opposed to the first five," Morris said. "We have to go back and figure out why."

UMass has scored a total of 23 points in the last two weeks, a number it topped in every game prior to the bye week. In their only loss in the first half of the year against highly-touted Michigan, the Minutemen scored a season-high 37 points.

Third down conversions have been a good barometer for UMass this season. In their three losses, the Minutemen have a nearly 36 percent completion rate. In their four wins, they have a 42 percent completion rate.

Fourth down, on the other hand, has been nearly automatic for UMass, which is 14-of-19 for the year. Four of those turnovers on downs, however, have come in the last two contests.

In 2009, the Minutemen also got off to a strong start on the offensive end. En route to winning three of its first four contests, UMass averaged nearly 34 points per game, including two 44-point performances. After the bye week, however, the Minutemen averaged just over 20 points per contest, including three weeks when they failed to score over 14 points.

The drop in offense played a large role in UMass' 2-5 record down the stretch.

Though many would consider the Minutemen to be victims of a second-half collapse again this season, linebacker Tyler Holmes isn't worrying just yet.

"I'm not concerned," Holmes said. "We just got to fix the mistakes like we always do and get ready to bounce back. I'm very confident in this team. We have a lot of confidence."

Arikian, Craft lift UM to win

By Herb Scribner
Collegian Staff

It was a weekend of firsts for the Massachusetts men's soccer team.

Not only did the Minutemen earn back-to-back road victories for the first time since 2008, but UMass remains unbeaten through six-straight games, which has not happened since last season.

On Sunday, the Minutemen (5-3-6, 4-0-1 Atlantic 10) finished their weekend with a strong 1-0 finish over Saint Joseph's, thanks to Bryant Craft's fifth goal of the year. Craft stands alone on the offensive scale for the Maroon and White, as he has 12 points thanks to his five goals and pair of assists.

UMass	1
SJU	0

"Today's game was played much better," UMass coach Sam Koch said. "I felt comfortable how we were playing the whole game."

Craft's goal wouldn't have been possible without midfielder Ben Arikian, who earned the assist on the game-winning goal. Arikian now stands alone as fourth all-time in career assists, and is one shy of moving up to third, and five away from being tied with Yuri Morales, who holds the record for most assists as a Minuteman.

Koch wasn't shy about expressing his delight with the UMass offense's presence against the Hawks (2-11-0, 1-4-0 A-10), as they out-shot SJU 19-12.

"We moved the ball better, we didn't give [away] the ball as much, we possessed it better," Koch said. "Something about today's game is we didn't finish our chances, and we had a lot of good opportunities to score and we didn't finish them until nine minutes left."

Goalkeeper Chris Piekos had another strong performance in the net for UMass, saving three shots to earn his fifth shutout of the year.

Piekos' fourth shutout came on Friday, when UMass finished off Temple, 1-0, in a game which featured another first in freshman Connor DeVivo's first collegiate goal.

"We certainly liked the result," Koch said. "We didn't play that well, but we found a way to win."

Piekos played a similar game on Friday, when he saved five of Temple's 13 shots. The mighty defensive effort by the Minutemen wouldn't have meant anything had it not been for the surprise goal by DeVivo.

DeVivo, who has played in three games in the 2010 season, scored his first collegiate goal against the Owls (4-7-2, 2-2-0 A-10) in the 61st minute.

For Koch, the goal capped off a game that the Minutemen narrowly escaped.

"It was one of those games when the game's over [you] get on the bus as quick as you can and get out of there so they don't change the score," Koch said.

UMass felt a dominant performance by the Temple offense, suffering a 13-5 shot margin. Piekos and the Minutemen defense had to compete against four shots by Tyler Witmer, three of which were on goal, and then another three shots by Ryan Bradbury. Also contributing to the Temple attack were Cody Calafiore, Max Kinderwater and Vaughn Spurrier, who all had a pair of shots.

Seniors show value during last home meeting at Garber Field

Tanvi Kinger/Collegian

Senior Makaela Potts follows through on a pass during the Minutewomen's win over Temple. With wins over the Owls and Saint Joseph's, UMass automatically qualifies for the Atlantic 10 tournament.

By Pete Vasquez
Collegian Staff

For seniors Jaime Bourazeris, Katie Kelly and Makaela Potts, this weekend was already one to remember. Leading the Massachusetts field hockey team to a two-game home sweep only made it more special.

On senior day, the three eldest players on the team were showered with praise from friends and family who came to see them play their last game at Garber Field dressed as Minutewomen. Fans had names printed on their chests and relatives were seen with bouquets of flowers at the edge of the stands, ready to embrace their loved ones after the game.

"It was almost surreal," Potts said. "I really didn't think this day would ever come for me. I actually don't feel like a senior, I still feel like a junior, so it's really weird. It still hasn't hit me; I don't think it will hit me until the season really ends. But hopefully we have a while."

UMass coach Justine Sowry has called these three players a pivotal threesome that helped turn the program back around.

"All three of them have contributed significantly over their entire careers," Sowry said. "I can't speak enough about all three of them. They've played throughout all the different lines. You get great leadership. This year in particular, they brought just a whole other level of dedication, commitment and that competitive spirit. They've really led the team well and they're focused heading into the Atlantic 10 tournament."

On the front page of the program for Sunday's game was a picture of the three seniors huddled around each other, with arms intertwined and radiant smiles beaming from their faces. After Sunday's 4-1 win over Saint Joseph's, the same smiles were visible again.

Kelly, the two-time team captain who has led UMass in goals for the entire season, received the nod to take a penalty stroke with two minutes, 38 seconds remaining in the game. She stood with the ball, about 10 yards away from the SJU goalkeeper, and calmly sent the ball into the left corner of the net, cementing the win for the Minutewomen.

"I had never done a stroke in a game before, so I was really nervous, but it felt pretty good to be able to score," Kelly said.

"She's worked on [the penalty stroke] for four years," Sowry said. "What a perfect way on senior day to give her an opportunity. So when I asked her, she smiled. It was a rocket, great goal."

She also scored the only goal in Friday's 1-0 victory over Temple on a backhanded shot in the circle. Kelly's score was set up by a penalty corner.

Bourazeris and Potts have made a living this season executing penalty corners. Bourazeris lines up the crucial opening pass and Potts, with her sharp stroke, more often than not gets the shot.

Both players played major roles in both wins this past weekend specifically because of their execution on penalty corners. Out of the five total goals scored by UMass, four came courtesy of the penalty corner. The only one that didn't was Kelly's penalty stroke.

Teams have now realized that Potts is the first option on penalty corners, and make it a point to recognize her at the start of every corner. Thus, for the first goal of the game against the Hawks, Potts became the decoy. When the ball was set up to her for a shot, she faked her swing, giving Thando Zono a clear shot for the score.

After the clock wound down to zero and the game was over, teammates and coaches took turns hugging the three players.

"They basically just said that today was a big, emotional day for us seniors and that we wanted to finish it off strong and have a good result at the end," Kelly said. "That's what we focused on throughout the game, just having a positive result so we could celebrate the day."

The results were there and the celebration was on. While the players and coaches insist that two more conference games remain and nothing is solidified as far as the A-10 standings, the three seniors could afford to let go and take it all in on Sunday. The day was for them.

Minutewomen take 2 wins at Rudd Field

By David Martin
Collegian Staff

The Massachusetts women's soccer team picked up a stunning overtime win on Sunday afternoon against Atlantic 10 rival Saint Joseph's in its last home game of the season.

The Minutewomen (7-9-0) improved their conference record to 4-3-0 with their second straight win of the weekend. Senior Therese Smith proved to be the heroine of the game by scoring the golden goal with just over three minutes remaining in the first overtime half. Jess Howe picked up the assist on the play.

The goal marks Smith's seventh of the year and second in as many games.

"This was a really big game for us," Smith said. "We are glad we could win in overtime, especially on the last home game of the season. We can't settle though, we have to keep winning and carry this trend into next weekend."

The Hawks (5-10-1) played a strong defensive game that worked well at frustrating the Maroon and White's scoring chances. The backbone of their defense, goalkeeper Christine Neal, made 6-of-7 saves against UMass, with her best coming off a diving stop with just over 20 minutes remaining in the first half.

St. Joe's now falls to 2-4-1 in A-10 play, with its last three games against conference opponents ending without a win.

UMass coach Ed Matz could not be more pleased with his club's performance on the day.

"We had great play all weekend," Matz said. "The biggest factor to our success was, by far, the performances from the seniors. They all really stepped up this weekend, and with them leading the way, the rest of the team followed well."

UMass	1
SJU	0
UMass	5
Temple	0

The Minutewomen outplayed the Hawks for the majority of the game, making sure to keep the ball in the offensive zone with strong drives and consistent scoring threats. UMass outshot Saint Joseph's, 17-8, on the day and led in corner kicks, 6-3, while also leading in fouls 12-9.

UMass scored five goals in the first half to pick up its strongest win of the season against Temple on Friday afternoon.

The Minutewomen dominated on both the offensive and defensive fronts, rebounding well after suffering a close 1-0 loss against Rhode Island in last Sunday's road game.

Junior forward Deanna Colarossi led the potent Minutewomen attack with her first hat trick of her collegiate career. Her first goal came just after the 15th minute of play off of teammate Jen Houtmann's blocked shot, which Colarossi then put in the right side of the net past Owl goalkeeper Gillian Kacsuta.

Senior Therese Smith would put up the second tally of the game off a shot that bounced off the hand of Kacsuta. Freshman Brittany Moore earned the assist. The goal came just three minutes after Colarossi's first tally.

Tanvi Kinger/Collegian

Deanna Colarossi dribbles the ball up-field during UMass' 5-0 win over Temple.

Colarossi scored her second of the game in the 28th minute off of a pass by Alyssa Visconti. The shot never left the ground on its way into the back of the net.

Colarossi would go on to complete the hat trick in the 36th minute, when she took advantage of a failed clearing attempt by Kacsuta to put the ball into an open net. Colarossi's hat trick is the first by a Minutewoman since Oct. 25, 2002, when Erin Lilly scored four goals in a 6-1 win over Temple.

Freshman Blair Ferry capped off the scoring with her second goal of the season off of teammate Lauren Skesavage's deflected shot off the post. Ferry made the goal with just 56 seconds left in the first half.

Matz was impressed, to say the least, with his team's performance.

"The offense was really clicking," Matz said. "The best part is, even though the offense dominated the game, the defense was also spectacular. It was great to see an overall great game from both ends of the field."

UMass put on a clinic against Temple (6-10-1, 1-5-1 A-10) and kept it from getting any real offense going. The Minutewomen outshot the Owls, 24-14, though they were behind in corner kicks, 5-2, and were ahead in fouls, 9-4.

Sophomore goalkeeper Emily Cota came back strong for the Minutewomen, picking up her first win since being injured against Harvard earlier in the season. This marked the first of two shutout wins for Cota on the weekend.

Dainton critical in development of Teglia

Captain not worried about fighting for spot

By Dan Gigliotti
Collegian Staff

Senior captain Paul Dainton stood on the bench during the Massachusetts hockey team's home opener against Boston University, making way for freshman Jeff Teglia to start his second-straight game in net.

Despite allowing four goals in a loss on Friday, Teglia was pleased with his two performances against the Terriers, glad to be given the chance to start this early in the season.

"It was a great experience playing at BU and with an unbelievable home crowd here tonight," Teglia said. "I was pretty happy with my play, both nights. I thought I gave my team a chance to win."

UMass (0-3-1, 0-1-1 Hockey East) earned a lead into the second period before losing, 4-3, when three unanswered goals put the Terriers up for good.

Trailing 1-0 in the second period, BU forward Charlie Coyle found the net four minutes, eight seconds into the period with a man up. Seven minutes later, forward Andrew Glass rifled a shot into the top of the net from in front of the goal. Forward and captain Joe Pereira finished the scoring flurry with a breakaway goal at 18:27.

Despite the scoring blemishes in the second stanza, Minutemen coach Don Cahoon believes that Teglia played well enough to give his team a chance at a victory.

"We had the goaltending to win that game," Cahoon said. "He gave us good enough play in the goal. The two goals we gave up were goals that could have been prevented through execution."

Teglia turned away 33 shots in the game, including six on the power play. In three games this season, he has given up 10 goals (3.54 goals-against average) and made 84 saves (.894 save percentage).

Teglia entered this season as a touted goaltender, ranked 28th in North America for the 2009 NHL Draft by Central Scouting Service. However, with Dainton as the incumbent starter and captain, his playing time this early in the season is unexpected.

Dainton was sidelined after suffering an undisclosed injury in the second game of the season at Minnesota on Oct. 9. He is close to full strength, he and Cahoon have said, but did not start because of his limited play leading up to Friday's game.

"Paul was close, but we didn't give him a lot of practice time as we wanted," Cahoon said. "It just seemed prudent with one game to play this weekend, knowing that he's probably 100 percent by tomorrow or Monday, why throw him into the mix and then all of the sudden he gets involved in a collision and next thing you know he's down for a couple more days."

Teglia appeared in relief of Dainton against the Gophers, making 18 saves while allowing four goals in over 45 minutes in the crease. His first start came in a 2-2 tie at BU on Oct. 16, where he shut out the Terriers for the final two periods and overtime (33 saves).

Teglia credits Dainton's continued leadership on the bench and in practice as a factor to his early success.

"He's an unbelievable mentor. I've learned a lot from him, just being on the side when we have time. He's a great guy and a great leader."

Dainton could play this Friday against Providence, depending on whether Cahoon feels he is ready. He should begin to practice this week at full speed. However, Dainton is not concerned about ceding his spot in goal for the time being.

"He was the top goalie in his league and that's why we brought him in here," Dainton said of Teglia in an interview early last week. "From a personal standpoint, I'm going to do everything I can to get into the lineup this year, but if Tegs is stopping the puck, he's stopping the puck."

Dan Gigliotti can be reached at dgigliot@student.umass.edu.

UMass stays undefeated in A-10

By Michael Wood
Collegian Staff

Senior Katie Kelly scored two goals in the last two regular season home games of her career and received helped from a flurry of offense as the Massachusetts field hockey team closed out its home schedule with back-to-back wins.

Oct. 24 was senior day at Garber Field, and the Minutewomen made sure to send their seniors off in style, defeating Saint Joseph's, 4-1.

Thando Zono scored two quick goals, Kelly converted on a penalty shot and Mika Black scored the first goal of her UMass career as the Minutewomen clinched a berth in the Atlantic 10 tournament.

The Maroon and White (11-6, 5-0 A-10) have won seven consecutive games, and remain atop the standings with an undefeated record in conference play.

"We're feeling pretty good," Kelly said. "It's exactly where we want to be. We just need to continue focusing, taking one game at a time. Next weekend we still have to get the job done."

Kelly's penalty shot was the first of her career, and her team-leading tenth goal of the season. She now has double-digits in scoring for three straight seasons.

"It was good. I had never [taken] a stroke in a game before so I was really nervous, but it felt pretty good to be able to score," Kelly said. "I pretty much do the same stroke every time, so I basically was just thinking if I miss it, people were going to have a lot of comments to say to me, so I better score this."

UMass	4
SJU	1
UMass	1
Temple	0

Zono scored the first two goals of the game midway through the first half. Both goals came off successful penalty corners, something the Minutewomen have been working on all season long.

"We had enough of them that you want to keep mixing it up," UMass coach Justine Sowry said. "Overall, I wasn't that pleased with our penalty corner execution. Scoring a couple is good, but I'll give great credit to the Saint Joseph's defense, and I thought their goalkeeper played really well today."

Black tallied her first goal off a cross from Nicole Cordero inside the scoring circle with 10 minutes left in play.

On Friday afternoon, UMass capitalized on its consistent pressure, effective passing attack, and offensive shots and beat Temple, 1-0.

"We had some great passing combinations in this game," Sowry said. "It's been our focus and we've tried to even up our attack a little. We got into the circle a decent amount, and from here we just have to stay consistent and hopefully get a little more attack in the circle."

Kelly scored the lone goal in the game with five minutes left in the first half. She took a cross from Nikki Panciocco in front of the net and put a shot past Owl goalkeeper Sarah Dalrymple for her ninth goal of the season.

The Minutewomen defense shined as the most effective aspect of the game plan, holding Temple to just one shot on goal. The remainder of the game was dominated by the Maroon and White in unquantifiable categories. Everything the team did seemed to work, and while Sowry was pleased with the outcome, she stressed that her coaching staff still expects perfection out of their athletes.

"We're still very hard on [the players] right now," Sowry said. "A 7-0 run, 5-0 in the A-10 is great, but that's not why we're here. It's to get back into the tournament and get into the final and move on from there. We have to work hard at practice on our set pieces, continue to pass the ball and have good field awareness."

The Minutewomen finish their regular season on the road as they head to Westchester on Friday and La Salle on Sunday for the last game before the start of the A-10 tournament.

Michael Wood can be reached at mcwood@student.umass.edu.

Jeff Bernstein/Collegian

Forward Sydney Stoll runs towards the goal during UMass' game against Temple on Friday. The Minutewomen beat the Owls, 5-0.

Seniors step up in final home stretch

By David Martin
Collegian Staff

Senior Day is a special time of the season for the older players on the roster.

The day is theirs to shine, their time to grab recognition and applause from their teammates, their coaches and all who come to cheer on their team.

The seniors on the Massachusetts women's soccer team made sure to take their day and extend it throughout the whole weekend, as they finished their careers on their home field in solid fashion.

"All of the seniors came to play this weekend," UMass coach Ed Matz said. "As I have said before this season, they would be the key to this team's success over the course of the year. This weekend, they really came through and led the team to an important pair of wins."

"The thing is, the freshmen are not fully aware of how close to the end of the season we are," Matz added. "They are kind of naive in the fact that they do not know what to expect or how to react to the pressure that comes in trying to earn a playoff spot. The seniors did an excellent job this weekend in showing them how to perform. The freshmen are responding to senior leadership in the exact way I hoped they would."

The senior who made the biggest impact on the weekend was undoubtedly Therese Smith.

Smith scored one of five goals in the team's dominating 5-0 win against Temple on Friday. Her second goal of the weekend would be the overtime golden goal in UMass' exciting 1-0 win against Saint Joseph's on Sunday.

"It was really a big game for us," Smith said. "We knew we could score goals, and we proved that in both games this weekend. As great as it is to win, we can't settle yet; we have to keep winning if we want to make it into the playoffs."

"It did feel really good that we could win in overtime today," Smith added. "To score the overtime goal on Senior Day is a great feeling, but I'm really just happy we won."

In honor of Senior Day, the numbers of each of the seniors were taped up to the fence opposite of the benches. Smith's number 14 found itself in good company.

Ashley Hamel (20), Kelsey Anderson (2), Alyssa Visconti (3) and Sydney Stoll (4) all were honored along with Smith for their hard work and four years of service to the team. Combined, the five Minutewomen played in 304 games and have made a lasting impact on the club.

A sixth number also was honored with the group, though it was not seen on the field of play this season.

Senior Meghan Gould (11) was declared medically unable to play for the Maroon and White this season due to previously suffered injuries. In her three seasons at UMass, Gould stuck out as an outstanding defensive player, playing in 44 games starting 32 of them. Her contributions to the club were not forgotten, however, and it is clear that many of her former teammates still see her as an important part of the club.

The seniors will now work to lead the team through the final three games of the season to what they hope will be another Atlantic 10 playoff berth in their collegiate careers.

David Martin can be reached at dmmartin@student.umass.edu.

Colonial thrash

New Hampshire blows out UMass at Gillette

By Dan Giglotti
Collegian Staff

FOXBOROUGH, Mass. – Gillette Stadium provided a brand new setting for college football on Saturday and a rivalry which dates back over 100 years, as the Massachusetts football team met with New Hampshire.

However, a familiar set of miscues led to a UMass loss to the Wildcats, despite a record-setting performance by its quarterback.

The No. 12 Minutemen (4-3, 2-2 Colonial Athletic Association) lost the turnover battle and the lead in the first half, as No. 10 UNH (5-3, 3-2 CAA) won the first inaugural Colonial Clash, 39-13, in Foxborough, Mass.

"Unfortunately we didn't play up to the venue today," UMass coach Kevin Morris said. "New Hampshire took advantage of all mistakes and that's the ballgame."

The Revolutionary War replicas, which fire off blank musket rounds after the home team scores during New England Patriot games, used much of their ammo for UNH on Saturday, as it scored 29 unanswered points to begin the game.

In a meeting that featured the top two passers in the CAA, UMass quarterback Kyle Havens threw for a school record of 450 yards on 32-of-55 passing with two touchdowns and one interception.

UNH	39
UMass	13

Havens broke the UMass single-game passing record, set by Liam Coen (421 yards) in an FCS quarterfinal playoff loss against Southern Illinois on Dec. 1, 2007. His career-high performance comes on the heels of his worst game of the season against Richmond, when he threw for 78 yards and one touchdown on 12-of-22 passing.

After the game, Havens wasn't aware that he made his mark in the Minutemen record book, but was more concerned with his team's loss.

"I didn't know I did that, but we lost, so I could care less," Havens said of his record-setting performance.

R.J. Toman finished 17-of-26 with 175 yards for the Wildcats, threw for one touchdown and rushed for two.

Minutemen wide receiver Anthony Nelson caught a career-high 11 passes for 190 yards while wide receiver Julian Talley had eight catches for 111 yards and one touchdown.

UNH Sophomore linebacker Matt Evans won the Bill Knight Award for the Most Valuable Player of the game, leading a stymieing defense with 13 tackles and an interception.

The Wildcats pounced on the UMass rushing attack

UM struggling offensively in 1st losing skid

By Jay Asser
Collegian Staff

FOXBOROUGH, Mass. – For the second-straight week, the Massachusetts football team fell short of high expectations in an electric environment. After allowing a game-winning drive in the last minute against Richmond on homecoming weekend, the Minutemen never found their rhythm in a 39-13 loss to New Hampshire at Gillette Stadium this past Saturday.

No. 12 UMass managed only 43 rushing yards, compared to the 171 amassed on the ground by No. 10 UNH. The Minutemen also lost the turnover battle once again, with two fumbles and an interception.

"Certainly, it's a one-night performance that's not very good and didn't represent who we are this year in 2010," UMass coach Kevin Morris said after the loss. "But that's who we were tonight."

Though quarterback Kyle Havens had a strong statistical day with 450 yards and two touchdowns, the running game struggled to move the chains, forcing Havens to throw 55 times. It was the second-straight game in which the rushing and passing games were out of sync.

Against the Spiders, tailbacks Jonathan Hernandez and John Griffin combined for 146 yards on the ground, but UMass gained only 78 yards in the air.

"That's two weeks in a row that's happened now," Havens said. "We get great field position. The defense is putting us in good positions, and we just can't really start or finish."

The Minutemen entered the week first in the Colonial Athletic Association in red zone offense, converting 26-of-30 chances. Following the loss, in which they converted on only 2-of-5 red-zone chances, they dropped to fifth.

The rushing production has also taken a dive following the bye week, with neither Hernandez nor

Wide receiver Anthony Nelson looks to gain a first down for the Minutemen during their loss to the Wildcats at Gillette Stadium. UMass lost, 39-13, despite quarterback Kyle Havens's 450-yard record-breaking performance.

Fumbled punt return begins trouble in loss

By Adam Miller
Collegian Staff

FOXBOROUGH, Mass. – If one were to search for any indicators of the problems the Massachusetts football team would have against New Hampshire on Saturday, one could point to the botched punt recovery by strong safety Shane Viveiros.

The junior tried to block a UNH player from getting to the ball, but his efforts backfired, as the ball bounced off his foot and got picked up by Nico Steriti at the 14-yard line with seven minutes left in the first quarter.

Scoring first ultimately gave the No. 10 Wildcats the confidence they needed the rest of the game in carrying out their 39-13 rout of the Minutemen.

Saturday was the second time Viveiros turned the ball over on a punt return. The last time he muffed a punt

UMass Football

was in a 27-14 win against Towson on Oct. 2.

In that game, Doug Shaw returned the ball to the 23-yard line. The Tigers took advantage of their field position and advanced to a 1st-and-goal at the 9, but the Minutemen eventually got the ball back with a turnover on downs.

This time around, UMass (4-3, 2-2 Colonial Athletic Association) was not as fortunate. The Wildcats (5-3, 3-2 CAA) took advantage of the mistake and eventually scored after quarterback R.J. Toman ran in the first touchdown of the game.

Viveiros's fumble was the only return the Minutemen had the entire game on six punts. UNH's punts totaled 203 yards on the day compared to UMass, which had three punts untouched by the Wildcats for 112 yards.

UNH controls ground game

An area for that has been strong all season for the Maroon and White was outdone by the Wildcats on Saturday.

UNH ran for 171 yards with four rushing touchdowns. On the other hand, the Minutemen finished

Minutemen fall at Mullins

Young Mass Attack struggles against BU

By Steve Levine
Collegian Staff

Despite resilient and gritty play, the young Massachusetts hockey team has yet to win a game this season.

On Saturday, the Minutemen (0-3-1, 0-1-1 Hockey East) played its home-opener against No. 8 Boston University (3-0-1, 1-0-1 HEA), losing 4-3 in front of a home-opening record crowd of 7,021.

Both teams opened their conference schedules against each other on Oct 16, when they tied, 2-2. In that game, UMass rookie goaltender Jeff Teglia got the start due to senior Paul Dainton's injury, stopping 33-of-35 shots. With Dainton not yet 100 percent, Teglia started on Saturday, again registering 33 saves.

"I'm really happy with my first two performances," Teglia said. "It was just an unbelievable home crowd tonight. I had a ton of fun out there. I thought I gave my team a chance to win both nights, and I think it's really coming along."

Despite being outshot 10-4 in the first period, it was UMass which notched the game's first goal, coming on a power play, as sophomore Darren Rowe scored his first of two goals on the night. Senior Danny Hobbs started the play with a pass down low to freshman Troy Power. Power took a shot on net, which deflected off BU's goaltender, Kieran Millan, into the right faceoff circle. Rowe, pinching in from the point, gathered the puck and shot it over Millan for his third goal of the season, sending the crowd into a frenzy.

Despite not scoring a goal in his rookie season last year, two of Rowe's team-leading four goals have come on the power play, which has struggled to find consistency amidst the roster's inexperience.

"It's still a work in progress," UMass coach Don Cahoon said, referring to the power play. "Rowe certainly has found his way, though; he's got a nice feel."

The 1-0 lead dissipated quickly in the second period, as the Terriers scored three unanswered goals.

"We played pretty hard in the first period but struggled with their strength down low right from the beginning," Cahoon said.

"You could see that when they cycled pucks or spread us out in the zone; they would get their bodies between the puck and [our players]. They were able to possess the puck more than we would've liked them to."

With one minute, 33 seconds remaining in the second period and UMass at the tail-end of a power play, BU's captain Joe Pereira made it 3-1 on a breakaway coming out of the penalty box. UMass' Conor Allen fanned on the final shot of the power play, giving BU's Chris Connolly possession. Connolly then found Pereira behind the UMass defense, and he slid a backhand shot between Teglia's legs.

"Pereira put a strong move on Teglia," Cahoon said. "[BU's] goals were goal-scorers' goals."

UMass showed its resilience in the third period, when Rowe scored his second goal on a seeing-eye shot from the point, making it 3-2.

The Minutemen could not overcome critical mistakes made in the third, though, as BU's Sahir Gill scored the game-winner on a breakaway resulting from a broken play in UMass' defensive end.

BU	4
UMass	3

"In the third period we battled back and made a game of it but then made a bonehead play that just gave the game back," Cahoon said. "The mistakes that were made continue to be young mistakes with young players either losing their poise or not following through on an assignment."

With 19 seconds remaining and Teglia pulled for the man advantage, Michael Marcou made it 4-3 with a slap shot from the point. The Minutemen could not score the equalizer in the final seconds.

"It's frustrating that we can't pull out any wins," Rowe said. "It's good that we're finishing strong, though. The second period got away from us and we have to make sure to play hard for 60 minutes."

Steve Levine can be reached at slevine@student.umass.edu.

Junior Danny Hobbs tries to escape a BU defender during the Minutemen's loss to the Terriers. The Mass Attack remain winless.

Disgustingly dark dishes

By Ellie Rulon-Miller
Collegian Staff

Halloween is creeping up on us. All over the Pioneer Valley people are scrambling to put together costumes and organize last-minute parties.

One of the keys to a good party, regardless of the holiday, is good food. It's easy to appreciate fun food that corresponds with the theme of a party, and Halloween is the perfect opportunity to pull out all the stops and have a little more creative fun with your cooking.

The Internet is crawling with interesting recipes that are both delicious and visually appealing. They range in ingredients and portion size, and most have an obvious gore factor.

Severed Finger Hot Dogs

One of the goriest-looking homemade Halloween foods is severed finger hot dogs. The recipe is extremely simple, requiring only hot dogs and ketchup, although some variations of the recipe require French fries or other foods to use as edible fingernails. All you have to do to make the hot dogs look like fingers is slice small, horizontal slits in strategic places – when done properly, they'll look like the bunched up skin on your knuckles.

If you want to incorporate a fingernail into it, simply cut off a small part of the hot dog at one end and cut a fingernail-sized piece of a French fry. Stick the fry onto the hot dog with a small amount of cheese, and bake the whole thing until it's cooked all the way through. If you cook it just long enough, the hot dog will look like the finger has not only been severed but has also been boiled – it will bulge in some areas and turn a darker, slightly burnt color. Squirt some ketchup around the hot dog when serving to look like blood.

Apple and Almond Vampire Teeth

A healthier alternative to severed finger hot dogs are apple and almond vampire teeth. This recipe requires only those two ingredients – an apple and pieces of slivered almonds. Without peeling it, cut the apple into quarters. Then, cut the skin side. Don't cut all the way through. Make two cuts into the apple at diagonal angles, allowing you to remove a sort of triangle-shaped piece from the side with the skin. At this point, the apple should resemble a mouth.

Next, just take pieces of slivered almonds and stick them into the soft interior of the apple where you just removed a piece. Use different sized pieces of almonds to look like scarier teeth. You can use as few or many almonds as you'd like to make the teeth look as grody as you want.

Timely 2010 costumes that'll make you Gaga

By Malea Ritz
Collegian Correspondent

It's that time of year again. The candy corn is back on store shelves, pumpkins sit on doorsteps, and overpriced Halloween costumes have returned to tParty. For most of us poor college students, these pricey outfits are out of the question. In this case, Halloween DIY costumes are the best way to go.

An obvious costume choice is to dress up like your favorite guido or guidette from "Jersey Shore." Considering the fact that these people are most well known for their hair, mastering their 'dos is a must. You can choose whether you want to take the easy way out and buy a wig, or put in the effort on sculpting your own hair. If you choose to style your own locks, you will need hair gel, hair spray, a hairbrush, a teasing com, and a lot of time. For Pauly D's signature look, you will need to style your hair with lots of gel, spiking it up all over with your fingers. As for Snooki's famous pouf, you will need to tease your roots on the top section of your head and secure your hair in the back.

What the duck?

By Kate MacDonald
Collegian Staff

Regardless of how much you can bench press or how much alcohol you have in your system, everyone is afraid of something. It's human nature to be cautious about the things which we don't fully understand, and it's very common to be frightened of something you had a bad experience with when you were young.

Personally, I'm terrified of two things: clowns (really, who thinks their faces are funny?) and elevators (thanks, Dad, for dragging me on Disney's "Tower of Terror" three times in a row when I was 10, because you loved it). Call me irrational, but it could be much worse.

Coined by Gary Larson in his comic, "The Far Side," anatidaephobia might strike fear into those walking by the campus pond. This is the fear that, "Somewhere, somehow you are being watched by a duck." While this could stem to a traumatic childhood experience, anatidaephobia has got to be one of the most ridiculous fears out there.

It has good company, however. Those with bolsephobia are petrified by Bolsheviks, though there probably aren't too many sufferers around today (the same cannot be said about early 20th century Russia). Linonophobics are tortured by the thought of string. While not commonly thought of as a terrifying object, it evidently horrifies some. The same can be said for geniophobies, who have a fear of chins. Unfortunately, you really can't escape chins - even geniophobics have them.

The fear of bald people is referred to as peladophobia. It's hard to comprehend what makes them scarier than people with hair - it's not like those with hair use as a weapon. But pair this fear with the fairly common fear of dentists - dentophobia - and you've got a person who's going to suffer a lifetime of untreated toothaches.

There are many phobias that have to do with one's given profession, something most professors don't tell you about. For example, in law school, they don't mention that litigaphobics - those with a fear of lawsuits - need not apply. The same goes for priests, rabbis, et cetera; they shouldn't enter a seminary if they have theophobia, or the fear of religion.

And perhaps doctors should be more considerate to their macrophobic patients, who have a fear of long waits. While this annoys almost everyone at some point, macrophobes simply cannot deal with it. Obviously, they're not the type of people who are going to be braving the lines at a Massachusetts Registry of Motor Vehicles.

There are also certain fears that one probably wouldn't find on your average college campus.

Amherst's Marx named next president and CEO of NYPL

By Dan Peltier
Collegian Staff

The New York City Public Library's (NYPL) Board of Trustees announced earlier this month that Amherst College President Dr. Anthony Marx will become the next president and CEO of the library starting in July 2011.

The move will force Marx to step down from his position as President of Amherst College, a post he has held since 2003. Marx is the 18th President in Amherst College's 189-year history.

According to Masslive.com, while at Amherst, Marx led a $450 million capital fund raising campaign that featured one donor contributing a $100 million gift, believed to be the largest donation ever to a liberal arts college. Marx said he is proud of what he has accomplished at Amherst and where he has taken the school during his time there.

"We've more than doubled our enrollment, and we're now minority white students," said Marx. "We're the most selective liberal arts college in America."

Marx said that he decided to take the post at the NYPL because he feels that it shares similar beliefs and ideas with those of Amherst College.

"New York Public Library shares many of the same values that Amherst College has in regards to education and learning," said Marx.

Marx has high hopes for the NYPL, and has a vision for where he wants to take the library in the future.

"I hope that I can help the library move to have better access to ideas and information," said Marx. "We need to ensure that the 90 branches throughout the city have equal access to these ideas and information."

As far as what his first move as President at the library will be, Marx said that he will visit one of the library's icons for support and advice.

"I plan to visit the famous Winnie the Pooh statue in the library to get inspiration from that," Marx joked.

With the NYPL facing massive budget cuts, Marx realizes that he has his work cut out for him when he assumes the post next year.

See MARX on page 4

Current Amherst College President Anthony Marx has been appointed the next president of the New York Public Library. His tenure will begin next July.

Vegetarian dishes satisfy creepy cravings

By Anthony Santiago
Collegian Correspondent

Halloween, as well as the season of fall, is the time of the year when just about everyone's sweet tooth is in high gear. Cookies, cakes, pastries — and even comfort-food like macaroni and cheese and mashed potatoes — are all warm, subtle reminders of the season.

For vegans and vegetarians, it's a little harder to enjoy these delightful dishes, but there are plenty of Halloween treats that can easily satisfy anybody's taste buds. Here are a few dishes that are easy to make and can get anyone in a Halloween spirit.

Pumpkin Cider Bread

Ingredients
bread pan or round circular pan
2 cups pumpkin puree
Flour (just keep adding until consistency is right)
2 tablespoons yeast - dry, in 1/2 cup
1 tablespoon salt
2 tablespoons oil
1 3/4 to 1 1/2 cup molasses
2 cups apple cider

Preparation time: 1 hour to 1 hour and 30 minutes
Cooking time: 45 minutes

The first, proof the yeast, which means that you will want to measure out two tablespoons of yeast and mix it with warm water to activate it. It is important that the water is warm because water that is too hot will kill the yeast. The yeast is the essential part of vegan bread because it allows the bread to rise. Once you can see a quarter inch of foam on the top of the yeast, you can mix the dry ingredients.

It is best to start with the flour and salt. Start with four cups of flour and then slowly sift in more after the wet ingredients are added. Once the flour and salt are combined, mix in the rest of the ingredients from most wet to most solid. Some extra ingredients that you can add are cinnamon, nutmeg, ginger, cloves, allspice, mace and cardamom.

After all the ingredients are mixed, transfer the dough to a lightly greased bowl, cover it with a cloth or plastic wrap, and leave it in a warm, draft-free spot until it has doubled in size. This may take a while depending on your yeast and the climate and humidity, so anywhere between a half hour to an hour. Roll the dough out into a long, thin, strip and place in a greased pan and let it rise until it again doubles in size.

Finally, put it in a preheated oven and bake it at 325 °F for about 45 minutes. Make sure to watch it so that it does not burn or start browning too quickly. Cool the bread out of the pan because the heat could continue to cook it for a while.

Halloween Pizza Mummies

Ingredients
English Muffins
Pizza Sauce
Black Olives
Scallions / Green Onion
Cheese Sticks

Preparation time: 10-15 minutes
Cooking time: 10 minutes

First, preheat an oven or toaster oven to 350 °F. Cut each English muffin in half, toast them, and spread about a tablespoon of sauce. Next place the slices of olives on the muffins for the eyes and then cut small pieces of green onion for the pupils. Next, pull apart the string cheese and lay the cheese across the muffins for the mummies' wrappings. Finally place the muffins on a baking pan and place them in the oven for about 10 minutes or until the cheese has melted.

Haunted Pasta

For this next dish you will need the following items
Any good size pan
1-1/2 pounds pasta of your choice

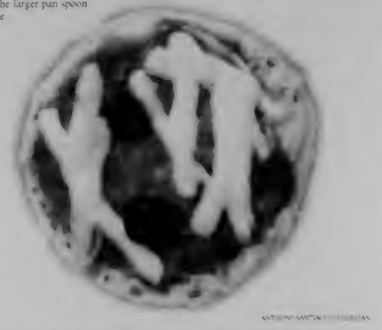
Sauce
3-1/2 cups unsweetened nondairy milk
1-1/2 cups nutritional yeast
1 cup canola or vegetable oil
1 cup water
1/3 cup tamari or soy sauce
1/4-1/2 cups of black or firm tofu cubed
1 tablespoon garlic powder
1 tablespoon paprika
1 tablespoon Vegenaise (in lack of fancy processed yeast taste-salt)
1 tablespoon mustard (optional)

Preparation time: 15 minutes
Cooking time: 15 minutes

Pre-heat the oven to 350 °F and then boil water in a big pot to cook the pasta in. Cooking directions are right on the side of the pasta box. Next, add all of the cheese sauce ingredients into a blender and process it all until it has a smooth texture. Once the pasta is fully cooked, drain out the water. Place the pasta into a baking pan and pour the cheese sauce over it. Then, place the pan into the oven and bake the pasta until the top starts to turn brown in color or until it is crispy over the top. This should occur after about 15 minutes.

For a more creative dish of Halloween spirit, you can make some macaroni swamp creatures. For this you will need a muffin pan, olives and spinach. Instead of pouring out the macaroni into the larger pan spoon some into the muffin cups (make sure each cup you used is lightly greased). Bake the macaroni until firm for about 20 minutes. While they are baking, sauté the spinach in a pan until cooked. Once the macaroni is firm, remove them from the oven and allow it to sit for about 10 minutes. After 10 minutes, remove them from the muffin cups and place them upside down on a plate on top of the sautéed spinach. Place the olives on top to act as eyes, and there you have it: macaroni swamp creatures.

Anthony Santiago can be reached at aosantia@student.umass.edu.



ANTHONY SANTIAGO/COLLEGIAN

Pizza is an easy dish to make in general and can easily be modified to be both vegetarian and vegan friendly by adding vegetables and a vegan cheese substitute.

Spook your stomach with sweets

RECIPES from page 1

Doughnut Hole Eyeballs

One of the most interesting (and delicious) Halloween party foods you can make is doughnut hole eyeballs. For this recipe, you will need doughnut holes (which may require a trip to Dunkin' Donuts if you can't find any at the grocery store), white chocolate chips, M&Ms, red decorating frosting and possibly some vegetable oil, depending on your chosen method of chocolate-melting.

If you have to get your doughnut holes from Dunkin Donuts, go for the chocolate glazed ones. They're the most round, making them the closest in shape to eyeballs.

To melt the white chocolate chips, you will either want to microwave them or use a pot on the stove. Should you choose to use the stove, you will have to use some vegetable oil mixed in with the chips so they won't stick as much to the pan. Be careful using the stove — it's incredibly easy to burn your chocolate chips. If you choose this method, your eyeballs may not coat evenly. They will be just as delicious as the microwave method, but they will look less natural.

The microwave would be the easier option. Michaels sells bags of various types of meltable chocolate that does not require the additional use of vegetable oil in the melting process. Follow the instructions on the bag to microwave the chocolate for the right amount of time and avoid burning.

After the chocolate is melted, dip the doughnut holes in it one at a time, piercing them with a fork for easy removal from the chocolate. Lay each evenly-coated doughnut hole out on a sheet of parchment paper until the chocolate hardens. Putting them in the refrigerator for a few minutes will expedite the process.

After the chocolate coating hardens, it's time to decorate. Use red decorating frosting to make red veins on each doughnut eyeball. Squeeze an extra dab on the top of each one and stick an M&M there as the pupil. Peanut Butter M&Ms make the eyeballs the most delicious.

There are many more Halloween recipes out there. A simple Google search reveals dozens of them. Each one makes for a little added entertainment at a themed party, or just as a dessert. Try them and make your Halloween a little sweeter.

Ella Rusen-Miller can be reached at ellarusen@collegian.com.

The best part of the Halloween season is the sweets, including candy and baked goods amongst other tasty treats.

Snacks reign supreme at parties

Ian Winship
Collegian Correspondent

Halloween weekend is coming up. This is one of the weekends that arguably has the biggest, wildest parties of the year. Whether it is a small get together or a huge kegger there is one thing that is the most essential part to your party. This article isn't about that particular thing. It is about the second most essential part of your party. Food. Everyone gets hungry at parties, and with all the running around that comes with this weekend, appetites will most certainly be soaring. This article will have some suggestions for party food so that you and your guests don't leave with grumbling stomachs.

Easily the most important Halloween food, if you can call it food, is the candy. Fruit kung-fuse, to the less-than-fun fun-sized bars. From handfuls of candy corn, to somewhat sketchy homemade candy. There are all types of candy and you can find it anywhere. It may be the easiest thing to go out and buy in bulk for your party needs. You can get different varieties and flavors. The best part: if all of the candy isn't eaten and/or stolen by the end of the night it is still yours. Who knows how long you can make all that candy last?

The next step up from candy is your basic junk food. This basically covers everything from cookies and chips to pretzels and Chex Mix. Again, this is an incredibly easy path to take if you need to supply some food for your guests. There will not be many people who are against free cookies and chips, as long as you stick to the basics. Usually you can go with regular potato chips in a bowl. If you feel like spending a bit more you can even buy some dip. There are more than enough different kinds of dips to keep everyone satisfied. You can go to any given grocery store and get bags of your favorite kinds of chips. This works out well because even if they aren't everyone's favorite, you will be left with a bunch of chips that you expected to disappear anyways. Cookies work as well, but they are often a bit more expensive. It might be safer to use them only for smaller events. Another item that falls into this category that's frequently forgotten is pretzels. You can also go with the classic Chex Mix. Pretty much anything you can put in a huge bowl and share with everyone works!

The best thing you can do for a party, quite honestly is to stock it up, take some time and bake. Homemade baked goods reign supreme when it comes to social snacking. If you don't know how to bake, it may just be time to learn. Or, if you are against learning a skill that will be useful for the rest of your life, you can simply ask someone to help you. Get together with a large group of friends and make hundreds of baked goods. Make anything you want. One great part about making your own food is that you have all of the power. You can add as many ingredients as you want. Maybe add extra sugar! Or extra vanilla extract! Anything you want works. You will also receive bragging rights, because quite frankly, you made some really tasty food. Instead of just saying that you went out and bought something, you can say that you made your very own delicious creation. You still have a bunch of time so, get out there and get some food for your fellow partiers.

Ian Winship can be reached at iwinship@student.umass.edu

While alcohol is a key component to most Halloween parties, candy and snack foods of all kinds are equally essential.

Capuano running unopposed in Massachusetts' 8th district

By Sam Hayes
Collegian Staff

In an election where Massachusetts Democrats are fighting for their political lives, with close congressional, state office, and gubernatorial races, Democratic Congressman Michael E. Capuano is a sure thing. Why? Because he is the only one running.

Capuano is the only uncontested House of Representatives incumbent in Massachusetts and has run uncontested for the previous four elections.

Capuano has held Massachusetts' District 8 congressional seat since 1999.

The eighth district covers about 70 percent of Boston (wards 1-5, 7-19, and 21-22) as well as Cambridge, Somerville and Chelsea, and was the same seat John F. Kennedy held from 1947-1952.

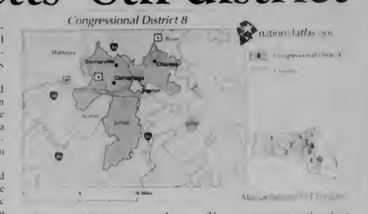
"Congressman Capuano has been an effective advocate for his constituents over the past twelve years," said Capuano's spokesperson Alison Mills about why he is running unopposed. "His Senate run last fall also gave people many opportunities to learn more about his record and his priorities."

Capuano ran for Edward Kennedy's vacated seat in 2009, but finished second in the Democratic primaries to Martha Coakley, who lost to now-Massachusetts Senator Scott Brown in the general election.

"Being unopposed has allowed Congressman Capuano the opportunity to help Democratic colleagues in their campaign efforts," explained Mills.

"At the same time," said Mills about the congressman's lack of need to aggressively campaign, "Congressman Capuano has spent a great deal of time in his district talking with constituents."

In his next term Capuano plans to work "with Congress and the President to continue stabilizing the economy and creating jobs; continue working to bring our men and women in uniform home from Iraq and Afghanistan; and continue assisting constituents in the eighth congressional district," said Mills.



Capuano voted for the Affordable Health Care for America Act, HR 3962, the 2009 federal stimulus package, Troubled Asset Relief Program (TARP), and the renewable energy bill.

Capuano asks students to "Vote!" Mills said. "There are many federal issues that impact college students directly, such as student loans and the economy. Every vote matters."

Capuano was born in 1952, in Somerville, Mass., where he graduated high school in 1969. He then graduated from Dartmouth College, receiving his bachelor's degree in 1973 and graduated from Boston College Law School and passed the Massachusetts Bar in 1977.

From 1977 to 1979 Capuano was an alderman in Somerville just as his father, Andrew Capuano, was. In 1985 he became alderman-at-large for two terms, before being elected as Somerville's 34th mayor in 1989.

He was elected mayor five times, and left halfway through his fifth term to become the congressional representative for Massachusetts' eighth district according to Capuano's website.

Capuano is member of the House Financial Services Committee, the Committee on House Administration, and the House Committee on Transportation and Infrastructure.

The congressman is the chair of the Special Task Force on Ethics Enforcement.

"In November of 2006, Speaker-elect Nancy Pelosi asked Rep. Capuano to head the transition, as Democrats prepared for a majority role in Congress," according to Capuano's website.

Capuano has raised $516,870 and spent $1,894,450. His top contributors include Triumvirate Environmental, Telecommunications Insight Group, Machinists and Aerospace Workers Union, Feeley and Driscoll Accounting Firm, and Genzyme Corporation, a pharmaceutical company.

"Massachusetts is receiving more than $5 billion over six years," states Capuano's website biography about federal transportation money for which he lobbied. And he "significantly expanded the number of Massachusetts citizens eligible for home loans issued by the Federal Housing Administration, Fannie Mae and Freddie Mac."

Capuano is also involved in foreign affairs. He co-chairs and co-founded the Congressional Caucus on Sudan and "has emerged as a leading Congressional voice fighting the ongoing atrocities and genocide in the Darfur region of Sudan," according to his website. He also was involved with giving $50 million more to the African Union Mission in Sudan.

Sam Hayes can be reached at sdhayes@student.umass.edu.

Survival Center fills the van for hunger

As the long, cold grip of winter sets in and the people of the Pioneer Valley are forced to grapple with added heating and transportation costs, one local organization, the Amherst Survival Center, is working to make sure that everyone in the community has enough to eat.

Starting Monday, the Center will be launching a "Fill the Van Challenge," inviting locals to bring non-perishable food items to their favorite businesses around Amherst, which will be featuring donation boxes.

The challenge is being modeled on the Greenfield Center for Self Reliance's annual "Belly Bus" event, where residents of the Franklin County city and local businesses pair up, with locals showing their support of their favorite businesses by attempting to give them the most donations.

According to an Oct. 22 release from the Survival Center, the Greenfield-based event "nets thousands of pounds of food," and organizers here in Amherst are hoping this community "will be able to match or exceed that effort."

The challenge will run through mid-November, according to the release, and will culminate in a "Fill the Van" drive Nov. 10, where the Survival Center will set up its white van around tan soliciting food donations. From 9 a.m. to noon that day, the van will be at Amherst Common, from 12:15 to 1:15 p.m., it will be at the Spirit Haus on Route 9, and from 1:30 p.m. to 2:30 p.m. it will be at Atkins Market in South Amherst.

Congressman Michael Capuano is running unopposed in the Commonwealth's 8th congressional district. He has held the seat since 1999.

Study examines how social media affects mental health

By Jessica Bonheur
Collegian Staff

In today's fast-paced society, social networking has evolved beyond cell phone calls and text messaging and proliferated onto the Internet. Most teens and college students now have at least one account on the sites Facebook, MySpace, Twitter, Tumblr or other popular forms of social media, like Google Chrome and LinkedIn.

A new mtvU study in collaboration with the Associated Press and the Jed Foundation reported that 90 percent of college students sampled said they visited at least one social networking website in the past week.

The results held that the new era of incessant communication can cause friction and mental uncertainty for students.

"For college students, constant digital communication carries an additional layer of complexity, often leading to misunderstandings, confusion and uncertainty," the text of the study read.

The study goes so far as to suggest that the very nature of communication has shifted in the era of social networking, with a majority of students reporting that they had had a fight without physically speaking to another party.

"Nearly 70 percent [of surveyed students] have had an argument exclusively via text message," the study states.

This study was released as part of the Half of Us Campaign by mtvU and the Jed Foundation to examine "how technology is impacting college students' emotional health," according to the campaign's website. The Half of Us Campaign "is designed to improve emotional health and prevent suicide among college students," it states.

The study also sought to examine how students use social media in the categories of seeking help/suicide, misunderstandings/conflicts, being connected vs. feelings of isolation, and stress and happiness. The study sheds light on how social media tools have become the most common form of communication among young people.

Beyond a shift in the parameters of possibility for how young people argue, the study found that students have changed how they empathize and console each other, as well. Nearly four in 10 students reported they had "ask[ed] for help with a serious personal issue or let a friend know they are upset via text message."

The mtvU study certainly indicates that in-person interaction likely has the most positive effects on student well-being, in addition to highlighting how digital communication can be confounding based on its ambiguity.

"At least half of the time when college students read emails/text messages or posts on social networking sites, 48 percent report that they are unsure about whether the sender was serious or joking."

The study also illustrates how social networking has changed how people keep tabs of one another, and some would likely argue for the worst. "Sixty-one percent of students say they have found themselves frequently tracking someone's social networking site," the study suggests.

With the capability to link together individuals from all over the world, social networking tools have, however, have helped 85 percent of students feel more connected to others, the study states. However, the results also show that one in seven say that, while they may be more connected to those around them, they are also further away. This seventh stated that "social networking sites increase feelings of isolation."

The study also suggests that, with the constant presence of social media, young people are changing how they spend their time. A majority of students reported spending two to six hours online per day, and "one-third are online for more than six hours daily."

To understand the prevalence of social networking usage at the University of Massachusetts, 20 undergraduate students were randomly selected and surveyed about their social networking usage. All but one of the students stated that they possessed at least one active social networking site account. Seventy-five percent, or 15 of the UMass students, answered that they checked their online social networking accounts daily, while 40 percent of those that admitted to using their networking accounts daily admitted to actually checking the account more than three times a day for updates and messages.

The number of "friends" the individuals surveyed had in their social network site ranged from 0-900. On average the students had about 343.05 friends on their friends list. Most individuals stated their reason for keeping a social networking account was "to keep in contact with people." One student said, "I was forced to make one," while another simply stated "pictures." Long gone are the days where direct face-to-face communication is the main form of communicating with others. Social networking websites and tools are here to stay.

Amherst President Marx off to Big Apple to head NYPL

MARX from page 1

"Libraries are under a threat both nationally and globally," said Marx. "There won't be just one thing that I'll have to do first; there will be many."

Library Chairwoman Catherine C. Marron and Vice Chairman Joshua L. Steiner issued a joint statement expressing their excitement about Marx's appointment.

"We are thrilled with the choice of Tony Marx," said Marron and Steiner. "Everything he stands for - as a New Yorker, a scholar, and a dynamic change agent - makes Tony perfectly placed to lead the New York Public Library."

Marx was the youngest president in Amherst College's history, starting the position at the age of 44. Prior to coming to Amherst, Marx was at Columbia University for 13 years as a professor and later, director of undergraduate political science.

He also has led a large number of successful secondary school initiatives in the United States and abroad. When he was only in his 20s, Marx helped to found Khanya College, a South African secondary school that prepared more than 1,000 black students for university, according to nypl.org, the library's website.

"At Amherst, and for higher education more broadly, Tony Marx has been a courageous and skilled leader. He understands instinctively that America's greatest institutions need to be more accessible to all Americans, based on merit rather than elitism based on wealth and connections," said Jide Zeitlin, Chairman of the Board of Trustees at Amherst College, in a press release from NYPL.

Marx has been a longtime advocate for public education, and feels that New York is a place that shares in his passion for creating opportunities for public education.

"New York is a city that has always taken immigrants and populations of great talent and given them opportunities, and the library has always been in the forefront of that," said Marx in a recent New York Times article. "And the need for that is even greater today, even as the technology forces us to rethink how we deliver that opportunity.

The NYPL has more than 50 million items in its research and circulating collections. It serves 16 million patrons each year and another 28 million on its web site, nypl.org, according to masslive.com.

Dan Peltier can be reached at dpeltier@student.umass.edu.

Amherst College President Anthony Marx will depart next July to become president and CEO of the New York Public Library.

******IMPORTANT ANNOUNCEMENT******
REGISTRATION FOR FALL 2010

The Writing Program Placement Test
will be offered on:

Tuesday, October 26 @ 6:00pm in Bartlett 109

You must take this exam to qualify for enrollment in EnglWrit 112 (College Writing).

This test may be taken only once.

Students do not need to register for the test.

THE MASSACHUSETTS DAILY COLLEGIAN

EDITORIAL OPINION

"If we don't believe in free expression for people we despise, we don't believe in it at all." -Noam Chomsky

TUESDAY, OCTOBER 26, 2010 EDITORIAL@DAILYCOLLEGIAN.COM

Our apologies for the back in the day buffet

Readers of the Editorial/Opinion page were most likely perplexed yesterday when they read columns about the recently completed March Madness basketball tournament and of the heavily contested primary race between Barack Obama and Hilary Clinton.

The Collegian staff has stepped out of its time machine and returned to present time, a world in which Obama defeated Clinton (and then appointed her to his cabinet) and where college basketball players are still trying to figure out a way to win their first game of the season, let alone the entire NCAA tournament.

Needless to say, we weren't pulling a Halloween prank. We are embarrassed by this mistake. From the time a page's layout has been completed, there are plenty of instances where things can go wrong before you pick up the paper every morning. But that doesn't mean they should.

We take great pride in our newspaper and website products, and every mistake – no matter how little – is disturbing to us. We hope you accept our apology and we will do everything in our power to make sure this doesn't happen again. We'll start by keeping the time machine powered off and tucked away in the storage room where it belongs.

- Collegian Staff

Massachusetts *ballot questions:* No, No and No

Massachusetts citizens should loudly vote against the state's three ballot questions on Nov. 2.

Question 1 would remove sales tax on alcohol, as an excise tax is already imposed on liquor, as it is with such commodities as cigarettes and gasoline. The 6.25 percent sales tax was levied on alcohol starting in the summer of 2009 as a supplemental means of securing revenue, with the state facing a total debt starting Fiscal Year 2011 of $61.5 billion, when adding the Commonwealth's outstanding debt, pension debt, Other Post Employment Benefits (OPEBs) and Unfunded Actuarial Accrued Liabilities (UAALs), unemployment trust funds and the budget gap, according to the Sunshine Review.

Collegian Editorial Staff

While as college students, it might be nice to get a 6.25 percent break on booze, our excise taxes on liquor are significantly lower than those of many states you might think would impose less than "Taxachusetts."

While as college students, it might be nice to get a 6.25 percent break on booze, our excise taxes on liquor are significantly lower than those of many states you might think would impose less than "Taxachusetts."

In the Bay State, we pay a $4.05 tax per gallon of spirits (that's a little under $2 for a 1.75 liter handle), a $.55 tax on wine per gallon (not too bad, only about 14 cents a bottle), and an 11-cent tax on beer per gallon, roughly 33 cents for a 30 pack. Compare that to Alabama, which levies a tax of $18.78 per gallon on spirits. Alaska, $12.80; Idaho, $10.96, Iowa, $12.47, Michigan, $10.91, Montana, $8.62, North Carolina, $13.39, Oregon, a whopping $24.63, and Washington, an even steeper $26.45, according to the Tax Foundation. Maybe tacking on the sales tax to the existing excise taxes simply brings us closer to some of those states.

Based on the state's current budget gap of $2.8 billion – $2.8 billion it simply doesn't have – every penny counts, and we cannot cut state revenues staring down such a huge hole. The idea that we can cut a means of state funding as a way of improving the state's budgetary situation simply does not work. The meager additional 6.25 percent conservers spend on liquor is not breaking their banks, and it should be posited that those who drink heavily will likely find a way to get their booze, even if they face a 6.25 percent hassle.

According to the non-partisan Massachusetts Taxpayers Foundation, if the alcohol tax question and Question 3, which would reduce the sales tax to three percent starting next year, pass, the state budget gap for FY 2012 will widen to $5 billion. While the state already faces a gap of $2.8 billion, the passage of these two measures would force the state to cut widely from many of its most essential programs.

Further, heavy alcohol use ultimately costs the public money in emergency room costs, police, fire and emergency personnel fees. The state should use taxes on liquor to fund anti-drinking and rehabilitation programs.

According to a Sept. 26 piece in the Patriot Ledger's Mass. Market blog, sales on alcohol rose roughly four percent in the first two months of fiscal year 2011, July and August, meaning times can't be too tough, anyways, for the spirit industry here in Massachusetts.

In addition, since the new law went into effect at the start of last fiscal year, it has generated $110 million, according to the Taxpayers Foundation.

Question 2 would do away with a state law that allows developers seeking to build low or moderate-income housing to obtain a single, uniform permit from a city or town zoning board of appeals, rather than being required to garner permits from each local board individually.

According to the U.S. Census Bureau's American Community Survey (ACS) for 2009, which surveys data about the make-up of states and cities, Massachusetts has the fifth-highest home property rates in the nation, trailing just Hawaii, Washington, D.C., California and New Jersey. The Bay State also had the tenth-highest average rental price per month, at $988 per month, a rate few lower-to-middle income citizens can afford.

Massachusetts' Affordable Housing Law simply makes sense. It encourages developers to build affordable housing by providing an incentive: fewer bureaucratic hurdles to jump through, fewer permit fees, a smoother process, and states that at least 25 percent of homes in a given development must be affordable to those households earning less than 80 percent of the area's median income. Why would we do away with a law that promotes the creation of affordable housing, makes life easier for developers, encouraging construction and thus stimulating the economy, and cuts down on bureaucratic red tape? That simply does not make sense.

Lastly and probably most importantly, as much as we might all like 3.25 percent of our every purchase back, right now, we've got to give a little to get a lot more back. With the state facing the aforementioned budget gaps and deficits, it simply cannot afford to chip away from the revenue it so sorely needs. If we choose to scale back our taxes to three percent, we will be putting ourselves into an even deeper hole, and the 3.25 percent extra cash we have on hand for consumer purchases simply will not bridge that gap.

Buying 3.25 percent more at the grocery store or the mall simply will not infuse the economy beyond the hurt Bay State citizens will suffer if the state is forced to cut further from education, welfare, health care, public safety or other areas. As mentioned, the state faces a $2.8 billion budget shortfall, and the Mass. Taxpayers Foundation predicts that, with the passage of this question and question one, that would increase to $5 billion. Beyond that, the Commonwealth could run such a great debt that the Taxpayers Foundation predicts the state will lose its AA credit rating if the question passes.

"It is not an exaggeration to say that the resulting massive spending cuts would eliminate or erode a wide range of services – from education to public safety to health care and human services – that for decades the citizens of Massachusetts have counted on the government to provide," the Foundation wrote in its September report.

Beyond all of that, Massachusetts sales tax is relatively low at 6.25 percent, based on the state's cost of living and average income. Of 45 states with a sales tax, adjusted for per capita income, the 6.25 percent is just 43rd, according to the Foundation's report.

The Commonwealth earns 20 percent of its total tax revenue from sales tax. Can we really afford to cut that beneath 10, already billions in debt? All four gubernatorial candidates oppose the measure, and that ought to say enough. Question 3 would result in a reduction in revenue of nearly $992 million just the rest of this fiscal year, until July, and then a $2.5 billion reduction by FY 2012. We are already too strapped to pass this initiative.

With Massachusetts in precarious financial straits, we need all of the revenue we can pump into social services. While it might be nice to have a few extra pennies in our pockets and purses, what we would lose if we pass these three questions vastly outweighs the few cents per dollar we would get back.

Unsigned editorials represent the majority opinion of the Massachusetts Daily Collegian editorial board.

Love and sex in a time of politics

There has been a writing prompt going around the feminist blogosphere that asks people to express their thoughts on "f***ing while feminist." The responses have been interesting, if not slightly predictable. There've been debates about casual sex, monogamy, the difference between sex with men and sex with women, and BDSM, with the general consensus being that at the end of the day the most important points are consent, safety, and enjoyment. To me these things seem like givens for any healthy sexual relationship, but sadly they do need to be brought up in discussion over and over due to societal failures. But I think there is a deeper discussion to be had about how the politics of the society we live in affect what goes on in the most intimate parts of our lives.

Tori Knobloch

With my brain practically drowning in feminist theory from my women's studies class and the unnecessary amount of extracurricular reading I do on the subject, I examined where the personal meets the political in my own world. I began thinking out loud, proposing theoretical questions to my friends, not as concerns about my own life necessarily, but more as some food for thought.

Is it feminist to be monogamous? Is it feminist to date a man? The response I got was not what I was looking for.

"Feminism is not about being anti-man."

"You can be a feminist if you're single, if you're married, if you're a porn star; Feminism is for everyone."

"If you're happy, you're being a good feminist."

They had essentially presented me with their definitions of feminism and attempted to minimize my concern by assuring me that I fit in just fine. I'm not worried about the feminist police coming and taking away my membership card because I'm dating a man and I certainly wouldn't stop doing something that made me happy because I didn't think it was "feminist."

The debate about the definition of feminism and who gets to be a feminist isn't a new one, but it is something that comes up a lot these days, primarily because of Sarah Palin and her abortion views. But, while most people would agree that feminism is fundamentally about equality and women's rights, it's also a movement that has historically not included all women. Women of color, lower class women, and transgender women have all been excluded from what is apparently some kind of elitist, secret club.

The definition of feminism, as well as the people involved in the movement, will continue to evolve and change with society and gender theory, and that's a good. But to view the idea of "f***ing while feminist" as "how to make sure you're being a good feminist while you're f***ing" ignores that the concept of a "good feminist" has not always been particularly helpful and that its definition will never be set in stone.

The thing about "f***ing while feminist" is that it takes your desires, your most intimate wants and needs, and places them in the context of the misogynist, heterosexist society you've spent your whole life in. It may very well be true that you are in a monogamous heterosexual relationship because it's what you want and it makes you happy, that is fantastic. But you have to assume to a certain extent that the reason you want something is because someone else wants you to. It could be because they want you to buy something, or they want power over you, or maybe they want to maintain a system of oppression that benefits them. This isn't a conspiracy theory, I'm not being paranoid or radical or any other of the things you could call me to dismiss my concerns. Our culture operates within these structures of power and privilege that we are all influenced by, whether we recognize it or not.

It's not like there is some evil overlord at the head of David's Bridal cackling and rubbing his hands together saying, "I will brainwash them all into hetero-normative monogamous relationships so they will spend absurd amounts of money on weddings!" Ultimately there is nothing wrong with any kind of relationship you may be involved in, assuming that consent, safety and enjoyment are present. But it might be worthwhile to reflect on your desires.

Whether you like it or not you are a product of either conforming to or rebelling against the world around you. Even if you were to realize that you only want a relationship because all your friends have them, or because the television told you to, it might not mean that what you feel isn't authentic, or that you should change anything. It's just important to understand the systems of power around you, systems that are probably in one way or another affecting your sex life. I'm not going to dump my boyfriend because I decide our relationship doesn't fit in with my queer politics. But to simply say that it makes me happy, end of story, is to ignore the world I live in and the influences around me.

"F***ing while feminist," to me, means sexual awareness. It's about being comfortable enough to question what no one else can question for you. It's about realizing, without judgment, that your desires might not be what they appear and that, ultimately, it's about having the humility and personal strength to recognize and change certain aspects of your life.

Collective thoughts on individualism

Dear Editor,

Count us among the radical individualist "ideological aberrations" Eli Gottlieb chides in his column critical of Ayn Rand, an author whom Gottlieb displays little evidence of actually having read or understood.

We agree with Rand's view that we have "no ties binding us to others." To be precise, Rand's view is that we have no such ties that are not chosen. She thinks, and we agree, that we do owe our friends and loved ones affection, energy and time. We owe our employers and trading partners the goods and services we have agreed to render. And if we want to live in a civilized society, we owe it to others to respect their freedom.

But Gottlieb thinks we are bound to others by ties imposed by a god or by "fate." We think this is an arbitrary, non-substantiable assertion. But it is curious how many secular people also share Gottlieb's conviction that we have innate obligations to live our lives for other people. These people should think carefully about whether there is any earthly reason to surrender our precious time on earth to random strangers.

A true mark of overcoming "adolescence" is the commitment to take responsibility for one's own life and for one's own thinking – rather than blindly believing the dictates of our culture's moral and religious "authorities."

The Undercurrent

Preserving American democracy, one tea cup at a time

Dear Editor,

The far left has had a plan for some time and they have been working toward their first major goal of having America become a socialist country. Europe is already well on its way. With the election of Barack Obama and a Democratic Congress, a perfect storm was created for their dream to become a reality. The traditional Democratic Party had already been taken over by the far left. The Republican Party had lost its strength through a diffusion and lowering of their values, so they would not be able to stop it. At breakneck speed they began to implement steps that would drive America into the depths of socialism and globalism. The feeling was that the American people, even if they complained and were opposed to what was going on, were not organized enough to stop the movement. But then something unexpected happened.

The will, the strength and the voice of the American people were grossly underestimated. Suddenly ordinary Americans, many of whom never participated in any political movement before, began to rise up. A true groundswell, and grassroots movement, began to emerge. And emerge they did. They were senior citizens, grandparents and parents, deeply concerned not only about themselves, but the future of America for their children and grandchildren. They were conservative Republicans, traditional Democrats, Libertarians and Independents who were strongly opposed to the new socialist direction – scared to death of it, in fact. They were informed younger people, and minorities who think for themselves and object to adhering to mass block thinking where it is "expected" that they will just comply. They were people who have a deep faith in God. They were people who are patriots and love America. They are veterans who had served their country and who had fought to preserve freedom. Spontaneously they came together- millions upon millions of them. They came together under the title of "Tea Party."

The left was flabbergasted; they hadn't planned or expected anything like this. They were so close to achieving their goal. At all costs, the Tea Party had to be stopped. Immediately they began to try to discredit the Tea Parties, a tactic that had worked for them so many times before. Truth is irrelevant, but discredit they must. They began to call them crazy, radicals, Nazis, every name in the book, and finally the one that always seemed to have worked before – racists. Many major media sources fully complied with the unfounded and unwarranted attacks. Yet the Tea Parties kept coming, without a flinch. What the far left and the media failed to realize is that Tea Party is America – the vast majority of the American people. You can't turn the vast majority of the American people on themselves, especially with what are known to be falsehoods. The far left then engaged union leadership, and organizations like the NAACP to help discredit the Tea Party movement and call them racists. Again this didn't work; to say nothing about violating the ninth Commandment of God by bearing false witness. Many of the good and decent people of the NAACP don't like being part of false accusations. Neither do the unions' membership, in fact many of them are either in agreement with the Tea Party movement, if not actual members.

Nonetheless, the great strength of the administration in power, with the help of nearly all major media sources is immense. In addition, over time, deep seated roots have been established by the far left into many organizations throughout the country. Further, there are some very wealthy backers who have their own agenda toward turning the United States into a greatly weakened, yet socialist country that will allow globalism to continue.

The future of United States is now dependent upon the people of America. This includes all those who want to preserve our great democracy irrespective of party affiliation, race, religion, ethnic or any other socio, political or economic group. And it depends greatly, as the far left fears, on the Tea Party, since they have the strength of organization.

All of this comes down to two dates in November 2010 and November 2012, and our sacred right to vote. The choices are simple yet dramatic and potentially tragic in our history; socialism that will lead to the destruction of America as we know it or the preservation of our great country and democracy. Thankfully, the Tea Party movement has given us at least a choice; now it is up to us.

Al DiLascia,

Chicopee, Mass.

Swimming and diving earn first victory of 2010–11 season

By Nick Bellofatto
Collegian Staff

The Massachusetts swimming and diving teams both came out triumphant Saturday in their 2010-11 home-opener at Josephs Rogers Pool with a sweep of the United States Military Academy.

Both teams were coming off opening season losses to Boston University and bounced back in outstanding fashion at home. The Minutemen won 184-116, while the Minutewomen posted even more impressive numbers, winning 183-106. Knowing that both the men and the women had to bounce back from an opening day loss, they proved to be very resilient in the early season and defended themselves at home.

For the Minutemen, junior Joey Sbordon and freshman Derek Hursch continued to dominate in the pool and lead the Minutemen to victory. Sbordon won the 1,000-yard freestyle, the 500-yard freestyle and finished second in the 200-yard freestyle.

Derek Hursch was named Atlantic 10 Swimming and Diving Performer of the Week after the season-opening loss at BU. Hursch continued to pick up steam as a collegiate swimmer, winning the 200-yard freestyle, the 100-yard freestyle and the 200-yard individual medley. During the season opener, Hursch also won all three meets he swam. Through the first two meets, Hursch has a 6-0 individual record.

When it came to the diving team, the UMass men earned a clean sweep in both the one and three meter dives. In the one meter, Jason Cook, an Amherst native, set a new school record and a pool record with a score of 334.50, followed by John Clark in second and Adam Duffield in third.

In the three meter, Cook also set a pool record with a score of 368.25, followed by Duffield and Clark, respectively. With the juniors and seniors leading the team and the freshman posting impressive wins, UMass looks is well positioned when it takes on Stony Brook this weekend.

For the Minutewomen, the story of the day was freshman Anna Cavanaugh, who picked up her first three collegiate individual victories. Cavanaugh won the 200-yard freestyle, the 50-yard freestyle and the 100-yard freestyle.

The Minutewomen were also anchored by the likes of their senior swimmers, especially Jessica Starosielec. Starosielec won both the 100-yard breaststroke and the 200-yard breaststroke.

For the Minutewomen diving team, it was sophomore Molly Elkins and junior Hannah Swift who controlled the meet. Elkins and Swift came in first and second, respectively in both the one and three-meter dives.

As with the Minutemen, the Minutewomen also relied on veteran leadership and underclassmen stepping up when they needed too. It was a total team effort on their part and even though the individual accolades are impressive, it is more impressive to see what UMass did as a team.

UMass won 24-of-32 events at the meet and now have a 0.75 winning percentage as a team.

Both squads will be back in the pool again on Oct. 30 as they travel to face Stony Brook. Coming off of a fresh win at home, both teams look to capture their first road victory and a winning record.

Nicholas Bellofatto can be reached at Nbellofa@student.umass.edu.

UMass won 24-of-32 events this weekend against the Black Knights and head to Stony Brook this weekend for their second-straight win.

Chris Rowsess (11) goes up for a header against the Wildcats earlier this season. UMass is second in the A-10 behind the 49ers.

Cuero wins conference POW accolades, URI still winless in A-10 competition

By Teddy Reagan
Collegian Correspondent

The Charlotte men's soccer team is now undefeated in Atlantic 10 play due in large part to senior forward Andres Cuero.

Cuero scored two game-winning goals in games against George Washington and Richmond two weeks ago, on his way to winning A-10 Player of the Week honors. In addition, Cuero also earned TopDrawerSoccer.com's National Team of the Week honors for the second time in his four-year career.

The 49ers are trying to improve on a conference record last year that landed them in fourth place in A-10 play. Helping with the cause, alongside Cuero are points leaders Tyler Gibson, Donnie Smith, Evan James and Will Maythew. All have at least two goals and two assists, while Gibson leads the pack with four goals and three assists.

Charlotte is coming off a 3-1 win Friday vs. Saint Louis. After an early goal by Saint Louis in the 13th minute, the 49ers responded with three unanswered goals to come away with the victory.

For the first score, Maythew assisted Gibson on a long cross that was headed in for a goal in the 23rd minute. The second goal was also a header, set up by Cuero and finished by Charles Rodriguez. The third goal came seven minutes later in the 79th minute, when Maythew assisted Cuero for his team leading fifth goal.

The 49ers are now 10-4 overall and are ranked 21st nationally. They finish the season with four home games all against conference opponents.

Rhody's Woes Continue

Rhode Island's 1-0 loss at Temple on Sunday keeps them at the bottom of the A-10 Conference (2-10-2, 0-4-2 A-10). Temple's goal came on the leg of Andrew Dodds in the 64th minute, as URI managed just two shots on goal the entire game.

The Rams have only scored seven goals all season compared to 25 goals against and lack a consistent goal scorer. The team leader in goals, Jamie Eckmayer has only two goals on the season.

The Rams have two upcoming games at home against La Salle on Friday and Fordham on Sunday. They must capitalize on the upcoming home stretch because they follow with two games on the road to close out their season, and are 0-7 in away games thus far.

With 17 returning players from last year's team, which finished 9-9-2 overall and 6-3 in A-10 play, the Ram's season has not been a success so far this season.

Road to the Final Six

In a league of 13, only six qualify for the A-10 Championship.

With only four games left in the season for most teams, the outcome of this upcoming week's games will be crucial for a number of teams within the A-10.

The third through seventh place teams in the conference all share a 3-2 record and the 10th-ranked team in the conference, Saint Louis, is 2-3 in the A-10.

Fordham visits Massachusetts on Friday afternoon, as both stand at second and third in the conference with UMass ahead (5-3-6, 4-0-1 A-10).

The 49ers (10-4-0, 5-0-0) take on Saint Joseph's hopes to ride the wave of A-10 Player of the Week Colin Baker and pull off the upset.

The Billikens are the defending champion from last year's A-10 Championship, but find themselves fighting for a birth this year to even get into the tournament. They play Missouri-Kansas City at home Tuesday night.

The champion of the A-10 Conference Championship also wins an automatic bid into the 48-team field for the NCAA tournament. Both SLU and the 49ers qualified last year but lost close matches in the first round.

Teddy Reagan can be reached at mreagan@student.umass.edu.

UMass gets key wins at Head of Charles

By Stephen Hewitt
Collegian Staff

Leaving difficult river and weather conditions in its rear-view mirror, the Massachusetts rowing team traveled to Boston, Mass., this past weekend to compete in the Head of the Charles, one of the most prestigious rowing spectacles in North America.

After arriving to the area on Friday, UMass coach Jim Dietz and the Minutewomen waited until Sunday to compete on the waters of the Charles River against some of the best squads they will face all year.

UMass brought three of its best boats to Boston for the trip and displayed a solid performance under cooperative and good racing weather.

Kicking off things on Sunday for the Minutewomen was junior and United States U-23 member Emily Boucher in the Lightweight Single event.

Racing to an official time of 20 minutes, 22.396 seconds, she finished in seventh out of 20 competitors and also guaranteed herself a spot in next year's event by placing 3.8 percent out of first place.

The Champ 4- boat also engaged in competition, generating a time of 18:54.854 and a 12th place finish, which was good for eight spots ahead of Atlantic 10-rival Fordham.

Rounding out the day for UMass was the Lightweight 8+, which finished in ninth place at a time of 17:44.182.

Dietz expressed the key of aggressiveness for the solid effort of the Minutewomen crew and that the squad really came to race, especially Boucher.

"Following Emily's race was extremely exciting," Dietz said. "It was very difficult starting far back in the pack as she did, but for her you could see the aggression because of the number of athletes she passed. I think she passed five or six athletes over the course of the race. That's making up a tremendous amount of time," Dietz continued.

Dietz was not short to praise Boucher for her aggressive efforts, but also multiplied it towards the entire team and valued it as something they could build on for the rest of the season.

"Coming out of the weekend, I'd say we saw three boats race and that's important. They didn't participate, they didn't just row down the course, they raced. And that's the positive note that I want to go away with," Dietz explained.

With the most important race of the fall season in the Head of the Charles now behind the crew, UMass will look forward to building off of its solid performance in Boston to put itself in good shape for the spring.

Perhaps one of the most important factors as the group moves forward is keeping the level of competition within the team up with the addition of intersquad racing on top of its weekly races to re-evaluate the roster and round out the depth of the team as it heads into the spring, into A-10 competition and ultimately the A-10 championship.

"The Head of the Charles is always the focal point of the fall, and we've been spending the majority of our time with those three boats that were going to the Charles," Dietz explained.

"Those were the guys that we were training in the morning hours we were training other people in the afternoon. Now we're going to start to mix the two groups back together, starting to re-evaluate and do a lot more intersquad racing amongst ourselves to see where people can really move up."

The Minutewomen will continue their fall season this Saturday as they travel to Saratoga, N.Y. to compete in the Head of the Fish.

Stephen Hewitt can be reached at shewitt@student.umass.edu.

Sydney Stoll (4) looks to score against the Owls in 5-0 victory on Friday. The Owls and Minutewomen are vying for a playoff birth.

Flyers in Top 25 before falling to Bonnies

By Jackson Alexander
Collegian Correspondent

On Nov. 4, the Atlantic 10 women's soccer playoffs will begin. However, the teams participating in the postseason are yet to be determined.

This will be the final week of regular season play before the A-10 tournament kicks off and features the top six teams in the conference.

Dayton (15-3-0, 7-1-0 A-10) and Charlotte (13-4-0, 6-1-0 A-10) sit atop the standings and have already clinched a berth in the tournament.

Seven teams will fight for the final four playoff spots, as Duquesne, St. Bonaventure and Massachusetts will be the three, four and five seeds in some order, while the sixth seed will be fought over by La Salle, Fordham and long-shots George Washington and Xavier.

Last season Dayton, Charlotte, Fordham, St. Bonaventure, Saint Louis and UMass made the A-10 tournament as the Flyers and 49ers faced off in the championship game for the second year in a row, with Dayton emerging victorious.

Flyers crack Top 25 before falling to Bonnies

Last Tuesday, Dayton re-entered Soccer America's Top 25 for the third time this year. The Flyers moved into a three-way tie No. 25 with South Carolina and Georgia. However, Dayton will likely drop from the Top 25 thanks to a 2-1 loss against the Bonnies following Sunday.

The Bonnies (10-7-0, 4-3-0 A-10) shocked the Flyers, who were riding a 12 game winning streak and had just clinched their 15th-straight A-10 tournament appearance.

Despite the loss, the Flyers seemed poised to make another deep playoff run. They are guaranteed one of the top two spots in the playoffs, meaning that they will receive a first round bye in the tournament. The Flyers are led by forward sophomore Colleen Williams, who leads the conference in points scored (37), goals (14), assists (nine) and game-winning goals (six).

Dayton began the year ranked 20th in the nation, but a few early losses dropped them from the top 25.

The Soccer America Top 25 is the primary ranking system used in college soccer. The majority of teams included in the poll are D1 schools from power conferences.

POW, ROW announced

St. Bonaventure's Anna Cunningham was named the Atlantic 10 Conference Women's Soccer Player of the Week, while teammate Taylor Broderick shared the Rookie of the Week award with UMass' Brittany Moore.

Cunningham and Broderick led the Bonnies to two conference victories this week while strengthening their chances of reaching the conference tournament.

St. Bonaventure started the weekend with a 2-0 shutout of Xavier. Alyssa Lapp and Sarah Clarke scored the two goals with Courtney Bosse adding an assist.

Next, the Bonnies upset conference leader Dayton thanks to the combination of Broderick and Cunningham. Facing a 1-0 deficit, St. Bonaventure got the equalizer from Hannah Lapp who converted a penalty kick to tie the match.

Eight minutes later, Broderick fed Cunningham with a pass from 40 yards out into the box. Cunningham delivered the game-winner with a header that eluded the Flyers goalkeeper.

If the Bonnies can take care of business versus George Washington and Richmond this week, they will punch their ticket to the postseason.

UMass freshman Brittany Moore anchored the Minutewomen (7-9-9, 4-3-0 A-10) defense and added an assist as they went on to defeat Temple and Saint Joseph's last week.

Massachusetts, who currently sits tied for fifth in the A-10 standings, wraps up its season against Fordham and La Salle this week.

Jackson Alexander can be reached at jtalexan@student.umass.edu.

Millan's 39 saves move Terriers over Friars, Black Bears route No. 2 Fighting Sioux Fri.

By Stephen Sellner
Collegian Staff

Kieran Millan's 39-save effort helped lift Boston University past Providence, 2-1, on Saturday.

Ryan Ruikka found the back of the net with a wrist shot from the left edge, giving the Terriers the lead 13 minutes, 59 seconds into the game. The goal was Ruikka's first collegiate score, with Alex Chiasson receiving the assist.

Chiasson gave BU a two-goal advantage four minutes later, after corralling a rebound in front of the net and lifting the puck past PC goalie Alex Beaudry.

Aaron Jamnick scored the lone Friar goal in the closing minutes of play after pulling Beaudry to give them an extra skater.

BU held off seven Providence power plays and have successfully killed 23 out of 24 opponents man advantages this season.

The Friars (1-4-0, 1-2-0 Hockey East) challenged Millan with 40 shots on net, doubling the Terrier's total of 20.

BU (4-0-1, 2-0-1 HEA) is off to its best start since 2001, where the team posted a 6-0-1 mark to begin the season.

The Terriers are in first place in the HEA standings after claiming four points this weekend while defeating Massachusetts, 4-3 on Friday.

BU's next challenge is a visit to UMass-Lowell on Friday to begin a home-and-home series. PC begins their own home-and-home series this Friday as they travel to take on the Minutemen at home.

Black Bears sweep UND

Maine soared past No. 2 North Dakota this weekend, completing the sweep with a 4-2 triumph on Saturday after a 7-3 blowout on Friday.

Brian Flynn scored the eventual game-winner Saturday, rifling a shot in front of the net off a feed from Jeff Dimmen that ricocheted off of a Fighting Sioux defenseman.

The Black Bears took a commanding 4-1 lead in the seventh minute of the third period after Spencer Abbott whipped a slap shot past UND goalie Aaron Dell. Gustav Nyquist's prime one-time pass assisted the goal, coming on a Black Bear advantage.

North Dakota struck first on Ben Blood's first goal of the season at the 13:25 mark in the second period.

The lead was short-lived however, after Nyquist netted a rebound off a Robby Dee slap shot in the 17th minute of the second frame to knot the score at one.

conference play this Saturday with a matchup at Vermont.

Northeastern Tops River Hawks

Chris Rawlings' 39 saves helped push the Huskies past UMass- Lowell, 3-1, this weekend.

Steve Silva gave Northeastern the lead with eight minutes, 35 seconds to play in the game, which proved to be the game-winner.

Tyler McNeely started the scoring, giving the Huskies the lead in the sixth minute of the contest after redirecting Brodie Reid's shot on a power play. The goal was McNeely's first of the season.

Maury Edwards proved to be the only source of offense for the River Hawks, as the senior capitalized on a power play, netting his own rebound to tie the game at one.

The River Hawks pulled their goalie late in the third period in an attempt to tie the game. McNeely capitalized on the empty-net opportunity, stealing the puck and sealing the victory with his second goal of the contest.

Rawlings faced 40 shot attempts while River Hawks goalie Marc Boulanger saved 23-of-26 challenges, suffering the first loss of his career. Northeastern (1-2-2 1-2-1 HEA) hosts Bentley and Holy Cross this weekend, while the River Hawks (1-2-2, 1-2-0 HEA) begin a home-and-home series with the Terriers.

Steven Sellner can be reached at ssellner@student.umass.edu.

Eric Filiou (10) takes a faceoff against Ross Gaudet of the Terriers in Friday's 4-3 loss. After defeating the Minutemen, BU beat the Friars 2-1 Saturday.

History Club tours haunted spots on campus

By Matthew M. Robare
Collegian Staff

Halloween wouldn't be the same without tales of the dead walking the earth, but there's no need to find a good ghost story in a movie or book: the University of Massachusetts is haunted enough.

Ghosts and related phenomena have been reported around campus for over 100 years and for several years, the UMass History Club has conducted tours of campus at night around Halloween, passing on the school's legends.

"The tours have been going for some time," said History Club President Dan McDonald. "I believe they were written in 2003 and then updated in 2008. They were written by a former History Club president [Kathleen Flynn], an alum [Patrick Browne] and a history club member named Laura. They were edited by Brendan Conway in 2008."

McDonald added he had never seen a ghost and nor did he know anyone who had. "I will say that I am in the marching band," he added, "and the Old Chapel is known to be, in addition to being one of the more historic buildings on campus, one that's associated with that kind of activity. Places like the Old Chapel, South College, which experienced a pretty devastating fire at one point, they tend to be the hot spots of that sort of thing."

Caitlin Hayes is the History Club's Public Relations Officer. She said that students collected the stories before the History Club was started. "We were the ones who started giving out tours," she said. "But they had a collection of all the stories that had been collected over the school's history. The most recent one is from the 70s."

The most detailed stories concern Stockbridge House, currently home of the Faculty and University Clubs and the oldest building in Amherst, Orchard Hill, Greenough Hall and Draper Hall.

Samuel Boltwood built Stockbridge House in 1728. His daughter married John Field, a Loyalist during the American Revolution. According to the story, "The local Committee of Safety rounded up nine local Tories . . . and imprisoned them in the house . . . one woman, upon visiting the basement, found herself face-to-face with nine angry ghosts - the spirits of the Tory prisoners." The house is also reported as being haunted by Levi Stockbridge, the fifth president of the Massachusetts Agricultural College, which became UMass in 1947.

The story concerning Orchard Hill is unusual in that one of the participants is named, along with a year. The story says that John B. Howard was the Collegian's editor in 1929 and died after falling out of a tree in the apple orchard that used to be on the hill. "Some say that on a dark night they can still see Howard as a form of white, walking on the path down the hill," the History Club's story records.

Draper Hall is reported to have once been a dorm and is allegedly haunted by a young woman, who appears behind people when they look in mirrors. Another story says that there was a kitchen in the building and two of the cooks starting arguing one day. They didn't stop arguing until one had murdered the other. According to the story, their argument can still be heard on its anniversary.

"My guess would be that it's sort of the same way any ghost story starts," said Debbie Felton, professor of Classics, "which is that maybe somebody died in a certain place, or they were murdered or killed themselves, or they just died of natural causes, but the idea would be that it was unexpected, in a place you wouldn't expect. Eventually a rumor starts going that 'Oh, but I thought I saw him,' and 'Was it a ghost?' and 'Is the place haunted?' because of the unnatural or unusual occurrence. That's kind of the way, going back all the way to antiquity, that they all got started."

She added that as the years go by, stories can become more exaggerated. "These stories also tend to represent people's fears about, not just dying and what happens to you, but the method of dying."

Felton said that, in general, many ghost stories are dealing with the fear of death and the concern for an afterlife. She said that many involve putting the spirits to rest and ending the haunting and that "urban legend-type" stories are more popular in the United States. "Basically any haunted house story has the same elements it did 2,000 years ago," she said.

The History Club Haunted Tours will be conducted on Tuesday night, starting at 7:30 outside Herter Hall. They are free, but the Club is suggesting a donation of $3.

Matthew M. Robare can be reached at mrobare@student.umass.edu.

The Old Chapel is one of a number of buildings on campus known for its paranormal qualities. It is one of several buildings in the area that have survived a disastrous fire.

Alternative horror flicks terrify the timid

By Kate MacDonald
Collegian Staff

Have you ever been watching a movie and you're simply overcome with fear, horrified at the events that are unfolding and wary of what's to come? Have you experienced these symptoms while watching a romantic comedy? You're not alone.

Romantic comedies can be some of the best and funniest films out there, but it's also the easiest genre to screw up. Not all actors are cut out for this film category- the same can easily be said about screenwriters.

So, on Halloween night, if you're up for a horrifying flick but are a little too chicken for a gore-fest, check out one of these messes.

"Rumor Has It..."

This is director Rob Reiner's attempt at a perverted, far less sufficient modern day version of "The Graduate." While it was supposed to be a family-oriented comedy, what's more terrifying (and revolting) than being wooed by, and subsequently sleeping with, a man who might be your father? Answer: nothing.

"Because I Said So"

One of the few non-horrendous movies on this list, "Because I Said So" is scary solely because of the plot. Millie's (Mandy Moore) mother, Daphne (Diane Keaton) decides to continue her obsession with her youngest daughter by taking out a personal ad for her so she can pick and choose her daughter's suitors. Dating men that your 60-year-old mother hand-picks for you without your knowledge- oh the horror.

"Failure to Launch"

It has got to be a parent's greatest fear that their child will push the age of 40 and still live in the room they grew up in. Conversely, what person wants their dad to walk in while they're sleeping with their date? Pair these elements with a less-than-mediocre job by both Matthew McConaughey and Sarah Jessica Parker, and you've got yourself a Halloween-worthy flick.

"The Family Stone"

Parker terrifies audiences again with another atrocious acting venture. The awkward family moments that fill "The Family Stone" are actually painful to watch. By the end of the movie, Parker becomes the horrible houseguest that just won't leave, no matter who she's with. But viewers will only find that out if they're brave enough to make it to the end.

"Georgia Rule"

Side effects from watching "Georgia Rule" may include dizziness, caused by attempting to make sense of the dozens of subplots featured in the 2007 Garry Marshall film. Lindsay Lohan, Felicity Huffman and Jane Fonda combine to form a modern-day Addams family- a nightmarish group no one wants to be involved with, let alone a member of. What's worse than being in the Randall clan? Working on this movie, as hinted by the cast and crew, once they finally tracked Lohan down.

"The Wedding Planner"

Imagine you're Bridgette Wilson's character Fran. You've landed McConaughey's Dr. Steve Edison and your father is paying for your perfect nuptials. When Mary (Jennifer Lopez) enters the mix, your dream wedding becomes your worst nightmare. Maybe Fran was the real villain- Steve becomes fused to a statue and Mary almost dies in a runaway dumpster accident. Coincidence?

"The Proposal"

"The Proposal" is an utterly hilarious movie, thanks to the spot-on comedic timing of Betty White, Sandra Bullock and Ryan Reynolds. However, the fact that Reynolds's character is being blackmailed by his boss adds to the tension. It's a pretty awful situation when you have to choose between standing in the unemployment line and marrying your boss, who is literally a nightmare.

"Monster-in-Law"

Though it was a box office bomb, there was one redeeming quality about "Monster-In-Law:" Wanda Sykes. Sykes kept the audience in stitches while Jane Fonda and Jennifer Lopez (playing the mother and the fiancée respectively of Michael Vartan) nearly killed each other over the pending wedding. The thought of a bad mother-in-law took on a whole new meaning in this 2005 film.

"Raising Helen"

Not only does Kate Hudson's 20-something character, Helen, lose her sister, but then she's saddled with her three rebellious and quirky kids. For someone working in the fast-paced fashion industry, dating male models and going to clubs every night, this might be a fate worse than death.

"Gigli"

This film didn't just crash and burn, may have even destroyed the eternal love of "Bennifer." "Gigli" is the worst kind of romantic comedy (it's also probably the most shameful attempt at making a movie in this genre.) It's not Ben Affleck's character (a mob enforcer) that's scary, it's the fact that by watching, you've just wasted 2 hours of your life you can never get back.

So, on Halloween night, maybe it's not movies like "The Exorcist" or "Dawn of the Dead" that will send shivers down your spine, but rather the likes of "Rumor Has It..." or the dreaded "Gigli." For those looking for sweet dreams on Halloween night, it's probably safest to to avoid Jennifer Lopez, Sarah Jessica Parker and Matthew McConaughey films at all costs.

Kate MacDonald can be reached at kaithynm@student.umass.edu.

courtesy photobucket.com/David_Shankbone

While the genre of romantic comedy is not always so scary, certain poorly executed films, such as almost any featuring Sarah Jessica Parker, are so bad they'll leave you cringing on your couch when you watch them.

Plethora of phobias plague the fearful

PHOBIAS from page 1

For instance, methyphobia is the fear of alcohol and claustrophobia is the fear of confined spaces - a problem at many college parties. Also, people with ancraphobia have a fear of wind, which can definitely be a problem while walking to class, especially next to the W.E.B. DuBois library.

You can't help but feel bad for those who have a fear of long words. At 36 letters long, hippopotomonstrosesquippedaliophobia is really just adding insult to injury.

There are so many common fears out there today. An extreme number of people are coulrophobic (scared of clowns), glossophobic (afraid of public speaking) or arachnophobic (terrified by spiders), so these phobias are thought of almost as commonplace now.

Pteromerhanophobia is a common, but somewhat irrational fear. People who suffer from this phobia are afraid of flying, though it is the safest mode of transportation. Linked into this group are soceraphobics who are afraid of parents-in-law. On second thought, maybe that's not really an irrational fear.

Fans of Edward Cullen may like to pretend they are phengophobic. Phengophobia occurs when one is frightened of daylight or sunshine.

Arachibutyrophobia, too, is fairly irrational. People with this ailment are horrified at the thought of peanut butter sticking to the roof of their mouth. Chances are that this fear can be overcome by not eating it, or simply swallowing the peanut butter when it's in their mouth.

Electrogenphobia, however, is very high on the list of ridiculous fears. A widely unknown and rare phobia, the definition reads that it is the fear of urinating during an electrical storm. While this may be a danger in certain circumstances, it's probably not something most people ever worry about.

Having a phobia isn't really a horrible issue. That is to say, if it's not debilitating or affects one's daily life, it can keep people safe. If any of the above phobias apply to you, not to worry, it could still be worse. You could be phobophobic and have a fear of phobias themselves.

Kate MacDonald can be reached at kaithynm@student.umass.edu.

Lynn Tran/Collegian

Phobias exist for nearly everything, including geniophobia, the fear of chins, and pteromerhanophobia, the fear of flying.

Haunt your dorm for $20

LESLIE ROSENFIELD/COLLEGIAN

With a number of craft and design stores in the area, it can be easier than ever to create your own unique dorm room designs for Halloween. All you need is $20, a few supplies, and a creative eye. With a few simple tips, your dorm will be pimped out in no time.

By Leslie Rosenfield
Collegian Correspondent

Fall is now upon us. October brings the crisp, fresh and breezy air that moves the orange leaves through the sky. The season comes alive with aromas of apple cider and pumpkin pie. As the month of October creeps along, more and more people become invested in Halloween. Costumes are put together, baked goods are prepared and, most importantly, decorations are bought or made to deck out dorm rooms. Many ideas are thrown around when wanting to deck out a room for the upcoming festivities. Luckily, there are a few hints to be revealed about how to decorate your room in Halloween style for just 20 bucks.

When pimping out your room in either the scariest or most charming designs, steps must be taken to show off your love of Halloween in a cost-efficient way. The first thing you will want to do is assess the supplies you already have in your room. Colored paper, glue, tape, scissors and perhaps some markers are all essential components. With these tools you will be able to create an original work of Halloween art to call your own. If you lack these materials, do not worry – colored paper and tape can be bought for only five dollars at either Target or Michael's. Perfect; now you're down to $15, and you already have the means to make dozens of paper ghosts, spiders and witches!

Another key aspect of presenting a mysterious look to your room is lighting. Black lights, or black light bulbs, can be the perfect touch. One last do-it-yourself at home project is easy and can bring your dorm room up a notch, just by using cotton balls. Simply take your cotton balls and glue them into different shapes of ghosts. Done.

Homemade materials are always great, but if you really want to get down to some hard-core decorations then round up your spare change and head to the Dollar Store, Target or Michael's for some inexpensive supplies. Jot down on your to-do list the goods that will bring all your décor together. Upon entering these stores scout first and foremost for black and orange streamers, usually priced between one and four dollars. You can tape them in various designs across your ceiling, around your bedposts or shred them for a scary look.

Another fun element you can add are signs/saying things like "Beware" and the classic "Boo!" These sparkly word decorations will only cost you $2.50 at Target and add a pinch of sleekness. This leaves your pockets deep enough for a few more things. So far, your room is looking quite fabulous. Bats and spiders are in place along side the streamers bringing the look together. To bring your dorm room to the ultimate level, just two more essential items are needed to complete your Halloween decorations. You're down to about 17 dollars right now, which gives you enough leeway to purchase a pumpkin! No Halloween room is complete without a carved jack-o-lantern. Spice up your pumpkins by carving scary, pretty or just plane old goofy faces that will definitely have your friends talking about your spectacular decorations.

Add it up and you've spent just $20 on the perfect spooky and playful Halloween decorations that will have everyone jealous. This task will keep your mind at bay from all the midterm work cramping your style, and soon enough it will be that glorious night of Halloween, when you can get down in style amongst all your terrifying hard work.

Leslie Rosenfield can be reached at Lrosenfi@student.umass.edu.

Scary sites at UMass chill you to the bone

By Kate Evans
Collegian Correspondent

With Halloween approaching, the late nights packed with party hunting and chilly walks home are inevitable. The University of Massachusetts is generally a safe campus. That isn't to say it isn't creepy, however. The area is packed with tens of thousands of students and faculty, but some roads are less traveled even amoung the masses. Below is a list of the top 10 scariest places on campus, so be sure to take the necessary precautions to avoid them over the upcoming weekend. If not, you may find yourself Trick-or-Trembling.

The Orchard Hill- Sylvan Trail: The path that connects Orchard Hill to Sylvan has been unofficially nicknamed as the scariest place on campus for years

Library elevators: A control cable broke in one of the elevators in August 2007, rocketing the metal box up to the 27th floor. The DuBois library made headlines for all the wrong reasons. Although no one was in the elevator at the time, who's to say it won't happen again?

The Old Chapel: One of the older landmarks on campus and notorious for being haunted, this condemned place of worship would best be opted out of in the Trick-or-Treat lineup this year.

Hardware Support: After taking a slow, creaky elevator down to the basement of OIT, Hardware Support stands alone with the terrifying experience it provides to students and faculty alike. Make sure to steer clear on a full-moon, and bring a friend when your laptop breaks.

Boyden during finals week: One thousand sweaty students packed into an excruciatingly brightly lit gymnasium, suffering through their cumulative exams. Enough said.

The underground tunnels: The tunnel that runs from the basements of Hartlett to Hetter is simultaneously creepy and convenient. Shaving those few seconds off your walk from classes may not be worth the fright.

UMass Police Department: Unless you're participating in some sort of safety course, the UMPD is the last place you want to end up on a Friday night.

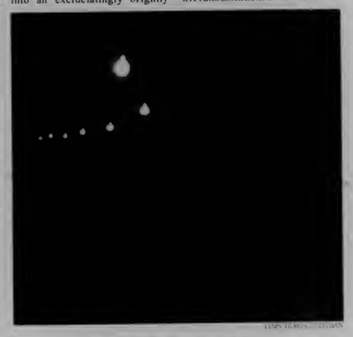
Southwest Tunnel: A scream of terror in this channel of cement could be echoed throughout the entire residential area, chilling the bones of unsuspecting students. With flickering lights and wobbly floorboards, the tunnel into Southwest is best not taken after nightfall.

The Recreation Center after Spring Break: An entire week of guzzling fruity mixed drinks and stuffing your face with fast food galore may result in the dreaded beer belly. Good luck facing the treadmill after that fiasco!

The Morrill buildings: Didn't think science could get any worse? Throw dimly lit bathrooms, cockroaches and a tarantula named Fluffy into the mix for a truly creepy educational experience.

Though some may prefer being stranded on a trail between residential areas than spending the evening on lockdown with the UMmass police, all 10 places permeate a certain fear factor. It may be best of celebrate the holidays off-campus this Halloween!

Kate Evans can be reached at kvevans@student.umass.edu.



The Orchard Hill Walkway has a reputation for being one of the scariest places on campus, especially after dark.

Horror provide insight on how to make it through Halloween night

By Lindsay Orlov
Collegian Staff

The dark, cold month of October is the first true month of autumn, a season that brings to mind multi-colored leaves, pumpkin-flavored edibles, and, of course, the approach of everyone's favorite spooky holiday. As college students gather in droves to watch the scariest films they can find on Netflix, it's important that they keep in mind the lessons meant to be learned from horror movies – namely, the best ways to end up painfully, suddenly dead. Here are the top ten ways to avoid death on Halloween:

10. Do not, under any circumstances, enter a house uninvited to inquire about borrowing some gasoline for your car. For all you know, the person who lives there might have bizarre, life-threatening hobbies such as impaling strangers with meat hooks, cutting off their body parts with chainsaws and making furniture from their bones once they're dead. In fact, it's probably best to avoid any and all chainsaws on Halloween if possible. The likelihood of a tree needing to be cut down while on your way to a costume party off-campus is probably incredibly low.

9. Try and avoid picking up babysitting jobs anytime during Halloween weekend. Yes, it's nice to make some extra cash, especially extra cash that's under the table – but ask yourself: Is it really worth the risk? What if, while you and a friend are babysitting two sweet little kids right across the street from each other, a man in a mechanic's suit and a 70's-style hockey mask murders your friend, her boyfriend, and then tries to off you? Something to think about.

8. If you're reading this from Japan, be careful before accepting jobs caring for demented elderly individuals. Check your facts first. Make sure no one was brutally murdered for revenge inside of the house, and call up the previous occupants to check for any strange sightings of ghost-like children. It is very important to perform this kind of background check before going anywhere near the house itself. If the house is inhabited by an onryo, or vengeful spirit of a murdered individual, that onryo will follow you until your death if you allow yourself to go near it.

7. Take a moment sometime soon and think deeply about your life. Are you happy? Do you appreciate the little things, like a midterm pushed back a week or a care package from Mom? Do you live every day as though it could be your last? If you answered no to any of those questions, then now is the time to recognize your luck in being alive, before some cancer-riddled sociopath decides to chain you to a pipe and give you a hacksaw as your only means of escape. That hacksaw, by the way, would be for your foot, not for the chain.

6. The zombie apocalypse, by this point, is a well-anticipated event about which many survival guides have been written. Pick one up at your local bookstore and give it a read. Once you've stocked up on ammunition, food, and water, all that's left to do in the event of a zombie catastrophe is exercise a lot, to get in shape and avoid any military compounds led by fanatically-minded soldiers looking to repopulate the world.

5. If you've recently been having a string of heart-pounding nightmares involving a close brush with death, and if these nightmares have seemed a little too real, it might be wise to invest in some energy drinks. Coffee is a popular favorite, with many UMass dining halls carrying a pumpkin spice flavor this time of year. Another option to increase your safety is to join a sleep lab and log as many research hours as the experiment design will allow. If you absolutely must sleep, get a friend to watch you do so, and hope to everything holy that they don't decide to go on an Antonio's run after you conk out.

4. This piece of advice goes out especially to struggling writers and recovering alcoholics: don't take a job as a winter overseer for a closed hotel. The solitude will not help your writing, nor will it give you a chance to bond with your family. Please note that if you must take this position for financial reasons, do not bring your family with you. This advice is doubly important if a murder has occurred at the hotel. Cabin fever is a serious threat to one's mental health. If at any point during this season you find yourself cooped up in a hotel, hallucinating bartenders, please seek medical attention immediately.

3. Nearly every county in America has a Crystal Lake. October being a cold month, a weekend trip to the closest Crystal Lake near you shouldn't be in your day planner. However, if you end up staying at a Crystal Lake cabin over Halloween weekend, just for something different, try to pretend as though your mother is watching you at all times. Even if Mmom isn't watching, a near-immortal killer wearing a hockey mask might be. In short: avoid any Crystal Lakes, and if you can't, avoid immoral behavior. Otherwise, you might find your make-out session cut short, quite literally, with a machete through the chest of you and your kissing buddy.

2. This applies to every day of the year, but especially on Halloween: don't get possessed by the Devil or any of the various demons said to inhabit the bowels of Hell (e.g. Beelzebub, Azazel, Pazuzu, etc.). Due to a thinning of the boundaries between our world and the world inhabited by demons and spirits, possessions are particularly common around "All Hallows' Eve." Some common signs of possession include distorted facial expressions, speaking in tongues or odd, foreign voices, hovering in the air and projectile vomiting. While you might not have any choice regarding your 'possessed' status, some common ways thought to prevent possession include the use of St. Benedict's medal, nazars or hamsa hands. If you believe you are a victim of demonic possession, please contact a priest or professional exorcist near you.

1. If you've ignored all of the aforcmentioned advice and are still alive to tell the tale, at least take this final word of advice to heart: do not watch any of the "Twilight" movies on Halloween or any other of the 364 days of the year ... You might just feel an overwhelming compulsion to go on a homicidal rampage before the movie is over.

Lindsay Orlov can be reached at lorlov@student.umass.edu.

COURTESY FLICKR.COM/ADAMPORSELLI

Scenes from classic horror movies such as "The Shining," above, give hints on how to survive Halloween and any other night by avoiding a few key mistakes. "The Texas Chainsaw Massacre," for example, teaches that chainsaws and other such machinery should be completely avoided.

Jack-o-brews: the best of pumpkin beer

By Andrew Sheridan
Collegian Staff

Beer has a lot in common with vegetables. It comes in many forms, is often considered an acquired taste and represents an essential part of any complete diet.

Also like a good produce, beer is best enjoyed in season. Choosing the proper variety for the time of year is crucial to making sure that your product is fresh and fitting for the temperature outside. This month, it just so happens that the produce season and the beer season are in perfect harmony. This is October and it's pumpkin time.

The use of pumpkin for brewing dates back to colonial times when the time-honored flavors and grains used in European brewing were nowhere to be found. The idea has been picked up by craft brewing companies in recent years, and the lack of concrete tradition has resulted in lots of variety between different brewers.

Pumpkin beer is a fun style, more playful and inventive than most other seasonal beers. Brewers often employ festive autumn spices, and the frequent use of real pumpkin makes the beer sweeter than standard fall seasonals and "Oktoberfest" varieties.

Shipyard Pumpkinhead

Shipyard is one of the most popular pumpkins on the market, and for good reason. With a full round flavor and medium body it is by all means a well-crafted beer. More important than the technical aspects, however, are the spices. Cinnamon, nutmeg and a bold gourd punch immediately bring to mind a pumpkin pie and make this one of the best examples of the style.

Shipyard also has another pumpkin beer, the micro-brewed Smashed Pumpkin. Part of their "signature series," the Smashed Pumpkin weighs in with a big alcohol punch and an even bigger price tag. The best way to imagine this beer is to think about champagne. The first thing to hit the senses is an aroma reminiscent of bubbly, and the body is similarly sweet and thick. The Smashed Pumpkin's spices are similar to those in the Pumpkinhead, but come across as more delicate. This beer is quite good when enjoyed in a glass, but whether or not it is worth the high cost is up for debate.

Dogfishhead Punkin' Ale

This full-bodied ale hits the tongue with a quick bite of spice which quickly fades to a mellow finish. A combination of brown sugar, allspice and cinnamon make this a smooth, nutty beer that may surprise fans of Dogfish's intensely hoppy IPAs.

Smuttynose Pumpkin Ale

Not all pumpkin beers deliver as much flavor as these examples make it seem. Some brewers simply hop on the seasonal bandwagon without thinking it through. For a perfect example, take Smuttynose Pumpkin Ale. This rustic-looking beer comes through with a flat note of hops, negligible pumpkin flavor, and not much else to back it up. With so many good beers around, why settle?

Jack's Pumpkin Spice Ale

Made by the Anheuser-Busch, Jack's Pumpkin Spice Ale is the only beer on the list that is not produced by a small-time brewer. That is not to say that it should be overlooked, however, as Jack's is a solid and refreshing fall beer. As its name suggest, this ale does not taste like pumpkin – it tastes like pumpkin spice. With a decent amount of flavor and light body, it goes down easy and leaves room for more.

Post Road Pumpkin

Those who are on the fence about gourd might want to check out Post Road Pumpkin. It has more beer flavor than many other pumpkin-styles, with classic malt sweetness and only a hint of pumpkin. While it may not be the best representative of the style, Post Road is a good beer with plenty of aroma and a big spicy finish, and is worth checking out.

Pumpking

While some of these beers may bring to mind the flavors of pumpkin pie, there is one brew on the market that tastes like it's fresh out of the oven. Pumpking by the Southern Tier brewery is, as its name suggests, the grand master of pumpkin beers. Rich, creamy and incredibly flavorful, this beer so closely resembles good pumpkin pie that it's almost a dessert by itself. At the price of seven dollars for a 22-ounce bottle, this might not be the drink to give away at your Halloween party but for anyone with the cash and the inclination, Pumpking is certainly not to be missed.

So grab some candy, carve a jack-o-lantern, and crack open a cold bottle of Halloween goodness. The pumpkins are fresh, and your new favorite beer just might be in season.

Bottoms up.

Andrew Sheridan can be reached at Asher1@student.umass.edu.

How to get monster smashed

By Ashley Berger
Collegian Staff

Aside from being an extremely popular 2009 song by rap group LMFAO, "shots" also happen to be a crucial part of most college students' Halloween evenings. In case you're used to taking straight shots of $13 vodka, here's a list compiled just for you using a wide variety of alcohol that is sure to tickle your taste buds on this spooky night.

Brain Hemorrhage

Mix three-quarters Bailey's Irish Cream and one-quarter Rumplemintz. The mixture will cause the Bailey's to curdle, giving the shot a brainy look. Add a few drops of grenadine to give the shot a bloody brains effect. For this recipe, you can use virtually any type of alcohol to mix with Bailey's; it will still give it a brain visage.

Maggots

Hate the feeling or image of bugs crawling all over you? In this drink, you'll be able to see them before you drink them. Mix equal amounts of vodka, peach schnapps, Irish Cream and Kahlua. Similar to the recipe above, the Irish Cream will curdle upon it's reaction to the other alcohol, giving the appearance of little creepers in your drink. Drink fast!

Life in Hell

Layer Tabasco and tequila in a shot glass. Add in a slice of jalapeno and top of with a splash of evercleat. Carefully, light the shot on fire, then quickly blow the flame out, take the shot, and eat the jalapeno. These are for professionals only – and don't drink too many, or you will literally wish you were in hell the next morning.

The Jello Shot

The is the easiest shot to make on the list, because chances are everyone has already made them once or twice. For beginners, buy "jigglier" molds in the shape of all things Halloween. Prepare Jello as you normally would and stir in the vodka as well. Use different colors by using food dye for different molds. Chill and shrill as you take these gooey shots. For added Halloween-themed fun with this recipe, buy syringes and fill them will the Jello before refrigeration. If your costume is a nurse or a doctor, this drink also makes the perfect accessory.

Vampire's Kiss

Pour one-third raspberry liqueur, one-third part vodka and one-third part cranberry juice into a shot glass. The sweet taste resembles what it would probably taste like to kiss a vampire, and the red color resembles what your neck would look like when he is done kissing you.

The Screaming Green Monster

Mix pineapple juice, 7-Up, Bacardi 151, Midori and Malibu Coconut Rum. Shake well before straining into a shot glass. The mix will turn out a ghastly green. Drink one too many of these shots and you'll be screaming like the green monster.

Freddy Kreuger

Everyone's favorite killer comes in two forms: the crazy knife-welding man, and the deathly shot. Mix equal amounts of vodka, Jägermeister and Sambuca. The syrupy sweetness causes the shot to go down slow and painful, but sweet nonetheless, leaving you begging for mercy just as the movie character would before he kills you.

Candy Corn Shot

While candy corn is arguably the most popular Halloween candy, it is also quite tasty in shot form. Layer one-third ounce Galliano, followed by one-third ounce orange curacao, and finally one third ounce cream to create a shot that looks just like the treat. Enjoy as the shot goes down sweet like candy!

Pumpkin Pie

What's sweeter in October than homemade pumpkin pie? Answer: A pumpkin pie in shot form. Mix Irish Cream, Kahlua, and Bacardi 151 Rum. Add cinnamon on top for a spicy and sweet flavor.

Caramel Apple Shot

After taking the Pumpkin Pie shot, are you still craving something super sweet? Mix one ounce of Apple Liqueur with one ounce of Butterscotch Schnapps. This drink goes down sweet, sour and sugary, and is sure to ease your sweet tooth craving for a while.

For added fun, make sure you buy festive shot glasses with which to take these drinks. Please drink responsibly.

Ashley Berger can be reached at aberger@student.umass.edu

Surving Halloween: Hangover remedies

Jeff Mitchell
Collegian Correspondent

After the glory of Halloween night has ended, the reality of early morning classes on Nov. 1 hits hard. Here are some friendly words of advice to prepare you for the hardships of the next day.

Prep the night before

Even though you want to impress your friends, don't buy a really nice costume. It will either be covered in beer or vomit by the end of the night.

Make sure your make up comes off for the next morning. You don't want to be known as that guy with the whiskers.

Pick Monday's wardrobe out at 5 p.m. the night before. While it seems like a minor thing to do, it will save you time the next morning.

Halloween night

If you know what parties you are going to, start at the furthest party and work your way back towards your house or dorm. You'll definitely be happy you did, especially if you have a bulky costume.

Know the bus schedule. You don't want to be wandering around Mount Holyoke College in a blood-splattered axe murderer costume at 9:30 a.m.

Know what your friends or significant other are wearing before you go out that night. You don't want to end up grinding up against the wrong Lady Gaga in the dimly lit basement of a frat house.

Don't mix candy corn with shots and chocolate. Seriously, don't.

Be careful if you are offered gummy worms or bears if you do not want to drink, they can be soaked in vodka and act similar to a Jell-o shot.

Cut yourself off by 2 a.m. Even though you probably won't, it still should be said.

Don't go home with a girl with a lot of makeup; it can hide many things you won't notice until tomorrow morning.

Change out of your costume before you fall asleep - no one wants to wake up in a puke-splattered Edward Cullen costume at 7:45 a.m. in the morning.

If you feel like you might throw up, do it the night before.

Your morning will hectic enough without spewing chunks all over the spider webs hanging from your dorm the night before.

The next day

Get four or more hours of sleep or get none at all. Your body will not be well- adjusted enough to function and your bed will simply just feel too good to get up.

Wake up an hour earlier than you usually do. Even though it will probably be rough, the extra time will be needed depending on how hard you partied the night previous.

Take a shower if you plan on going to class - smeared make up that recks of Captain Morgan is a definite give away.

Follow these tips and the day after could be just a bit less horrible than you thought it would be.

Jeff Mitchell may be reached at jjmitche@student.umass.edu

Mixing booze in the cauldron

By Ashley Berger
Collegian Staff

When we were younger, we trick-or-treated for all kinds of candies; orange and black M&Ms, chocolate-shaped spiders, and we especially loved when the neighbor down the street gave out king-sized Kit-Kats.

In a more mature, more experienced level of life, college students across the nation look at Halloween as not merely a night to get a slew of free candy, but a reason to party and party hard.

There are a ton of spooky concoctions that provide a treat for your taste buds and a buzz that will keep you warm through the most chilling night of the year.

Ghostbuster

Who ya going to call? This drink, named for one of the greatest Halloween movies of all time, is an easy and yummy treat. Mix one ounce Peach Schnapps with an ounce of melon liqueur. Shake well and add a few drops of Irish cream liqueur to create a ghastly white cocktail.

Bloody Mary

There is a legend that spinning around three times in the bathroom will supposedly conjure the ghost of Bloody Mary to appear behind you? For this drink, mix together an ounce and a half of vodka, three ounces of tomato juice, Worcestershire sauce, hot pepper sauce and lemon juice. Garnish with a celery stalk. Drink a few of these and Bloody Mary will really have your head spinning.

One-Eyed Zombie

Didn't think your drink could look at you? Spook all your party guests by creating a red "eyeball" for a garnish. Take a maraschino cherry and insert a chocolate chip into it pointing inwards. Add to a martini mixed out of two ounces of gin, lemon juice, one teaspoon of powered sugar and a splash of carbonated water.

Black Cat

What's creepier than a black cat crossing your path at night? A black cat attacking your liver, obviously. Mix one ounce Black Cherry Schnapps, one and a half ounces of vodka, two ounces cola and two ounces of cranberry juice for a meowing-good time.

Monster Mash

Arguably the best Halloween dance is now available in drink form! Mix one ounce of rum, one ounce of lemon schnapps, two ounces of vodka and one can of Monster energy drink, and you'll be mash-ing all night long.

Dracula's Bite

Even with recent ""Twilight"" hype, Dracula is still the most beloved and popular vampire out there. And despite the battle between Edward and Jacob, Dracula still has the deadliest bite. Pour vanilla vodka in a glass and layer in grenadine and maraschino liqueur to create a bloody biting drink.

Full Moon

A full moon on "All Hallow's Eve" makes the night that much scarier. This drink will send chills up and down your spine far into the night. Mix an ounce and a half of amaretto with and an ounce and a half of Orange Curacao and pour over ice to create a milky, ghost-like drink.

Spider's Web

Though spider webs are frightening at any time of the year, this drink will definitely have your head spinning. Mix four ounces Goldschlager, one drop of strawberry juice and one and a half ounces of whipping cream to create this web. For an added creepy effect, freeze tiny plastic spiders in an ice cube and drop them in the web.

Jack O'Lantern

The essence of Halloween is a good Jack O'Lantern. Carving them was a fun activity to do as kids, and as adults (or almost, at least), they're even better as mixed drinks! Mix two ounces of citrus vodka, one ounce mango nectar or juice, a little bit of orange juice and a little bit of sour mix. Garnish with an orange and drink up this sweet and sour treat.

Bloodbath

Halloween doesn't have to just be for people who like to drink hard alcohol. This drink consists of two shots of raspberry liqueur, red wine, and a splash of cranberry juice. Shake together for a fruity drink, but make sure not to spill it on yourself or you will look like you just bathed in blood.

Ashley Berger can be reached at aberger@student.umass.edu.

Top five topical costumes for Halloween 2010

TOPICAL from page 1

If you're interested in dressing up like "the Situation," you will need sunglasses, a wife beater tan, and dark denim jeans. In order to get the full essence of the Situation's narcissism, you will need to continuously lift your shirt to show off your painted on six-pack throughout the night. As Pauly D, you can wear any type of t-shirt and jeans as long as you master the hair. For Snooki or J Woww, you just need a tight, revealing dress and high heels. Depending on how fat you want to take the look, you can add some orange caked on foundation. Try out the Jersey accent and maybe you'll woo someone enough to bring them back to the Smoosh Room by the end of the night.

Lady Gaga never fails to disappoint, and neither will you in one of her crazy outfits. There are so many looks to choose from that you will have to look through hundreds until you find one that strikes you. For any outfit, you will need a long platinum blonde wig with straight across bangs, with the exception of her 2009 VMA performance outfit. In that case you will need a short, curly platinum blonde wig with pink highlights. You will most likely need some type of crazy hat to wear on your head or some kind of glittery design for your face. There is no underestimating her insanity, and if you can tune in to that type of thinkin, you will pull off her outfit with ease.

For those of you that have a good sense of humor and are willing to show a little skin, Nicki Minaj is a good choice. The costume is fairly simple, with just a few essential pieces to pull the look together. You will need a colorful wig, a tight jumpsuit or dress, a good pushup br, and butt pads or some type of padding if you are not already blessed in that area. To finish off the look, you will need bright lipstick, false eyelashes and chunky accessories.

If you are someone who enjoys a lot of attention, Tiger Woods is a good choiceY You can buy the beaten and bruised Tiger Woods mask at a party store, or do the scars and bruises yourself with the help of some special effects makeup. For the rest of your outfit, you will need a black Nike hat, a polo t-shirt, some sort of khaki or dress pan, and golf shoes. It would be clever to surround yourself with scantily dressed girls holding golf clubs. Don't make any snide comments or stupid moves in this outfit, or you may end up with some real bruises of your own.

This last outfit is an easy fix for the people who may be a little slow at picking out Halloween costumes. Speaking of slow, Alan from "the Hangover" would be a good fit for you. You can buy the shirt with the baby already on it, or buy a t-shirt, baby slin, and baby doll for the full effect. You will need dark shield or aviator sunglasses. You may also choose to wear his odd grey t-shirt with some white pants, and a purse – excuse me, satchel. Maybe in wearing his outfit, you will inherit his good fortune in winning $80,000!

Don't bother dusting off the old classic Halloween costumes when there are so many current outfits you can pull off this October. With a little bit of creativity and imagination, you can be the life of any party on Halloween while keeping your wallet full and happy.

Malea Ritz can be reached at mritzla student.umass.edu.

LYNN TRAN/COLLEGIAN

From Snookie to Gaga, there are no limits to how creative you can get this Halloween. Above, Lauren St. Pierre poses with her best "Poker Face" for the Collegian during a best costume photo shoot.

Get-ups for the crew Straight outta' Jersey

By Ashley Berger
Collegian Staff

Are you that person who has a ton of friends? Do Halloween give you a headache because you and all your friends want to dress up as a group, but simply can't find an idea that allows for enough costumes for everyone? With these costume suggestions, your posse is sure to be styling on the spookiest night of the year.

Blue Man Group

This is a relatively easy outfit to put together for a trio. Buy some blue face paint, blue latex gloves and all-black suits. This is perfect and easy enough for anyone to pull off, male or female.

KISS

If you love screaming and head-banging to '70s hard rock, then dressing up as KISS may be your crowd's calling. Bonus points if one of your friends enjoys showing off an excessively long tongue. Buy black and white face paint and draw designs on each other's faces, and then stick some black wigs on your heads and blow-up guitars in your hands. Someone should carry a microphone. Sing "I Wanna Rock and Roll All Night" everywhere you wind up.

M&Ms

This costume idea works for pretty much any number of friends because you can create any color you want and play it off like it's a holiday-colored candy. Everyone picks a color and just wears that color with a white "M" on the front of their shirt or dress. Wear white gloves and white shoes.

Three Blind (or Blonde) Mice

Find two other friends and wear all gray outfits. Buy some form of ears and little tails. Wear eye patches, sunglasses or blindfolds all night. If deciding to be blonde as well, buy blonde wigs. This costume works well for either males or females, and blonde wigs look especially stunning on the guys.

Seven Deadly Sins

On Halloween, you can dress up to be anything you want to be, even if that includes being something extra sinful. The seven deadly sins are pride, gluttony, greed, envy, wrath, sloth and lust. For pride, dress as nicely as you possibly can and walk around praising yourself. For an added effect, create a list of great things you've done in your lifetime. For envy, wear all green. For gluttony, carry around all types of food, wear oversized clothing and act hungry all night. For a lustful costume, dress in red to give the illusion of passion. The person dressed up as wrath should also wear red, but add devil horns. The character portraying greed should wear green and tape fake money to themselves, a large gold money chain and carry an iPod, cell phone and other expensive things all night. Finally, for sloth, dress sloppy and constantly make other people do things for you.

The Cast of Alice in Wonderland

This idea also works for a various number of people in a group, because not all characters are as important as others, but is perfect for a big group because you can add as many characters as possible. The most important character is Alice, who would wear a blue dress and a blonde wig and act like a space cadet for the duration of the evening. The Mad Hatter is another essential character who would wear a top hat and act hyper, confused, and belligerent all night. The Cheshire Cat could wear all purple and also act spacey. If you have twins in your group, they could easily pull off Tweedle Dee and Tweedle Dum, in which they could act annoying ignorant of each other. Other key characters could be the White Queen, the Red Queen and the Caterpillar.

Cereal Killer and Friends

Have one person dress up in a costume holding a toy gun. Have every other person dress up as their favorite cereal with some form of fake blood coming out of them. This works for as many friends as your have and as many cereals you can think of.

Harry Potter characters

Have a lot of red-headed friends? Like casting spells? This idea, again, works well for any number of people, because there is a never-ending amount of recognizable characters. Important characters are obviously Harry, Hermione and Ron. However, interesting characters could also be Dumbledore, Voldemort, McGonagall, Snape, any of the Weasleys or any of the fictional animal characters.

The Peanuts Gang

Who didn't love "It's The Great Pumpkin, Charlie Brown" when they were younger? This costume is great for a multitude of different people because you can keep adding characters. Have Charlie wear a yellow shirt and draw the zig-zag on the shirt. Pair that top with black shorts. Have Sally wear a pink dress, and Lucy wear a blue dress. Lucy should act particularly bossy to everyone all night. One person should wear all white and dog ears to be Snoopy. Someone should wear all yellow and tape feathers to them to play Woodstock. One friend should wear a red t-shirt with black stripes and possibly carry a hand held piano to play Linus. Other entertaining Peanuts members can be Schroeder, Peppermint Patty, Pig-Pen, Franklin and Rerun.

Ashley Berger can be reached at aberger@student.umass.edu.

By Kate Evans
Collegian Correspondent

Your friends have been pestering you for weeks now, inquiring about your Halloween costume. Unfortunately, you've been too busy watching Jersey Shore reruns to study for your midterms, let alone construct an original outfit.

Stress no more! Turn off the television and check out this epic list of how to dress like each Jersey Shore cast member to impress your nagging friends:

We've got a Situation- Think you'd make a nice Mike "The Situation" for Halloween? You could give up and acknowledge that your abs will never look like that, or you could grab some gym shorts, a white "wife beater" and a black marker. Use the marker to draw an 8-pack outline on your stomach, as you will be continuously lifting up your shirt to expose your "situation" all night. If you have extra cash, buy a fake blingin' cross necklace and rock that as well. Gel your hair, go tanning and say things like, "I'm like a Ferrari, I'm high maintenance, okay?"

The Princess of Poughkeepsie- Does Snooki the pickle-loving firecracker appeal to you? Wear anything that's short, tight and animal print, decked with lots of glitter. Make sure to apply at least 20 coats of bronzer, four layers of black eyeliner and sparkly lip-gloss. Take two bobby pins and clip the front section of your hair back, creating the famous poof. Carry around a jar of pickles and say things like, "It's like putting a watermelon into a pinhole."

DJ Strong Hair- Do you love getting with hot chicks, dancing to house music, and DJ-ing? If so, Pauly D is who you want to be. You'll need to apply an entire bottle of hair gel, then comb your hair straight upward. Once it is sticking up, spray half a can of hairspray, or until your hair is hard as a rock. Wear jeans, a pink or black T-shirt, and as much bling as you can find.

Drape headphones around your neck and say things like, "Nothin' like herpes to ruin a party."

Kim Kardashian of Staten Island- Feel like you're the misfit of your group? Angelina is the cast member for you. Rock some cutoff jean shorts with a black top and match that with the largest pair of sunglasses you can find. If you have the funds, purchase some black washout hair dye and go all out. Stick your nose in the air and say things like, "the [expletive deleted] of Staten Island is back and ready to party!"

Muscles- Are you not that funny but manage to get with two chicks at once while your girlfriend sits at home in bed? Dress as Ronnie this year! Match some swim trunks with a gray "wife beater" and gel your hair into a faux-hawk. Neglect your current girlfriend and carry around a book with all your ex-girlfriends' phone numbers. Make sure to say things like, "I'm gonna have a good time and get creepy and get weird."

The Sweetheart- Ironically nicknamed, as Sammi Is never smiling. To look like this diva, dress in black yoga pants and a black "wife beater." Wear your hair down and straightened, and make sure to act as much like a wet blanket as much as possible. Carry around an anonymous note with you that says your boyfriend cheated on you at the club. Make sure to say nothing all night since Sammi never speaks, she only cries.

Oh WOWW- The first step to dressing like JWoww is to stuff your bra with oranges. Wear tight jeans and a top that sinks low enough to reveal your bellybutton, and pretend to chat on the phone with your "boyfriend," Tom. Rock large gold hoop earrings and say things like, "I'm allergic to pecans... sometimes."

Guido Wannabe- If you were born a daywalker, Vinny is the character for you. This costume requires faded jeans, a black wife beater, and a plaid baseball cap. You may want to wax your eyebrows, be down to snuggle with Snooki, and say things like, "My v-neck is so fresh that I skip T-shirt time."

Your midterms are in your own hands now, but at least you'll succeed in making a memorable appearance on Halloween all while showing your friends up.

Ballot question 2 may repeal comprehensive permit law

By Katie Byrne
Collegian Staff

In less than a week the Commonwealth of Massachusetts will be voting to repeal or not to repeal the comprehensive permit law, the second of three referendums on the midterm ballot. The comprehensive permit law, also known as 40B, enacted in 1969 provides an alternative zoning approval process for select housing developments.

Mass. law allows a qualified organization wishing to build government-subsidized housing that includes low to moderate income units to apply for a single comprehensive permit from a city or town's zoning board of appeals (ZBA), instead of separate permits from each local agency or official having jurisdiction over any aspect of the proposed housing.

Under the existing law, the ZBA holds a public hearing on the application and considers the recommendations of local agencies and officials. The ZBA may grant a comprehensive permit that may include conditions or requirements concerning the height, size, shape or building materials of the housing.

If a person is aggrieved by the ZBA's decision to grant a permit, the applicant may appeal to the state Housing Appeals Committee (HAC). Two things the HAC considers are whether the permit is consistent with local needs and if the permit is economically sound.

If the HAC rules that the ZBA's action was consistent with local needs such as protecting public health and promoting better site and building design. The HAC must uphold it even if the decision creates a difficult economic situation.

According to the Town of Amherst website, the zoning board of appeals is a quasi-judicial body that operates under the authority of Chapter 40A of the General Laws of the Commonwealth. The board's stated purpose is to promote the health, safety, convenience and general welfare of the inhabitants of the Town of Amherst.

A study published in 2000 by the the University of Massacusetts Donahue Institute titled "Economic Contributions of Housing Permitted through Chapter 40B," found that 21,861 new housing units have been built as a result of Chapter 40B permitting, including 8,140 affordable housing units. These include both homeownership and rental developments serving seniors, families and people with disabilities who have a wide range of incomes.

A provision in the comprehensive permit law states 10 percent of all developments in cities and towns must be zoned for affordable housing. The law has been considered controversial because a rural town in the Berkshires is demographically different than a suburb of Boston.

State Senator Stanley Rosenberg, Democrat representing the Hampshire-Franklin District is opposed to repealing 40B.

"40B is roughly a 40-year-old law," Rosenberg said in a phone interview. "It has done a lot of good, but it has flaws that need to be fixed."

Rosenberg highlighted the fact that very few states have done a better job than Massachusetts at creating affordable housing.

Rosenberg is fearful that if the law is repealed the Commonwealth will no longer promote affordable housing developments.

"The law has fundamental problems, but the idea of it is sound," said Rosenberg.

The proponents of repealing 40B seem less optimistic the law can actually be fixed if not revoked on November 2. Affordable Housing Now, a group of supporters who advocate for real affordable housing, feel as though 40B is nothing more than a tool being used by developers to extract huge profits at the expense of the community.

A story published in the Boston Globe in 2007 exemplifies a major

Citizens across the Commonwealth will cast their decision on ballot question 2, which will determine the fate of low income housing.

ROTC enrollment on the rise at UM

By Katie Landeck
Collegian Staff

Over the past five years, the Reserve Officer Training Corps., program at the University of Massachusetts has seen an increase in the number of students enrolling, with this year being its largest class. Currently, there are 47 students participating in ROTC at UMass.

The University has not always seen these kinds of numbers. During the Vietnam War, many colleges removed the ROTC program from their campuses. UMass temporarily discontinued academic credit of courses taught by the Military Air and Science Department in 1972, but then reinstated it in 1973, according to the University website's history section.

During the war years, the program suffered from decreased enrollment and loss of institutional memory and internal traditions, until interest in the program began to increase again in 1976, according to the program's site.

Today, enrollment is increasing on the campus.

"I have been thinking a lot about why more students are joining," said Major Matthew Bachman, who is in charge of enrollment. "A lot of the kids that are joining have a sense of duty to serve. They have been watching the news for the past 10 years and want to do the right thing and support the efforts overseas."

In addition, the program sees a lot of support from the campus community.

"We have a great relationship with UMass," said Bachman. "When I walk around, students will approach me to talk about the program in a positive manner. We even have some students who are not involved in the ROTC but participate in our classes and training."

The program trains students to become Second Lieutenants in the United States Army, emphasizing leadership and training experience.

"These are the future leaders of the army," Bachman said. "We teach them to be leaders. We push them and test their medal, and when they officially complete the program they feel good about themselves and what they have done. They gain a real sense of accomplishment."

While enrollment is increasing, 47 members is still only a relatively small sample of the 20,000 students enrolled at UMass. Such a proportion, ROTC enrollment data indicates, is common at universities across the nation.

Nowhere are they more apparent than at Ivy League schools. After the Vietnam War, many of the Ivies did not reinstate their ROTC programs as a means of protesting the Army's "don't ask, don't tell policy," which bars openly homosexual people from joining the army. Among these schools are Harvard, Columbia, Yale and Stanford, which is not a member of the Ivy League.

SWAP team asks Pioneer Valley to take its clothes off for charity

By Stephanie Anjos
Collegian Staff

Looking for a way to gain community service credit? Is it time to update your closet, but it's difficult to find a local bargain?

Just in-time for the weather to change, North America's largest international, non-profit clothing-swapping organization, the S.W.A.P. Team, has added a new location to its growing list of centers, and has arrived in the Northampton-area, with the primary intention of attracting students from the Five College Consortium.

Founded by and operated by President Alecce Germano, the organization hosts "Take Off Your Clothes," events, which preserve more than 40,000 items that North America would otherwise send to landfills through swapping and donations to partner charities, such as The Salvation Army in Canada and Juri Boutique.

The team is maintained through a cycle of volunteer efforts, which its website promotes, and maintains profiles with social networking websites such as Facebook and Twitter to help begin new chapters, recruit volunteers, publicize events and collect clothing and monetary donations.

Abaigeal Duda, a former Pioneer Valley resident and Mount Holyoke College graduate, is the director of the Boston and the new Northampton S.W.A.P. chapters. She said she first learned about the group through Germano, as they were co-workers.

Duda said she believes the Valley's vintage taste and penchant for consignment stores will make the S.W.A.P. mission a success.

"Knowing there is an eclectic sense of fashion in this area, clothing swaps are sure to offer a lot of very interesting finds for the style hunters," she said.

Duda also felt that swapping itself will be a hit in the college-dominated area, as she feels inquisitive young people will be drawn to the legacy of the clothes they will exchange.

"[Swapping] allows you the chance to hear people's stories and background. In doing so, one is able to see the transition from enabling another to move forward in an aspect of life," she said.

As the program is a non-profit, students can also log volunteer hours for a variety of needs through the S.W.A.P. Team. Some extracurricular activities such as B.A.S.I.C., Brothers and Sisters in Christ, have already brought awareness to the campaign.

One University of Massachusetts student said she feels that the program has the potential to be a real boost to those in need, but cautioned that stu-

dents will need to rethink materialistic desires for the program to truly take off.

"I think this program will be very helpful," said freshman Cynthia Kyei-Akomeah. "It will aid those that go through difficulties that are unexpected. I hope it will be successful, but it all depends on students' willingness to actually give up clothes that are worth wearing. We are in an age where fashion is key, and unfortunately, many are very attached to their material items such as clothes.

According to Duda, the Environmental Protection Agency (EPA) reports that people in the U.S., on average, throw away more than 68 pounds of clothing and textiles per person per year. Keeping that in mind, she added that there are more than 37,000 faculty, staff and students in the Five College area alone.

With greater communicative connectivity than ever in the digital age, swaps have even taken flight on the Internet.

"If it works out, usually you and others communicate and swap. With the methods of the S.W.A.P. Team, we hold direct events and advertising campaigns in which participation is encouraged, versus months of trying to find things," said Duda. "It's more immediate."

Although the organization is global, Duda explained that S.W.A.P. Team also grounds itself in the communities where it operates.

"We work with local designers and independent clothing retailers in the community," she said. "This kind of collaboration makes for exciting events and helps small businesses to gain visibility."

As for a sales pitch for students, Duda touted how enjoyable the program can be.

"This is one of the most fun things that you can do to help the environment and others in your community," she exclaimed. "It not only makes a strong social and environmental impact, but getting involved is an absolute blast. I'm looking forward to bringing the entire community together and swapping "till we drop."

Additional information can be found at the Team's website, theswapteam.org or by contacting Abaigeal Duda at Northampton@theswapteam.org.

Stephanie Anjos can be reached at sanjos@student.umass.edu.

Bud bust

The Amherst Police Department announced Tuesday that early last night they had made a major drug seize at a house on North Pleasant Street.

According to a release from Lieutenant Ronald Young, officers from the APD and the Massachusetts State Police served a search warrant at 314 North Pleasant around 2:10 a.m. The officers seized what the release describes as, "a large amount of psilocybin mushrooms and had marijuana that had been packaged for sale," in addition to "several thousand dollars and other indices of distribution."

While conducting the raid, officers arrested 21-year-old University of Massachusetts student Steven Samson of Enfield, Conn. Samson was charged with possession of a Class C substance, psilocybin, with intent to distribute, possession of a Class D substance, marijuana, with intent to distribute, and a drug violation in a school zone. He was held at the Hampshire County House of Corrections in Northampton overnight in lieu of $5,000 cash bail, and was expected to be arraigned Tuesday morning in Eastern Hampshire District Court in Belchertown.

According to Young's release, police are continuing their investigation into the matter.

Nationwide numbers indicate lagging ROTC

ROTC from page 1

Some of these schools offer their students the opportunity to participate in ROTC programs at nearby campuses. As a result, according to an article in the college news Web magazine "Inside Higher Ed," Stanford and Yale both have zero students in the program.

In recent months, these schools have attracted more and more attention for this policy. Defense Secretary Robert Gates spoke on Sept. 29 at Duke University in N.C., criticizing what he sees as student apathy towards the program. President Barack Obama also made a comment about ROTC's waning influence recently, stating that he believes it is a "mistake" for universities to not allow the ROTC program on their campuses.

In light of these comments, several universities are reconsidering their stance. According to the article in "Inside Higher Ed," Stanford has established a committee to consider reinstating the ROTC and Harvard President Drew Faust are considering similar measures if the "don't ask, don't tell" policy is repealed.

These considerations do not necessarily mean that ROTC programs will be reinstated. In May 2005, Columbia University voted on allowing ROTC back on their campus, with the measure rejected by a margin of five to one. They explained their rejection as a consequence of their disagreement with the "don't ask, don't tell policy."

Katie Landeck can be reached at klandeck@student.umass.edu.

Nov. 2 referendum to determine housing law

BALLOT from page 1

concern of elected officials and citizens living in communities who are subject to huge affordable housing developments. The article by Christine McConville illustrates that affordable housing properties, like the one in Billerica, Massachusetts, make huge profits for developers, as they are bought and sold to different developers more than once before completion, at the taxpayers' expense.

The Villas in Billerica, Massachusetts were bought and sold by developer David Veo. Veo received a comprehensive permit to build 180 apartments under Chapter 40B on the parcel that had cost him about $800,000 to assemble, according to state records. McConville writes, "Six days later, he sold the land and permit for $5.4 million."

This is a concept known as "profiteering," something State Inspector General Gregory Sullivan concluded of developers of 40B housing developments after investigation. McConville emphasizes Sullivan's feelings of this practice being an abuse of the 40B law.

"The original developer would pay a certain sum for a piece of land, then obtain the 40B permit" writes McConville. "That developer sells the permitted land at a significant markup to a second developer, who then uses the marked up price in calculating the project costs."

State Senator Michael Knapik, Republican representing the Second Hampden and Hampshire District notes serious abuses of 40B in communities and towns across the Commonwealth.

"Eliminating 40B is not the most prudent course of action," Knapik said in a phone interview. His arguments for keeping 40B intact echo those of Rosenberg's. Additionally, Knapik addresses the fact that there become too many demands on infrastructure and resources in communities when local zoning laws are circumvented, another reason for reform of 40B.

A yes vote would repeal the state law allowing the issuance of a single comprehensive permit to build housing that includes low to moderate income units. A no vote would leave the law unchanged, allowing issuance of such a comprehensive permit.

"If we don't believe in free expression for people we despise, we don't believe in it at all." -Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

Déjà vu all over again

Ben Rudnick

We are about to witness, once again, the spectacle of an American election. All the predictions of the pundits and prognosticators will be put to the test, and it will finally be time for us, the voters, to express ourselves. If you are like me, you are excited for the opportunity a ballot represents. However, I urge you to recognize that there is a responsibility that goes along with voting, and there is still time to fulfill it.

Before you vote it is important to know a bit about the candidates, their views, and their ideas. I do hope that everyone reading this will go to the polls, but only if you've made some effort to become informed about the issues at stake. This may be a difficult task, but not impossible, even this late in the process.

The biggest problem I see nowadays is how many people are only listening to one side or the other. There is no such thing as an "unbiased" news source. If you want to know enough to make an informed decision on an issue, you need to actively seek out the opinions of those with whom you disagree.

The biggest problem I see nowadays is how many people are only listening to one side or the other. There is no such thing as an "unbiased" news source.

Letting Jon Stewart, or Keith Olbermann, or Sean Hannity tell you what the other guys think are not good enough.

It can be hard work getting information from both sides of the debate. In any given week, I try to read The New York Times, The Boston Globe, Politico, but also the National Review Online, Investor's Business Daily and the Drudge Report.

I garner opinions from the left, such as David Broder, Maureen Dowd, and Paul Krugman, but I also read George Will, David Brooks, Charles Krauthammer, and especially Thomas Sowell.

On TV, I watch CNN, Fox News and CSPAN. As far as I am concerned, if you don't read, hear or see something that pisses you off at least once a day, you are not paying close enough attention.

Do you have to do as I do? No.

One right we clearly still have in this country is the right to ignore what is going on around us if we so choose. I would hope that those reading this are doing so because they want to be engaged in the process, but if you have no real desire to be thoroughly informed then that is your prerogative.

You also have the right to only listen to those in the media with whom you agree. I know how comforting it can be to feel like they agree with you on everything I used to do it myself during the Clinton Administration, but don't delude yourself into thinking that one side or the other is always right.

However, if you want to be a part of the solution, and really understand the many disagreements we have on the issues, then I challenge you to expose yourself to opposing views. You will be amazed how much easier it is to find common ground if you actually take the time to listen to those on the other side instead of dismissing or even insulting them.

Think of it this way, if you make the effort to listen to what the other side is saying and they refuse to show you the same courtesy then they are the ignorant ones. Democracy is about trying your hardest to convince those who disagree to adopt your position, but willing to listen as they try to do the same with you.

Close-mindedness, insults, and slanted information may end a debate, but never confuse that with winning one.

Never mind the commercials, the glossy and not-so-glossy spots crafted by spin-masters and media consultants, start with the local paper, or perhaps The Springfield Republican. You probably saw the Collegian's write-ups on the various gubernatorial candidates, or the interviews with Representative Ellen Story and her challengers Dan Sandell and Dan Melick, but maybe you didn't read them. I encourage you to do so now.

All that being said, it is less than a week until Election Day as you read this, and I hope everyone will remember that there will be another one in just a couple of years. If you are a person of the left, and upset by the prospect of a Republican wave, just keep in mind that you will have other chances to advance your ideology. If you are on the right, don't forget 2006 or 2008, when you paid the price for not living up to your promises. Besides, the only thing worse than a sore loser is a sore winner.

Next Tuesday is going to be a big day no matter what, but there's going to be an even bigger Election Day in two years, so let's all try to keep that in perspective.

Ben Rudnick is a Collegian columnist. He can be reached at brudnick@history.umass.edu.

Decison 2010 malaise

Nick O'Malley

The 2010 Massachusetts governor's race has been received, particularly among college students, with an overlying tone of "meh."

In the face of a horrible economy that holds the future of the University of Massachusetts funding in the balance, the upcoming elections do not bring much to get excited about. One look at the candidates shows why.

Most people that have been paying attention have realized that Governor Deval Patrick has not done a spectacular job during his four years in office. Patrick's biggest threat, Republican Charlie Baker, does little to appear more than another budget-slasher that won't do much outside of the conservative base in a blue state. Tim Cahill's only chance at this point is to show up wearing a Jonathan Papelbon Red Sox Jersey while carrying a Dunkin' Donuts iced coffee and declare that he's going to do a "wicked good job." Jill Stein could be the greatest candidate in the world, but she's still in the Green-Rainbow party.

It's indicative of the current state of affairs in politics throughout the whole country. Patrick represents a whole lot of incumbent democrats who wanted to make some changes, but the economy had different ideas, hamstringing any effort to make a change, which likely involves spending some cash.

Baker represents the angry counter-liberal approach that has come after a bleak showing from President Barack Obama's term amid the recession. He's another guy riding the wave of the pissed-off older population that are losing their jobs and are well aware the country has a gajillion dollar deficit. Don't bother with stats, they won't matter by the time Obama unveils his socialist scheme.

The corruption in the state government has lowered people's standards a bit.

What the race boils down to is that Patrick got dealt a crappy hand, and would like nothing more than a pass on the past four years. Baker, meanwhile, wants to cut taxes and cut the budget while the state has a deficit.

Right now, it's likely that Patrick's the better candidate, but doesn't necessarily represent the best endgame for Massachusetts. The Patrick Administration hasn't been great and doesn't have a particular upside that one would want with better days hopefully coming for the economy. If he does win a re-election bid, Massachusetts won't be worse off for it in the short run. But what it does do is put the State House in play for what will now be known as "The Menino Clause."

"The Menino Clause" is simply the idea that, like current Boston mayor Tom Menino, a politician in this state can stay in office while doing a mediocre job, simply by not doing anything completely atrocious like embezzling funds or taking bribes. The corruption in the state government has lowered people's standards a bit.

While not awful, the scenario that ends in Patrick's re-election puts voters in a position to stick to him.

It would mean that he'd be a two-time incumbent that survived the Big Democrat Scare of 2010 in a blue state.

The other scenario -- barring a colossal upset by Stein or Cahill -- is that Baker is elected and fights the good Republican fight in the state house for four years against a Democratic state legislature. Could he do the job? Sure. Will he be able to fulfill his fiscally-conservative campaign promises? It's unlikely, given the state's budget crisis and lack of budget flexibility.

What a Baker win would do is keep the door open down the road. None of the four candidates this year are particularly impressive and don't have much in terms of long-term appeal. It's not like they would be able to do much for much of their tenure, either, with the state's budget likely to cripple whatever administration takes office.

Even though the elections haven't happened yet, it may be more important to look down the road to when the economy is more likely to improve. If there's a Democrat waiting in the wings that's better for the job, its best that he or she doesn't get annihilated by a Patrick office that ran the show while the economy improved. The same scenario would also hinder the chances of a stronger Republican than Baker when they step into the ring in four years.

After his four years in office, Governor Patrick shouldn't have the world's biggest fan club, particularly at UMass, where the safety valve has come from the federal government. But amidst a huge deficit, slashing the budget may not be the best idea. But then again, keeping Patrick in office may not be the best course of action either.

For the time being, Cahill and Stein remain out of the pictures, and the forecast for both frontrunners is lukewarm at best. Massachusetts needs a legit governor, and 2010 was a flop. It may be time to start looking at prospects for 2014.

Nick O'Malley is a Collegian columnist. He can be reached at nomalley@student.umass.edu.

Five reasons to not celebrate Halloween

1) You're not seven anymore.
2) So much "Halo: Reach" left to play.
3) Someone, somewhere is probably wearing a meat dress.
4) No one has forgotten what a disaster your "slutty Osama bin Laden" costume was.
5) Nearly all vampire films are acrtually soft–core porn.

ED/OP

Who is 'that Kid?'

Stacey Linehan

You know "that kid" you have in your class? The one who raises their hand to speak and the whole class starts to shake their heads and sigh. You know, the one who always has something to say about nothing.

The one that causes you to physically turn your head at least twice in the time they are speaking to check the clock. You feel you hear them talk more than you hear the professor.

We all know who it is and what it is in every class setting. You know, I know, the professor knows, and well, the kid probably knows too. The problem, however, is what to do with this kid. The professor can't get mad with the student for doing what is expected of them and participating in class. Perhaps professors need to clarify that participation should be thoughtfully engaged and not just paraphrases of what was previously explained.

By ranting about nonsense for minutes at a time, that kid interferes with the lesson plan formulated by the professor and the success of the students in the class.

Also, why does that kid always seem to raise their hand to say "I agree?" If I am in a lecture hall with 399 other individuals and someone raises their hand, solely for the purpose of agreeing with the teacher, I get confused. I was pretty sure a simple head nod would suggest to the professor and those around you that you believe the current topic of discussion holds some truth. If you feel so inclined to raise your hand and disrupt the valuable learning time of the whole class, maybe I should be paying you to listen to your opinion, but wait, you are not the teacher.

While I understand the importance of participation for collaborative learning, gaining more knowledge from your peers, debating, and networking, I recognize when and where this is appropriate. We have these sections called discussion sections and what you do there is right in the name, you discuss. This would be a fine time for that kid to get their opinion heard, among an intimate group of 20-30 students. When you go to a lecture, guess what happens? You get lectured. The professor spends a lot of time and puts in effort to accurately time out their lectures to fit the brief period they are given to provide us with the information we will need to succeed in the class.

By ranting about nonsense for minutes at a time, that kid interferes with the lesson plan formulated by the professor and the success of the students in the class. I know it seems simple but if it's so simple why do people have such a hard time grasping what is expected of them?

When the teacher reads the title of a slide from a Powerpoint and you raise your hand to define the term before their first bullet is presented, you're that kid. If you make "Oooh oooh oooh" noises while waving your hand so the professor will notice you, you're most likely that kid. When you raise your hand before you even know what you are going to say, chances are you're that kid. If people groan and moan when the professor notices you're obviously waving your hand and calls on you, like it or not, you're probably that kid.

If you hate this article so far because you disagree with the portrayal I am giving, big bright signs are pointing your way, flashing and displaying in dazzling colors, "that kid."

What can we do about this?

Both professors and teaching assistants have office hours and some professors will even meet with you by appointment, so I would like to advise that kid to utilize these opportunities to connect with professors and clarify misunderstandings from class. You could discuss class exercises, homework, internships, how you like your coffee, chat about the weekend, anything you want for all I care, as long as it's not on my time.

I choose to attend all my classes because I pay for those classes. There is never an internal debate as to whether or not I should skip a class because I'm too tired or because it's raining, I just suck it up and go. I realize that no matter how little you think you may learn in a particular class, not going means you have learned absolutely nothing. As far as I'm concerned, a missed lecture is more than a missed lesson, its money lost. I, like everyone else, don't like to waste my money, so next time you raise your hand in class to participate, think for a moment whether or not what you have to say will be remotely beneficial to the rest of the people around you who are paying for the time in their seat.

Don't want to be "that kid."

The S.P. Sullivan Memorial Prize

For Haiku Writing

S.P. Sullivan

A haiku is an old form of poetry from Japan, originating from around the 17th century.

In English, haikus have usually been 17 syllables on three lines – five, seven and five.

S.P. Sullivan, former Collegian Managing Editor, was a major proponent of the haiku.

John Irving returns to Mt. Holyoke

By Jeff Mitchell
Collegian Staff

The Chapin Auditorium of Mount Holyoke College was filled with mobs of middle-aged housewives, clamoring to sneak a peek at the critically-acclaimed author John Irving. Irving is the author of twelve novels, including "The World According to Garp" and "The Cider House Rules," and recipient of the National Book Award. The Oct. 20 event was co-sponsored by The Odyssey Bookshop and the Mount Holyoke College English Department.

While waiting for the author to take the stage there was a buzz, comparable to that of a crowd waiting for a popular musician. People were discussing what he would look like and who would be lucky enough to possibly obtain his autograph.

Joan Grenier, of The Odyssey Bookshop, started the event. She explained the collaborative efforts of their business with Mount Holyoke College to bring John Irving back to the Pioneer Valley. She also mentioned that he would be the first in a multitude of authors that would be visiting in the coming months.

As the former MHC Assistant Professor of English took the stage, he was greeted with a flood of applause. His appearance at first seemed very typical and filled the criteria of what you would expect from a prestigious author. He had white combed-back hair, and a blue collared shirt tucked inside of his blazer.

The event got off to a somewhat disappointing start when Irving announced he would only be answering pre-selected questions. These questions ranged from his plethora of novels to his views on writing, his process, and opinion of MFA programs.

As Irving spoke of his books, he started off with a somewhat slow, docile speech. Surprisingly the author was humorous, but in a very dry sense.

A book which many questions were centered around was "The World According to Garp." Irving explained, "I was very angry when I wrote that novel. There was still a lack of sexual differences and it made me angry."

The audience was filled with mothers and daughters, old and young individuals, all of whom were fans that had read multiple novels by him. They all felt connected to the works, as Irving spoke on an analytical level about aspects of many of his novels and compared them to his life at the time of writing.

A question that Irving addressed with detail was his process of starting with the last sentence in the novel first and working from it. "I see endings first, I don't need to know what happens, I need to know how it sounds. I can just focus on language when I work, and not second guess myself."

Irving also read an excerpt from his unreleased 13th novel which detailed the psychological struggle of a bisexual youth in America. The narrator is an older man looking back on his adventures as a boy. The story focuses on his confusion and indecision between men and women and how these feelings shape his view of love, sex and relationships.

Irving's reading was powerful, to say the least. His old haggard voice picked up in an effective manner that emanated the confusion of both the narrator and other characters. The way he spoke captured a true understanding and connection to the story, one which only an author would have. His tone bled with the feeling of constant detail and humor.

In response a question on the political nature of his works, Irving answered, "I'm not a political person. I never set out to write a political novel." Another interesting point he brought up was "I've never begun a novel that didn't make me feel afraid in some way."

When describing authors that inspired him, Irving mentioned Dickens, Melville, Thomas Hard, and Nathaniel Hawthorne, but he concluded with an especially humorous comment on Hemingway: "I hate Hemingway. If you want to write in sentences that short, be a copy editor."

The crowd found Irving truly hilarious, laughing at every joke that he made as if he were a stand-up comedian. It was obvious that they were true fans of not only the novels, but the man himself.

Due to an injury, Irving was only able to sign 200 copies of his most recent book, "Last Night in Twisted River." In order to be ordered in the drawing, you had to have purchased his book at the event.

Cindy Pyle was an individual present in the audience who had read all of Irving's novels. In response to his reading from the unreleased novel, Pyle said, "In a way it was slightly different, and franker than all the others. Maybe he chose [the chapter] because it was provocative or representative I'll certainly buy the book."

Jeff Mitchell can be reached at jmitche@student.umass.edu

John Irving, acclaimed author of "The World According to Garp," and "A Prayer for Owen Meany," answered a pre-selected group of questions this past Thursday at MHC.

Woody Allen, seen here at Cannes 2010 with Naomi Watts, is the director of the new film "You Will Meet a Tall Dark Stranger." Although the dialogue has a somewhat alienating quality, the film deserves credit for its ensemble acting.

'Tall Dark Stranger' disappoints

By Kim Giordano
Collegian Correspondent

Woody Allen's "You Will Meet a Tall Dark Stranger" is a rather mediocre story that follows the trials and tribulations of a married couple and the people that come in and out of their lives that only serve to make things miserable. Taking place in London (as many of Allen's recent works tend to do) the bland and drizzly atmosphere of the U.K. creates the perfect backdrop for the tone of a film in which the characters can only feel sorry for themselves, or continue to pine after something, or someone, that they can't have.

Though married for over 40 years, we learn within the first 10 minutes of the movie that Alfie (Anthony Hopkins) and Helena (Gemma Jones) have recently been divorced. Alfie quickly finds himself in a relationship with 20-something former hooker, Charmaine. Allen's familiar theme of the older man going for the much younger woman is very much present in "Tall Dark Stranger." It is also seen in the unhappy marriage of Alfie and Helena's daughter. The most tolerable character in the film is the restless Sally, played by Naomi Watts. Stuck in a marriage with a failed and quite rude novelist of a husband, Roy (played by Josh Brolin), she starts an innocent flirtation with her married boss, Greg (Antonio Banderas). Roy, just as frustrated with his life, begins a heavy flirtation with younger and gorgeous Freida Pinto, who lives across the street. She catches Roy's eye as she strips off a vibrant red dress and forgets to shut the shades.

Essentially, Allen's characters are an ironic representation of the human desire of wanting what you don't have. At the film's start, each of these couples wants more and more from each other, but in the end they are left with virtually nothing. After the last 40 years of his career, to say "Tall Dark Stranger" is one of Allen's best would be an overstatement. The dialogue, although humorous at certain times, was mostly overwhelming and dry. The flat writing of his characters did not allow the audience to actually feel a real connection to any of the people on screen, creating a loss of interest and a lack of sympathy throughout the film. The actors, though an extremely able group, gave surprisingly lackluster performances as an ensemble, with the exception of Anthony Hopkins. As Alfie, he once again proved his acting chops are still superb and his performance was as effortless as his more well-known work as a crazed, cannibalistic serial killer.

Along with Hopkins, Gemma Jones gives life to the scatter-brained and aggressive Helena, who is left entirely alone after her "devoted" husband leaves her. Her daughter (Watts) impatient and tired of her mother's brandy-delusioned antics sends her to a faux psychic for "therapy" for dealing with her divorce and life. Helena puts too much faith in this fortuneteller, and at the conclusion of the film makes a decision that ends up negatively affecting her daughter.

The real message from Allen, though, is that Helena's "crazy" beliefs and spiritual journey eventually allowed her to achieve her own kind of happiness, whereas the desires and impulsive decisions that drove everyone else did not turn out in their favor, even though they all thought they were doing the things that would make them happy and bring them success. It can be argued that the only happy ending is for Helena, who, just as the psychic predicted, ends up falling for a "tall dark stranger". But again, because of an apparent lack of sympathy for a majority of the characters, the unhappy endings left audiences with feelings of rather mundane neutrality.

"You Will Meet a Tall Dark Stranger" is an average film, with an average screenplay, directed and written by an above-average filmmaker. Woody Allen's latest film will have audience members asking a very important question: does he even care anymore?

Kim Giordano can be reached at kgiordan@student.umass.edu

Daniel Tosh of Tosh.0 to play Mullins Center this Wednesday, October

By Kate Evans
Collegian Correspondent

Have you seen the viral Internet video, "David After Dentist?" More importantly, have you laughed at it? Daniel Tosh has.

Tosh, of Comedy Central's 30-minute comic segment "Tosh.O" will be performing at the Mullins Center at the University of Massachusetts tonight. Tosh will be hosting back-to-back shows, at 7:30 and 10:30 pm, the latter of which, still has tickets available for purchase.

The comedian is most famous for mocking widely circulated Youtube videos on "Tosh.O." He has performed on "The Late Show with David Letterman," "Jimmy Kimmel Live!" and "The Tonight Show with Jay Leno." Tosh even briefly appeared in "The Love Guru," starring Mike Myers.

The Mullins Center is just one of the stops along the comic's 60-city tour, titled Tosh Tour Twenty Ten.

Not always in the spotlight, Tosh grew up in suburban Orlando, Florida with a pastor as a father. He decided to work in comedy to put his sassy demeanor to use, as well as to avoid the 9-to-5 grind.

The witty character got into the business by performing stand-up comedy routines at an Orlando club called Bonkers, which an old girlfriend arranged. Tosh continued on this path for several years, performing at various clubs and colleges in Florida until he was discovered by someone who wanted to manage him.

His manager took a liking to Tosh mostly because he reminded her of comedian Bill Hicks. Tosh's manager worked with Hicks before he died 10 years prior to Tosh's discovery. Tosh was exposed to a great deal of Hicks' material starting out, drastically influencing his comedy.

By 23, the comedian decided to move out of Florida, which he has described as "flat, hot and dumb." He settled in Southern California for the beaches, since surfing is one of his pastimes.

Tosh's first big break came in 2001 with a performance on "The Late Show with David Letterman." Following this came appearances on other popular comedy-talk shows.

The comic released a CD in 2005 called "True Stories I Made Up." Tosh clearly isn't afraid to make light of more sensitive topics, such as religion, gay marriage and the media's impact on women.

In 2007, Comedy Central aired Tosh's 60-minute stand-up special: "Daniel Tosh: Completely Serious." Then in June of 2009, the network premiered Tosh's own comedy show, "Tosh.O." The humorous show features popular video clips and Tosh's commentary on them, and resembles Entertainment Tonight's "The Soup".

The first season was only scheduled for 10 episodes, but its popularity with viewers allowed it to be extended to 16 and renewed for a second season. The second season consisted of 25 episodes, one of which reeled in an astonishing 2.7 million viewers. The third season of "Tosh.O" will premiere in January of 2011.

Fans of the star can look forward to plenty of improvisation this Wednesday, as he has said he never goes on stage with a set list. Tosh is also impartial to transitions, stating, "Comedians always say, "I was at the mall the other day." No, you weren't. Just tell the damn joke."

The comedian's website, DanielTosh.com, has an ongoing countdown until "Daniel's Groundhog Day Ends." The end of the countdown falls on Tosh's 38th birthday on May 29, 2013, the day he plans to retire. Groundhog Day is a reference to the film of the same name, starring Bill Murray, in which Murray is frozen in time and forced to relive the same day repeatedly.

Tosh compares Groundhog Day to the life of a comedian in the sense that each day he's in a different town, does a radio interview, naps, performs and then starts all over again the next day.

On the countdown, Tosh has said, "When that thing expires, I'll either put a bullet in my head or just retire to a beach somewhere."

Tickets can still be purchased for Tosh Tour Twenty Ten at the Mullins Center or online.

Kate Evans can be reached at kvevans@student.umass.edu.

Daniel Tosh will performing at the Mullins Center this Wednesday. Audiences can expect to enjoy his energetic, improvisational comedic style.

New leader, goals for Minutemen in 2010

Kellogg calls for tougher 'men' to earn starting rotation spots

By Herb Scribner
Collegian Staff

The Massachusetts men's basketball team has some holes to fill after losing its top scorer Ricky Harris to graduation.

"In losing Ricky, we lost 20 points a game and a guy who's been here and scored the ball his own career," UMass coach Derek Kellogg said. "It's going to be hard to replace."

Stepping up for the Minutemen will likely be guard Anthony Gurley, who averaged 13.6 points a game last season including a career-high 24 points against Richmond in the Atlantic 10 Quarterfinals.

Despite having an experienced scorer waiting in the wings, Kellogg is looking to put "men" on the court.

"When I say a man, a man is a guy who never quits," Kellogg said. "He never gives in, he fights from the second he walks in the gym until the second he leaves. It's a constant effort, constant toughness."

Planning for the season is still in the early stages for Kellogg and company, as the former Memphis coach has yet to establish a starting lineup, basically because he expects the players to show him that they deserve to be a Minuteman.

"When I say 'men' I mean we've got to become tougher, we've got to become better defensively, we've got to rebound the basketball better," Kellogg said. "It means if I have five of them, I'll play five. If it means I have six, I'll play six. If I have seven, whatever the number is of the players I consider men, that's how many guys I'm going to play. I'm letting these guys figure it out right now."

Rebuilding 'Big City'

Hashim 'Big City' Bailey is doing whatever it takes to be a dominant force on the UMass basketball squad.

Last season, Bailey struggled with conditioning and weight issues that had Kellogg fuming at times during practice and at games. This year though, it's a whole different story after a summer of hard work.

"Over the summer, I was eating right," Bailey said. "Running a lot, like jogging around campus. This summer was really awesome to lose weight, because coach was telling me 'if you lose 40 pounds or so, you're going to be a monster out there, 'City' and that's what I did, that was my goal. Anything to help my team to win, lose this weight, get it down and that's what I did."

Kellogg showed much appreciation for Bailey after training in the summer.

"It's nice to see that he lost some weight. Somebody came in and really didn't recognize him," Kellogg said. "He's one of the few guys we have with some mass and some beef. So if he gets everything in the right order, I think he can help us this year."

Men's Basketball

Like every other player on his roster, Kellogg still believes there is much for Bailey to work on to help him improve on his game.

"He's still got a little ways to go, his conditioning is not where it needs to be quite yet," Kellogg said. "I'm just holding everybody to a certain standard and when you reach that that's when you're going to be productive for this team. And he's doing a good job of trying to get there, but he's got a little ways to go still."

It's been more than just a change in size for Bailey however, as the New Jersey native has been improving as much off the court as he has on the court.

"I'm trying to change a lot, I'm listening to the coaches," Bailey said. "I'm listening to the coaches when they're telling me to do a task. They told me lose weight, I did it. They told me to do better in school, I did. Get my grades up, I did."

Aside from academic and physical growth, Bailey said he has been developing as a person as well.

"I'm maturing as a man," Bailey said. "[Kellogg] knows what's the best for me. He's seen where I've come from and what I could do and what I could become. It's all love, me and DK is love."

Bailey will look to wedge his way into the starting lineup after starting in one game of the 27 he played in last year.

Establishing a Brand

Super Sunday and Midnight Madness are gone.

Kellogg's attempt at bringing more fans to UMass games this year? Mission 1,000.

Mission 1,000 is only a piece of a larger puzzle for Kellogg and his plans for the Maroon and White. The three-year coach looks to establish UMass as the premier basketball team for the state of Massachusetts.

Part of establishing the Minutemen as a brand for the state comes from playing a schedule where all the games are within 90 miles of Amherst.

"I just think that we've got to conquer New England first and be the Massachusetts team," Kellogg said. "Like let's play games where students and people that graduated from UMass can get to. Going to road games and some of those other places, I don't think is conducive to building a program because they're not coming here."

Kellogg played sang a similar tune last season when the Minutemen traveled to play Central Florida, where basketball legend Michael Jordan's son plays his collegiate basketball.

While establishing a state-wide appreciation for UMass is part of Kellogg's goals for the team, he is also looking into developing excitement around campus in likes of the way the football team has in recent weeks.

"I think if we can get some excitement around here and play some games more competitive and compete to a high level, I think the fans [will get excited]," Kellogg said. "You build the excitement one, first, by winning and playing the right way. And as you mature a little bit, that's when you step on the gas and try to play some nationally-ranked teams both home and away."

Herb Scribner can be reached at hscribne@student.umass.edu.

Guard Anthony Gurley looks to become the leader for the Minutemen following the graduation of Ricky Harris. Gurley averaged 13.6 points in all 32 games last season for 16th best in the Atlantic 10.

About KAUST

KAUST is a new university located on the shores of the Red Sea in Saudi Arabia.

The University research facilities include nanofabrication, imaging and characterization, and a fully-equipped class 100 clean room, and several focused research centers.

The community has many things to offer including: housing, healthcare, shopping, dining, parks and sport facilities (including golf course, sailing facilities, gyms with swimming pools, running tracks, etc).

Tennis posts mixed results at ITA Regionals

By Scott Cournoyer
Collegian Staff

Six of the Massachusetts tennis team players posted mixed results in both singles and doubles play at the Intercollegiate Tennis Association Northeast Regional championships over the weekend in Dartmouth, N.H.

"I thought some of our players did well, and for others, it was a wake up call in terms of the talent that exists in DI tennis," UMass coach Judy Dixon said.

Sophomore Juha Comas headlined the UMass crew, going 2-2 over the weekend in both singles and doubles. The Barcelona-native won her first main draw singles match, defeating Marist's Erin McCarthy, 6-4, 6-1, before losing to Boston College's Erina Kikuchi in straight sets, 6-1, 6-2 in the second round.

"[Juha] definitely raised the bar," Dixon said. "She has the game to be able to compete with some of these players out there that have some great individual talent, and she proved that she can hold her own with some of them."

Senior Candynce Boney also competed in singles and doubles, with her lone win on the weekend coming in doubles main draw. Comas and Boney defeated Harvard's Hideko Tachibana and Kristin Norton, 8-6, before losing to BC's Kikuchi and Alex Kelleher in the second round, 8-3.

"We wanted to make an impact at ITA's in doubles play, and I think we were able to post some decent results," Dixon said. "These tournaments are designed for great individual talents, so I felt it was good for us to be able to continue working on doubles play against some of the best players in the area."

Boney also competed in singles qualifying Friday, losing in the first round to Stony Brook's Katherine Hanson in straight sets, 6-1 and 6-4. It was the last time that Boney would have the opportunity to compete for a chance to play in the NCAA tournament, but Dixon knows that Boney is just as excited for what's to come for UMass this season.

"Although she's probably upset that she didn't qualify for NCAA's, she's an incredibly humble player," Dixon said. "She knows that there's a ton of talent out there, and she knows how exciting the rest of this season is going to be, so I think she'll be just fine."

Doubles play continued on for UMass, seeing two more pairs made up of a freshman duo and an experienced combo compete in the main draw event.

Freshman Jessica Podlofsky and Clara Matias were defeated in their first round matchup, losing to Stony Brook's Prerana Appineni and Aylin Mehter, 8-4.

Senior Kaitlyn Carpenter and sophomore Jocelyn Providence were defeated in the first round, losing to Yale's Elizabeth Epstein and Blair Seiderman, 8-2.

For Podlofsky and Matias, two players coming from two different countries and different styles of competitive backgrounds, Dixon believes that the weekend's tournament provided her young, talented players with one universal understanding: collegiate tennis can be extremely difficult in all phases.

"For Jess, even though she's seen some of these faces in local competition before coming to UMass, it's a very different thing to now face them in a collegiate tournament," Dixon said. "For Clara, someone who's never previously played over here and hasn't seen a whole lot of this style of play, it must have been a little overwhelming. For both of them, it was just another learning experience and an opportunity to continue improving their game, so that they can come back here and post even better results."

UMass will conclude its fall season at the Big Green Invitational in Dartmouth Nov. 5-7, and Dixon hopes to see the players who participated in ITAs build upon what they've shown thus far this early campaign.

"ITAs provided a handful of our players with a sense of what's coming, and they need to be ready for it," Dixon said. "Before you know it, the thick of our season will be here, and hopefully this weekend's tournament gave our players a sense of what kind of talent is ahead of them that they will have to compete against."

Scott Cournoyer can be reached at scournoy@student.umass.edu.

SAMANTA JOHNSON/COLLEGIAN

The UMass tennis teams returned from the ITA regional's with mixed results. Despite impressing on the court, Candynce Boney failed to qualify for the NCAA tournament in May, much to the dismay of UMass coach Judy Dixon.

UMass heads to Stony Brook in search for first road victory

MAXWELL SPARR/COLLEGIAN

After pulling off a major victory against Army, UMass travel to Stony Brook with a chance to win its first road meet. This will be the Maroon and White's second road meet in its last three competitions.

By Nick Bellofatto
Collegian Staff

The Massachusetts swimming and diving teams are heading to Stony Brook to face the Seawolves on Oct. 30. Both squads are coming off home victories against Army.

However, both teams have yet to win on the road, and SBU might prove to be an important test because it will be UMass' second road meet in just three weeks.

The meet against the Black Knights was at home in the Joseph Rogers Pool, and UMass swept the opposing team. However, in the first meet of the season, the Minutemen were at Boston University, and were swept by both Terrier squads.

If both teams hope to contend for an Atlantic 10 crown, they will have to win the meets on the road, and that starts this weekend against SBU.

The Seawolves are also coming off a big victory, but unlike UMass, their victory came on the road.

On Oct. 23, the Seawolves faced off against the Saint Francis. Both SBU teams recorded their first victories of the early season. The men's team won, 119–85, while the women's team won, 154–50.

The meet at SBU's Pool on Saturday opens the Seawolves home schedule, and poses obstacle to the UMass' squads. If the Maroon and White hope to prove the preseason polls right, it must win on the road this coming week to avoid opening the season with two losses on the road.

If it is any consolation, the team that beat Stony Brook was the Black Knights, who UMass faced, and swept, last weekend.

In order to secure UMass' .500 mark, the squads will have to rely on veteran leadership, as well as young talent. In the sweep against Army, it was this young talent that proved to be an important factor for both the Minutemen and the Minutewomen.

For the Minutemen, the young talent comes from Derek Hursch. The freshman earned the A-10 Performer of the Week after the match at BU.

Hursch swam in six individual meets this season and has come out victorious in all six of them, winning three against the Terriers, and three at home in the Joseph Rogers Pool against the Black Knights.

The Minutewomen expect a push from freshman Anna Cavanaugh who picked up her first collegiate victory against the Black Knights. Cavanaugh showed that the first win was all she needed to propel her early season, posting an impressive 3-0 record on the day.

Even with the young talent stepping up to help secure the victories, it is still up the veteran leadership of Tri-Captains Dan Backler, Adam Duffield and Brian Schmidt to anchor the men's squad down, and secure their first road victory.

Nick Bellofatto can be reached at nbellofa@student.umass.edu.

Atlantic 10 Championships begin for Maroon & White

By Eric Mansfield
Collegian Staff

The Massachusetts cross country teams will travel to Schenely Park in Pittsburgh, Pa., Saturday for the Atlantic 10 Championship meet.

Both teams had this past weekend off, but two weeks ago, the men finished eighth at the Chili Pepper Festival in Arkansas and the women took fourth in the Rothenberg Race in Rhode Island.

UMass coach Ken O'Brien said that it's always nice to have that "good taste in your mouth" from the previous meet, as Minutemen competed with some nationally ranked competition.

"[We're] starting to show steady progress. We're in a pretty good place," O'Brien said. "This year's [conference championship] is as tight a championship forecast as I can remember in recent years."

While UMass is suffering from a few nagging injuries, O'Brien said common sense would say that a lot of other teams could be in the same boat at this point in the season.

O'Brien said he expects Richmond and Dayton to be tough competitors. Both of those teams have a good group of top three runners.

In terms of depth, O'Brien feels that the Minutemen may have the edge along with La Salle.

O'Brien said UMass will rely on senior Andrew Mulvaney to produce for the Minutemen. According to O'Brien, seniors Scott VanderMolen and Robert Deegan have been showing well recently and senior Sonny Gamble and junior Patrick McAllister have also been rounding into shape.

O'Brien said the course at Schenely Park is rather tough and that a team like Duquesne which runs out of Pittsburgh, may hold a home course advantage.

The first half of the race will start out almost directly downhill, take a 180-degree turn and go back uphill.

Still, O'Brien doesn't think that the race being in Pittsburgh will play that big of a factor.

"I feel comfortable we can moderate the home course advantage," O'Brien said.

Women's coach Julie LaFreniere also thinks that the A-10 will be tight this year. At the top, LaFreniere expects in no particular order to see Richmond, Dayton and La Salle. The rest of the schools will be close together, even as close as within one or two points of each other.

"If our top seven really pull it together they can be in the top five," LaFreniere said.

LaFreniere said that the Minutewomen will go into the championship meet fairly healthy and that they will use the rest of the week to freshen up.

In the most recent workouts there have been mixed results, some have done well some have not. Some key individuals dropped the ball at the end of last week, LaFreniere said.

"[I] thought they'd be in a better place," LaFreniere said.

If the team shows up with the right attitude and gives everything they have, good results will come, LaFreniere said.

LaFreniere said that the course at Schenely Park is pretty fast, and that it will be important for the runners to have the confidence and courage to compete.

LaFreniere also said that UMass has never run in an A-10 meet as early as Saturday's 9 a.m. start. The Minutewomen will have to be up early to start preparing for the meet.

Eric Mansfield can be reached at eamansfi@student.umass.edu.

DECISION 2010

White House asst. talks about economy in conference call

By Sam Butterfield
Collegian Staff

If you are like 53 percent of American college students and recent college graduates, you will leave the University of Massachusetts with some degree of debt. The 2009 Dodd-Frank Wall Street Reform and Consumer Protection Act, however, aims to make the process of acquiring and using financial products like credit cards, home loans and student loans, smoother and more accessible.

On Tuesday evening, Elizabeth Warren, a former professor of contract law at Harvard University and an assistant to the President and special advisor to the Secretary of the Treasury on the Consumer Financial Protection Bureau (CFPB), a regulatory agency created by last year's act, spoke to a group of student journalists about how the new Bureau will help make students' lives simpler.

Warren opened by explaining to the reporters that President Barack Obama had asked her last month to start the new CFPB "right now," and that she has been "filling out the new consumer agency implementation team and trying to start a culture that makes sure the Bureau remains a voice for years to come."

Warren explained that the Bureau's mission is to, in essence, make consumers' lives easier by forcing loan and credit issuers to be transparent in their statements, charges and fine print.

"People ought to be able to read their credit card statements and know the deal," she said. "The new law creates a chance to put a tough cop on the beat and to provide real accountability and oversight over the consumer credit market."

Warren, who was last spring rumored to be among the candidates President Obama was considering as a nominee to replace retiring Supreme Court Justice John Paul Stevens, gave several examples of how she envisions the agency helping families and young people.

"For young people who need to take out a private loan to cover the cost of higher education, the new consumer agency will be able to supervise private student lenders, fight unfair lending practices and require student lenders to follow the rules of the road," she said.

"For people with credit cards, the consumer agency will prevent evasion of the Credit Act of 2009, which bans arbitrary rate hikes and cleans up credit card practices for young people at universities," she continued.

She further mentioned that the agency would oversee car rental agencies for young people who rent while in school, and added that the Bureau will fight to ensure that banks provide clear language and up-front disclosure about when consumers will be charged overdraft fees.

Last, Warren explained that for those using "alternative financial services" like check cashing services and online creditors, "the financial reform bill establishes for the first time robust supervision and oversight of larger alternative financial services."

After outlining her four examples, Warren laid out what she sees as the very essence of the Bureau's job.

"Anyone who uses a financial product ought to be able to tell the cost and the risks up front, and should be able to compare one product to another," she said. "The idea is that we will empower young people to make smart financial choices by promoting financial education and financial literacy, and by safeguarding securities and investments, but most of all by putting into your hands the tools you need to make good decisions."

Warren then took calls from several students, most of them from Midwestern universities.

The first reporter, from the Michigan State University student newspaper, asked Warren, a member of the FDIC's Commission on Economic Inclusion, how the agency will work to make financial literacy easier, more accessible and more engaging for young people.

"I see there being two prob-

The White House has been holding a series of conference calls recently to answer questions student journalists have on their minds.

District 5 race heats up for Republicans

MARK WILSON/GETTY IMAGES

Republican frontrunner Jon Golnik is looking to take the seat in District 5 that Democrats have held for nearly 40 years.

By Lindsey Davis
Collegian Staff

Nearing election day 2010, the race has tightened to fill Massachusetts' fifth congressional district's seat, as Republican frontrunner Jon Golnik attempts to beat out incumbent Congresswoman Nikki Tsongas in a district which has remained in the hands of the Democrats for almost 40 years.

Both campaigns are steadying their focus on this year's hot topics, such as health care, social security, unemployment and immigration, on the minds of the working class immigrant population which dominates some of the area.

Comprised of old mill cities in the Merrimack Valley including Lowell, Lawrence and Haverhill, the GOP is making a final push to gain hold of the traditionally Democratic region. Independents Dale Brown and Bob Clark also remain in the race.

Despite the anti-incumbent attitude sweeping the nation, Congresswoman Nikki Tsongas, wife of the late Congressman Paul Tsongas, has taken the lead, according to recent polls. The Smith College graduate ran unopposed for her first term during a special election in Oct 2007.

See FIVE on page 2

Politician vs. comedian in Nov.

By Ashley Berger
Collegian Correspondent

The race for Massachusetts' District 9 congressional seat this year features two candidates: one an experienced incumbent, the other a first-time runner who happens to be a comedian on the side.

The incumbent is Stephen Lynch, who has represented the ninth district since 2001. It was in this year that incumbent Joe Moakley passed away, leaving a vacant seat. In the special election, Lynch garnered about 40 percent of the vote, and in the elections since, he has run unopposed or won by vast majorities.

First-time candidate for public officer, Vernon Harrison, is the chief technologist for the firm Unitiv Inc. He has owned electronic repair businesses for a majority of his life and has virtually no political experience.

The ninth congressional district in Massachusetts consists of the southeastern part of the state. This includes towns such as Easton, Braintree, Milton, Bridgewater, Brockton, and parts of South Boston. Though the district extends a long way, it has the lowest population of the 10 congressional districts in the Commonwealth, according to the 2000 census.

COURTESY COMMONWEALTH SOLAR, CORP.

Stephen Lynch is running against Vernon Harrison, who has little political experience.

Since 2001, the district as well as the state of Massachusetts, has been in Democratic hands. During Lynch's tenure, he has established and been heavily involved with legislation regarding labor and working rights. Lynch's father was an ironworker and he became an ironworker after graduating from South Boston High School. Before beginning his political career, Lynch served as the president of the Iron Worker's Union.

Lynch graduated from Wentworth Institute of Technology with a bachelor's degree in construction management, a degree from Boston College Law School, and a master's degree in public administration from Harvard University's John F. Kennedy School of Government. After passing the bar exam in both Massachusetts and New Hampshire, Lynch practiced as a labor and employment attorney.

Though Lynch was unable to be reached for an interview, his website provides information regarding issues that face the ninth district. One of the major issues for the congressman is the economy. Lynch supported the American Recovery and Reinvestment Act of 2009. This piece of legislation is intended to save 3-4 million jobs, give 95 percent of Americans an immediate tax cut, and inject funds into the American economy.

According to his campaign website, Lynch also strongly values legislation which he sees as benefitting working families. He is the co-founder and co-chair of the Congressional Labor and Working Families Caucus. The committee focuses on the fact that all employees and families have a right to a safe workplace and a decent wage. In establishing the committee, Lynch noted that he believes the government has an obligation to ensure that all Americans are able to enjoy a decent standard of living.

Several years ago, Lynch pushed for "The Fair Minimum Wage Act of 2007," which would raise minimum wage over two years (the bill passed). In a speech on Jan. 10, 2007 to the U.S. Senate, Lynch said, "In today's economic climate, minimum wage workers working 40 hours a week, 52 weeks, earn $10,712. That's more than $5,000 below the poverty line for a family of three. Quite simply, these families deserve a raise."

Though Lynch has been an active supporter of legislation that helps and benefits working class families, his opponent feels strongly that those in power now are doing nothing to lower taxes and failing to create better economic and living conditions for taxpayers.

Vernon Harrison, a southeastern Mass. native and Republican from Brockton, comes from a working family as well, and is now raising five children. He received 63 percent of the vote to run against Lynch in the primary election. A member of the Tea Party movement, Harrison embraces the fact that he has never held a political office before. Harrison also feels strongly about the economy and job creation.

In an interview via e-mail, Harrison answered questions regarding his top priorities and problems facing District Nine.

"Job creation and the economy are absolute top priorities," he said. "These are tightly intertwined with the size of government, government spending and the national debt."

Regarding central issues for the district, Harrison cited "lack of jobs, overly burdensome taxation and the lack of political leaders who are willing to listen to the people of the ninth district, regardless of party affiliation," as some of the most pressing matters.

Harrison continued talking about how, if elected, he plans to address the issues.

"I would introduce legislation that bans corporate welfare, stop stimulus spending, renegotiate debt with foreign nations and loosen bureaucracy around energy production to once and for all stop our dependency on foreign energy.

"Creating jobs and strengthening the economy by having the courage to make the government cuts that will be necessary to free the private sector and stop wasteful government spending," Harrison said.

Harrison also went on to describe what he sees as a difference between himself and the current congressmen.

"I am not tied to special interests, which means I can listen to the residents of the ninth district instead of lobbyists. Unlike Lynch, I am not a career politician beholden to unions and special interests" he said.

"I would not vote for more federal government stimulus, and I do not favor government takeover of healthcare. I am for private sector growth, not government-funded programs that benefits unions only," he added.

Harrison and Lynch share a few of the same views on certain matters. Both are from working families in the southeastern region of the state, and in that respect, both support programs that boost the economy and wages for the middle class. Both candidates have also expressed interest and support for a single-payer healthcare system.

Recently, Harrison was endorsed by former Governor Mitt Romney and current Senator Scott Brown. Harrison and Lynch also share the ballot with Independent candidate from Westwood Phil Dunkelbarger.

Ashley Berger can be reached at aberger@student.umass.edu

Governor Patrick to visit UMass today

By Sam Butterfield
Collegian Staff

Gov. Deval Patrick will speak today at 11 a.m. in the Cape Cod Lounge in a "get out the vote" style event to promote his reelection campaign. The appearance, hosted by the UMass Democrats, will highlight the governor's record on education and jobs, and will look to energize young voters to play a more active role in the campaign, with just five days before the tightly-contested election.

Reached by phone yesterday, Mike Fox, vice president of the UMass Democrats, said the organization had hoped to bring the governor to Amherst all year, but that political and scheduling logistics had finally come together, and the Patrick campaign said they were happy to bring the governor to the Pioneer Valley this week.

"We got contacted last week with the idea that they might want to bring the governor here for a 'get out the vote' type rally, and then we received word earlier this week from the campaign that the governor would be more than happy to come," he said.

Fox said he hopes the event will display that students are still enthused about the election, as some political analysts have theorized that the youth vote will be significantly quieter this year than in 2008, when a wave of youth enthusiasm propelled Barack Obama to the presidency.

"I'm of the personal belief that the Obama election was not an exception," said Fox. "A lot of people have said that the youth don't care about the midterms, but I know from my experience that young, politically-involved people definitely still exist, we still care, and I see that on both sides of the spectrum," he said.

"We are willing to be active and show that we have a voice and we want to help make our voice heard."

Also speaking will be District 1 Congressman John Olver, who is seeking reelection against Republican opponent Bill Gunn and Independent Michael Engel.

The UMass Democrats advise all interested in attending the Governor's appearance to arrive around 10:30, as they anticipate the Cape Cod Lounge filling up.

Sam Butterfield can be reached sbutterfield@dailycollegian.com.

Tsongas fighting for security of seat

FIVE from page 1

when Marty Meehan resigned to take over as chancellor of the University of Massachusetts-Lowell. As the daughter of a military officer,

Tsongas' political career has been defined by military-related legislation, including bills to fund light-weight body armor for troops and improved medical care for veterans.

She has toured Afghanistan and Iraq to work with women on the prevention of sexual assaults in the military. Recently, she defended the repeal of the "Don't Ask, Don't Tell" policy. In lieu of some criticism she has received on what critics call her limited transparency, Tsongas developed programs through the internet and physically in the community to maintain communication with residents of the district including "Congress on Your Corner," a series of events hosted by Tsongas in different towns allowing community members to speak to the Congresswoman in person.

Jon Golnik, a Republican small business owner from Westford, Mass., has adopted the approach taken by Republican Senator Scott Brown during his election early this year to fill the seat held by the late Sen. Ted Kennedy. Golnik utilizes his small town charm and pick-up truck to cast himself as a regular guy, with his website proclaiming that "Jon is not a politician."

After graduating from Dartmouth College, Golnik spent time as an AIG agent on Wall Street and collected signatures for Mitt Romney's race for governor. His campaign, which has been endorsed by the Eagle Tribune, the Lowell Sun and the Irish American Republicans, has focused on Tsongas' shortcomings and what his campaign has said is her lockstep agenda with the Democratic-controlled Congress. In his advertisements and rhetoric, he accuses the congresswoman of voting with the leadership in Washington, including Nancy Pelosi, "98 percent of the time." Golnik has managed to develop strong campaign messages.

Recognizing that many districts in Massachusetts remain blue despite Brown's January win, the Republican Party has shifted its focus on swaying districts across the country, leaving Golnik unable to obtain significant fund raising dollars. So far, Golnik has acquired an estimated $173,000 in private donations, while Tsongas has raked in nearly $1.3 million according to the campaign finance website OpenSecrets.org.

The hot topics at the forefront of the campaign in the district coincide with leading national political trends, jobs, healthcare, immigration and global warming.

As a district with a number of "gateway cities" such as Lowell and Lawrence with sizable immigrant populations, immigration plays a major role in the politics of District 5. Golnik has taken a conventional Republican position, focusing his agenda on securing the borders and strictly enforcing visa expirations. Tsongas applauds the work of immigrants in the area, but holds strong on building programs which encourage immigrants to work towards citizenship and paying taxes, and holding employers accountable for enforcing legal employment.

Throughout his campaign, Golnik has criticized Tsongas' support of President Barack Obama's health care bill and the Democrats' approach to the $787 billion stimulus package. He insists he will work to repeal the current health care legislation and says he would hope to draft a bill allowing individuals to purchase interstate insurance, as well as advocating for the abolition of state health care mandates. On the economy, Golnik has proposed cutting the 35 percent corporate tax rate to 30 and giving small businesses who hire new employees a $10,000 tax credit.

"We don't have a revenue issue in this country. We have a spending issue," said Golnik in a recent debate sponsored by the Lowell Sun. "Ms. Tsongas, the people of this district are not the government's ATM machines."

Tsongas fought back during the same debate.

"[It] is now in place and people don't want it to go away. Give it a chance to work. I think my opponent simply wants to put Wall Street back on Easy Street."

In an interview with GateHouse News Service, Tsongas expressed her thoughts on bipartisanship during a time of volatile inter-party relationships.

"With every piece of legislation I've filed, I've really sought to go across the aisle and generate support," Tsongas said. "We have clear differences; there's no denying, we have fundamental differences around so much on the large scale."

One of her latest bipartisan projects is a bill pending review, which she cosponsored with Republican Mike Turner of Ohio, outlining a program to protect victims of sexual assault in the military. She is also working with Republicans to adjust the requirements for struggling small business owners to borrow money from their 401K retirement plan in order to sustain business practices.

The two other candidates, Dale Brown and Bob Clark, both independents, have struggled to gain substantial recognition within the race.

Brown, a retired engineer and Vietnam veteran from Chelmsford, Mass. leads his campaign with issues revolving around national security and the Iraq War. He believes the U.S. should remove itself from Iraq and focus on national security along the Mexican border, insisting that immigration is the real threat.

Bob Clark addresses currency manipulation and keeping jobs within the nation's borders and in the hand of the American people.

Conference call with students notes financial advice and ideas

WARREN from page 1

lems simultaneously here," said Warren. "One, Americans need more financial education; more information about how to survive in a complex financial world. At the same time, financial products need to be more readable," she continued. "I teach contract law at Harvard, and I can't read a credit card contract," she joked. "[Credit card statements] are often designed not to be read," she said more seriously, "so I think of this as a 'you'll push from your end and I'll push from mine.'"

A University of Wisconsin student reporter then asked about what kind of research the new agency would conduct.

"The answer is, I don't know yet," Warren said. "We've got a big budget, we've got a big job to do here," she continued, adding that "we are required to establish a search division.

"My thinking is that we're going to be working both inside [the agency] and outside at the same time; I'm hoping we become a very open agency with lots of access for everyone."

A reporter from Northwestern's paper then piqued Warren on whether the CFPB would have any ability to directly affect tuition rates.

"We have our hands full with the credit issue here," lamented Warren. "When the costs of student lending are clearer," she added, "then the pressure on universities to control increases in tuition will be more intense.

"I'll have to be straight with you here," she finished, "we do the debt part of it here, we don't get to talk about the tuition itself."

A University of Missouri student then asked Warren if the agency would have the ability to help students in debt retroactively.

"What this new agency will be able to do is to review the procedures used by private student loan issuers in the calculation and collection to debt, and work to rebalance the power between the borrower and the lender," responded Warren.

A final caller from the University of Michigan queried Warren about what degree of responsibility she places on those who take out sometimes slippery loans, stating that professors at her university had said they believe regulation takes responsibility out of the hands of consumers.

"I believe the professors you've spoken to are wrong," Warren said lightly. "I believe in personal responsibility, but in order to be responsible, you've got to be able to read what's in the bill," she said. "Too much of the consumer credit industry is structured around pretending to sell products at one price and then using tricks and traps buried in the fine print to charge far more.

"This new agency is about making sure that costs and risks are visible up front," she continued, "and then it's up to the student to make good decisions."

The CFPB was established as Chapter X of the Dodd-Frank Act, initially proposed in 2009 and signed into law this July. The call was part of a series of call-in sessions the Obama Administration has hosted with student reporters to discuss their agenda regarding student issues.

EDITORIAL@DAILYCOLLEGIAN.COM

'Yes' on Question 3

Shane Cronin

Citizens of Amherst, the Ministry of Propaganda is up to its old tricks. They're operating under the guise of The Massachusetts Coalition for Our Communities and similar groups. They're hoping to scare you into voting "no" on ballot Question 3 in the upcoming election. "Save our teachers. Save our police officers and fire fighters. Think of your children's futures. We can't afford any more cuts during these tough economic times." Yeah, yeah yeah.

We're familiar with the routine.

These phonies conveniently neglect to mention on their site that the sales tax in this state was originally passed as a temporary emergency measure to close a budget gap, not a perpetual crutch for career politicians and outrageous pension liabilities. It should have been repealed when the Jackson 5 were still putting out records. Instead, it continues on a never ending climb.

A map of the state is displayed on their home page http://votenoquestion3.com, with an arrow that hovers over various cities and towns. You can select your community in the scroll bar to find out how much money it is set to "lose" if the Massachusetts state sales tax is rolled back from the current 6.25 percent rate to three percent. What the group doesn't tell you is how much money each working individual and family will save if the tax is cut.

The ballot initiative's lead proponent, Carla Howell, claims the average worker will save nearly $700 annually if the rollback passes. Families will save almost $1000. The Beacon Hill Institute found the tax cut would result in almost 30,000 new jobs as well as hundreds of millions of dollars in investments and wage raises. Can you say "economic stimulus?"

I know I don't need to remind you of the enormous efforts and difficult choices you've made over the last few years, Amherst. You've made concessions for your community and the Commonwealth of Massachusetts. You have given plenty of dough. Now its time for you to take (or should I say keep) some of that money for yourselves.

Earlier this year, you passed a $1.68 million Proposition 2 1/2 override, which increased your property taxes. I had the opportunity to meet some of you outside the Bangs Community Center last spring and listen to your concerns. Many of you noted your friends and neighbors who worked at the local schools and library. You wanted their jobs to remain intact, so you voted for the override. For some of you this was not a financially feasible decision, but you voted for it anyway. For your community.

In addition, you've made $7 million worth of other budget cuts over the last few years including the closing of Mark's Meadow Elementary School. Furthermore, of the old five percent rate, 20 percent of your sales tax dollars have financed the Massachusetts Bay Transportation Authority for decades. Amherst and the rest of the western Mass. receive virtually no benefit from this investment.

The agency is insolvent, which means the legislature is pumping your money into an industry that has been failing for years.

What does Governor Deval Patrick say in response to your efforts? When asked what the effects of rolling the sales tax back, he told Boston Herald reporters a few weeks ago, "I think it means that property taxes go up, it means tolls on the Turnpike and fares and the commuter rail and T go up." If that isn't a low blow to Amherst, I don't know what is.

The opposition doesn't want you to think about any of that stuff, though. They want you to forget about your sacrifices. Forget about John Kerry and his yacht docked in Rhode Island to evade taxes. Forget about Deval Patrick's attempt last year to install State Senator Marian Walsh in a $175,000 position that was left vacant for 12 years. Forget about the big stink the teachers unions put up about a pay freeze while you were furloughed and laid off.

The Massachusetts Teachers Association, by the way, has funneled over half a million bucks into the campaign fighting the sales tax rollback. That's a lot of money for a group that claims its members can't miss one or two pay raises in a recession, like almost everyone in the private sector has done at a minimum.

According to rollbacktaxes.com, no local aid need be cut if the sales tax is rolled back. Massachusetts could trim the fat from the state budget, which there is plenty of.

The Massachusetts Coalition for Our Communities is audacious in telling Mass residents to keep the sales tax at its current rate. Vote "Yes" on Question 3. No matter what the Propaganda Ministry says, Amherst will still be here next year.

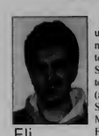
Sanity manifesto



Eli Gottlieb

Since I will unfortunately not be able to attend Jon Stewart's Rally to Restore Sanity (also known as Stephen Colbert's March to Keep Fear Alive) this Saturday, I will instead print here the introduction to the manifesto that I was going to press on people at the rally. If anyone likes it, I advise them to include themselves in the "we" of this column and perhaps leave a thoughtful comment on the website. Above all, remember: I may disagree with you, but I'm pretty sure you're not Hitler – except when you are. Perhaps, if anyone likes, a bunch of University of Massachusetts students could gather on the lawn of the Campus Pond next to the Fine Arts Center Saturday around 4:00 p.m. to talk, sing, yell and wave around the picket signs we wanted to take to the Rally, but couldn't.

Obviously, this work will present an apparently eclectic set of ideas, driven by a relatively new philosophy.

At the very least, the average reader will most likely not have seen many of the enclosed ideas in the discourse of mainstream American politics before. We are not mainstream people, or are we? The observant reader will, after all, find that we are not utopian or totalitarian radicals of the kind typically implied by calling someone "not mainstream."

Here we reach the core issue that drove writing this entire piece: American politics has become like the weather – everyone complains, but nobody does anything about it, at least not anything to get at the root of our society's present problems. We no longer necessarily have a definitive mainstream encompassing most actual Americans, merely a set of old, established and usually quite wealthy institutions calling themselves "mainstream" and defining the American "Overton Window" according to their own opinions. More Americans now call themselves "independents" than any time before, yet depending on the issue and the poll most Americans seem to adhere either to some form of radical individualism, some form of theocratic Christianity, or to an ideology that other countries would call social democracy.

Yet nobody represents these people, not honestly at least. The Republicans claim to represent the radical individualists, but in practice act for the neoconservative militarists, Evangelical Christian theocrats, and their friends in oil companies, agribusiness and defense contractors. The Democrats claim to represent the social democrats and social-issue libertarians, but in practice betray the social democrats to nearly every conservative counterproposal, or simply inaction, that they can lay their hands on and instead act for their friends in big academia and the media industry. Both parties bow before the purported wisdom of the richest banks and worship the ground upon which they serve foreclosure papers.

Yet nobody represents these people, not honestly at least.

The far left and far right have risen boldly to this occasion of history, each seeing finally the inevitable crisis that will allow them to take power, purify the Earth of all evil and build their fantasies.

The associated scourges of totalitarian hatred have returned with them. Fascism has come to America, on the one arm draped in the flag and carrying a cross, and on the other pumping its fist to liberate everyone oppressed by bourgeois economics, Jewish bankers and imperialist aggression by doing away with all traces of capitalism, Jews, banks and militaries.

These groups and creeds thrive on the fear, uncertainty and doubt generated in these times of political death matches, public ignorance and shriveling economic opportunities for a more-shriveling few.

In this context, some have begun to rally for sanity and call themselves "the radical center," claiming to deplore partisanship. Yet more often than not, the so-called radical center merely puts a polite smile and a nice suit on compromising between the Democratic betrayals and the Republican duplicity, fallaciously reasoning that whatever lies between of the two "extremes" must somehow constitute a rational, reasonable "Golden Mean." We admire the sentiment, but simply cannot assent to the reasoning.

So then, who are we? We are people who tend to call themselves liberals and progressives but who often have to hold our noses when voting Democratic. We are some people so unable to stand the Democrats' spinelessness in defending American liberal democracy against totalitarian assault from without and nanny-state social regulations from within that they close their eyes and vote for the purportedly-libertarian Republicans.

In our hearts and heads, most of us are probably social democrats, but may not particularly like the European connotations of the term. Most of us are definitely on what we think of as the Left, even if we so often find vocal leftists like the Chomsky-ites condemning us for our patriotism, our bourgeois lack of proper radical spirit, our incomes or most often our failure to join in their pet cause.

Some of us may be on the individualistic Right, at least by the standards of other countries, though we do think that the American Right has by now drifted so far right into hatred of government that it must soon fall off the scale into full-on anarchism.

We are people who want to live in a society that maintains its own health, that gives its young every opportunity they merit, that takes care of its citizens no matter their race or class or income or status, that lets its culture and lifestyles evolve naturally rather than dictating them from on high. We are the people who want to build a society that grows upward each year, and we want to plant the seed of that growth, to spiral and spread out until we enable everyone in our country and in every other country to thrive as much as we know they can.

Human thriving is the cause for which we stand, and in it we stand together. We know well what we can accomplish through all our work. The reader is invited, if he or she favors our notions, to join us. To the rest, well, we answered that above. So yes, let us be for our freedom, but as Paul Berman would add, "Let us be for the freedom of others."

LETTERS *to the* EDITOR

Editorial@DailyCollegian.com

Letters to the editor should be no longer than 550 words and can be sent to editorial@dailycollegian.com or submitted online at dailycollegian.com. We regret that, due to space constraints, not all letters will be printed, but can be found online.

ANTI-STEIN CONSPIRACY

Dear Editor,

There is a clear reason why the corporate media consortium tried to keep Dr. Jill Stein out of the gubernatorial debates. It is the reason why these same media commentators said after the WGBH debate that she was a "distraction" to the men, "brought nothing to the debate," that "she should not be included in other debates" and the classic, "I wanted to put an apron on her."

It is the reason some polls don't include her.

The corporate power structure is afraid of who and what she represents. Jill blows the whistle on corporate control of Beacon Hill and the debates have shown there is little difference between Baker, Patrick, and Cahill. So they call her a spoiler, but not so Cahill, because he is part of the same Baker/Patrick cloth.

But it is true. Jill spoils business as usual. She will spoil the sweetheart deals that give away over a billion dollars to big utilities, weapons manufacturers, film and insurance companies, Coca Cola and other corporations. She will spoil environmental destruction of wetlands and forest clear-cutting for biomass. She will spoil waste, particularly in the health care industry.

Every Election Day, corporate powers play the fear card and voters self-censor by choosing the lesser of evils.

And nothing changes.

Can lobby money buy your vote? Don't let them scare you when you dare to vote what's good for you.

When you lose your choice, you lose your voice and that's what they want you to do. We really must be the change we want to see and we will only get that by voting for what we want and believe in. To do otherwise is to throw away your vote in a meaningless exercise and be silenced.

Greenfield

MORE SPORTS, MORE MONEY

Dear Editor,

An open letter to President Jack Wilson:

I recently read the following article on Boston.com – "UConn scores by spending more – The Boston Globe."

As a University of Massachusetts alumnus, I am extremely disappointed to hear that my alma mater is hurting so badly and slipping down the charts with regards to its academic and research performance. This school, which has graduated me, my wife, my sister, my brother-in-law and my brother, was once one of the best institutions of higher learning in Massachusetts. Now, from all accounts, it's littered with run-down buildings, sub-par research facilities and students who are not necessarily the cream of the crop.

I implore you to follow the University of Connecticut's lead and empower the athletic department to start raising money for the rest of the university. Make your flagship university just that – the most sought after university in Massachusetts. Build your Ohio State University, your University of North Carolina, your Michigan.

Start with the men's basketball team. UMass already has the infrastructure in place. We currently have a reasonable size arena to play in. The roughly 9,500 seat Mullins Center is similar in size to the 10,000 person capacity (including standing room) that perennial powerhouse Duke has in its Cameron Indoor Stadium. Let's start bringing in top talent, playing top-level teams and building a winning tradition. You'll fill the Mullins Center every game. You'll get the student body very involved. You'll build the magic that was present in the early to mid 90s during the Camby/Calipari era. Work the basketball team, get them profitable and make us all proud. Then turn your attention to the football team.

As a UMass alumnus, I was extremely proud of my team hanging with a big-time school like Michigan this year. And, to be able to watch my team on TV was even better.

Now, imagine if you could have the UMass student body filling the football stadium, going crazy over our team. Imagine the alumni that would travel to western Massachusetts to see their team take on the powerhouses of college football. Imagine the money that the gate, concessions, parking, etc., could generate if we filled a big-time stadium. Let's make this happen. A big-time football team and basketball team could mean millions of dollars to the university – money that could be used to bring the academics to a level that would compete with any university in the country.

Yes, you'll need to spend money on athletics and not academics at first. And, yes, you are first and foremost an academic institution. But, please, use the tools at your disposal. I would love nothing more than to go out and buy a $100-plus football jersey for the great, Heisman trophy-worthy quarterback or buy a replica jersey for our All-World point guard. But, right now , we don't have that. And, right now, UMass isn't bringing in the money that sales like these would produce. You've got the tools in the tool belt: break them out and start building!

I have twin daughters and my sister and brother-in-law have a son. Many of our classmates have children as well. All are products of UMass. My family and friends would love nothing more than to have our children go back to the University that meant so much to us. But you, Mr. Wilson, need to make the right moves, so that our children can enjoy the same great education that all of us received.

Sincerely,

Dan DeLairro, '01

THOUGHTS ON BALLOT

Dear Editor,

In Massachusetts, unlike many states, we have a wonderful tradition of citizens voting directly on some laws. There are a number on the ballot this year, and I say vote yes on all of them.

Questions 1 and 3 are to reduce taxes. That's a no-brainer. The folks on Beacon Hill who brought us the Big Dig – and a thousand and one little digs – require some restraint put on their ability to be excessive – even if it is only symbolic (i.e. the legislature will probably overturn them the next day).

Question 2 is difficult. A no vote results in more government subsidies, and a yes vote leads to more powerful zoning boards. Kind of wish you could vote for neither.

But while local zoning boards can be a pain, local control is still better than centralization in the bureaucracy of Boston. Vote yes.

Speaking of local: there are non-binding advisory referenda in 73 towns around the state, titled either Question 4, 5, 6, or 7. In Amherst, it is Question 4. Put forward by various groups, they cover a variety of suggestions for easing marijuana laws, either for medicinal uses only, or, as in Amherst, across the board. Anything that leads in the direction of making Prohibition history is positive, and deserves a yes vote.

Sincerely,

Terry Franklin
Amherst

"You know Halloween is fast approaching. The day when parents encourage little boys to dress like little girls, and little girls to dress like whores." – Sue Sylvester, Glee

ARTS@DAILYCOLLEGIAN.COM

Scarily bad costumes

By Tappan Parker
Collegian Staff

There are two ways of scaring people on Halloween. You can wear a terrifying, gut-wrenchingly scary costume that festers on the edge of insanity. Or you can wear one of these costumes.

Vuvuzela Guy/Gal

If you watched soccer over the summer you heard this instrument. The satanic droning of thousands upon thousands of vuvuzelas blasting throughout the stadium made millions want to rip off their ears. What represents terror better than the thought of having to listen to one of those again?

Set up is simple. Get a vuvuzela and play it at every possible moment when you go out on Halloween. It is guaranteed to have people glaring at you while thinking, "Man that costume is terrifying!" Or something like that.

The Lady Gaga meat dress

With all the Lady Gagas that you will see this Halloween, you need to set yourself apart from all the others. What screams fashion diva more than Lady Gaga's meat dress? You'll be the talk of the night and if you get hungry, you've got something ready to cook on hand. Just go to Franklin, get a few flank steaks and you are good to go.

Borat in a man-thong

For individuals who are of a more unusual body type – out of shape, pale and skinny as a rail, or those who have a serious body hair problem – consider emphasizing your attributes. Nothing is more disturbing or comical asthan dressing as Borat in a man-thong. Another bonus: The costume is incredibly cheap. Just grow a moustache and buy an awkward piece of bathing suit. Sure it may be a cold night, but you'll be able to walk with confidence knowing you are the scariest thing on the street.

A hipster

Okay, so maybe being a hipster for Halloween isn't all that scary. But how ironic would it be to dress up as something not scary for Halloween? Just get your bike, a pair of glasses and dress like you just don't care. People will admire the fact that you don't go with the rest of the crowd on Halloween. Not that you care about what anyone else thinks.

Ke$ha

Parents coming up for the weekend? Scare your parents by dressing like Ke$ha. Your parents will think you turned into a trashy college kid when they see you brushing your teeth with a bottle of Jack Daniels. But the joke is on them you are in costume. Plus, the boys will all be lining up because they hear you got swagger.

Cereal Killer

People love funny costumes, but nothing is scarier than a bad pun. And a cereal killer is a really bad pun. You may have to put a little work into this one, but it will be worth it to say you had the scariest pun-based costume on Halloween. Be on the lookout for enormous boxes you can steal from the dining commons dumpsters.

Cop

This one is guaranteed to frighten everyone you meet on Halloween. The beauty of being a cop is that it gets scarier as more people do it. You may even be so scary that people won't want to let you into their parties. At the very least, it could turn out to be the ironic hit of the night if you are dragged away in handcuffs by the real police. Bring a camera.

Edward Cullen

So you want to be a vampire, but you don't want to put a lot of work into your costume. Why not go as Edward Cullen? Nothing scares a guy more than the thought of having to watch Twilight, but the girls will be all over you. Just get a ton of glitter, and make sure to make your hair looks like you just woke up. Dignity is optional.

Tappan Parker can be reached at tjparker@student.umass.edu

Still need a costume?

Local thrift stores are stocked with items ideal for a costume light on the wallet, high in style

By Ian Winship
Collegian Correspondent

Halloween is right around the corner and you still don't have a costume. You've checked your pockets and you aren't exactly stacking bills. You have to have a costume, so you hit the road with what you've got, and get busy.

Some may be gifted enough to head over to Jo-Ann Fabrics or Michael's Arts and Crafts and whip up something snazzy. But what if you aren't one of those people? Don't worry, there are still places you can go to get an original costume that won't break the bank.

A great place to start is thrift stores. There are quite a few in the area. Thrift stores have all sorts of odd and interesting things that could be used together to make the best costume ever. Not only can you find every type of clothing out there, but also you will also find them at reasonable prices.

The biggest one in the area is the Salvation Army on Route 9 in Hadley, Mass. This place is great. It has rows and rows of clothes that were donated by people in the area of demographics. You can find anything from full suits to leotards. Not only is it a great place to piece together a costume, but you can also go there to save a little money on your other school-related needs.

The best thing about the Salvation Army is the mass quantity they have to offer. There are rows of clothes sorted by color that are just waiting to be found. It may take some time to sift through everything, but the prices make it all worthwhile. Who knows, maybe you'll finally find that perfect used pair of underwear to compliment your Quaalman costume.

There are a few similar stores located in The Big Y Plaza in Amherst – Plato's Closet and Goodwill. Goodwill is a smaller version of the Salvation Army, with a similar set up and similar prices. You may not find the same type of eccentric clothing there, but it is still worth a shot. Every so often you will find a diamond in the rough, and there is nothing better than that. Plato's Closet seems to cater more to the needs of females, whereas the other places have a good mixture for both guys and girls.

This works out though, because what easier costume could there be than a hearty cross-dresser? Go for it. There is no limit to what you can do with another person's normal clothes.

Keep in mind that it is in these small stores where you will likely find the some of the most interesting things. Whatever it takes to avoid dressing up as a character from the Jersey Shore.

The best place in the area to get a costume is Ultra Gal in downtown Northampton. Don't let that name deter you. You may have walked by it from time to time wondering what goes on in there.

Well, it's four floors of everything you need to make an awesome costume. They really do have everything. They provide a wide variety of masks, face paint and props. You can find costumes from different points in history. There are even full-body costumes like a Santa suit or a chicken, and smaller things that can be mixed and matched to make whatever you costume you'd like.

The store in itself is an interesting place to go even if you don't end up buying a costume. The first floor is on street level and it seems like a semi-normal street shop. Then you will find a sign that says "Enter if you dare!" This will bring you to the stairs that brings you down into various other floors that have masks and costumes hanging everywhere.

The time to find a costume is now. You better get out there and get busy before all the good ones are taken. Go, go, go!

DIY: Group Pac-Man costumes

By Jeff Mitchell
Collegian Correspondent

Looking for a great group idea that will allow you and your friends to stand out amongst the hordes of cheap store-bought costumes? These clever Pac-Man costume ideas can accommodate up to five people, but require a decent amount of work. The supplies can be found in any local craft store and is fairly cost effective for a quality costume. If these steps are followed correctly, you will impress everyone on the one of the biggest nights of the season.

Pac-Man

Clearly the most important, Pac-Man will set the tone for your group costume.

To construct Pac-Man, supplies needed are: measuring tape, scissors, cardboard to form the structure, glossy yellow poster paper, duct tape, spray adhesive, and black construction paper. Allow three to four hours to construct the costume.

First off, measure the individual's waist and height. Add about two inches extra to each side of the waist to determine the width, this new width measurement will be the width of the spine.

To calculate height, measure from the individual's head down to their knee.

Cut two Pac-Man faces out of your cardboard. The diameter of the sphere should be the height that you measured before.

The spine is the most crucial part of the Pac-Man costume, as it has to hold the two faces together as well as accommodate the width of the individual.

The spine will be comprised of two pieces. The first piece should be a long rectangular piece of cardboard that has enough flexion to follow the circumference of the Pac-Man from the top lip to the base of the head. A second spine should be created to accommodate the space from the leg holes to bottom lip of Pac-Man.

Once the spine and faces are completed, use duct tape to connect them together. Apply the duct tape to the interior of the costume, in order to avoid having the material visible from the outside. Have the individual try the costume on to make sure it is structurally sufficient as it should remain fairly rigid.

Once you are positive the costume will hold, use spray adhesive on the cardboard to attach poster paper to the Pac-Man. Cover the entire costume in yellow poster paper, except for the gap where the mouth is.

On the mouth, use cardboard and poster paper to cover the bottom jaw as you did for the spine, but leave the top half open as it will act as eyes for the individual inside.

Lastly, apply a circular piece of black construction paper onto each side of the face to act as eyes.

Ghosts

These ghosts are an easier construction to make than Pac-Man as they are smaller and are require only one spine component.

To create the ghosts, you'll need measuring tape, scissors, cardboard to form the structure, glossy white poster paper, duct tape, spray adhesive, spray paint, and white and black construction paper. Allow three to four hours for construction of each ghost.

The ghost costume has a "post office mailbox" build. Each individual should be measured separately for their height and width and the costume should cover the head to a bit below the individual's knees. Again add two inches to each side of the width so that the fit is more comfortable.

Create a ghost face template by creating an oval and then cutting a wave like pattern in to the bottom. Get a photo as a reference so you can get an accurate idea of how the head should be shaped. Use this template to cut out the form of the ghost from the cardboard.

This project only requires one spine that will run around the entire costume except for the bottom for the individual to put their legs through.

After the spine and faces are completed, use duct tape to connect the spine to the faces. Again, have the individual try the costume on to make sure it is structurally sufficient.

Once you are positive the costume will hold, use spray adhesive on the costume to attach white glossy poster paper to the entirety of the costume.

Spray paint the costume in either blue, red, orange, or pink. Do not spray the cardboard directly, as it will warp the material. This will give the costumes a very glossy and finished look.

Place an oval of white poster paper on each side of the face for the eyes. Add a piece of black circular construction paper inside to create the illusion of eyes.

Cut a rectangular slot out of the spine near the top so that you can see out of the costume.

Once completed, practice moving around in these costumes so that you are prepared for Halloween.

Avoid wearing the costume in the rain, or where water might damage the costume, as the frame is made of cardboard.

If made correctly, each ghost will cost around $25 to create and the Pac-Man around $30.

Amidst the plethora of last minute iParty products, a creative and homemade costume like Pac-Man and his accompanying ghosts will make you stand out and catch some attention.

Ritter dims the lights and raises the volume

By Angela Stasiowski
Collegian Staff

While the majority of the University of Massachusetts campus might have been jamming to Phish this past Saturday, singer and songwriter Josh Ritter pulled quite a crowd for his performance at the Calvin Theater in Northampton.

Ritter and the Royal City Band wowed concertgoers with infectious theatrics and feel-good tunes. Not a single foot seemed to resist tapping out the contagious rhythms, and, by the end of the evening, no one bothered to try.

The NoHo-based Winterpills opened the show. "We're from right here," said singer and guitarist, Philip Price, pointing to the stage where he was standing. The local heroes performed a short set featuring several songs off of their recent EP, "Tuxedo of Ashes," including the title track.

In the style of folk greats Elliott Smith and Simon and Garfunkel, the Winterpills play heavily on the power of the softer side of music. Says Price on the band's influence, "Before Winterpills formed I actually played in a much harder rock band and I think after I heard Elliott Smith, he gave me some sort of permission to go quieter. There was a lot of power in the quieter music. More power."

"Anxious Decoder," a track off the new EP was a standout of the set, featuring the shining male-female harmonies that make the band so easy on the ears.

Gracious as always, vocalist Flora Reed stopped by the merchandise booth upstairs to distribute copies of the EP and greet fans and friends alike.

Ritter's portion of the night began with a whispering acoustic rendition of "Idaho," about the songwriter's birthplace. Sans amplifier, the guitar was lost to an almost a cappella performance by the songwriter. A still-antsy audience strained to hear the delicate chords, making the melodic vocals even more beautiful. The stage was equally sparse, bearing only the band and a set of giant light bulb-like objects that rhythmically lit with the music.

Ritter literally jumped from his quiet beginnings to rock starmode in an instant, banging out rollicking renditions of his hits, "Rumors" and "Wolves."

"Change of Time," off of Ritter's latest album, "So Runs the World Away," came as an early crowd favorite in the set. Without the interference of studio production, the song stood on its own two feet quite beautifully in the live setting. Ritter's light, acoustic strumming was flawless.

Throughout the night, there was a lot of talk between the lighting engineers and the songwriter. The banter began innocently, with Ritter asking for some "ancient-Egyptian" style lighting for his song "The Curse." He nodded his approval as the piano fell into place against his earnest lyrics.

Midway through the evening, Ritter beckoned again to the lighting engineers, this time prompting them to kill the lights completely. Once the theater was completely black, Ritter began "In the Dark," shouting, "Please don't leave me in the dark!" At the end of the song, he called for a "slow sunrise," which the lighting team did not catch on to until the last minute.

Throughout the night, the songwriter could not take his eyes off of the lights that lined the rows of seats in the concert hall. "It's like a runway," laughed Ritter. "I'd like to roll a keg down it."

"Lantern," a huge hit with the crowd, again played on Ritter's call for light. "Hold it high for me," he sang to the sea of glow sticks, cell phones and lighters.

Treating an audience to some humor, Ritter revealed a new tune, "Sir Galahad," about the angel Gabriel and the knight of the round table. The simple, acoustic tune told the laugh-out-loud tale of Galahad's question-

See RITTER on page 5

'Hereafter' questions what happens after death

By Malea Ritz
Collegian Correspondent

"Hereafter," directed by Clint Eastwood, would seem to be the title of a thrilling horror movie; however it is quite the opposite. The movie is more of a tearjerker. It takes the audience on an emotional roller coaster, following the lives of three people that have experienced death in different forms.

The first character, Marie LeLay (Cecile de France), is a French journalist who is on vacation when disaster strikes. She is swept away by a gianttsunami wave and nearly dies.

Just before she is revived, she experiences something unusual and unexplained. Marie recovers from her near death experiencs and attempts to return to her successful career. She is unable to focus on her job and has no choice but to take time off in order to get some answers.

George Lonegan, played by Matt Damon, is a working American trying to escape his past. George has the ability to make a connection with a person's deceased loved ones. His psychic skills once provided him with a thriving career that he is attempting to put behind him. George struggles to have a normal life, free from death and sadness.

Marcus and Jason, played interchangeably by Frankie and George McLaren, are young identical twins who rely on each other to deal with their mother's alcoholism and drug addiction. When their mother asks them to do an errand for her, Jason agrees to help, but is killed in an accident. This forces Marcus to look for answers about death.

In the end, Marie, George, and Marcus are inadvertently brought together by their experiences. They use their past to help each other move on with their futures.

Eastwood does a phenomenal job on establishing an emotional connection between his audience and the characters in the movie. The calm and collected tone of the opening scene is there to show the viewers that the seemingly arbitrary choices one makes can determine one's near future.

Marie wants her lover to buy gifts for his kids he refuses, as he is too tired to get out of bed. Marie decides that she will buy the presents herself, and in a matter of seconds, her life changes forever.

The introductory scene for Marcus and Jason effectively displays their innocence. The boys save up all of their money to get a professional portrait taken, as a present for their mother. When Social Services comes to take their mother away, they try to cover for her. They are compassionate and naive little boys. When Jason is bullied and killed, the audience's heart bleeds for this child and his twin brother who is now alone. It is heartwrenching to see Marcus looking at the empty bed next to him as he places Jason's hat on his pillow and says goodnight to the jar that holds Jason's remains. The close ups on this little boy's face, as tears slowly fall from his eyes, are emotionally distressing for the viewers. A scene in which Jason's hat, which Marcus constantly wears, blows off his head displays the unexpected importance of little occurrences.

The audience finds themselves hoping for George to give the woman a reading who desperately bangs on his apartment door in hopes of talking to her son. Viewers are heartbroken after George seems to have found love, as he gives her a reading that releases her personal pas, ane she never contacts him again.

The ending will likely leave audiences happy, but a little underwhelmed. It is almost as if the ending purposely left the story open to a sequel.

If in seeing the commercials for "Hereafter" you were hoping for a thrilling horror movie, you will be surprised. It is unexpectedly emotional, yet also deep and thought-provoking. What happens to us when we die? Watch the movie if you're interested in finding out.

Malea Ritz can be reached at mritz@student.umass.edu.

Matt Damon and Bryce Dallas Howard star as a medium and his love interest in "Hereafter," a new film directed by Clint Eastwood that begs the question: what happens to us after we die?

Ritter: Americana tunes woo audience

RITTER from page 4

able sexuality and the sacrifices the knight would have to make to get to heaven (no more nights with lonely stable boys).

Ritter finally broke through to the surprisingly reserved crowd with "Kathleen," a love song of epic proportions. Until this point in the show, the majority had remained seated and silent, taking in the music, but not participating. As if the entire night had led up to that one moment, the concert hall erupted in song.

Ritter ended the performance with some high-spirited and fast-paced Americana tunes, including, "Harrisburg," "To the Dogs or Whoever," and a rocking rendition of the Grateful Dead's "Friend of the Devil." Bringing the entire audience to their feet, he swayed the formerly uptight room to dance.

Ritter is a singer, a guitarist, a songwriter and an entertainer. Before anything else, however, he is a storyteller. His performance this past Saturday cemented his status as one of the great living songwriters.

Angela Stasiowski can be reached at angela@dailycollegian.com.

Josh Ritter and the Royal City Band had the audience on their feet on Saturday night at the Calvin Theater in Northampton.

Dainton recovering, uncertain for Friday

HOCKEY from page 8

five total points all of last year in 33 games.

UMass junior forward Danny Hobbs had a career-high three assists against No. 8 BU, helping set up both Rowe goals as well as Michael Marcou's late goal to cut the deficit to one.

"[Hobbs] has been a real good leader," Cahoon said. "He's really grown and developed and he's starting to become the player of measure that we thought he'd be when we recruited him. I think he's right on pace to be a real good scorer and a consistent performer for us."

Team captain Paul Dainton has been a full participant at practice so far this week as he makes his way back from injury. It is still unclear of whether or not he will be in front of the net come this weekend.

"He's doing fine," Cahoon said. "It's just a question of how comfortable he is and whether the timing is right. You won't find out until game time."

Providence leads the all-time series against UMass by a count of 32-21-3. Last season, the Minutemen took two out of three games against the Friars. The two teams played a home-and-home series around this time last year, on Oct. 30 and 31, and took one game each, with both road teams getting the win. UMass won the only other meeting with Providence on Jan. 30, by a score of 4-1.

Pete Vasquez can be reached at pvasquez@student.umass.edu.

Forward Brian Keane tries to skate past a defender during UMass' 4-3 loss to Boston University on Oct. 22. The Minutemen start a home-and-home series on Friday against Providence.

Cahoon appreciates passion out of new players this year

RESILIENCE from page 8

Michael Marcou scored with 19 seconds left.

It's that element of resilience that has Cahoon excited about this team despite a difficult start to the season.

"Those same kids that are inexperienced are passionate," Cahoon said. "They have good skill level, are really competitive and have the wherewithal to be very good players at this level once they shore up their game a little bit."

Only time will tell when that happens. In order for the Minutemen to change nail-biting losses into wins, they need their younger players to mature.

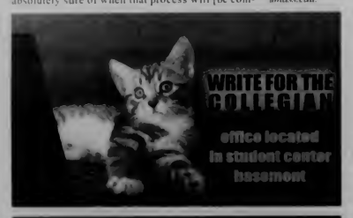
"There's always a sense of urgency," Cahoon said. "You want things to be as good as they can as soon as they can. Obviously there is a process that everyone has to go through and no one is absolutely sure of when that process will [be complete]. We're hopeful that it's sooner rather than later."

In recent years, UMass leaned on certain players for production. Now, it demands contributions from up and down the roster. Without many of last year's star players, nobody is taking anything for granted. Everybody is on the same page as they compete for ice time.

"I'm not trying to beat them down," Cahoon said, following the 4-3 loss. "It was not a lack of competitiveness that led to the loss. It was a lack of execution [and consisteney]."

They are competitive and resilient, yet inexperienced and inconsistent. The latter can only change with time. As soon as it does, UMass could be a major force in the premier Hockey East conference.

Steve Levine can be reached at slevine@student.umass.edu.



Nelson filling big shoes left by receivers

By Jay Asser
Collegian Staff

The loss of former wide receivers Jeremy Horne and Victor Cruz has not been felt by the Massachusetts football team this season, due in large part to transfer Anthony Nelson.

The senior, now is in his first and only season at UMass after departing from Hofstra, is providing quarterback Kyle Havens with a reliable receiving target down the field.

Nelson leads the Colonial Athletic Association in receptions per game (6.71) and receiving yards per game (87.1). Those statistics both rank 13th in the country, making Nelson not only one of the best receiver on the Minutemen and in the conference, but one of the best in the nation.

After the departure of Horne following the 2008 season and the loss of Cruz after last year, there were questions on who would fill in as the primary receiving threat on the outside in 2010. In their finals season with UMass, Horne pulled in 50 receptions for an average of 74.6 yards per game, while Cruz caught 59 passes for a 78.9 average.

Now, Nelson is on pace to have a better season than either did in their senior campaigns.

In this past week's loss to New Hampshire at Gillette Stadium, Nelson set a career-high with 11 receptions for 190 receiving yards, easily surpassing his previous high of 128, which also came against the Wildcats back in 2007. For his effort, he was named to the College Football Performance Awards honor roll.

"It was an outburst by necessity a little bit because we had to throw the ball to get back into the game and take some chunk yards," UMass coach Kevin Morris said in his weekly conference call. "It just shows you what we're capable of, certainly. We're capable of running on all cylinders, which we have been at some points during this year. We can get the ball up and down the field and do it very well."

Along with Nelson, Julian Talley also made a big impact in the passing game with eight receptions and 111 yards. The performance of the duo marked the first time UMass had two receivers over 100 yards in the same game since Rasheed Rancher (143) and Michael Omar (114) on Dec. 1, 2007.

The contest also marked the first-career 100-yard receiving game by Talley, who now has over 1,000 yards for his career. This season, the junior is second on the Minutemen with 33 receptions for an average of 63.3 yards per game.

This week, Talley and Nelson will face off against a stingy pass defense in James Madison.

Despite dropping three of their last four contests, the Dukes rank first in the CAA in pass defense, allowing just less than 150 yards per game and four touchdowns in the air.

"Obviously last week when the score got out of our control a little bit, we had to throw the ball probably a lot more than we normally do in the ratio," Morris said. "We're going to come out and try to be balanced and you need to be balanced against JMU because if they know you're going to pass it, they'll gang up on you in those pass-rush lanes and cover in the secondary."

The Dukes' secondary hasn't allowed a receiver to top 100 yards in a game this year. The receiver who had the most success against JMU was Villanova's Norman White, who caught seven passes for 72 yards in a 14-7 win this past week.

With their running game coming back down to earth after the bye week, the Minutemen will continue to lean on Nelson and Talley in the air down the stretch of the schedule.

Jay Asser can be reached at jasser@student.umass.edu.

Lock Haven records 3rd shutout of year

A-10 Field Hockey

By Stephen Sellner
Collegian Correspondent

The Lock Haven field hockey team recorded its third shutout of the season, blanking West Chester, 3-0, on Friday.

Amy Herdendorf gave LHU an early lead, scoring her team-leading 17th goal one minute, 15 seconds into the match.

Kristi Shepps extended the Eagles' lead in the 30th minute. Leslie Ahern penetrated downfield and found Shepps in front of the cage for the 2-0 advantage.

LHU goalie Erin Terreson tallied her third shutout of the season, making two saves in the victory.

Lock Haven outshot West Chester, 8-3, as the Eagles dictated the pace throughout the contest.

LHU (13-5, 4-1 Atlantic 10) continues conference play on Friday at Saint Joseph's, while WCU (5-11, 1-4 A-10) hosts Massachusetts.

Temple grabbed its third conference win of the season, handling Saint Louis, 5-0.

Katie Briglia ignited the Owl scoring frenzy, scoring three goals in the first 17 minutes of play. The sophomore entered the match with only three goals the entire year.

TU goalkeeper Sarah Dalrymple earned her sixth shutout of the season, never affording the Billikens an opportunity to mount a comeback.

The Owls (8-10, 3-2 A-10) travel to Richmond on Friday and host Lock Haven on Sunday for their final regular season tests.

SLU (0-18, 0-5 A-10) tries to capture their first win with matchups against La Salle and West Chester on Friday and Saturday respectively.

Pycroft earns weekly honor

Richmond's Danie Pycroft earned the Atlantic 10 Player of the Week honor, with teammate Jessica Hollis and Massachusetts' Mika Black claiming co-Rookie of the Week honors.

Pycroft scored a pair of game-winning goals for the Spiders against West Chester and La Salle. Her team-leading nine goals include four game-winners for the Spiders, who are fighting to claim one of four spots in the A-10 tournament.

Hollis provided an insurance goal in Richmond's 2-0 win against West Chester, giving her three for the season.

The Spiders are in a three-way tie for third place in the conference, as they attempt to surpass the Owls and SJU this weekend.

Black scored her first goal of her collegiate career, in UMass' 4-1 win over Saint Josephs. The goal helped the Minutewomen atop the conference standings.

All A-10 teams enter the final weekend of regular season play, hoping to capture a spot in the conference tournament on Nov. 5.

The playoff race

A-10 teams enter the final weekend of play with plenty of playoff implications.

Four teams are fighting for three spots in the conference championship, with UMass (11-6, 5-0 A-10) in sole possession of first place.

Lock Haven enters the weekend in second place, while Temple sits in a three-way tie for third place along with Richmond and SJU (6-11, 3-2 A-10).

The Owls travel to Richmond on Friday in a greatly anticipated showdown.

Temple is led by Bridget Settles (13 goals) and Katie Briglia (six).

Katelin Peterson and Dani Pycroft anchor the Spiders offense. Peterson has six goals and seven assists while Pycroft has a team-leading total of nine goals.

The Hawks host Lock Haven on Friday, as the second place Eagles try to diminish any hope of an SJU playoff berth.

Saint Joseph's comes off an impressive 5-2 trampling of SLU on Friday while LHU looks to build off their 3-0 triumph over West Chester on Sunday.

Lock Haven does not stop there, as the team travels to Temple on Sunday in a final opportunity to secure a spot in the tournament.

Richmond hosts Saint Joseph's on Sunday afternoon in the final game of A-10 play.

Stephen Sellner can be reached at ssellner@student.umass.edu.

Piekos leading with maturity

Goalkeeper Chris Piekos is not your average senior. You only need to look at his age – 26 years old – to figure that out.

To put that in perspective, when the keeper graduated high school, midfielder Stuart Amick – also a senior – just graduated junior high.

While he is significantly older than any of his teammates, Piekos isn't playing for the Massachusetts men's soccer team at his age because of academic problems, but because of his willingness to serve for his country.

Adam Miller

After his freshman year at Rivier College, Piekos served two deployments over four years in Iraq and received a Bronze Star. Needless to say, his background is a little off the beaten trail for a soccer player.

Despite his age and background, Piekos had to deal with a competition against redshirt junior Shane Curran-Hays who is a bit longer and quicker than Piekos, but doesn't have the strength of the current starting keeper.

Curran-Hays earned his right to the starting job after sitting behind Zack Simmons for two years as his former teammate led the Minutemen to two NCAA tournament appearances. Curran-Hays quickly learned that his apprenticeship would be challenged by Piekos all year, and UMass coach Sam Koch alternated between both keepers for all of last year and the first part of the 2010 campaign.

Piekos earned the job for good on Sept. 19 when the Minutemen played then-No. 24 Indiana. The senior finished out the non-conference schedule with a disappointing 0-2-3 record while allowing eight goals.

The situation seemed eerily familiar to last season when UMass started the season with three ties throughout the non-conference schedule. The Minutemen eventually fell out of contention for the Atlantic 10 tournament.

This time, it looks like Koch is not going to have to deal with the disappointment of last season. Ever since the start of A-10 play, UMass is 4-0-1. During that stretch, Piekos has only allowed one goal.

Now, he looks poised to lead the Minutemen back to the A-10 tournament, and his teammates can thank his maturity for the solid leadership and defense they've been receiving during the second part of the season.

Ever since Piekos put on the Maroon and White, he has been a leader – even when he wasn't the one in goal. Last season, he posted a 0.68 goals-against average and a save percentage of .868 – good for seventh in the nation.

Despite his accomplishments, Koch rotated his two keepers all season. Piekos never complained once about his role with the team and even cheered on Curran-Hays from the bench during half the season.

Ever since the job permanently went to Piekos, his teammates are feeding off his maturity. In Oct. 16's 1-0 win over Rhode Island, freshman Chris Stoker kicked the game-winning kick late in the game.

That day, Piekos kept the Rams out of the goal with an extended-arm save off a shot by URI senior Greg Balicki to keep the score tied early in the first half.

Last season, the Minutemen not only struggled to keep other teams out of the goal, but also struggled to produce offense themselves.

While they still aren't going to win games on their offense, they are still making sure to get on the board every game. Unlike last year, where UMass was shut out seven times during the season, it has decreased that number to two.

No, I'm not suggesting that the Minutemen's success is solely related to Piekos, but having someone with his maturity level at his age is very beneficial for the Minutemen. As far as Piekos is concerned, if he can handle defending his country, he can do the same with his own net.

Minutemen prepare for Dukes

Morris admits team's backs against the wall

By Dan Gigliotti
Collegian Staff

The Massachusetts football team travels to James Madison on Saturday with an imbalanced offensive performance to show for a balanced conference record.

"Last week, we had to throw the ball a lot more than we normally would," UMass coach Kevin Morris said. "We're going to come out and try to be balanced and you have to be balanced against JMU, because if they know you're going to pass it, they'll gang up on you in those pass-rush lanes."

Both teams are struggling in conference play, losing consecutive games to Colonial Athletic Association opponents and standing in the Football Championship Subdivision polls.

No. 18 UMass (4-3, 2-2 CAA) dropped 10 spots in the Sports Network Fathead.com FCS Top 25 and FCS Coaches Poll in two weeks, following losses to Richmond on Oct. 16 and New Hampshire last week.

Morris perceives the urgency of this weekend's game, along with the rest of the regular season, as the playoffs approach.

"If you win, you're in. You've go to win these games," Morris said about the importance of the upcoming schedule following Saturday's game. "Certainly, our backs are against the wall, absolutely.

The No. 15 Dukes dropped four spots this past week after losing to No. 6 Villanova, 14-7, on the road. JMU upset Football Bowl Subdivision opponent and No. 13 ranked Virginia Tech on Sept. 11. Since then, they have lost three out of four in the CAA, including two home games against Delaware and UNH.

The top-ranked Minutemen offense gained more yards than normal on Saturday, with quarterback Kyle Havens' and wide receiver Anthony Nelson registering career-high numbers. Their efforts did not translate into points, however, dropping the first inaugural Colonial Clash to New Hampshire, 39-13, at Gillette Stadium in Foxboro, Mass.

With a struggling ground attack, Morris acknowledges his team's strength in offensive production and their necessity to remain balanced to ensure a winning performance.

"We're capable of running on all cylinders, which we have been at some points this year, when we can get the ball up and down the field and do it very well," Morris said in a CAA teleconference on Monday. "We know we have the potential to be explosive, because we've been there, done that. But, you have to do it every down, every snap in this league or it's not going to come to fruition."

The Minutemen entered last week's game tied for second in the CAA in scoring offense, but were unable to score through the first three quarters against the Wildcats.

Havens threw for a 450 yards on 32-of-55 passing with two touchdowns and one interception. Nelson caught the bulk of those passes, with 11 catches for 190 yards, good for fourth best in school history and garnering College Performance Award consideration.

The typically balanced UMass offense saw a decline in its rushing production in the past two weeks. The Minutemen, led by the running duo of John Griffin and Jonathan Hernandez, gained 149 yards against the Spiders and 43 against UNH, down from its season average that now stands at 175.9 yards per game (third in the CAA, 33rd in the Football Championship Subdivision).

Saturday was the first time this season that UMass failed to break 100 yards and the stout JMU defense will make it difficult to get off the snide.

The Dukes are ranked second in the league in total defense (280.7 yards per game) and first in pass defense (149.6 ypg). JMU give up 13.4 points per game, allowing more than 16 points once this season against New Hampshire on Oct. 16.

Turnovers have plagued UMass this season, overcoming them in road wins early in the season and falling victim to them as of late.

The Minutemen gave possession away three times, leading to 15 Wildcat points and hold a turnover margin of -6 this season (last in CAA). They also went 2-for-4 on fourth down conversions, dropping from its FCS leading spot in that category to seventh (73.7 percent).

The last meeting between the two teams was on Nov. 14, 2009. JMU rushed for 212 yards in a 17-14 win at McGuirk Stadium. It was the Dukes' first win in Amherst since 1987.

The Minutemen hold the all-time series lead 7-6-1.

Dan Gigliotti can be reached at dgigliot@student.umass.edu.

JEFF BERNSTEIN/COLLEGIAN

Running back John Griffin tries to stiff arm a Richmond defender during the Homecoming game on Oct. 16. Following a bye week for UMass, the Spiders defeated the Minutemen, 11-10, on a last-minute scoring drive after being down five points.

UM begins weekend series against Friars

Mass Attack trying to rebound after rough start to campaign

By Pete Vasquez
Collegian Staff

After a harsh season-opening schedule saw the Massachusetts hockey team go winless against both Minnesota and Boston University, two of the top 15 teams in the country, the Minutemen welcome an equally struggling Providence team this Friday night for the first home-and-home matchup of the season.

A 4-3 loss to BU last Friday dropped UMass (0-3-1, 0-1-1 Hockey East) into a tie for seventh place in the HEA.

"We're a team without a win in the league," UMass coach Don Cahoon said. "We'd like to get things moved into a positive direction. It would be a big push forward if we can get W's this weekend."

Providence (1-4-0, 1-2-0 HEA) comes into Amherst dragging four straight losses with it. However it does boast a conference win, having beaten Northeastern 3-2 in its season opener. Though since then, they have played three out of four teams in the top 10 against Minnesota-Duluth and BU. A loss at UMass-Lowell mixed in there has the Friars aching to get back on the winning track.

"They're a team that's struggled over the last couple of years, hasn't had a lot of success and I think they're tired of it and really driven to get beyond that and be a better team … I expect they're going to play real hard," Cahoon said. "This is going to be a real task for us to be able to play up to the level we'd like to play and end up with the results we want."

In their four-straight losses, the Friars have allowed a total of 19 goals, an average of almost five goals per game. Cahoon sees an opportunity to continue that trend if UMass executes on special teams, and takes advantage of the struggles Providence is currently having with its special teams.

Sophomore Darren Rowe comes into the game having had his first career two-goal effort on Friday. He leads the team with four goals already this season after not scoring at all last season in 26 games. The Friars may have an equivalent to Rowe on their side, however, in sophomore Tim Schaller, who already has five points in five games this year, compared to

Cahoon appreciates resiliance from team

UMass coach encouraged by play despite losses, inexperience

By Steve Levine
Collegian Staff

Although the Massachusetts hockey team continues to search for its identity with a revamped roster, the Minutemen are sure they possess two qualities: inexperience and resilience.

With 13 freshmen on the roster, many of whom log important minutes on the ice, inexperience was to be expected. The resilience, however, was something nobody could've predicted.

Both traits were evident when the Minutemen opened their conference schedule with a home-and-home series against No. 8 Boston University.

On Oct. 16, UMass went to Boston to play BU in its home-opener. UMass' inexperience quickly took center stage, as the Minutemen surrendered two goals in the first period. After a scoreless second, UMass' resiliency shined through in the third, when Darren Rowe and Marc Concannon scored to tie the game, 2-2. Prior to those goals, UMass rookie goaltender Jeff Teglia was determined not to allow another Terrier goal. After the first period, Teglia made 24 saves en route to UMass' conference-opening draw.

Had it not been for an ugly first period, the result could have been a win for UMass. But inconsistent play has haunted the Minutemen's season thus far, as they can't seem to string together a strong performance for the full 60 minutes of regulation.

"Inexperience is the biggest reason [for that]," UMass coach Don Cahoon said. "We get great performances from most of the kids most of the time [but then] there's that inexperience that pops up that hurts us on the penalty kill or a particular situation where something isn't recognized as quickly as it might be if we had more games under our belt."

Following the tie, UMass welcomed BU into the Mullins Center for a home-opener. After securing a quick 1-0 lead, the Minutemen eased up in the second period, allowing three unanswered goals. UMass made it tight in the third, but again couldn't overcome key mistakes, ultimately losing, 4-3.

Two of BU's four goals could've been prevented. On one, UMass broke down on a defensive assignment. On the other, a bad decision to pass laterally burned the Minutemen. The latter mistake resulted in a 4-2 deficit with less than two minutes to play. Still, the Minutemen did not give up, as

Patrick urges students to vote Nov. 2

By Sam Butterfield
Collegian Staff

Governor Deval Patrick, locked in a tight race for reelection, visited the University of Massachusetts yesterday, speaking for about 15 minutes to a relatively small crowd of supporters, UMass Democrats, professors and locals.

The event began slightly late at about 11:20 a.m., as Gov. Patrick walked in to a standing ovation flanked by District 1 Congressman John Olver, State Sen. Stan Rosenberg, State Rep. Ellen Story and Chancellor Robert Holub.

"So formal," joked the Governor, as he waved and shook hands with young admirers.

First to speak was Emily Jacobs, president of the UMass Democrats, who hosted the appearance.

Jacobs, who also serves as Western Massachusetts regional director for the College Democrats of Massachusetts, told the crowd that, while some political strategists have spoken of a lack of enthusiasm among young people this electoral cycle, she believes the youth vote will be a recognizable force this year.

"We're here today because we've all heard the pundits," she said, "they say young people aren't going to vote this year and that we don't care, that we've abandoned the party, and I don't see that."

"We're here today because we see the importance of getting out the vote, and I hope every one of you will vote," she concluded, before introducing Olver, the nine-term Democrat from Amherst currently seeking reelection in the First District against Republican challenger Bill Gunn and Independent Michael Engel.

Olver then gave something of a stump speech, telling what he called "a student audience" about student-oriented legislation the current Congress has enacted recently.

Olver then touched on what he feels have been the Patrick administration's greatest accomplishments.

"Four years ago, Deval Patrick put an end to the aimless drift of 16 years of short-term Republican governors here in Massachusetts," he said. "Governors who would rather have been in Mexico or Canada or," he paused, "Washington, than solving Massachusetts' problems."

"So," he continued, "Deval Patrick has proven his commitment to Massachusetts and moved us out of the recession…and the choices that Gov. Patrick, with the help he's needed from the legislature, made to invest in our economy has enabled that growth."

Echoing the event's theme, Olver signed off with a plea to the crowd to organize in the campaign's final days.

"Now I urge you to join the volunteers, seniors, workers, students all over the Commonwealth, here in the last five days to join those whom are working in their neighborhoods, or by phone, or foot work in the neighborhoods, to help coordinate this campaign. We need to make the right choice for Massachusetts, we need to elect Deval Patrick, [and] so he can finish what he started."

With that, Olver turned the floor over to the Governor, who, receiving another standing ovation, first asked to speak without the use of a microphone, but due to audio-video requirements was asked by staffers to continue speaking through it.

After thanking the crowd and Olver, Patrick first touched on the partnership he and Olver have forged, describing various transportation and railway projects he and the Congressman have pushed for, and then later paid homage to Story and Rosenberg, telling the crowd that "you have no greater champions for UMass Amherst than these two back on Beacon Hill."

Current governor Deval Patrick addresses supporters at his Thursday appearance at UMass. He is seeking re-election for a second term in office.

Patrick then thanked Chancellor Holub and the UMass faculty, before making his case for what he sees as the commonwealth's greatest challenges and how he hopes to surmount them, focusing heavily on what he calls "generational responsibility," or one generation's obligation to leave the world better than they found it.

"It's not about me, it's not about the other candidates, it's about you, it's about our future, and it's about generational responsibility," he said, sounding off on a motif of shared responsibility and an appeal to think about the future he would return to throughout the discussion.

"This whole idea of generational responsibility," he explained, "we're supposed to leave [the world] better than how we found it, that's something that every one of us learn from our grandparents, but it's leaked from our government, and we need to put it back."

"And because we have been making those adjustments," he said, referencing budget revisions and job growth measures, "we're number one in student achievement, health care, in veterans' services, and number four in job creation, and none of that is by accident," he continued.

The Governor then spoke to what he sees as an ambiance of negativity running throughout this electoral cycle.

"Sometimes if you listen to all the ads and all the rhetoric from the other campaigns, it makes it sound like everything wrong in your lives including a rainy day or a flat tire is my fault," he joked, "and everything right we just kind of stumbled on."

"No," he emphasized, "that's because we've been making tough choices that would be tough under the best circumstances, and they're especially tough in these difficult times."

Before making his get out the vote pitch, Patrick detailed what he sees as a difference in political philosophy between himself and his primary opponent, Republican Charlie Baker.

"Charlie's answer is to put 5,000 more folks out of work and 12,000 out of health care; his answer to health care is to drive up health insurance costs 150 percent in premiums over the last ten years and stand on the sidelines while rates go up, we try to cap them and drive them down."

"Now you can make that choice," he continued. "It's a different view about the role of government, it's not evil, it's just a different view. Some folks see numbers, I think he's one of them, I see neighbors, that's what this election is about, it's a choice among choices, among values."

After laying out what he sees as the choices in the race, Patrick made his pitch to students and citizens to mobilize before Tuesday.

"When I ask you to come out on Tuesday, take some time off, help people get to the polls, it's not about me, it's about them, "he said, referencing a group of unemployed people in Quincy who he had recently met with. "See, I think that the American dream is something worth fighting for, I think it is worth fighting for that government has a role to play in helping people help themselves."

"I appreciate that you're here, and it's great," he continued, "but where we need you is out on the street, knocking on doors, calling people on your cell phone list, sending emails to the people on your email list, talking to your friends, and your classmates, and to your schoolmates, and here's a radical idea, to the people who don't believe in the same ideas as us, engage them, and if we do that, and do it together, and do it in the spirit of generational responsibility, that we can and should do what we can to leave a better Commonwealth, I'm confident that we'll win, we'll all of us win," he concluded, thanking the crowd.

After his speech concluded, the Governor shook hands with students and supporters for about 15 minutes, trading pleasantries and smiles and given the relatively small crowd, introducing himself to a majority of those present.

Patrick then took a few questions from local media, explaining that the get out the vote effort is his campaign's top priority from here until Tuesday.

The goal is "to be in as many places and shake as many hands as is possible up until then, and to get people to come out and vote," he explained. "Not just to vote for me, but to vote in general, because we believe people get the government they deserve, and Tim Murray and I believe Massachusetts shares these values and will get the government it deserves."

On the subject of the day – catalyzing students to help win the election – Patrick said he feels the student vote will be important, but cautioned that every vote counts.

"I think students are going to be key," he said, "not just because I value students, but because every vote is important, and people ask why I'm out in Western Massachusetts in towns with small populations, and it's because I think every vote is important across every corner of the Commonwealth," he said.

Patrick's appearance was not the only political event to bring a crowd to campus Thursday. The Massachusetts Society of Professors was staging a "No on 3" rally against the sales tax reduction ballot question yesterday afternoon, and Green-Rainbow gubernatorial candidate Jill Stein appeared later in the day.

Sam Butterfield can be reached at shutterfield@dailycollegian.com.

Stein advocates more prudent spending

By Bobby Hitt
Collegian Staff

Dr. Jill Stein, the Green-Rainbow party candidate for governor of Massachusetts, is hoping the electorate of Massachusetts will show some love for the underdog Nov. 2.

Dr. Stein, whose running mate Rick Purcell sat for a one on one interview with The Massachusetts *Daily Collegian* last Sunday, visited the Student Union Ballroom at the University of Massachusetts yesterday, Oct. 28 to talk to students and garner votes.

The event was sponsored by the Cannabis Reform Coalition (CRC) and coordinated by former news reporter turned-performance artist Norman B, who also performed at the event.

"The CRC supports [Jill Stein] because she is for the legalization of marijuana, and also [because she] is for the environment… and a supporter of gay rights," said Alex Delegas, treasurer of the CRC.

"[Marijuana] is better for the environment. You can have so many uses of it," said April Lachapelle, the president of the CRC.

"You can get hemp paper, hemp seeds which are good for vegetarians. Weed can also be used as a pain reliever," said Lachapelle.

Dan Melick, who is running for the Amherst-Granby area seat in the United States House of Representatives, introduced Dr. Stein to a group of about 40 students and local citizens.

Dr. Stein appeared youthful and focused despite graying hair and the long campaign season. She began by thanking the CRC and UMass for inviting her to speak.

Stein went on the offensive early against her opponents, Republican Charlie Baker and incumbent Governor Patrick.

"I'm in this race because if I weren't, we would just be hearing from three Beacon Hill insiders," said Stein, "and just be hearing about three different versions of business as usual that's just not doing the trick for us in all kinds of ways."

Dr. Stein criticized the Patrick administration and former administrations for systematically disinvesting in the state's higher education.

According to Stein, $600 million has been cut from funding of higher education in the last 10 years with a substantial amount of those cuts having happened under Governor Patrick's watch.

"We're told there's not enough money," said Stein, "what they really mean is that there is not enough money for you [college students], because there is plenty of money for other things."

"Like over $1 million in corporate tax giveaways to the well-connected, $300 million a year for the Raytheon and Fidelity tax breaks and for jobs that were supposed to be created, but never were," said Stein.

Several UMass students attended the speech, many from the CRC.

"I support Jill Stein and the legalization of marijuana," said Jessica Charnley, a freshman history major.

"[The legalization of marijuana] could definitely benefit the state, allowing more spending money for the schools, and we should change the drug laws so that so many people aren't being jailed," said Charnley.

In an interview after the presentation with Dr. Stein, the candidate elaborated on why UMass students should cast their vote for her on Tuesday.

"Don't throw your vote away voting for more of the same and more of what's failing us and more of what's raising your fees and tuitions and reducing your financial support and depriving you of jobs," said Dr. Stein.

According to Stein, her experience as a medical doctor prompted her to get active in the political process.

"Seeing our medical system failing and seeing kids walking around with diseases that you're not supposed to get until you're in old age, so it's the failure of the medical system all around that made me feel like I did not want to sit around dispensing pills and sending people out to what was making them sick," said Dr. Stein, echoing themes of pollution in her speech.

"The medical system also showed me that health insurance is not what we should be spending our health care dollar on," said Dr. Stein.

"There is a simple system, called the single payer system – like what they use in Canada – that could cut our healthcare costs by billions right out of the starting gate," said Stein, "So why not cut the cost of healthcare by cutting waste in the bureaucracy instead of cutting the care?"

Dr. Stein was involved in a physicians' group that tried to change the community drivers of health and disease.

"I learned after about 10 to 15 years of being an advocate that [legislators] don't change, when they are being paid not to change by the lobbyists and industries that are sponsoring their campaigns," said Dr. Stein.

Purcell called Baker and Patrick "corporate candidates" in his interview with the Collegian last week. The two candidates for Lieutenant Governor responded by saying that they could not receive campaign money from corporations.

Dr. Stein countered their claim that they do not receive money from corporations.

"They just take [the money] instead from the officers of the corporations," said Stein, "and the lobbyists who collect the donations from lots of members of the corporations."

Dr. Stein pointed out that 90 percent of the Massachusetts state government is run by Democrats, so the state senate could in theory overrule every decision made by the Governor. She advises the Mass. public to "vote with their conscience."

Norman B, whose real name is Norman Bie, performed a rock opera after the speech entitled "Protest PG," which detailed topics of the Pashtun genocide, Guantanamo Bay and the prohibition of marijuana. According to Bie, the other candidates for the gubernatorial race were contacted to speak before the performance, but all declined except Dr. Stein.

Bobby Hitt can be reached at rhitt@student.umass.edu.

Green-Rainbow Party candidate for governor Dr. Jill Stein speaks at the podium in the Student Union Ballroom on Thursday.

EDITORIAL@DAILYCOLLEGIAN.COM

Divided we fall

Harrison Searles

More Americans are disgruntled today with the state of the American system of government, according to an ABC/Yahoo opinion poll, than they have been in 36 years. This should be of little surprise to anyone who has been paying attention to the state of American politics recently. It has become a cliché truism to state that the United States is divided on long ideological grounds and that opposing sides have promulgated diametrically contradictory ideas of what the role of government is. It is easy to write off this increasingly fundamental fact of the political landscape of the United States as being a reaction against the policies of those in control of the Federal government, and that the solution lies in bipartisan compromise.

However, though the growing displeasure with the system of government may be influenced by unpopular decisions in Washington and politicians' attitude that "history will vindicate us", but this is too simple of an analysis because much of the reason why Americans are fractured politically is that many of the political opinions held by the opposing factions are simply irreconcilable.

Indeed, the periods of American history in which the country seemed the most united from a hindsight influenced by both myth and history are the times at which citizens have united towards a single end. Many have looked back upon the so-called "Greatest Generation" nostalgically as a time in which Americans were united behind Franklin Deleno Roosevelt's New Deal and then together in WWII against the Nazis and Japanese. Another time at which the United States seemed to be united is during the Kennedy administration behind both the Cold War and the space program. In both of these examples, so vivid in the mythology of American politics, it was not a random occurrence that America was politically unified. American politics were centered on issues in which there were not radical disagreements regarding the policies that the government ought to pursue.

> Americans are in disagreement about fundamental issues that are irreconcilable.

This is not the case in contemporary politics, debate today is not about what a policy should entail, but about the political paradigm that motivates the suggestion of a program in the first place. In the upcoming elections, the issues at stake are not merely opinions about the policies that the Federal government ought to pursue, but what is the role that it ought to play in society.

Members of the American right are not angered that the Democrats' healthcare bill had X and Y in it while lacking A and B, but they are vexed by the fact that it was passed in the first place. Despite how attractive President Obama's campaign message of bipartisanship might have been, its naïveté has been revealed in full during the last two years because it is simply impossible for him, along with the Democrats, to take a bipartisan stance since the policies they hold dear are necessarily partisan and the same is true for Republican stances. There is no unifying paradigm for the role of the government in American politics to provide the foundation for political compromises; instead, each side justly realizes that any such action would result in policies contradicting their political worldview. America is now host to political ideologies that are simply contradictory in application and that is a simple fact driving the polarization of politics.

It thus follows that any notion of bipartisan politics is rendered vain in today's political circumstances and that either there must be either an ascendant unifying view or a rethinking of how American politics will be done. The former option may very well be the more realistic of the two and a new thought may very well emerge in the next two years, but it could be argued that such a solution simply pushes the fundamental issue further into the future. A fact is that the modernization of society is multiplying the amount of problems in society and increasing the amount of knowledge in society in terms of orders of magnitude.

Whether it is the challenge posed by globalization, or that supplied by the shift in demographics the way American government operates will eventually need to evolve in order to be able to provide solutions to these. Furthermore, it is wishful thinking that all of a sudden radical groups like the Tea Party would be able to meet in the middle regarding questions of government policy. Instead, the American system of government must evolve to face the challenges of not only a vastly more complicated world, but also an environment in which citizens agree less and less.

Perhaps the problem is found in the fact that contemporary America places compromise in such high regard without realizing that perhaps rational disagreement, synthesized with federalism, may very well be a more fruitful avenue. As discussed above, Americans are in disagreement about fundamental issues of political paradigm that are irreconcilable, so perhaps what is needed for American politics is an increased emphasis on the political nature of the States.

Rather than being considered as little more than administrative regions, as they are all too often, it is time that they are considered true political communities in which political dialogue can occur. It is simply unnecessary to have political debates regarding issues like abortion, same-sex marriage and drug legalization at the Federal level, they can be handled at the state level and instead of having debates at the Federal level that go nowhere and obscure other issues like taking care of the out-of-control deficit.

If citizens who cannot live without a fully-automatic assault rifle decided to opt for no gun control in Texas, then why worry? Similarly, if citizens in a socially-liberal state like Massachusetts decide to legalize gay-marriage. If the issue can be handled by debates within smaller communities that not only allow for a greater role of the individual citizen, but also occur within more culturally homogenous communities, then why must that issue be centralized to a higher branch of government?

If one is really abhorred by the fact one's next door neighbor owns a small armory, then vote with one's feet and move to a state with tougher gun regulations. Such a scheme would also have the advantage of putting to the test many different sorts of policies in which States pass different laws, and the ones that are more effective than others at achieving the desired end will be mimicked by other states in a process of social evolution much like Karl Popper's suggestion of piecemeal social engineering. Furthermore, since States are smaller than the Federal government, they would be able to tailor policies according to the circumstances facing them.

Instead of expecting compromise on fundamental issues at the Federal-level, a system of live-and-let-live federalism would allow the States to disagree on those issues, and in doing so would be better suited for a political environment in which it is simply impossible to expect compromise on certain issues. Such a system would allow for key issues to be discussed and legislated at the state level, and would allow for individual States to embrace programs that would best fit the views of its political community.

Point-Counter-Point

"I disapprove of what you say, but I will defend to the death your right to say it." - Evelyn Beatrice Hall

Should we keep the sales tax on alcohol?

Vote "Yes" for tax freedom

Matthew M. Robare

The main thing most students have to worry about, besides from the apocolypse and the looming threat of midterm exams, is what we're going to buy at the liquor store. Since we don't have that much money anyways, it's not usually a problem. A 30-rack of Bud Light Alfredo (or whatever the most recent marketing strategy is to hide the fact that their selling carbonated water) won't set most of us back too much. But taxing it does raise the price, since the store owner, already out the money for a liquor license and with a mortgage or rent and debt to pay off, must do the rational, traditional thing and water down the drinks.

Okay, no – he must pass on the costs to us.

So not only is that Bud Light Chicago Deep Dish Style just water, it is expensive water, after taxes. Now, if you want an actual alcoholic beverage, like Colt 45 or Rubinoff, you need to be prepared to pay more. If you actually want to get drunk and forget about the recession because you have no future beyond underemployment in a fast food restaurant or, if you've been especially bad as an undergraduate, upon commencement you'll be condemned to eternal torment and damnation in graduate school.

Alcohol, then, is clearly vital to maintaining a firm grip on reality and protecting one's mental health, unless you're among the people who are stricken with problems controlling their intake. If you have a religious objection to drinking, as the Church of Latter-Day Saints and the vast majority of Islamic schools of thought do, then I respect your choice even if I don't understand it.

Fermented and distilled beverages are not only a vital thread in this country's history, but especially the history of Massachusetts. After all, the Pilgrims on The Mayflower were headed to Manhattan, but had to put ashore in Plymouth because they ran out of beer. Unfortunately, the first thing Squanto did when he met the new arrivals was ask them for beer, which was such a total party foul back then that it set back relations between the English colonists and the native Americans for centuries.

Later on, a Bostonian named Benjamin Franklin said "Beer is proof that God exists and wants us to be happy." Truer words were never spoken, especially about college. Around the same time, George Washington – patriot, president, Revolutionary general and an overall pretty OK guy – became the largest distiller in the country when Mount Vernon produced 11,000 gallons of whiskey in 1799.

Hard liquor has a darker side to it than regular beer. The trade in rum between Africa and North America formed a major leg in the transatlantic slave trade, and if rum-for-slaves wasn't bad enough, distilleries operated by plantations – like Washington's – were worked by slaves. During the 19th century, with clean water supplies limited, many people drank regularly for their daily liquid intake, and the alcoholism and violence that resulted from that added fuel to the Prohibitionist fire.

But back to the 1700s for a moment. During Washington's presidency we first learned the reason why taxing alcohol isn't a good idea: It annoys people. After Congress decided to tax whiskey, the farmers who made a lot of it for extra cash because it was easier to bring to market than the crops fermented an anger so strong it kicked off a genuine Whiskey Rebellion. It wasn't a Tea Party so much as a Bourbon Party, but people were still waving the Gadsden flag around and talking about the tyranny of Washington, only they meant George and not D.C.

Washington did the thing that any sound American president would do: He and Alexander Hamilton rode out there at the head of a small army, and their numerous muskets and bayonets convinced the farmers that, yeah, they had pretty good representation for their taxation.

It's easy to see the problems Massachusetts would face if the sales tax on alcohol remained in place. Beer and liquor would be brought back from New Hampshire and sold out of car trunks, tax-free. Governor Patrick (or Baker – who knows?) would be forced to enforce the law and they would get stuck in a quagmire for years, costing the state billions because they had completely forgotten there was any Massachusetts between the Berkshires and Worcester. They'd also drop like flies from dehydration because they'd be looking for "bubblers" and not water fountains.

It's just not worth a rebellion and the suppression thereof over Bud Light Tomato & Basil, so vote "Yes" on Question 1 Nov. 2. As for me, not only am I from Vermont, but I already voted. I think I'll have a beer.

Matthew M. Robare is a Collegian columnist. He can be reached at mrobare@student.umass.edu.

Vote "No" for the budget

Zach Weishar

On Nov. 2, 2010, voters across the state will cast their ballot to decide whom can best represent our state in public office. Along with these changes in personnel, the citizens of Massachusetts will decide whether or not to remove the sales tax on alcohol that was implemented on Jan 1, 2010. With no definite end to the recession in sight, ballot Question 1 has raised considerable controversy.

Many storeowners are up in arms over this issue because they have reported a drop in their alcohol sales since the implementation of the sales tax last year. Store owners attest that their products are now subject to an unfair double standard because both an excise and sales tax are now included in their product's cost. This has forced owners to cut hours, a move that has hurt many employees trying to make ends meet during this economic downturn. Storeowners bordering New Hampshire have been especially vocal about this issue because they claim that many of their regular customers are buying their alcohol across the boarder where there is no sales tax.

Before last year's vote, Massachusetts had never applied its sales tax to alcohol. This left the excise tax as the only source of income to be made by the state from alcohol; and also gave alcohol the same tax-exempt status that clothing, food and prescription medication.

By including sales tax in the price of alcohol, Massachusetts has tinkered its tax scheme to the majority of the other states in our nation. There are currently 45 states with sales tax. Of these states, all 45 apply their tax to alcohol.

Proponents of the bill point to the high sales tax in Massachusetts in conjunction with the excise tax as a reason that alcohol should be exempt. It is true that Massachusetts has a high sales tax in comparison with other states, with only nine states topping our rate of 6.25 percent. However, it is not true that this condition creates an unfair tax environment that is unrivaled in other states.

Despite the vendor's complaints about how unjust the new taxation is, Massachusetts actually has one of the lowest excise taxes on alcohol in the country. Nationwide, excise tax is broken down into three categories based on alcohol content. The categories are spirits, wine and beer, each of which is taxed by the gallon. Of the 50 states, 41 have a higher excise tax than Massachusetts in at least one of these three categories. Therefore, prior to last years vote, vendors in Massachusetts had a much lower overall tax rate on alcohol than is seen in most other states.

Last years vote brought the sale of alcohol in line conceptually with the rest of the state's tax policies. Throughout state history, voters have been eager to pile taxes onto items viewed as unnecessary or luxury items. Cigarettes are a shining example of this. Massachusetts has the seventh highest tax rate on cigarettes, a rate that is often considered for revision first when more tax money is needed. Consumers of alcohol should be made to support the commonwealth in the same way that cigarette smokers have always done by paying high taxes on their vice of choice.

If the sales tax is removed, estimations predict that the state will lose between $50 to $80 million tax dollars in the upcoming year. With our state's budget already two billion dollars in the red, I do not believe that any potential tax dollars should be turned away. Furthermore, the money collected from this tax goes directly to mental health services dealing with drug and alcohol addiction. These programs are extremely important to the well being of many of our state's citizens. It only makes sense that the funding for these programs should come from the same substances that caused the patients illnesses in the first place.

Our state should not give in to the demands of a minority at the expense of the majority. The fact that some vendors boarding New Hampshire have experienced a drop in their sales is no reason to deprive the state of much needed tax money. Compound this with the already low excise tax, and the repeal of the sales tax on alcohol clearly will not benefit the state.

Of course I have sympathy for those that are put out of work by this tax, even though I suspect the facts to be skewed by proponents of the bill. After all, is it really cost effective for most residents to spend the extra time and gas money to buy their alcohol at a rate six percent less than they could on this side of the border? It wouldn't seem so.

With all facts considered, I urge the informed voter to vote against Question 1 on the up coming ballot.

An a-maze-ing place

By Lily Hicks
Collegian Staff

Some neighbors spend time together sitting on each others' porches, talking late into the night. Some jog the sidewalks of their neighborhoods, exchanging the latest gossip in between breaths. Some neighbors don't interact much at all, managing the occasional "hello" when they cross paths.

Mike Wisseman and Will Sillin of Sunderland make art in a cornfield.

Warner Farm owner Wisseman and longtime friend and neighbor Sillin, an artist, teamed up in 2000 to fashion a design out of Wisseman's four-acre cornfield. Wisseman provided the medium and, Sillin, the design. They've been making art from corn every year since.

This year, a plane flying over the now eight-acre field gives a view of the Campbell's Tomato Soup can made famous by pop artist Andy Warhol.

"I'm gonna claim credit for that one," said Sillin of this year's design. In the past, Sillin and Wisseman have decided on designs based on suggestions from friends and family.

The two neighbors worried at first that the design would be "too avant garde," Sillin said, but the record 2,500 visitors Wisseman said came to the maze on Oct. 10, the Sunday of Columbus Day weekend, didn't seem to think so.

"Upwards of ten thousand people" navigate the stalks of cattle corn every year, said Wisseman. They come to explore the maze's many different features, which include trivia questions on art history (answer four out of ten correctly and you win a free pumpkin), a series of printmaking stations that create four separate images of famous paintings when completed, and a station skirting the maze where visitors shoot potato cannons fashioned out of PVC pipe at tin cans hanging on strings.

Features like these have become a staple of the Mike's Maze experience because Sillin's self-termed "fractured glass" design allows visitors to find more than one way out of the maze, making the task of getting in and out a lot easier than a one-track route would be.

"We quickly figured out we needed games" to supplement the maze itself, said Wisseman.

In addition to printmaking, trivia questions, and potato cannons, this year features rows of wind chimes stationed at various places throughout the maze which, when played lightly with a metal wand, sound tunes ranging from Pyotr Ilyich Tchaikovsky's "1812 Overture" to the theme for Star Wars.

"A key thing about making the maze is to give visitors something engaging to do," Sillin said. He added that he tries to make the activities something that adults will enjoy as well.

"I want them to have a good time as much as I want the kids to have a good time," he said.

A work of art has never been quite so vulnerable to the elements, and rainy seasons have at times caused Wisseman and Sillin to question the viability of their enterprise.

According to Sillen, fall of 2005 was "the year of multiple hurricanes." Sillin said the maze featuring Albert Einstein became so muddy and difficult to maintain that Wisseman and Sillin debated whether or not to risk having the same conditions again.

But enough people told the pair to try it again that they persisted, Sillin said. Lo and behold, their 2006 design featured the maze's most popular guest star to date: Julia Child.

"She was featured on NPR's Weekend Edition, American Public Media's Splendid Table, Vanidades magazine, and in the Aug./Sept. 2007 edition of Saveur magazine as well in the Boston Globe and a mention in the New York Times," boasts the Mike's Maze website.

In preparation for the maze, Wisseman plants the corn in three-foot-square plots. Come cutting time, Sillin then places a grid over his completed design and navigates the maze in twenty-foot-square sections, marking which stalks need to be cut down and which will stay.

Some of Sillin's more conventional artistic endeavors are painting and illustrating. One of his paintings, a mural of a Triassic landscape complete with dinosaurs, is on permanent display at Dinosaur State Park in Rocky Hill, Connecticut. A similar painting of Sillin's which depicts what Connecticut Valley may have looked like in the early Jurassic period is on display at the Amherst College Museum of Natural History.

When not working on the maze, Wisseman manages his farm, which sells strawberries, asparagus, sweet corn, peas and beans, peppers, cucumbers, tomatoes, pumpkins and squash over the course of the year. Warner Farm, first established in 1720, also has a Community Supported Agriculture program (CSA) managed in part by Wisseman and his son, David Wisseman.

Warner Farm and Mike's Maze are located at 25 South Main Street in Sunderland. The maze is open weekends and holidays from 10 a.m. to 5 p.m. until October 31. Students with IDs and seniors over 60 years old pay $8.00. Students without IDs and adults age 13 and over pay $9.00. The maze accepts cash only.

Franti to say 'Hey' to Noho

By David Brinch
Collegian Staff

Michael Franti wears many different types of shoes.

Singer, songwriter, poet and political activist are just some of the types he wears, but literally speaking, he prefers not to wear shoes or use water bottles – (except sandals when he absolutely has to).

Franti will likely be barefoot when his tour bus, which runs completely on bio-diesel, rolls into Northampton for a two-night stint at the Calvin Theater Nov. 1 and Nov. 2 with his band, Spearhead.

While most people know Franti by his 2009 hit, "Say Hey (I Love You)," off of 2008's "All Rebel Rockers," he has been performing as Michael Franti and Spearhead for over 16 years and has recorded seven studio albums infused with reggae, hip-hop, rock and folk. "Say Hey" peaked at No. 18 in the United States on the Billboard Top 100 and has been featured in a number of advertisements, while "All Rebel Rockers" reached No. 38 on the U.S. Billboard Top 200, making it Franti's most successful album to date.

Franti is touring to promote his new album, "The Sound of Sunshine," which was released on Sept. 21 by Columbia Records. While his lyrics are mostly uplifting, like in "Say Hey," most have political undertones directly tied to Franti's grassroots efforts as an advocate for social justice, the environment and global peace.

In 2000, he released "Stay Human," which pointed out through riveting lyrics Franti's anti-death penalty sentiment, along with globalization and the monopolization of the media.

He has played inaugural balls for President Obama, has spoken out for peace in the Middle East and has been a figure for adoptions in the United States while promoting groups like Soles4Souls, CARE, Amnesty International and other philanthropic organizations.

Franti is mixed and was put up for adoption out of fear from his mother that people would not accept him. He was adopted by a Caucasian family that already had adopted an African-American child while raising three biological children. It was there that Franti experienced true love and compassion, which he took to the University of San Francisco and began creating music with a punk band called the "Beatnigs."

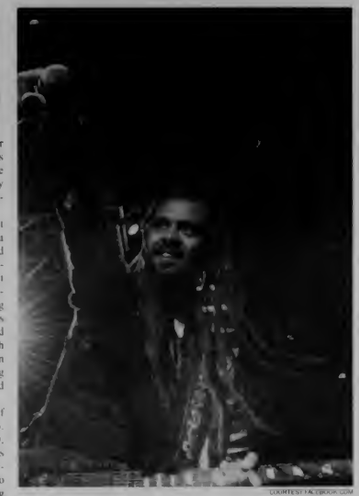
He insists that "The Sound of Sunshine," which reached No. 17 on the U.S. Billboard 200, was created to "bring all kinds of listeners a sense of hope during rough and rainy times for so many in our world," according to his website.

In August, Franti suffered from a ruptured appendix and almost died while on tour. He wrote most of the songs off the new album while in the hospital and reassessed his life before heading into the studio in Jamaica to work on his "arguably the most cohesive, romantic and life-affirming album" that the group has ever made.

He might not be wearing shoes Monday and Tuesday nights, but expect a strong two-night run from Franti, whose political messages and intellectual lyrics are just as inspirational as the reggae-infused rhythms and sounds he produces.

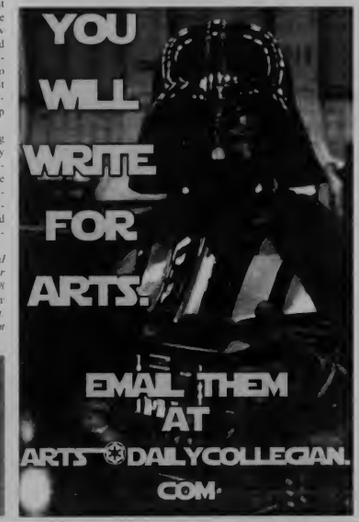
Michael Franti and Spearhead will perform at the Calvin Theater on Nov. 1-2. Both shows start at 8 p.m. and tickets are $32.50. Bobby Long will serve as the opening act.

David Brinch can be reached at dbrinch@student.umass.edu.



COURTESY FACEBOOK.COM

Known for his 2009 hit "Say Hey (I Love You)," Michael Franti will perform at the Calvin Theater on Nov. 1-2.



Editor's Note

To our readers:

With Halloween festivities going on all weekend, we at the Collegian would like to remind you to be safe and to make good decisions. When traveling to parties, bars or wherever your night brings you, make sure that you have a sober driver, utilize public transportation or make a taxi appointment earlier in the day. You might as well just walk if you're going to be drunk anyway; in fact, it might even make that hangover a little more tolerable in the morning.

We hope that you do have your best Halloween yet, but at the same time, urge you to use caution and to look out for your peers.

Have a Happy Halloween!

Justin Gagnon

Arts and Living Editor

JEFF BERNSTEIN/COLLEGIAN

Senior Ben Arikian ranks fourth in career assists at UMass after a helper in the last contest against Saint Joseph's. The midfielder has totaled six assists for eight points this year.

UM takes on Rams

By Michael Counos
Collegian Staff

The Massachusetts women's soccer team wraps up its regular season this weekend when they travel to play Fordham and La Salle.

UMass is currently fifth in the Atlantic 10 standings at 7-9 overall and 4-3 in the conference, while the Rams and Explorers are right on its heels at 3-3-1 in the A-10.

The Minutewomen begin the weekend on Friday at Jack Coffey Field against the Rams. Fordham is riding a two-game winning streak with wins over George Washington and Richmond. The Rams beat GWU, 2-1, and topped Richmond, 1-0, in overtime.

Fordham has been dominant at home with a 6-1 record in front of its home crowd, compared to a 1-7 record on the road. UMass, likewise, has struggled on the road at 2-6. On defense, the Minutewomen will need to be aware of Michelle Ancelj, who has five goals, as well as Katie McDermott and Mariella Romano, each with three.

"Fordham is very organized and extremely well coached," UMass coach Ed Matz said.

La Salle, meanwhile, is coming off a pair of wins last weekend, defeating George Washington, 1-0, on Sunday and Richmond, 1-0, on Friday. The Explorers are 3-1-1 at home with a high-powered offense led by Renee Washington and Anna Dolhansky, who each have eight goals.

"La Salle has a very strong offense that our defense will need to play very tough," Matz said.

UMass will be tested on the offensive side of the ball as they face Gabby Pakhtigian between the pipes. Pakhtigian has played every minute of the season and is sporting a 1.44 goals against average, allowing just 27 goals while turning away 91 shots. UMass was defeated 3-1 by the Explorers last year on Oct. 9, as senior Sydney Stoll had the lone goal, assisted by senior midfielder Therese Smith.

"Both games this weekend are meaningful games as Fordham and La Salle are fighting for a playoff spot like us," Matz said. "These games will almost be like a mini playoff series I imagine."

The Minutewomen are coming off a successful weekend double-header resulting in wins over Temple and Saint Joseph's at Rudd Field. UMass edged out the Owls, 5-0, on Friday, with all five goals coming in the first half, including a three-goal performance by junior Deanna Colarassi.

Sunday, which served as Senior Day, was the perfect storybook ending for the Maroon and White's graduating class. The Minutewomen won 1-0 over the Hawks as Smith scored the golden goal with just over three minutes left to play in the first overtime. Jess Howe sent a shot that deflected off a Hawk defender and came to Smith who finished the shot into the right side of the net for her seventh score of the season. The victory marked the highest win total for UMass since 2007.

"Our games have been close all year and our team has been playing with high intensity and hopefully the success that we have had at home will carry onto the road this weekend," Matz said.

Michael Counos can be reached at mcounos@student.umass.edu.

Hosting A–10 foes

By Eric Mansfield
Collegian Staff

The Massachusetts men's soccer team will host Fordham and La Salle in its final two home games of the year this weekend. Fordham will visit Rudd Field on Friday for a 2:30 p.m. start and La Salle will visit Sunday at 1 p.m.

The Minutemen, who are in second place in Atlantic 10 play with a 4-0-1 record, are coming off a pair of 1-0 wins against Temple and Saint Joseph's last weekend.

Fordham and La Salle have each won five of their last seven games.

"My feeling is that we will play the way we need to play," UMass coach Sam Koch said. "The Fordham game is a game that could go either way. If we play well I think we're going to be in good shape. If we make mistakes and don't play well, it'll be a tough 90 minutes."

The Rams are coming off of a weekend split of games against Richmond and George Washington. The Rams lost to the Spiders, 1-0 and defeated GWU, 3-0.

La Salle, meanwhile is coming off of wins against both Richmond and George Washington.

"It's crucial for [us] to get results," Koch said. "It's another test, it's like midterm exams. I mean we're playing at home so obviously that's good. We've got two teams right behind us, tied for third place. [They are] big weekends for them."

Fordham is in a six-way tie for fourth place in the conference with La Salle, Richmond, Temple, St. Bonaventure and Xavier.

Fordham is also tied for third place in the overall conference standings with Dayton University.

"It's a big game," Koch said. "Playing at home is easier for us, but it doesn't matter where we play the game. We're focused, it's vital that we come in with the right frame of mind, the way we did against Saint Joe's, as a whole team, and if we do that, we'll be alright."

In their last game against the Hawks, the Minutemen were able to take the lead for good in the 81st minute with a goal by junior forward Bryant Craft. The goal was assisted by senior midfielder Ben Arikian, who now ranks fourth in career assists at UMass.

All-time, the Minutemen are 10-4 and 12-3 against Fordham and La Salle, respectively. The Minutemen did not face the Explorers last season, but dropped their match to Fordham, 1-0.

UMass has not lost in their last seven games, going 4-0-3 in that span, with the defense allowing one goal in five conference matchups.

Seniors playing in their final home game on Sunday will be midfielders Stuart Amick, Ben Arikian and Chris Vaccaro, as well as goalkeeper Chris Piekos.

Eric Mansfield can be reached at eamansfi@student.umass.edu.

JEFF BERNSTEIN/COLLEGIAN

Sydney Stoll looks to score in a victory over Temple earlier this season. The Minutewomen head to New York and Philadelphia to finish out the A-10 regular season.

Head of the Fish on tap for UMass

By Michael Wood
Collegian Staff

With two games remaining on the regular season schedule, the Massachusetts field hockey team is preparing to transition into Atlantic 10 tournament play, but first it has to get past West Chester and La Salle this weekend.

The Minutewomen (11-6, 5-0 A-10) are unbeaten in conference play and will look to stay perfect in the A-10 for the second time in three seasons. The last time UMass accomplished this was in 2008, when the team went on to win the A-10 tournament, but lose in the first round of the NCAA tournament to Syracuse.

The Maroon and White hold a seven-game winning streak, currently the fourth-longest winning streak in the country, and have not lost a game in over a month. The last loss the team suffered was on Sept. 26th against Albany, which remains the only blemish on its home schedule as well.

"I think we generally tend to prepare our girls for what's coming the next weekend pretty well," UMass assistant coach Kelly Dostal said. "They've been doing a really nice job implementing what we've been working on [in practice]. We've been passing the ball a lot more and we've done better on [penalty] corners. Right now the whole coaching staff is very pleased with the team and I think we're in a pretty good spot moving forward."

Being the top team in a conference often allows a team some breathing room and the ability to play a little easier. This can be seen in professional sports all the time, but staying true to their philosophy from the first day of practice, the Minutewomen are preparing for one game at a time.

"You look past these two teams and suddenly you end up losing a game to a team that's 1-4 in the conference and suddenly your top seed is in jeopardy," Dostal said. "We're still preparing for these games just like we've prepared all season. We're looking strictly at Friday's game now and we'll prepare for Sunday's after that."

West Chester (5-11, 1-4 A-10) is in the midst of a five-game losing streak and coming off a 3-0 shutout loss to the second-place team in the A-10, Lock Haven. The Golden Rams have been shut out in three consecutive games and are winless in three overtime games this season.

La Salle (6-11, 1-4 A-10), meanwhile, has lost three straight contests including a 1-0 shutout to third-place Richmond.

The Golden Rams and the Explorers are both long-shots to make the A-10 tournament at the end of the season, as only four teams qualify. So, with both teams on losing streaks, the Maroon and White are prepared to face the best each squad has to offer.

"We try to keep the focus on us as much as possible and on what we need to do to get better," Dostal said. "It's a good problem to be the top team in the conference. Teams do bring their best against us, which is exciting. It gives us an additional challenge and reminds us we have to play our best when we come out against these teams [no matter what their record]."

The Minutewomen will face West Chester at 3 p.m. on Friday and will close out their regular season on Sunday at noon at La Salle.

Michael Wood can be reached at mcwood@student.umass.edu.

MICHAEL WOOD/COLLEGIAN

Though UMass is atop the conference standings, Lock Haven is on its heels with a 4–1 record. The Minutewomen, however, defeated the Lady Eagles earlier this season.

GEOFF KING/COLLEGIAN

Katie Kelly and the rest of the Minutewomen huddle up in a game earlier this season. Seniors Makaela Potts and Kelly have combined for 15 total goals so far.

Practices paying off

By Pete Vasquez
Collegians Staff

The Massachusetts field hockey team is not coasting with the Atlantic 10 regular season title just yet. Despite guaranteeing themselves a spot in the A-10 tournament next weekend, the Minutewomen still have much to be determined.

UMass is the only undefeated team in the A-10 with a 5-0 mark. But Lock Haven is only one game behind, with a 4-1 conference record. Therefore, in an extreme scenario, the Minutewomen could still forfeit the top seed if they were to lose both games against West Chester and La Salle, while Lock Haven beats both Saint Joseph's and Temple at home.

The other threat for UMass is Richmond, a team owning a 3-2 conference record, as well as holding last year's regular season crown. Richmond hosts Temple and SJU this weekend, just like Lock Haven.

The Minutewomen, however hold a distinct advantage after defeating both the Lady Eagles and the Spiders earlier this season. Therefore, even though Lock Haven may have a better non-conference record than UMass, the Minutewomen would still hold a higher seed than the Lady Eagles based on their 2-1 win on Oct. 15.

Situational practices

By this time of year, the Minutewomen have placed much emphasis on the major aspects of the game such as penalty corners, passing, attacking with purpose and defending within the circle. Now, the players are focusing on specific game situations and trying to mimic pivotal game scenarios, which can be the difference in winning or losing a close game.

These scenarios include: being one goal up with less than five minutes remaining and vice versa, being a player up as well as a player down and playing penalty corners after time has expired in the half.

"It's up to them to take what we've been working on in practice and actually put it into a game," UMass assistant coach Kelly Dostal said. "They have been doing a real nice job of implementing what we've been working on. We're pretty pleased with the team."

While the Minutewomen are not taking this weekend's games lightly, they are still using some of their practice time to develop a few strategies that could potentially be used in tournament play.

"Looking past this weekend is definitely something that we're not doing at all, but knowing that we've qualified for the A-10 tournament, we're definitely preparing to have tricks in our bag for the tournament weekend," Dostal said.

Underclassmen contributing

Throughout the season, the Minutewomen have relied on seniors Katie Kelly and Makaela Potts to do the bulk of the team's scoring. The two have combined for 15 goals, exactly half of the team's total mark.

"We've been talking a lot with the [players] about how Potts and Kelly are going to be keys for teams," Dostal said. "They're going to target those two players because they do have such an attacking presence, that we need other players to start stepping up. We've been encouraging our young players, saying the responsibility is going to fall on [their] shoulders. So [they] have to take that and make something happen with it."

Recently, the underclassmen have answered the call. Freshman Mika Black scored her first career goal this past Sunday against the Hawks. Sophomore Nicole Cordero, who had the assist on Black's goal, scored one of the two critical goals against Lock Haven as the Minutewomen edged the Lady Eagles by one score. It was Cordero's well-timed first goal of the season.

In the last four games, UMass has scored a total of nine goals. Only three of those nine have come courtesy of either Kelly's or Potts's stick. With junior Thando Zono back in the mix after a head injury, the Minutewomen have had a much more balanced attack. Zono, who only enrolled at UMass last spring, has netted four of the last nine goals.

Film

Edvard Munch

(1974, dir. Peter Watkins)

"Considered by some the greatest film about an artist ever made, Peter Watkins' feature focuses on Munch's formative years, a life marked by the absence of intimacy. A long, diaries effort with an older woman puts the ubiquitous ghosts of a childhood scarred by sickness and death. In the end it's the paintings which do Munch's talking for him. A remarkable film (Giovanni Buttorini)" (imdb.com)

"Blood is really warm, it's like drinking hot chocolate ...But with more screaming"

—Ryan Mecum

HOROSCOPES

aquarius Jan. 20-Feb. 18
Many classic horror icons share common characteristics: Pale skin, dark, sunken eyes, elongated faces, sharp teeth etc.

pisces Feb. 19-Mar. 20
These images incite horror in many, for good reason. The characteristics shared by these faces are imprinted in the human mind.

aries Mar. 21-Apr. 19
Many things frighten humans instinctively. The fear is natural, and does not need to be reinforced in order to terrify.

taurus Apr. 20-May 20
The fears are species-wide, stemming from dark times in the past when lightning could mean the burning of your tree home...

gemini May 21-Jun. 21
...thunder could be the approaching gallops of a stampede, predators could hide in darkness.

cancer Jun. 22-Jul. 22
The question you have to ask yourself is this:

leo Jul. 23-Aug. 22
What happened, deep in the hidden eras before history began that could effect the human race so evenly as to give...

virgo Aug. 23-Sept. 22
the entire species a deep, instinctual and lasting fear of pale beings with dark sunken eyes, razor sharp teeth...

libra Sept. 23-Oct. 22
and elongated faces? These specific physical features appear cross culturally.

scorpio Oct. 23-Nov. 21
The Bogeyman. Vampires. Demons. All the things that go bump in the night. Why do people imagine them the same?

sagittarius Nov. 22-Dec. 21
Somewhere, lost far in the caverns of the memory of our species, we knew that there was something else, distinctly other.

capricorn Dec. 22-Jan. 19
Just be careful out there.

DECISION 2010

Two candidates seek office in Massachusetts' 6th Dist.

COURTESY HUDAKFORCONGRESS.COM

Bill Hudak is an attorney from Boxford running as a Republican for Congress.

COURTESY JOHNTIERNEY.COM

John Tierney has represented the sixth district of Massachusetts for 14 years.

By Chris Shores
Collegian Staff

14 years ago, lifelong Salem resident John F. Tierney edged out incumbent Peter G. Torkildsen by just 400 votes to become congressman for Massachusetts' Sixth District.

Since the 1996 election, Tierney has become a regular in the House of Representatives, winning reelection seven times, collecting over 68 percent of the vote in each of the last four elections. To gain an eighth term, he will need to defeat Bill Hudak, an attorney from Boxford with no former political experience.

Hudak isn't concerned with his inexperience in politics, however. In fact, he believes it will allow him to do the job better.

"I am a big believer that you don't need to have political experience," he said in a phone interview. Those who do can "get tied down with the mechanics of politics, instead of being able to truly focus on what the problems are," he explained.

"I am not a professional politician," he added. "I look at a problem and it doesn't matter to me whether it's a Republican idea, Democratic idea, [a] liberal or [a] conservative idea. It's a matter of solving the problem with the most creative and logical matter that we can solve it."

In his 27 years as an attorney, Hudak said he has fought for the "interests" of people, something he would continue to do in Congress if elected. But he also noted that he believes in "limiting government," an issue he says that Tierney and himself "couldn't be more opposite" on.

Hudak commented that Tierney has consistently voted for higher taxes, which can cripple a business.

"I would always tend to reduce taxes so that businesses have more to spend, whereas he would try to punish them by taxing them and redistributing their wealth to nonproductive sectors of society."

Tierney could not be reached for comment, but said in a recent debate that Hudak's claims were incorrect, as reported by the Lowell Sun. He clarified his positions on tax cuts, saying that he advocated extending tax cuts on families that make less than $250,000 a year and on individuals who earn less than $200,000 annually.

"Every economist will tell you that the problem is, we need to get the economy going and people need to start spending," said Tierney in the debate.

In a recent campaign ad, Tierney also stressed the importance of "creating [and] saving jobs."

"I'm focused on creating jobs," he said in the television spot. "We have a work ethic here in Massachusetts and people just want the opportunity to work. We have the ability here to be the best trained, best skilled work force around."

In the last four decades, a Democrat has held the congressional position in the sixth district for 37 of 41 years. Torkildsen's two terms in Congress prior to Tierney were the first by a Republican in the post since their 82 consecutive year reign of the position ended in 1969.

Despite the overwhelming success Tierney has seen in recent elections, Hudak still believes he has a chance to win in a district he called generally "very conservative."

"I don't believe this district is completely blue," he said, citing the district's prevailing support for Scott Brown in January's special senatorial election.

"The only reason we don't have a two-party system is because the Republican Party has not done a good job to field good candidates. At least the district I'm in… the demographics point to it to be a Republican conservative district."

New names on the ballots

Olver faces off against challengers Gunn and Engel

By Nick Bush
Collegian Staff

As voters go to the polls tomorrow, those who are casting their ballots in Amherst will find two new names in the First Congressional District race, as Republican candidate Bill Gunn and Independent Michael Engel campaign to unseat well-established Democratic incumbent John Olver.

Gunn, a small business owner from Ware, has been a local organizer of the Western Massachusetts 912 Project in past years. His campaign has benefited from the rampant anti-incumbent sentiments clear across the country this year, but it remains to be seen if that will be enough to overcome the strong local support for the well-known Olver. Gunn's campaign has been endorsed by Sen. Scott Brown and former Massachusetts Gov. Mitt Romney, and supported by the Tea Party Express.

Independent candidate Engel, a former professor emeritus of political science at Westfield State College and owner of Cherry Picked Books in Easthampton, has been positioning himself as an independent progressive alternative to Olver while harnessing some of the same anti-incumbent feelings amongst the electorate as Gunn.

Victory for Olver this election cycle would mark two decades representing the First District in Congress. Olver, who once taught chemistry at the University of Massachusetts and has lived in Amherst since 1963, has faced stiffer resistance this year on each side of the political spectrum than in recent times he has sought reelection.

"I'd like to create more jobs with investment in green energy and energy conservation-focused engineering and technology," said Olver when asked about his goals if reelected in an interview with the Daily Collegian. "I would also like to bring our combat troops home from Afghanistan and pass economically advantageous, border-securing, comprehensive reform of our immigration policies.

"I think the citizens of the First District trust me to stand up to large corporate interests when that is necessary to protect families, seniors, and consumers in general," said Olver. "When Wall Street, health insurance companies, pharmaceuticals and oil companies go too far or are willing to put their short-term financial gain ahead of the good of the country, I will hold them accountable and re-assert the interests of the public.

"[Constituents] can also trust me to protect the shared natural assets that are critical to our survival: The air we breathe, our fresh water, our climate, our wild and public lands, and the earth's other vital resources."

Olver's competition has their work cut out for them if they intend to unseat the nine-term incumbent. Despite the Republican gains made in Massachusetts since the last election, including the special election of Scott Brown to the Senate and the rise of the Tea Party to public prominence, an upset victory by Gunn in the First District race would be a major surprise.

The first District spans parts of Berkshire, Hampden, Hampshire, Franklin, Worcester and Middlesex Counties, which account for a major portion of Western Massachusetts. It includes almost all of rural Massachusetts – which historically has voted Democrat, except for the rural eastern areas of the district north of Worcester that consistently vote Republican. This is noteworthy because most Democratic-leaning districts are typically found in more urban areas, making the First District time and again one of the bluest rural districts in the country, along with those from Vermont and California. The First District currently has a Partisan Voting Index (PVI) of +14, which shows it leans heavily blue; it is listed as the fourth-most Democratic district in the Commonwealth, and the 79-most Democratic of the more than 400 in the nation.

Republican challenger Gunn is hoping to do better than Olver's last Congressional GOP opponent, Republican Nate Bech, who drew only 27 percent of the vote in the 2008 election to Olver's 73 percent.

"My primary goals if elected would be to reduce our debt, repeal the health care bill and shatter voter apathy by presenting a government responsive to the people," said Gunn in an interview with the Collegian last Friday afternoon. "The main issue in this campaign is our economy, and reducing government spending – accompanied with a reduction in taxation. One without the other would be pointless."

Gunn urged voters to "stay engaged," noting that "apathy is leading to our demise, to polarization and to life-long incumbents … Governments that become tyrannical always start with an apathetic public."

Independent candidate Engel has been endorsed by the Green-Rainbow Party, whose gubernatorial candidate Jill Stein is supported by Engel.

"I'm concerned that our democracy is evolving into a corporate state, and I want to fight that," said Engel in an interview

HANNAH VAN VOORHIS

Democratic incumbent John Olver (far right) debated Republican candidate Bill Gunn and Independent Michael Engel in a forum in Amherst several weeks ago.

Frank fights for Fourth

By William Perkins
Collegian Staff

If there's only one thing the candidates in Massachusetts' Fourth Congressional District agree on, it's that one of the biggest issues facing the country right now is the economy.

But how to deal with that issue is one of the many divides reflecting a stark contrast between incumbent Democratic U.S. Rep. Barney Frank and Republican challenger Sean Bielat, competing in a district comprised of towns and cities in the southeastern corner of the state, including Newton, Taunton and Fall River.

Frank, a 70-year-old Newton lawyer who's been in the House since 1981, said that one of the primary reasons he is running for reelection is to ensure that the financial regulatory reform bill, passed last July, is implemented smoothly.

"I want to make sure it's turning out right," Frank said of the law during a phone interview with the Daily Collegian last week.

COURTESY WIKIMEDIA COMMONS

Frank has represented the 4th district since 1981.

COURTESY WWW.SEANBIELAT.ORG

Sean Bielat is challenging Frank as a Republican.

"The Republicans have talked about trying to undo [the bill]. I think it's very important for avoiding the kind of disaster we had before," added Frank, who has served as the chairman of the House Financial Services Committee since 2007.

The law, officially known as the Dodd-Frank Wall Street Reform and Consumer Protection Act - named for its sponsors, Frank and Senator Chris Dodd (D-Conn.) - imposes some of the most sweeping regulatory reforms since the Great Depression. It creates new regulatory bureaus and places stricter regulations on the banking and credit industries.

Bielat, a 35-year old ex-U.S. Marine and business consultant from Brookline, is making his first foray into politics this election season.

He believes the financial reform law regulates too many entities that didn't have an effect on the recent financial crisis, said Lisa Barstow, his campaign director of communications.

See FOURTH on page 2

Proposition 19 gives CA voters chance to legalize marijuana

By Simone Shenny
Collegian Correspondent

United States Attorney General Eric Holder informed former heads of the Drug Enforcement Adminjstration that the federal government will continue to enforce marijuana laws in California even if the state votes to legalize the plant.

Holder promised to follow through with marijuana law enforcement even if state Proposition 19 is passed Tuesday. Proposition 19 is the Regulate, Control and Tax Cannabis Act of 2010. It will appear on the statewide ballot in Calif. on Nov. 2. If Proposition 19 passes, California will be the first state to legalize marijuana.

Proposition 19 would make marijuana legal for people over 21 years old, and allows businesses to tax marijuana and regulate sales. It will also allow for various civil and criminal penalties. The official advocacy group for this proposed law is Tax Cannabis 2010.

The federal government has not legalized any type of cannabis. Under federal policy, marijuana is illegal for all uses. Medical marijuana has been legalized in some states and decriminalized in some states. Yet, the federal government can override these laws and take action.

The National Organization for the Reform of Marijuana Laws (NORML) does not seem to be too concerned with Holder's promise.

"It's a pretty hollow threat," said Executive Director of NORML Allen St. Pierre. In 1996, the federal government made the same promise if medical marijuana was to be legalized in states, explained St. Pierre.

Today there are approximately 2,400 medical marijuana dispensaries. Colorado, New Mexico, New Jersey, Rhode Island, Washington D.C., and Maine all allow licensed taxation of cannabis used for medical purposes. For the past 14 years, the federal government has not enforced its policies upon the state governments in regard to this issue.

If Proposition 19 passes, and the federal government still plans to enforce policy on local government, roughly 99 percent of people will face no problems if choosing to use marijuana, said St. Pierre. The federal government is only concerned with people who have over 1000 pounds of marijuana or 1000 plants. Anyone who possesses less than this amount will most likely not face any issues from the federal government.

Frank and Bielat battle for Fourth district seat

FOURTH from page 1

"The bill creates 20 new bureaucracies," Barstow told the Collegian, adding that Bielat feels the roughly 2,300-page document lags in regulating certain financial sectors, such as troubled mortgage backers Fannie Mae and Freddie Mac.

"It creates new bureaucracies that had nothing to do with the financial meltdown," Barstow reiterated.

Frank also opined on Fannie Mae and Freddie Mac, telling the Collegian he supports abolishing the two organizations that have received significant government backing since they were put in a conservatorship in 2008 as a result of the subprime mortgage crisis.

"They'll be abolished and replaced by purely private entities," Frank said, adding that he believes the dissolution of the two organizations will happen within the next year.

And the differences between the two candidates do not end with the economy, as both men have expressed different views regarding health care reform.

Frank, who voted in favor of the health care reform bill signed into law earlier this year by President Barack Obama, said he supports a single-payer healthcare system.

"I was for a single-payer system," he said, likening a single-payer approach to Medicare, which he said "works very well."

Since a single-payer approach didn't garner enough support on Capitol Hill, Frank said he wants to make sure the health care bill which passed is implemented effectively.

Bielat has expressed his opposition to the health care bill, and Barstow said he supports a type of reform that involves "more freedom and more choice."

"He thinks that ObamaCare is the wrong approach," Barstow said of Bielat's stance on the issue.

Both candidates also have slightly different stances on the military's controversial "don't ask, don't tell" policy, which bars openly gay men and women from serving in the armed forces.

Frank, who is openly gay, said he supports a complete abolition of the policy.

"I'm hoping we will finish up on 'don't ask, don't tell' when Congress returns" said Frank.

Bielat, Barstow said, would support an abolition of the policy if it's determined no longer feasible after a close exam by the U.S. Department of Defense.

"You don't just change something like this overnight," Barstow said.

Additionally, in his interview with the Collegian, Frank touted his support for working across party lines to support a cutback on military spending - something he declared a top priority. He said he's been working closely with Rep. Ron Paul (R – Texas) on an initiative.

Barstow also told the Collegian that one of her candidate's top priorities is job creation.

A poll of 400 likely District 4 voters conducted from Oct. 14 to Oct. 17 by Providence television station WPRI gives Frank the edge in the race, with 49 percent of respondents favoring him to 37.3 percent favoring Bielat. But Bielat trumps Frank 44.1 percent to 34.8 percent in the survey's body of Independent voters.

Bielat has also picked up endorsements from Arizona Sen. John McCain and former Alaska Gov. and vice presidential nominee Sarah Palin. But despite the Palin endorsement, Barstow said Bielat does not necessarily align himself with the 2008 Republican vice presidential candidate.

"Sean welcomes the endorsement of everyone," Barstow said, adding that her candidate differs with Palin on several issues.

WANTED:
Student Conduct Hearing Board Members

A great experience for students who:

Are interested in student leadership
Wish to enhance communication skills
Want to build their RESUME
Want to learn about the University's Student Conduct system

Requirements include:

Full-time enrollment *2.0 GPA or higher* *No current discipline sanction*

You need to attend *one* of the training sessions.

Thursday, November 4, 4:00 – 6:00 p.m., 911-15 Campus Center
Monday, November 15, 3:00 – 5:00 p.m., 174-76 Campus Center

Applications available at
Dean of Students Office, 227 Whitmore
Student Government Association Office, 420 Student Union

-Please submit applications to the Dean of Students Office-

Any questions? Please Contact:
Dean of Students Office, 227 Whitmore

DON'T MISS OUT ON THIS EXCELLENT OPPORTUNITY!!!

Calif. votes on pot legalization measure in elections Tuesday

WEED from page 1

"Approximately 13 percent of California's state budget goes to jails, and keeping convicts in jail. A portion of these people are low-level marijuana dealers. They are some of the people that are costing so much in state budget. Therefore it makes more sense for us to legalize marijuana, tax production of marijuana and save money on imprisonment," said Danielle Marshall, a student at the University of California-Berkeley.

According to "Yes on 19," an advocacy group for marijuana legalization, the three main changes that will be made if the question is enacted are: marijuana would be controlled like alcohol, the bill would direct police priorities away from marijuana enforcement and towards violent crime, and it would generate billions of dollars in revenue.

Those against Proposition 19 say enacting this law will allow people to smoke marijuana immediately before operating a vehicle, which they argue will increase the amount of accidents associated with drivers under the influence, according to another advocacy group, No on Proposition 19.

The federal government will enforce policy on those who do possess large amounts of marijuana. For example; California resident Todd McCormick was arrested for possessing thousands of plants, according to St. Pierre. Eddy Lepp, a Vietnam veteran, is currently serving a 10-year prison sentence for "conspiracy and cultivation with the intent to distribute marijuana." Lepp was growing over 20,000 marijuana plants at his home in Northern California.

Supporters of Proposition 19, a ballot question that would legalize marijuana, have been campaigning across California for the measure.

New technology affects political pollster results

By Nancy Pierce
Collegian Correspondent

Political pollsters are having a difficult time receiving responses from residents due to diminishing landline phone use and increasing cell phone use.

Brian F. Schaffner, an associate professor in the Political Science Department at the University of Massachusetts, and Stephen Ansolabehere, a professor in the Department of Political Science at Massachusetts Institute of Technology, found in a recent study that "one in five households rely solely on cell phones."

MCT

As less people have land-line phones, survey results are changing.

Schaffner estimates that between 35 and 40 percent of call recipients are difficult to reach.

The traditional methods of conducting political polls and surveys to the public needs modification to keep up with the population's changing habits, say the two researchers. Responses from residents are more difficult to receive since the shift from family home phone usage is increasingly moving toward mobilized individual cell phones. Before the age of cell phones, residents could typically be reliably reached on their home phones. Now that people generally have multiple phone lines, it is more difficult to get an accurate unbiased sample from a population.

"People with land lines tend to be older, they are more likely to have families and children, and they tend to move around less. And because of these characteristics, they also tend to be more Republican than people with only cell phones," Schaffner said. This produces results with Republican bias and excludes those younger, more Democratic residents.

According to Schaffner, Survey USA and Rasmussen Reports are both large opinion research organizations that don't include cell phones in their contacts.

The prominent survey-conducting firm www.surveyusa.com states on its website that "no other public opinion pollster has the breadth and depth of Survey USA." The organization has completed some 24,000 research projects and interviewed 36 million Americans.

SurveyUSA ensures viewers that "the probable residential phone numbers that SSI sells to SurveyUSA are just that: phone numbers. They do not come with names, addresses, skin color, income, education, or any other characteristics. We don't know anything about you before we start asking questions." While the phone numbers themselves are unbiased and completely random, they are not an accurate representation of the population as a whole, since these numbers are solely based on residents that have land-line numbers, according to the two researchers.

The solution to ensuring that political polls are accurate seems to be elusive. Schaffner notes that pollsters have tried calling both land-line and cell phones, but that method turns out to be very costly and still proves shoddy at retrieving responses. He also says pollsters try to utilize Internet surveys, but they aren't always effective, considering some do not have access to computers.

Because there is no feasible solution, Schaffenr said "pollsters do work to try to adjust those samples after the fact to make them look more representative."

On adjusting the data he explains, "The techniques require some expertise in statistics, but the basic notion is that if you have fewer of some group [younger demographics] in your sample than you should have, you weight the data so that each young person who is in your sample counts more to make up for the shortfall."

Voting in the Valley:

Candidates run to represent the First District

COURTESY FACEBOOK.COM

Engel is running as an Independent.

LINDSEY DAVIS/COLLEGIAN

Olver, the incumbent, is seeking his 10th term.

COURTESY FACEBOOK.COM

Bill Gunn, a Republican, is a first-time candidate from Ware.

FIRST from page 1

with the Collegian. "The incumbent, John Olver, has lost touch with his constituency, supports failed Democratic Party policies and has failed to deliver for his district. I have the qualifications and experience to be an effective independent member of Congress."

When asked what distinguishes his vision from that of the other two candidates, Engel was quick to reinforce his political independence.

"My views can't be reduced to a one-word ideological label, although I have a clear and consistent set of political values," he said. "What distinguishes me from them is independence from a party line, which gives me the freedom and flexibility needed to respond to my constituency, rather than to party leadership."

"My campaign message is 'The old system is broken – let's start building a new one,'" said Engel. "This resonates with voters I have spoken with. Our primary goals once elected would be listening to, working with, advocating for individuals and groups in the constituency who have creative, innovative, and ecologically responsible ideas about reviving our economy and putting people back to work ... [I would be] the kind of representative who is not afraid of honest and direct communication with constituents."

One of the defining aspects of this election cycle, both nationally and locally, has been the mixed reaction to last year's health care bill passed by Congress and signed into law by President Obama.

"One thing I've noticed is the lack of responsiveness of the incumbent to the constituents of the First District," said Gunn. "Quite a few people were appealing to [Olver] during the health care debate, and he did not respond."

When asked whether he thought the health care reform was a success, considering his past support for a single-payer health care system, Congressman Olver said he thought the bill has been "a large success."

"The legislative process to create this reform law took up much of the 111th Congress' two-year term and was a very hard-fought battle, but the initiative to reform health care, cut insurance costs, and provide for both the uninsured and those living one paycheck away from having no health insurance has been going on for decades," said Olver.

"The most critical thing at stake in this election is the fate of the new health care reform law. Republican candidates are campaigning on a promise to repeal the law, and that's not just an empty campaign promise. They actually mean it. If they can't outright repeal it, they would do their best to stymie the law's full implementation, even to the point of defunding it or the federal agencies responsible for administering the law.

"The second most important issue is the federal budget deficit. Republicans would love to make all of the Bush tax cuts permanent, even for the very highest income-earners. The Republicans did not make them permanent when they enacted them in 2001 and 2003 because the cost of doing so was correctly judged to be way too high. That analysis has not changed, and the cuts should be allowed to expire for the wealthiest Americans," Olver explained.

"My campaign is resonating with voters because I am talking about community involvement," said Gunn. "When one looks at the progressive ideals, ultimately they are decreasing our sense of community, and people are figuring that out."

Gunn noted that he strongly supports Federalism and maintaining state autonomy in the face of federal law.

"The closer the control of government is to the individual, the more empowering it is for the individual," said Gunn. "I feel that empowerment is common to progressives and libertarians alike. That is resonating with voters – everybody values freedom and liberty. I don't consider myself a liberal, but a lot of the liberal people that I've spoken to value local control and local values, and a sense of community."

Gunn did have some praise for his opponents, noting that "one thing that I appreciate is that all three campaigns have been quite respectful – and that's been a great service to the First District. I'd like to commend both of my opponents for that."

Nick Bush can be reached at editor@dailycollegian.com.

Hudak and Tierney campaign in a heated race for District 6

SIXTH from page 1

The New York Times' Election 2010 profile of the race disagreed with Hudak, calling the district "solid democratic" and predicting for the incumbent a 98 percent chance of victory.

It has been a contentious campaign for the two candidates, to say the least.

Earlier this month, on Oct. 6, Tierney's wife Patrice pleaded guilty to falsifying her brother's federal tax returns, covering an illegal investment that the Boston Herald reported as a "$7 million ownership stake in a Caribbean gambling operation."

Online videos of a debate that took place live on FOX 25 the next day show the candidates talking over one another and arguing for minutes at a time about Patrice's tax fraud and other issues.

Just days later, the Hudak campaign released an advertisement called "John Tierney: Not Paying Taxes."

"Tierney raises taxes on our families, but thinks it's OK for his own not to pay theirs," the campaign advertisement claimed.

According to the Boston Globe, during an Oct. 15 debate in Beverly, Hudak addressed Tierney, saying, "You're in office and engaged in a massive laundering scheme, and you're looking the other way."

Tierney responded by criticizing Hudak's insistence in holding the Congressman accountable for his wife's actions. "As a lawyer, you should know better," he told Hudak. "I knew of no wrongdoing."

Hudak meanwhile has been asked during the campaign to address his decision to put up a lawn sign prior to the 2008 election that portrayed Barack Obama as Osama Bin Laden.

The sign was a "parody" designed to have people examine the candidate more closely before voting, said Hudak to Maria Stephanos during the FOX debate. "I regret that some people were offended that that was not a flattering portrait of the candidate then, but I don't regret standing up saying, 'I'm very concerned with the policies that are going to be imposed.'"

During the aforementioned debate held Oct. 15 in Beverly, Hudak argued the satire was a "simple exercise of [his] first amendment rights."

The Boston Globe then reported the Congressman told Hudak that no one is questioning his right to put up the sign, but rather, "the maturity, temperament and judgment in doing that."

Last Monday, Hudak filed a libel lawsuit against his opponent. He claimed Tierney lied in his latest campaign video and that the Congressman said incorrectly that Hudak wants to "eliminate the home mortgage deduction" and "shift the tax burden from the wealthiest to the middle class." According to the Salem News, Hudak dropped the case the following day after a judge told him that no witness testimony would be heard before the election.

The Eagle-Tribune reports that during the campaign's final debate, held last Thursday in Lynn, the two candidates addressed the libel suit.

"[Tierney] is not fit to continue to be our representative," said Hudak during his closing statement. "What has happened in the last two weeks has been the most anti-American, unreasonable slam campaign I have ever seen."

During Tierney's closing statements, the Congressman then reportedly showed the audience a folder of documents he said proves his claims used in the campaign ad against Hudak.

"When this was filed, [Hudak] decided to turn tail and run," said Tierney. "The only issue outstanding now is how much he will pay in attorney's fees and costs for putting us and the taxpayer through the effort of tying up the court."

The Sixth District of Massachusetts contains a majority of Essex County and parts of Middlesex County.

It includes the towns and cities of Amesbury, Bedford, Beverly, Boxford, Burlington, Danvers, Essex, Georgetown, Groveland, Gloucester, Hamilton, Ipswich, Lynn, Lynnfield, Manchester, Marblehead, Merrimac, Middleton, Nahant, Newbury, Newburyport, North Andover, North Reading, Peabody, Reading, Rockport, Rowley, Salem, Salisbury, Saugus, Swampscott, Topsfield, Wakefield, Wenham, West Newbury and Wilmington.

EDITORIAL@DAILYCOLLEGIAN.COM

Smells like American Spirit

Alison Bowler

With all of the candidates for Congress putting the final touches on their campaigns, America is watching as November and the election come into view. In California, it is as if people can smell the congressional race coming. Van Tran, the Republican candidate for Congress, has taken his ads to the next level in Orange County - sending out scratch and sniff ads.

The perfume ad-like mailings, targeting Tran's opponent, Loretta Sanchez, say, "Something Smells Rotten about Loretta. It's the stench of Washington" with small font reading, "Your Free Fragrance Sample" above a scratch and sniff square adorned with Benjamin Franklin's hundred-dollar bill face. The odor is garbage-like. It is almost as if Tran's campaign against the current congresswoman, Democrat Loretta Sanchez, is just trying to say that she simply "stinks" in office.

It's high school student election drama all over again.

This makes ads like Tran's unfortunately effective on voter opinions.

Regardless of political association or the personal track records either of Sanchez or Tran, these ads are ruining the discussions about real issues. If elections come down to who has sent out the funniest mail, then it really is like high school. Whoever hands out the most stickers or pins or invites you to the coolest party is the person you vote for.

More than ever, these types of campaign techniques are becoming the norm on the political scene. Obviously, politics was never a clean sport, but this is a bit extreme.

What happened to the ideal we all looked up to? The enthralling debates, the ads with a strong voice and answers to real questions, and the days when we all knew voters had made informed decisions. There was no trashy junk mail, or junk mail that smelled like trash. What happened to the times when only simple, honest candidates were running fair and truthful campaigns?

What happened to the ideal we all looked up to? The enthralling debates, the ads with a strong voice and answers to real questions, and the days when we all knew voters had made informed decesions.

Sanchez responded, according to KABC in Los Angeles, by saying that the smelly ad "...is disgusting. We're trying to talk about the issues in the race and he's sending out smelly things." A district resident, Dave Koffman, responded to the ad with, "Smells pretty bad."

So what's so rotten in the 47th district of California? After all, most politicians call their opponents far worse things than "smelly" in today's elections. Seeing the headline in the paper or getting the ad in the mail are great conversation pieces, not to mention interactive.

As time goes on, it becomes increasingly clear that many Americans don't know a whole lot about the people in their offices. Besides the privacy and a front that politicians put up, how many people really take the time to gain a tremendous amount of knowledge about the candidates running for different races within their district, their state, or even their country?

Did we ever have that?

Regardless of the answer, we are in the age where this type of mail is happening and campaigns are becoming increasingly shallow. There are too many instances where people are misinformed. There are too many instances of influential people encouraging misinformation. We will never have a nation where every single registered voter will make an informed decision about everything they vote for, but the encouragement of acquiring knowledge is important. Every American citizen over the age of 18 should vote, but when they do, they should know how powerful their vote really is.

One uninformed person may seem like nothing, but an entire nation? That is truly something to consider.

Alison Bowler is a Collegian columnist. She can be reached at abowler@student.umass.edu.

YOUR OPINIONS SUCK

and you're dumb

editorial@dailycollegian.com

Tea Party time-machine!

Yaroslav Mikhaylov

It isn't unusual for a party to run a campaign promising a return to the good old days. For the Republican Party this year, it would be wise to run on a campaign promising a return to the Reagan years, contrasting the deregulation and the economic growth of that era with current day expansion of federal power and a stagnant economy. However, many candidates who the Republicans have put forward seem to look even further back than that, to the great years of American history, such as 1953, 1947 and 1692.

First is Joe Miller's recent assertion that the 17th amendment needs to be repealed to return power to the states. The 17th amendment, for those who've lost count already, establishes that the population of each state elects their own senators. Before its passage, the state legislatures or, in some states, governors, appointed their own choices of candidates to the United States Senate. Perhaps this is a sign of admission from Miller that he is not cut out for the rigors of the campaign trail. What fun is there to be had in abusing power when you have to earn the trust of the people first? Then again, maybe he simply wishes the Alaskan political process could have been expedited by his benefactor Sarah Palin simply appointing him to the Senate. Either way, Miller pines away for the days before people were allowed to choose who represented them. It's not as if he is one of the more well-known faces of a movement that claims to want to take power back into the hands of the people.

Of course, Miller doesn't just want to strip away rights from American citizens. He also wouldn't mind implementing a bit of a police state. In a recent interview concerning his stance on illegal immigration and control of the border, Joe Miller sent a shout-out to his social control model of choice: "If East Germany could, we could," control cross-border traffic. There is an inherent problem in giving people guns and a blanket order to kill anyone who crosses an imaginary line. I don't think Miller sees it.

We will have to wait until tomorrow night to see, but I believe that American people are not longing for the days of the Salem witch trials, the Cold War, or the segregated South.

At the same town hall where Miller rolled out his idea for a Soviet Bloc-style border security arrangement, he also rolled out a small-scale version of his own interpretation of the Stasi. When a reporter started asking him a question deemed ideologically unsuitable, Miller apparently summoned a private security detail to escort the reporter away. The private security guards were also getting used to the new role they would be playing in Alaskan life by "arresting" the reporter for a number of infractions, mainly trespassing upon a public event, and possibly being un-American and a traitor to the people. In the words of his opponent, Scott McAdams, "[Joe Miller], in case you were unaware, the Constitution also applies to reporters." But in these hard times, some of us have to give up our Constitutional freedoms to protect the constitution. The scary part is that the previous sentence actually makes sense to Joe Miller.

Compared to Joe Miller's desire to return to 1947 on the wrong side of the iron curtain, Rand Paul's promise of segregated lunch counters and schools of 1953 seems almost timid. In an appearance on Rachel Maddow's show, he claimed that the provisions of the Civil Rights Act of 1954 shouldn't apply to businesses. It should be any establishment's right to deny people of certain races entrance, because it is a right they reserve by owning said establishment, he argues. This runs roughshod over Brown v. Board of Education by again reiterating, in a different way, that facilities segregated by race can be separate but equal. It doesn't help that his metaphor for explaining it likens black bar patrons to loaded firearms. Serving non-white people is a safety liability for businesses then? Paul claims he is "not in favor of any discrimination of any form," but I'm sure he wouldn't mind living in an all-white gated community. He might even be willing to locate a polling center in one.

The most idyllic time recalled by the Republican Senate nominees this year is close to our own hearts: Salem, 1692.

Christine O'Donnell has no issues with religious dogma controlling the law. Once accused of witchcraft, she has admirably proven herself innocent by crusading against masturbation, and she is now willing to fight to give Americans the right to be judged by religious tribunals. Because this country is not based on such ungodly concepts as the right to freely practice any religion and separation of church and state. "Where in the Constitution is the separation of church and state?" she defiantly asked her opponent Chris Coons in a televised debate. When her opponent brought up the first amendment, she was incredulous. "That's in the first amendment?" she asked. Naturally, that amendment must be unconstitutional.

We will have to wait until tomorrow night to see, but I believe that American people are not longing for the days of the Salem witch trials, the Cold War, or the segregated South. For one, they're already too used to those silly yellow buses. Sens. Boehner and DeMint, may I humbly recommend sticking with Reagan next time?

Yaroslav Mikhaylov is a Collegian columnist. He can be reached at ymikhayl@student.umass.edu.

Respect the pole, people

Sophie Kaner

This past year, there's been talk of pole-dancing being recognized as a sport in the Olympics. Many people think the idea is laughable, but I don't. Although for me, pole-dancing isn't a sport as much as a dance form its acceptance into the Olympics would be an enormous step towards legitimizing it.

The first pole-dance I ever saw (outside of movies) was a recorded performance on YouTube. It was a pole competition, and the dance was an incredible fusion of ballet and pole-dance.

The minute I saw it, I was hooked.

I started researching pole-dancing competitions, and was floored by how unbelievably talented the women were. They could hang by their knees, waists, or their shoulders and they looked as if gravity simply had no effect on them. I had to try it for myself. Once I did, there was no turning back.

Now, as a pole-dancing student, I often find myself needing to defend what I do. "No, I don't take off my clothes," I say.

"Yes, it's a legitimate form of dance. No, it's not a stripper pole; it's just a dance pole." Of course, not many people believe me. Most only know of pole-dancing as something that strippers do in clubs, and assume that it's a solely sexual performance. They don't consider it something to be taken seriously.

Some pole-dancers, as well as some strippers - the lucky ones who don't strip as a last resort - will say, "Yes, pole-dancing is sexual. So what? We embrace our sexuality, and it empowers us." Well, that's fine for them, but it doesn't satisfy me. The feeling I get while pole-dancing is the same feeling I get when I dance ballet, or bharata natyam, or modern dance, and I'm hesitant to term that feeling "embracing my sexuality." It has much more to do with aesthetics than sex.

Most only know of pole-dancing as something that strippers do in clubs, and assume that it's a solely sexual performance.

Does pole-dancing have to be sexual?

I'm not sure that it does. It's true that, in the U.S., our pole-dancing culture originates in clubs, but there are other pole-dancing traditions in the world. In China and India, for example, male pole performers use tricks that are similar to Western pole-dancers' moves. In their cultures, though, the men are seen as acrobats, not erotic performers. If someone, in the context of Western society, sees a female pole-dancer, we are likely to immediately associate that with sex - but it's because of our previous experiences, not because of what she's really doing.

For the most part, it seems to me that Western pole-dancing is perceived as sexy because of our associations with it, not because of the dance form itself. However, it's also very hard to learn how to do Western pole-dancing without moving your hips, doing body rolls, or crawling on the floor. That, of course, is because pole-dance is still very much in its first or second generation, and people who pole-dance now mostly learned from strippers. So is it really true when I say, "No, I'm not a stripper?"

I think it is true. I'm trying to find a way to differentiate my kind of dance from strippers' without devaluing what they do. As a pole-dancer who isn't a stripper, my goal when I dance for other people is not to provoke sexual arousal; it's to create an artistic performance. My movement is intended to be aesthetically appealing, not sexually appealing. The pole-dancing that strippers do could be considered artistic, but its ultimate goal is to arouse the spectators. I don't want to reject the things that I've learned from strippers, and I don't want to demean the things they do, but I do want to differentiate the way I dance. The pole-dancing that I do may, at times, be sexy, but its ultimate goal is to showcase the grace and athleticism of the human body.

Like any dancer, I want to be taken seriously. Nevertheless, as long as pole-dancers who consider themselves dancers are categorized with strippers, very few people will view us as serious artists. Whether or not pole-dancing is ever recognized as an Olympic sport, I hope that it will eventually become accepted enough to be showcased like any other art form.

As I become a more advanced dancer, I want the opportunity to perform and to teach. In order for that to happen, I need people to stop assuming that pole-dancers are only looking for sexual attention from men. We're not. We just love to dance.

Sophie Kaner is a Collegian columnist. She can be reached at skaner@student.umass.edu.

Students chomping their way to success?

Leah Mandly

Cinnamon, mint, grape and an assortment of other fruity and tasty flavors can all be packed into a little piece of gum. These flavors are just waiting to burst into our mouths and free us from boredom, hunger or bad breath. Not only is chewing gum great exercise for our mouths, it also connects us to others when we share or swap a piece. However, when it comes to chewing gum, do we really know what we are getting ourselves into? Exactly what is gum made of and can chewing negatively impact our health?

If you look at the back of a gum package, a dizzying array of words like Xylitol, Taurine and Riboflavin make up most of the ingredient list. Many of these are chemicals like amino acids, but I'm more focused on the basics. First off, there is a "gum base" composed of either "chicle" - the natural sap that was used in making gum by ancient peoples in Central America - or a synthetic rubber developed during World War II. And of course, they contain sweeteners and artificial flavoring to make the taste desirable. Another important part of gum is softeners, without which, gum becomes hard and unchewable.

I chew gum a lot. It helps pass time when I'm doing homework, exercising or just need something to do. It is also a quick way to get fresh breath. However we weren't meant to constantly keep chewing something. When we chew, our brains think we are eating, so they secrete the enzyme amylase into the mouth and other digestive enzymes like protease in the stomach. However, there is no food, so the body can become bloated. Personally, I can't recall ever being bloated, after chewing gum but it's something to look out for. Imagine if you became so bloated you couldn't fit into your pants! Wouldn't that be wild?

Our stomachs can also start producing too much hydrochloric acid as a result of the hormone imbalances caused by chewing too much gum. Acid reflux disease and bruxism - clenching or grinding one's teeth together – can become an issue if this occurs. You know what they say about gum jaw.

Acid reflux disease and bruxism – clenching or grinding one's teeth together – can become an issue if this occurs. You know what they say about gum jaw.

Another potential health risk of constant chewing is a strain on your vertebrae because of a forward head posture. Chewing on only one side can also cause asymmetry on our faces! Now I don't know about you, but I don't want to be walking around with my face lopsided. I also don't need to strain my back; my fifty-pound backpack already does the job quite nicely. However, on the other end of the spectrum, gum has been known to have potential benefits.

The Wrigley Science Institute found that students who chewed gum had an increase of 3 percent on their standardized math test scores and performed better overall on their final exams. Those numbers sound pretty good to me, and in a cutthroat world of schools and jobs, where having an edge is crucial, chewing gum seems like a good investment. Other experiments, including a study conducted at Louisiana State University, found that students who chewed gum three times every hour after lunch ate less high calorie treats. The students also felt less hungry and craved fewer sweet things.

The Wrigley Institute also claims chewing gum can reduce stress, promote weight loss and help individuals be more alert and focused. Even better, having a sugar-free piece of gum after every meal can cut back on cavities, because it stimulates saliva, our best defense against tooth decay and plaque.

Many people now claim gum helps them stay focused in the workplace, gym and classroom. More and more studies are finding positive results when students chew gum when studying or in class. They are more likely to be quiet, pay attention and be able to concentrate. As college students, it seems like a worthy pastime. Chewing gum seems to be connected with getting good grades and staying focused. For me, improving my grades and concentration by just chewing gum is a worthwhile effort.

So exactly where does this leave us? On one hand, chewing gum can have some ill effects: digestive issues, spinal strain and dental problems to name a few. However, according to other research, gum can be beneficial in many different ways. It helps students focus and get better grades, fights tooth decay, promotes weight loss and can reduce stress.

Where do I stand?

Well, I can't disprove or validate either of these claims without doing my own experiments. However, if I have a big test, maybe I will pop in a piece of gum. I don't want my face to be lopsided, though, so instead of chewing gum all the time, it might be better to pop in a mint instead.

'Other M' a giant leap for 'Metroid'

By Nick O'Malley
Collegian Staff

Metroid: "Other M" is a vast departure from the Metroid franchise in that it's a game that's constantly telling you what to do - both in the story and the gameplay.

In itself, "Other M" is a great game that's fun to play with fresh gameplay that's got a lot of ticks. At the same time, "Other M" is not a great Metroid game in the way that "Other M"etroids are great. It feels like Metroid, but it looks and plays like a mix between God of War and Metal Gear Solid. In space.

Playing the game is a lot like ordering a bacon cheeseburger with fries and a shake and then getting a burger with a fried egg on it with sweet potato fries and a protein shake. Yeah it was good, but what the hell was that about?

Fans familiar with the earlier Metroid Fusion installment will recognize the game's more linear structure in place of the trademark non-linear, isolated wandering that is featured in most Metroid games.

The most glaring differences between "Other M" and the "Other M"etroids is developer Team Ninja's move from the first-person shooter camera used in the recent Metroid Prime games to a third-person camera view. It's the same camera-view that's used in the Metroid Prime games when the player goes into the morph ball or uses the space jump, so it's not a completely new perspective for experienced players.

What does take a lot of getting used to is the fact that, in "Other M," the player is taking orders.

The game's premise, which starts with perpetual Metroid protagonist Aran responding to a distress call at a space station, takes a new turn when the bounty hunter joins up with a squad of Galactic Federation troops to investigate the station. Of course, like any space station Aran has ever visited, something has gone horribly wrong and it will likely end up in an explosion. In the squad is her friendly former comrade, Anthony, and a rough, brooding commanding officer, Adam. Aran is revealed to have spent a period of time in the Galactic Federation Army.

What this does is include something that has been virtually absent from the entire Metroid franchise: dialogue. Aran is forced to interact with the troops and is soon under the temporary command of Adam, who continually orders her around as the background story of the station unfolds, similar to how Solid Snake gets briefed in Metal Gear Solid. It's weird.

The Metroid franchise is a case study in isolation and minimalism. There's no text, no dialogue, just actions. Fusion introduced this a bit, but "Other M" brings it to another level. While previous games have showcased the intense isolation that the franchise's heroine goes through as she slowly wipes out an entire planet, "Other M" is the first game to show the inner emotions and insecurities of the character.

The gameplay is, for the most part, fun and new. Combat is like playing God of War with a blaster arm, which means all the player has to do is fire in the general vicinity of an enemy and Aran will do the rest. Another colorful edition is Aran's ability to dodge, duck, dip, dive and dodge quickly, instead of her usual ability to take long, floaty jumps. An extension of this is the option to now jump on enemies to take a point-blank shot to shoot the enemy's face-off like in "Face-off."

As in some Metroid games, Aran begins the game without her full repertoire of abilities, which are usually taken away by an over-the-top crash or injury. But in "Other M," Aran is not allowed to use most of her powers until she is told she can due to the dangers of things like power bombs. This logic, however, is lost when it's apparent that Aran is not allowed to use her better armor, grappling shot or slightly stronger beams for an arbitrary reason. The most frustrating realization comes when Aran, no longer getting orders, decides to start using the space jump (continuous jump) and screw attack abilities, which now allow her to kill enemies that were once bosses in one hit, by jumping into them.

Like Fusion, the game takes place on a large space station, but it's quickly apparent that the game's horizons were not to be limited by such constraints. The facility is so large, with elaborate, world-like environments that make the player forget that it is a space station.

This in itself involves a little suspension of disbelief. The programmers probably didn't think the player would wonder who in the world created the vast, endless lava cavern with the enormous lava-sharktopus that jumps out of the lava like a coked-out whale. Seriously, who spent 15 years and 19 gajillion space dollars to build the endless lava cavern? What scientific value could that have?

The station is rife with mini-bosses, most of whom are entertaining and challenging, though repeat fights get old fast. The most annoying part of the bosses is that, for some reason, one attack will damage the enemy for a while and then stops without any major indication, leaving the player guessing why shooting it no longer does anything. It's one thing to have flashing weak points, but it's another to not give a hint.

However, easily the most negative aspect of the game is the incorporation of missiles. In "Other M," the player can go into first-person mode at any point by simply pointing the wii-mote at the screen. Through this, the player can now look on to enemies to fire missiles. At first glance it's a cool feature, but in battle the feature is slow and frustrating, especially during boss fights.

"Other M" takes a big step away from the roots of the "Metroid" franchise through significant changes in the game's structure and gameplay. However, the game still brings a lot of what fans are looking for.

It seems easy to just point and shoot, but instead of there being a "fire missile" button, the player must aim the wii-mote at the screen, wait for the camera to shift, point the wii-mote at the enemy, lock on and then fire, all while standing completely still.

However, the game acknowledges the clunks present in its missiles, requiring them to be used on a vulnerable, stationary target, or rewarding the player for taking a risk with one mid-combat. But when certain battles call for a quick missile hit, the process can be a struggle.

Speaking of missiles, they're unlimited in "Other M." Rather than picking them up from defeated enemies, Aran can now recharge her supply of them by standing still for a moment, pointing the wii-mote up and holding "A." This will also restore Aran's health when it's critical.

In fact, the game is devoid of enemy drops of any kind, save for a couple of upgrades from bosses. Instead, ammo is generated and Aran restores health at frequent "navigation rooms" that update the map and restore shields.

While everything mentioned is mostly a scratch on a veneer of a surface, the game's ending leaves a bad taste in the player's mouth. As the game builds, it acknowledges that the environment created on the space station is similar to that on planet Zebes, the setting of Super Metroid. But once the player arrives at the threshold of what would appear to be the game's big showdown, the game pulls the carpet from underneath and says, "Nah, we're going to do something much less awesome."

Instead of the big, combat-based finale, the game concludes with a convoluted, dialogue-heavy ending that tries to be emotional. In the end, though, the emotions are weak and the game's "final boss" is mostly an afterthought.

With everything that's wrong with "Metroid: Other M," it's hard to say it's bad - because it's not. It provides everything a player would expect out of a Metroid game or any first-tier Nintendo franchise game. But, instead of just going from the first-person perspective used in the Metroid Prime games to the third-person, Team Ninja changed a load of ingredients in the Metroid formula.

Much like trying to mess with the original Coke formula or putting foreign stuff in Reese's Peanut Butter Cups, it's good, but not as good as the original.

Noho quintet next big thing

By David Coffey
Collegian Correspondent

Halfway between the annals of fertile folk balladry and the immediacy of pop-rock sensibility lies Darlingside's simply titled "EP 1." The self-produced six-track effort, released earlier this year, marks the Noho quintet's recording debut. As far as debuts go, however, it's hard to believe this is the rag-tag band of musical twenty-somethings' first offering. Rarely does a debut encompass such a mature, cohesive and evolved sound.

Darlingside's sonic footprint on "EP 1," self-described as "string rock," is somewhat contradictory, in a way. Throughout, the songs remain melodically accessible and instantly appealing to the ears in the same manner that any homogenous mix of rock n' roll and pop should. At the same time, it's not familiar and debased to the glossy formulas of your average soft rock quintet. Darlingside's eclectic choices of instrumentation, which include the likes of mandolin, violin, cello and pennywhistle, in addition to the standard rock instrumentation of drums, guitars and vocals, tease out a sound that tends to transcend upon itself several times within one four-minute song. Blending flavors of folk, classical, blues and jazz over a strong pop-rock foundation, Darlingside produces songs you can't deny in ways you've rarely heard.

From the onset of the lingering and intertwining guitars that mark the intro to "Good Man," the album's opener, the mood is set for a musically compelling experience built upon near-virtuoso level instrumental chemistry. The songs of "EP 1" throw their weight behind the cardinal rule that the whole is greater than the sum of its parts. Guitar riffs and melody lines that would be pleasant enough on their own organically combine in a carefully crafted yet melodically expansive manner. The result is a series of flourishing verses and uplifting choruses that effortlessly come together to create songs that are at once harmonically deep and yet insanely catchy and sing-along-worthy.

While "EP 1" offers up a few slices of straightforward rock ballads with "Good Man" and the swaying ebb and flow of "The Catbird Seat," Darlingside are clearly at their best when they're steadily mixing and steadily defying seemingly incongruent genres. "Males," a mysteriously compelling track which flawlessly merges down and dirty break beats with an ominous string section, gives the record's pacing a midway shot in the arm, proving gentle numbers are not the band's only forte.

As the chorus rolls around in "All That Wrong," the song changes gears from a swishing slow-roller to an acoustic-punk romp, leaving the listener wondering if the string-rockers suddenly grew mohawks halfway through the tune.

Clearly displaying such mature musical prowess, it's nothing short of astonishing that Darlingside manages to match, if not exceed their instrumental abilities in the vocals department on "EP 1." Not since the likes of The Beatles or Crosby, Stills and Nash has there been a rock outfit wherein every member contributes so meaningfully to the vocal tracks of nearly every song. Individually, from the fragile falsetto of "Surround" to the laid-back crooning of album closer "In The Morning," each member of Darlingside is clearly a talented singer. When their voices join together in harmony, however, it's about as close as you're going to get to a religious experience through a pair of headphones. With lush, five-part harmonies abounding at every turn, the vocals on this record are about as near perfect as one could humanly wish for.

Perhaps the only shortcoming of this EP is just that: it's too short. At the close of the sixth and final track, the only thing the listener is left wanting is more. It's hardly a mystery, considering the genre transcending, expert-level instrumentation and the insanely spotless vocals coupled with a beyond-their-years musical maturity and cohesiveness. As debuts go, this one is pretty faultless.

David Coffey can be reached at dscoffey@student.umass.edu.

COURTESY MYSPACE.COM

Northampton's rock-pop quartet Darlingside released their recorded debut, "EP 1," this month. The record features five-piece harmonies and quirky instrumentations that could make them the next big thing.

Swift 'Speaks' with new album

COURTESY MYSPACE.COM

America's guitar-toting sweetheart Taylor Swift matures with the release of "Speak Now" this past October. The fourteen-track album marks Swift's third studio release.

By Ashley Berger
Collegian Correspondent

Dropping Oct. 25 and featuring 14 new tracks, America's sweetheart Taylor Swift released her third studio album last week. Showcasing the singer's more mature side, "Speak Now" highlights issues like growing up, mean critics, Swift's success and life in the spotlight, and the more adult aspects of breaking up with someone. Of course, the album still features signature Swift themes such as boys, crushes, and love.

The songs contain heavier and edgier sounds than her previous albums. In prior recordings, the angriest Swift has ever been was arguably in "Picture to Burn." On the new album, "Better than Revenge" takes a huge leap from innocence to addressing the other girl and how she acts in the bedroom, proving to listeners that she is growing up. The song is about a girl who stole Swift's boyfriend. Swift sings, "She's better known for the things that she does on the mattress." The song also features a heavy drum and guitar combination, showing just how angry Swift really is.

What would a Taylor Swift album be without a song about the dream boy she can't be with? "Sparks Fly" is about just that. The lyrics rival those of "Fearless;" in both songs, she sings about kissing in the rain and the happiness she feels whenever she is with this certain someone. Though the songs may have similar descriptions, "Sparks Fly" describes Swift as being with someone who isn't necessarily good for her, a diversion from anything our favorite good girl has ever sung about before.

Another song which strays from Swift's typical lyrical storyline is "Back to December." A slow song which features Swift's guitar, it is an apology to a boy she mistreated. In most of Swift's earlier pieces, the boy was always the instigator of the problem. Swift sings, "So this is me swallowing my pride / Standing in front of you saying I'm sorry for that night.../ Wishing I'd realized what I had when you were mine." She is recognizing her own faults, rather than putting all the blame on the boy. This song encompasses Swift's maturation and ability to take responsibility for her actions, not only as an artist but also as a person.

"Never Grow Up" is another standout. The music is simple, largely showcasing Swift's vocals and acoustic guitar. The lyrics focus not on fame or boys, but rather on staying young and enjoying youth. In the song, Swift gives listeners advice about the challenges she's faced in her young adult life. She sings, "Don't you ever grow up / It could stay this simple / Won't let nobody hurt you / Won't let no one break your heart." She emphasizes the idea that no matter how fast you want you grow up when you're little, you'll always want to go back to being that little girl with big dreams.

"Speak Now" features a more mature lyrical style and sound by Swift. The majority of the album is characterized by slower, more dramatic songs that focus on Swift's vocal ability. Though there are hints of fiddle and piano, the album is largely based on the simplicity of the voice, the instrument that Swift is most known for.

To date, "Mine" and "Mean" have already seen success on album and song charts. While we hate to see America's favorite girl next door grow up, fans and critics will be happy to see the 20-year-old mature and take risks on this album, singing about a variety of topical issues. Swift proves that no matter how old she gets, she will always be "Fearless."

Chances there, results not for Minutemen

HOCKEY from page 8

capitalize, and PC doubled its lead on its only power play of the period. Three and a half minutes later, the Minutemen answered again as Michael Pereira scored his second goal in two games. However, the Friars held off a late desperate push and took the only win of the weekend.

"We had plenty of chances, all sorts of looks, point blank looks and just couldn't find a way to finish plays," UMass coach Don Cahoon said. "They gave us an opportunity to get the equalizer and we weren't able to finish plays."

Friday's game also had its fair share of miscues, however the Minutemen were able to salvage a 3-3 tie after Darren Rowe scored a power play goal with three minutes and 43 seconds remaining in the game.

The Minutemen scored first midway through the first period. Doug Kublin scored his first goal of the season just as a UMass penalty expired. T.J. Syner brought the puck up through the neutral zone and gave a square pass to Kublin, who had followed the play. Kublin rifled his shot past Providence goalie Alex Beaudry for the early lead. The Friars scored later in the period to knot the game at one after the first.

Neither team could find the back of the net until the last 43 seconds of the period when both squads exchanged their second goals of the game. The Friars goal came with one second left in the period off an ill-timed wrap around pass by a UMass player.

"[There's] no need to give up possession of the puck," Cahoon said. "[He] just wrapped it and the thing ended up back in the crease and banged home. Then there were secondary mistakes in the front of the net, people covering space. You've got to negate people and we can't just stand in there and think well we're playing a zone defense. There's no zone in grade-A. You play man-to-man and take opportunities away from people."

Dainton, the team's captain, also came away disappointed with how a few Providence goals were let in on Friday.

"I wish I had that first and third goal back," Dainton said. "It's just one of the games where the team bailed me out of a situation and I'm going to have to get them back later in the season by stealing a game. The first goal, there's no way that should've went in. I was too deep in my net. The third play, I played it wrong. I thought I had more time, which I didn't. I think we deserved a better fate tonight."

However, Cahoon sees positives from these two games. His players always seem to fight for a comeback.

"The team continues to show resilience and perseverance," Cahoon said. "We've done that all along and that's a great trait. But we've got to clean up things so we're not putting ourselves in that position. If we play thorough we can win one-goal games as well as anyone else. Right now we haven't solved that piece of it yet."

Pete Vasquez can be reached at pvasquez@student.umass.edu.

Nine UM freshmen still getting acclimated to collegiate game

FRESHMEN from page 8

1-0 advantage in the first period, they allowed the Friars to tie the game with 1:20 second left in the opening period. Then, in the second frame, a go-ahead goal with just under one minute to play gave the Minutemen a 2-1 until the equalizer came 42 seconds later.

The second Providence goal was attributable to a misplay by the Minutemen defense. A freshman defender attempted to clear the puck out of the zone, wrapping the puck around the boards. The clear attempt was botched and the puck found its way back to the net, where Kyle MacKinnon netted a shot in the final second of the period to tie the game going into intermission.

Goalie Paul Dainton understands there is a learning curve for his team, which features three freshmen defensemen in its rotation.

"That's a young mistake [and] we talked to that individual," Dainton said. "He's going to bounce back fine. That's one thing that we have perspective of this year. We have a young team and there are going to be young mistakes. It's how you bounce back from them and how quickly you get them solved."

The young UMass squad appears to have a short memory, shown in its ability to come back in close games to amend its mistakes.

The Minutemen have lost one game by more than one goal, a 5-3 season-opening loss at Minnesota on Oct. 8. Since then, it has been involved in three one-goal losses and two ties.

In their season opener, the Minutemen cut a two-goal deficit to one twice during the third period. The following day, down 3-0 in the first period, they fought to make it 4-3 going into the third period.

Six of the 17 UMass goals this season have come from freshmen, including three from Mike Pereira, who scored one goal in each of the two games this past weekend.

First-year Jeff Teglia minded the Minutemen net while Dainton was out with an injury, playing well enough to give UMass a chance to win, according to Cahoon. He has played in three games this season with a goal against average of 3.54 and a save percentage of .894.

Cahoon has an inkling that his freshmen need time to adjust to a full-length game, questioning whether his team is physically ready to compete with older teams for 60 minutes.

"There are nine freshmen on the ice, so shift after shift, do they have the same level of endurance?" Cahoon said. "It's not that they aren't well-conditioned, but do they have the same strength? Can they play as hard for as long as a group of guys that have been training for two or three years?"

Cahoon is interested to see how his team reacts as they become more acclimated to the speed and physical demand of the college game. In the meantime, he plans to make changes in his lineup to compensate for it.

UMass dukes it out, defeats JMU Saturday

By Jay Asser
Collegian Staff

Following consecutive losses for the first time this season, the Massachusetts football team rallied in the fourth quarter to defeat James Madison on the road, 21-14.

The No. 18 Minutemen (5-3, 3-2 Colonial Athletic Association) scored 18 straight points, including 15 in the final quarter, for their largest comeback of the year (11 points).

"Everything's based on attitude and execution," UMass coach Kevin Morris said in a post-game interview with UMassathletics.com. "I think in the second half, we might have relaxed a little bit. We might have been a little uptight from the past couple weeks, when we weren't able to convert as well as we did in the first half of the season. We just came out and relaxed and tried to play our game of football and the guys did an excellent job against a real aggressive and fast defense."

Quarterback Kyle Havens led UMass in the air with 163 yards and two touchdowns on an efficient 15-for-19 passing. On the ground, tailback Jonathan Hernandez carried the ball 28 times for 137 yards, marking the third time this season the junior has gone over the 100-yard mark.

The Minutemen defense stuffed the Dukes on a key 4th-and-1 play at the JMU 48-yard line with 10 minutes remaining in the contest to give UMass possession. After driving down to the 1-yard line, Havens found tight end Andrew Krevis for his third score of the season to give the Minutemen the lead for good.

"There wasn't any panic," Havens said in an interview with UMassathletics.com. "It was actually very calm. Before the game we were hyped up and everything, but at halftime, we were calm. We knew the same thing like all year, we have confidence in the defense, [and] the defense has confidence in us. We know if we play well, we'll get it done."

Wide receiver Anthony Nelson, despite being held to a quiet 25 yards on two receptions, made a significant impact on special teams, as he filled in for regular punt returner Julian Talley for a play. Towards the end of the third quarter, Nelson fielded a punt at the UMass 30-yard line and returned it for 53 yards into the red zone.

"At first, I thought it was going to be a regular return, maybe 10 yards," Nelson said after the game.

"Then all of a sudden, Woody Carter just came out of nowhere and sprung a big block for me."

The Minutemen capped off the short drive with a two-yard touchdown reception by Talley, who finished with a game-high 66 yards on four receptions. Havens found Dan Sheeran on a pass for the two-point conversion to tie the contest at 14 apiece.

Linebacker Tyler Holmes sealed the victory with a 10-yard sack of Dukes quarterback Drew Dudzik with two minutes, 48 seconds left in the game. The junior finished the contest with 14 tackles to lead the Minutemen defense, while senior Mike Mele chipped in with 13 stops.

"We were well prepared," Holmes said in an interview with UMassathletics.com. "I think the first half we were just a little unsettled with people not doing their jobs and tying to do too much. Second half, we settled down, we were able to play and get a second-half shutout."

Both of the Dukes' scores were punched in by tailback Jamal Sullivan, who racked up 73 rushing yards. Dudzik, as well as throwing for 179 passing yards, amassed 98 yards on the ground for a game-high 277 yards of offense.

With the loss, No. 15 JMU drops to 4-4 overall and 1-4 in the CAA.

The Minutemen will return to action next week as they host Maine at 3:30 p.m. at McGuirk Stadium.

Jay Asser can be reached at jasser@student.umass.edu.

Roster inexperience a concern for Cahoon

By Dan Gigliotti
Collegian Staff

The Massachusetts hockey team is going through some growing pains.

With nine freshmen in their regular lineup, the Minutemen show a youthful resiliency, but cannot make up for their inexperience.

UMass played a home-and-home series this weekend against Providence, earning a 3-3 draw at the Mullins Center on Friday and dropping a game on the road on Saturday, 3-2. With positive contributions from many of its freshmen, UMass coach Don Cahoon has also noticed this group making key mistakes in game situations which they must learn from.

"It seems to show itself," said Cahoon, "every game this season there seems to be a young person's big mistake that costs us.

"We need to grow out of those. There are so many things that can happen, it's almost like you have to experience them one at a time with these guys to get the lesson learned."

On Friday, the Minutemen (0-4-2, 0-2-2 Hockey East) tied Providence by rallying to score a power play goal with three minutes remaining, but their play through the first two periods was indicative of their inability to hold a lead early in games.

After getting out to an early

Minutemen tie, fall to PC over weekend

By Pete Vasquez
Collegian Staff

Costly mistakes were the difference this weekend for the Massachusetts hockey team, as it lost the finale of a home-and-home series against Providence College, 3-2, on Saturday. This came after the two teams played to a 3-3 tie on Friday at the Mullins Center.

In the second game, the Friars (2-4-1, 2-2-1 Hockey East) were 2-for-4 on the power play, as they jumped out to an early 2-0 lead by the end of the first period. Daniel New found an unguarded Aaron Jamnick on the edge of the faceoff dot, who put a shot past UMass goalie Paul Dainton to put the Minutemen (0-4-2, 0-2-2 HEA) in a quick two-goal deficit.

UMass immediately responded just 41 seconds later, taking advantage of a power play opportunity of their own. After Branden Gracel won a faceoff, the puck found Joel Hanley, a freshman defender, who settled it before firing a slap shot that ricocheted off a Providence defender before landing in the back of the net. It was Hanley's first collegiate goal and it cut the deficit to one.

The Minutemen continued to press into the second period, outshooting the Friars 11-8, but the score remained 2-1 entering the third period. While UMass was given three-straight power plays to begin the third period, it couldn't

UM earns draw vs. Explorers

By Eric Mansfield
Collegian Staff

The Massachusetts soccer team added a loss and a tie to its record this weekend, falling to Fordham 1-0 on Friday and tying La Salle 1-1 in a double-overtime match on Sunday.

The weekend's games bring the Minutemen's record to 5-4-7 overall and 4-1-2 in Atlantic 10 play.

The loss to the Rams on Friday was the Minutemen's first inside the conference this season. After the two squads played the first half to a draw, with each team tallying two shots on goal, Fordham junior midfielder John Niyonsaba put one away for Fordham in the 63rd minute.

Neither team was able to muster any offense the rest of the game, with each team finishing the game with 10 shots. The Rams and Minutemen finished with three and two shots on goal, respectively.

UMass coach Sam Koch said the Minutemen were outworked and played into the hands of the Rams.

"Fordham was very good, their back four. They did a really good job against us," Koch said.

Although the score may not have shown it, Sunday's game included significantly more offense than Friday's game.

The Minutemen finished with 27 shots, nine of which were on goal, while the Explorers tallied 19 shots with five on goal.

"We created more opportunities today because we attacked better," Koch said.

"The guys did a good job getting forward, playing forward. We were able to take advantage of where the spaces were."

Koch added that he thought his team took advantage of the fact that the Explorers were tired and not as fresh as Fordham was on Friday.

The Minutemen totaled 16 of their 22 regulation shots in the second half.

Senior forward Ben Arikian and junior forward Bryant Craft led the team in shots with six and five, respectively, while Craft managed to put four of his shots on net, to Arikian's one.

La Salle senior midfielder Ryan Richter scored the lone goal for the Explorers on a rebound in the 37th minute.

The Minutemen were unable to respond until the 78th minute, when Craft took a shot directly following a punt from goalkeeper Chris Piekos.

"Basically it was just a good counter. Piekos got the ball in his hands and looked up and saw that I had basically a one [versus] one with their center back. [I] played it over the top [and] got a bit of a lucky break," Craft said.

"All [the] credit [goes] to Piekos. He's the one who made the play happen."

One glaring statistic in the game was the discrepancy between the amount of shots and the amount of shots on goals for the Minutemen, as only one third of their shots were on goal.

"We want to finish our chances," Koch said. We had great chances today and we didn't finish them."

In order to improve, Koch said that on top of working on their finishing, they will work on their attacking patterns.

Another concern was on the defensive side of the ball.

In the two overtimes, the Explorers were close to scoring on more than one occasion.

"We'll continue to work, making sure that we are defensively sound because we gave up I think two really good chances to them that they could've put away which would have ended the game," Koch said.

Sunday was Senior Day for the Minutemen, and playing in their final home game were goalkeeper Chris Piekos and midfielders Stuart Amick, Ben Arikian and Chris Vaccaro.

Next weekend, the Minutemen will play two road games, one of which will be against Charlotte on Friday and the other against Saint Louis on Sunday.

Eric Mansfield can be reached at eamansfi@student.umass.edu.

Minutewomen take No.1 seed

By Adam Miller
Collegian Staff

PHILADELPHIA— The Massachusetts field hockey team clinched the first seed in the Atlantic 10 tournament by extending its winning streak to nine games with wins over West Chester and La Salle during the weekend.

UMass (13-6, 7-0 A-10) finished its conference schedule undefeated with a 2-1 win over the Explorers on Sunday. With a nine-game winning streak, the Minutewomen passed Ohio State and Maryland for the longest streak in the country.

"I felt like we played some pretty good hockey and certainly had a lot of opportunities," UMass coach Justine Sowry said. The Minutewomen played on field turf, which made the ball harder to control because of how much it bounced around. Sowry said the field conditions might've hindered her team in having even better success against La Salle.

But the conditions didn't deny the Maroon and White a perfect A-10 record. Junior Thando Zono scored the first goal of the game, 16 minutes, three seconds into the half on a shot in the right corner to give UMass the lead.

The Explorers came right back with a goal of its own at the end of the first half from Gabrielle Nolt to tie the game at one apiece.

Explorer goalkeeper Emma Ruth worked the Maroon and White offense in hopes of giving her team a chance to pull off the upset and, for the most part, her efforts paid off, as she picked up 11 saves in the loss.

"She did a really good job," UM senior Katie Kelly said. "She was able to get her hands on the ball early, but that just made each save easier for us. We really need to capitalize on these good goalies by scoring early."

However, she couldn't handle the swarm of Minutewomen, who invaded La Salle's side of the field as they tallied their second goal of the game.

"We shuffled the lineup halfway through that second half and we looked very strong," Sowry said.

With a little over 19 minutes to play, Kelly caught the ball off a deflection from Ruth, who already batted the ball away multiple times, to give her team the game-winner.

One of the indicators of UMass' success came on penalty corners, as it held a 17-6 advantage on them throughout the day.On Friday, the Minutewomen delivered an all-around attack to defeat the Golden Lions, 3-0. Alesha Widdall finished the game with four saves on the day behind a solid UMass defense.

The Minutewomen out-shot the Golden Lions, 12-5. Although WCU had four of those shots on goal, goalkeeper Widdall's solid effort allowed her to tally her sixth shutout of the season.

On the offensive end, the Maroon and White stayed efficient by converting 25 percent of those attempts 12 into goals.

Sophomore Kim Young scored her first goal of the season eight minutes, 33 seconds into the game unassisted. UMass held onto the advantage in the second half when Zono converted on an assist from Kelly on the penalty corner. It was Zono's fifth goal of the season.

Penalty corners were a key component in allowing the Minutewomen to attack the net as often as they did, by holding an 8-3 advantage over the Golden Lions. The last penalty corner that WCU held during the game turned out to be the last score for Sowry and Co. Freshman Lindsay Bowman scored at 54:40, as Kelly recorded her second assist of the game. UMass had little trouble coasting throughout the remainder of the contest.

The A-10 tournament starts in Philadelphia on Nov. 5. The winner in both semifinal games will advance to play the next day with an automatic berth to the NCAA tournament on the line.

DECISION 2010

Bay State voters choose between limited government, "generational responsibility"

By Sam Butterfield
Collegian Staff

After months of fierce campaigning, millions of dollars in advertising, and one of the most intriguing, contested governor's races in recent memory, it all comes down to Tuesday. Today, the people of Massachusetts will decide who will serve as their next governor, and on the eve of the election, it appears that the four-way race has come down to two frontrunners, Democratic incumbent Deval Patrick and Republican challenger Charlie Baker.

In appearances across the state over the last week, the two campaigns have sought to distinguish and solidify their messages.

Patrick and his team have sounded a tune of "generational responsibility," arguing that it is his generation's obligation to help turn the Commonwealth around and leave the economy, environment and world at large better than they found it. Baker, for his part, has staked his campaign's bets on two themes playing out across the country this season: jobs and the economy, and a staunch anti-incumbent sentiment.

As volunteers mobilize to get out the vote for the campaigns and to help staff precincts scattered across the Bay State, recent polls have indicated that Gov. Patrick holds a slight edge, but that several other variables throw into question just how certain a second Patrick term is.

Independent Timothy Cahill, the state treasurer, continues to draw between 7 and 10 percent of polls conducted by numerous agencies, including the Boston Globe and Suffolk University. According to several analysts, most Cahill supporters' second choice would be Baker, and if these core Cahill-backers decide at the last minute that a Cahill vote is less relevant than one for Baker, this could seriously impact tomorrow's results.

David Paleologos, the director of the Suffolk University Political Research Center, said just how well Cahill and Green-Rainbow Party candidate Jill Stein perform will be key in deciding the election's outcome.

"The question is what is Cahill going to end up with and what is Stein going to end up with," he said. "Past polls show Cahill and Stein combining to about 9 percent."

Ralph Whitehead, a journalism professor at the University of Massachusetts and expert on the American political system, said Cahill's voters have detracted from what was likely a sure-fire Baker victory.

"Six months ago, Charlie Baker looked like he was headed for the Governorship," he said. "Tim Cahill has managed to hold on to a share of the likely electorate that is small, but comes chiefly out of Baker's potential share of the vote, rather than Patrick's."

Recent polls all have come to different conclusions, making it especially difficult to predict how voters will think tomorrow. An Oct. 29 poll from Rasmussen Reports of 750 Massachusetts voters gave Patrick 46 percent of Tuesday's likely voters to Baker's 44 percent, while a Suffolk University/7 News Boston survey conducted last week gave Patrick a heartier margin, placing him at 46 percent to just 39 percent for Baker, with nine percent behind Cahill and two percent for Stein. A third poll, released Oct. 24 by the Globe, put Patrick ahead 43 to 39 percent, while Cahill drew 8 percent and Stein held at two.

For their parts, the candidates are tuning out the polls and focusing the campaign's final days on a term familiar to all of them "GOTV," or 'get out the vote.'

"The goal over the last four days is all about getting out the vote," said Patrick spokesman Alex Goldstein. "We've turned from voter identification to get out the vote efforts."

As for what that entails, Goldstein rattled off the typical index of last-minute steps political bodies employ to bolster support.

"It's a combination of going door-to-door, phone banking, and generating volunteers," he said. "We are looking to have at least 20,000 volunteers who are working the weekend, before and on election day, and those folks are going to be in every single neighborhood in the Commonwealth knocking on doors, making sure people go to vote."

Regardless of what the pollsters have to say, the campaigns are focused on getting as many people to the polls as possible, and earning their votes.

"The polls kind of go all over the place," said Goldstein. "We've seen all kinds of polls over the course of this campaign, and they've never changed our focus. The only poll that really matters is the poll on election day."

Markey pursues 18th term in Mass. Dist. 7

By Cameron Ford
Collegian Staff

With election day 2010 finally upon us, politicians in every district across the country are heating up their campaigns, and Massachusetts' District 7 is no exception.

The District 7 seat in the House of Representatives is currently held by Democrat Edward J. Markey, who has represented the district for over 30 years with virtually no significant opposition.

Markey earned a law degree from Boston College Law School in 1972. He went on to serve in the United States Army Reserve before running for election to the State House. Subsequently, he was elected to the District 7 seat in 1976, after longtime incumbent Torbert Macdonald died in office. Markey has held the seat ever since, and is now running for an 18th term.

Markey has built a reputation among supporters based on his environmental advocacy. In Congress, he currently serves as Chairman of the Select Committee on Energy Independence and Global Warming, in addition to being a senior member of the Energy and Commerce and Natural Resources Committees. He is also Chairman of the House Subcommittee on Energy and Environment.

Markey's achievements in office mostly revolve around the environment and energy sustainability. In 2007 he helped pass the first increase in fuel economy standards in over 30 years, from 25-35 miles per gallon. More recently, he led demands for British Petroleum to provide the public with a live video feed of their recovery efforts in the Gulf Coast oil spill to enable scientists to obtain a more accurate flow estimate.

Despite numerous requests for comment, the Markey campaign did not return inquires. But according to Markey's website, the Congressman "has authored or helped shape every major environmental, energy and high tech policy over the last three decades."

District 7 is located in the eastern part of Massachusetts, and encompasses the

Question 3 divides citizens, would reduce sales tax to 3%

By Katie Byrne
Collegian Staff

Last Friday afternoon, outside of the Student Union at the University of Massachusetts, students walking by the building were immediately asked, "Have you heard about Question 3?" Some students were responsive as they listened and perused leaflets volunteers were handing out, which asked them to "Vote No" on Question 3. Other students were not so interested in listening or even interested in glancing at a brochure.

State Ballot Question 3 would reduce Massachusetts' sales tax from 6.25 to 3 percent starting next January.

Students and activists engaged with MassPIRG, a non-profit, non-partisan organization which defines itself as standing up to powerful interests to protect consumers, encouraging a fair, sustainable economy, and fostering responsive, democratic government stood on the steps of the Student Union on campus to promote their cause.

Accompanying them was PHENOM (the Public Higher Education Network of Massachusetts), a group which engages in grassroots organizing, policy analysis, education and advocacy in leading the fight for affordable, well-funded, high quality public higher education in Massachusetts.

Before the groups and students started speaking, the Governor, Deval Patrick, left the Student Union. As he approached his chauffeured SUV, he was prompted by a student speaking into the megaphone, "We all know the Governor is opposed to rolling back the taxes," Patrick responded with, "I certainly am!" He denied the invitation for a comment as he was already late for his next meeting.

As the gathering progressed, speakers from MassPIRG, PHENOM and representatives from the University declared their opposition to Question 3.

Sarah Hughes, Vice President of the graduate employee organization at UMass spoke on behalf of unions at UMass.

"This decision is extremely crucial," Hughes said through the megaphone, "there are so many workers on campus from faculty to the good men and women who work in our dining halls and residence halls, the University can't run without all the workers."

Hughes, along with other advocates of "Vote No on Question 3" believes if the sales tax is rolled back, discretionary funding will be cut. Public education is considered discretionary, allowing legislators to make funding cuts to education due to loss of revenue. Hughes asserted UMass has already had to make certain cuts to remain affordable for students.

"Presently, there are fewer jobs available at the University, fewer assistantships for grads, you can't get certain care at UHS anymore," Hughes said. "If Question 3 passes, it will cripple the economy of Amherst, which is run by higher ed."

Votenoonquestion3.com estimates Amherst would lose $2,954,139 if taxes are slashed. The advocacy site also estimates the Commonwealth as a whole would lose $2.5 billion in revenue if taxes are scaled back.

Ferd Wulkan, a member of PHENOM, said the organization has started a "Let's Be Average" campaign.

"Our state ranks 46 out of 50 for support for public higher education [funding per capita]," Wulkan said in an interview outside the Student Union Friday. "Our state ranks in the top half for tuition cost, and the bottom half for support, we just want to be average."

Another opinion on Question 3 need not go unnoticed. The Alliance to Roll Back Taxes has run its own campaign to encourage citizens to vote yes on Question 3 Tuesday. Rollbacktaxes.com, a website run by the alliance, claims that if taxes are rolled back, 33,000 productive, private sector jobs will be created.

According to findings by independent economists at the Beacon Hill Institute, a Boston-based Massachusetts policy center, "Ballot Question 3 would create 27,199 more private sector jobs… Increased competitiveness and the demand for labor would result in a $73.50 million increase in annual investment, while gross wages would increase by $1.03 billion."

Voting yes would also roll back the state budget to 2009 levels, and, according to supporters, would force politicians to cut government waste, bureaucracy and sweetheart deals.

The Alliance argues that voting "No on 3" will not prevent the legislature from cutting aid to cities and towns. The reason, according to the Alliance's website: "Remember in 2008 when they said "Vote no" on ending the income tax or else we'll have to cut aid to cities and towns? A majority of voters responded by voting no. What did the legislature do earlier this year? They cut local aid."

A family living in the Commonwealth is estimated to save $900 per year if the taxes are rolled back, according to the website. The Alliance argues that voting yes on Question 3 will put tax dollars back into the private sector.

The Massachusetts Election 2010 website, Political News and Analysis for the Independent Voter, states in a summary of Question 3 that sales taxes in the Commonwealth are regressive taxes that hurt working families. The taxes, according to the website, hurt the poor more than the rich, as people of all incomes pay the same sales tax level, cutting dollars out of some families' pockets but not affecting those who save more.

The prediction, according to the website, "Voters are tired of constant tax increases. The sales tax is affecting business in border towns across the state, and hitting families who can least afford it. If those families turn out to vote, Question 3 will pass by a narrow margin."

Katie Byrne can be reached at kebyrne@student.umass.edu.

Sullivan replacing Scheibel as DA

By Tim Jones
Collegian Staff

Dave Sullivan, Democratic candidate for Northwestern District Attorney and the only candidate on the ballot this fall, is ready for the upcoming elections, and wants to fight for the betterment of the criminal system.

Having beaten opponent Michael Cahillane in the Sept. primaries, Sullivan, 50, is looking forward to the November elections.

As district attorney, Sullivan will represent the Commonwealth of Massachusetts in prosecutions and criminal offenses.

Sullivan will take the place of current DA Elizabeth Scheibel, who is retiring after 18 years in office. He says he plans to base some of his own actions upon work already done by Scheibel.

"Elizabeth Scheibel has a very strong domestic violence and prosecution office, and I plan to build up on that," he said.

Sullivan will continue the works of Scheibel, who, according to the Northwestern District Attorney's website, "has created community education and outreach programs for these populations, particularly in the areas of domestic violence, juvenile justice, consumer protection and abuse committed against children, elders and persons with disabilities."

Sullivan said his motivation is based on his desire to contribute to the community.

"My primary motivation is to improve the criminal justice system and to serve the public, because I care about the community and protecting people," Sullivan said.

A graduate of the University of Massachusetts in 1981, Sullivan graduated with a degree in law from Northeastern University School of Law in 1986.

Sullivan was elected to serve as Register of Probate for Hampshire Probate & Family Court in 2002. According to his website, since he took that position, Sullivan has helped in "establishing a probate court website, founding a national award-winning parent education program, establishing a community outreach program, providing on-site mediation services for families, expanding pro bono attorney assistance, and increasing assistance to unrepresented litigants."

Sullivan said he believes his experience in the court system is his primary qualification for office.

"I emphasize my extensive leadership qualities, not only as a trial attorney for 16 years, but my experience in certain cases," he said.

Sullivan is also planning out which steps he will take first, as well as overall goals through his work.

"My top priority is to make sure we have top-quality prosecutions in a fair way and good accessibility and outreach in the community," he said.

"I also intend to have a community prosecution program to get the community involved in crime fighting," he added.

Tim Jones can be reached at timothyj@student.umass.edu.

Dave Sullivan will serve as the next Northwestern District Attorney, replacing Elizabeth Scheibel.

DECISION 2010

Dembrowski looks to unseat Markey in Mass. 7th district

DISTRICT 7 from page 1

towns of Arlington, Belmont, Everett, Framingham, Lexington, Lincoln, Malden, Medford, Melrose, Natick, Stoneham, Waltham, Watertown, Wayland, Revere and Winthrop.

Due to its solidly Democratic history, the Congressional coverage website CQ Politics has ranked District 7 as "safe Democratic," meaning that the current incumbent is almost certain to win. In addition, the New York Times has predicted a 100 percent chance of a Democratic victory in District 7.

With an outlook like this, one can only wonder who would be prepared to face such a formidable opponent. Enter Dr. Gerry Dembrowski, a chiropractor from Woburn.

"My reason for getting involved in the [District 7 race] is probably, like most of the people out there, [I] just got sick and tired of yelling and screaming at the TV screen seeing all of the corruption that's going on," Dembrowski said during a phone interview.

Another reason Dembrowski says he became involved with politics stemmed from the loss of his wife, who died on Feb. 4 after a long battle with breast cancer. According to Dembrowski, he spent more time with his wife and ensured she received the best treatment available due to their insurance coverage.

"I was able to spend those [final] months until Feb. 4 with her," said Dembrowski, "whereas under the universal healthcare bill that Markey voted on, she probably wouldn't have gotten all the care that she got until that final day when she passed away."

Despite Markey's projected victory, Dembrowski is still confident voters will recognize the work he is putting into his own campaign.

"I'm the one who's out there every single day from sunup till sundown, shaking peoples' hands," he said. "And I know Ed Markey is not out there shaking peoples' hands, because he's too busy doing whatever he's doing in Chevy Chase, Md. being the undocumented Congressman."

Prognosticating a bit, Dembrowski has already identified his top priorities if he is elected Nov. 2.

"You've got to do something about the economy," he said. "I mean, that is peoples' worst fear; that the economy is losing their jobs. So we need to do something that could boost the economy."

"Our economic climate is so fragile that we can't afford to continue with this spending," he went on. "So the first thing I'd do is put a moratorium on all tax increases. We just can't afford it and people are barely squeezing by."

Despite an ominous litany of problems facing the nation, Dembrowski has identified job placement as the biggest problem faced by students of Massachusetts.

"The current unemployment rate [for students] is 18 percent, if not higher," he said. "It's going to be a very tough road for the students coming out of college right now – because the jobs out there are very limited, and the students that are hitting the employment line are going to have to compete with people who already have experience."

Dembrowski also touched back on his previous statements about political instability in emphasizing the state of the economy.

"This is a horrible economy, and we're being told that. Oh yeah, things are wonderful," he said. "But the only thing that's growing is the government."

Dembrowski said he feels a large government can mean higher taxes to come, since governments run on tax income.

Dembrowski said he has no intentions of letting this happen, due to what he called an astronomical deficit. He also outlined his plans for combating America's ever-growing debt problems.

"I'd have to eliminate a whole lot of the discretionary earmark spending that the economists just think is a blank checkbook," he said. "It'll be a big start towards getting the national debt under all."

Dembrowski's parting comments were directed to potential voters at the University of Massachusetts.

"I was in your shoes at one point in time," he said. "It's going to be a harder road for them, for you [students], today than it was for me."

"[Students] need to know that if I get elected, I will be a voice for those students," he said. "And I will work extremely hard to create an environment that is business-friendly for those people who are coming out of school."

Cameron Ford can be reached at cjford@student.umass.edu.

34-year incumbent Ed Markey (left) takes on Republican Gerry Dembrowski (right) in the race for the Commonwealth's 7th congressional district.

Governor's race tight

GOVERNOR from page 1

phone in Boston on Sunday, said the former Harvard Pilgrim health care CEO's campaign is also mobilizing to rally its supporters.

"We have a tremendous amount of volunteers spread across the Commonwealth in a bunch of different offices making calls, identifying voters and encouraging everybody to get out to the polls," he said.

One thing all four campaigns seem focused on is their plans for creating jobs and stimulating the economy.

"Jobs is the issue of greatest concerns to voters," Goldstein pointed out. "Massachusetts has created 40,500 private sector jobs, according to the Bureau of Labor Statistics, and that's hopeful news, certainly for those who have jobs, but we know there're still folks out of work who need a better way, and that's what a second term is about," he said.

Gorka said job growth has always been Baker's trade.

"The biggest issues facing this campaign have been the same for the last 15 months," he said, "it's all about jobs, taxes and spending; creating jobs and cutting taxes and getting Massachusetts back to work."

While Cahill's campaign did not return numerous requests for comment, Stein, the Green-Rainbow nominee, was quite explicit regarding her plans for job creation in the Commonwealth.

Stein said she would take funds currently used for commercial and residential development and put them into a "revolving loan fund so that we can start up jobs in the many areas of the green economy that basically pay for themselves while they strengthen the economy."

Such jobs, she continued, include "jobs in green invocation, in the sustainable healthy food economy, in remanufacturing and clean manufacturing," among others.

"[Green jobs] are going to grow like gangbusters," she said. "That's where we can create easily 50,000 jobs in every community around the Commonwealth."

Other than jobs, both major candidates and the other two campaigns have stressed that this election ultimately comes down to a question of political philosophy.

"The Governor clearly believes that all the folks in this race are good people, but when it comes down to their values, they have a different set of values, and the Governor believes that government has a role to play in helping people help themselves," explained Goldstein.

Gorka, Baker's representative, honed in on another distinction between the two leading candidates.

"The biggest difference is Charlie Baker is not going to raise taxes," he said, "he's not going to continually raise spending."

"The overarching theme is that if you're happy with the way Massachusetts is being run and happy with the direction of the state, then vote for Governor Patrick; if you think that Massachusetts can be doing better, then you have to vote for Charlie Baker."

The polls show Gorka's logic may hold some weight.

According to the last Globe survey, Patrick's job approval rating is just 44 percent, and 55 percent of likely voters said they believe the state is heading in the wrong direction, compared to just 39 percent who said it is headed the right way.

Paleologos said that while he foresees Patrick edging Baker out, a number of scenarios could change that prediction.

"If that 45-46 percent [supporting Patrick] doesn't show up on Tuesday, that's certainly going to impact the race," he said. "[Patrick] is in a better position than Baker going into Tuesday."

Paleologos said that while the Patrick campaigned has championed his administration's record on job growth, disillusionment with the state of the economy could tip the election Baker's way.

"Ironically, it's probably jobs and the economy," he said of why Baker could win. "Patrick is trying to sell his approach in that the state doesn't have all bad news and that there are some kernels of hope, and Baker is basically framing the last days as if it's a referendum on right track vs. wrong track, and whether or not Deval Patrick has fulfilled the promises he made when he came into office, and however that shakes itself out is probably what will happen."

Whitehead pointed to the Cahill quotient as essential to Tuesday's outcome and said that, if Patrick wins, he feels voters will have decided his administration handled the recession aptly. If Baker wins, Whitehead said he would attribute the victory to the national wave of frustration with incumbents.

"If Patrick wins, it will be because a lot of voters conclude that he helped to spare enough of them from a full dose of the ravages of the Great Recession and also because a lot of them didn't take a shine to Baker as a person. If Baker wins, it will probably be because the national wave will have hit the state just hard enough."

While these dynamics have certainly in large shaped the race, Whitehead cautioned that the more complex nature of the four-way race means that, even up to the race's final minutes, much could change.

"If you have a situation like this election... the major-party candidates are neck-and-neck, their respective shares of the likely vote are a lot higher than the Independent's share – the Independent's share of the vote can dwindle to almost nothing on the eve of the election," said Whitehead. "If that happens in this election, the bulk of the voters who would leave Cahill at the 11th hour will probably go to Baker."

Whatever the outcome, polls open across the state at 7 a.m. tomorrow and close at 8 p.m.

Vote 'No' on Question 3 and protect UMass

Amanda Jusino

Many voters learn about referendum ballot questions on election day when they go to the polls. This year, one question in particular will affect the state of the University of Massachusetts' community. Question 3 is a ballot initiative that, if passed, will reduce the Massachusetts' sales tax from 6.25 percent to 3 percent. At first glance this may seem like a welcome relief to our wallets. After all, times are tough. Who wants to pay any more for goods and services than they necessary? This is exactly why you should vote "no" on Question 3.

According to the Massachusetts Taxpayers Foundation, reducing the sales tax to 3 percent would mean $2.5 billion less in state revenue. With the state's economy still wrestling with the national recession and budget cuts, a $2.5 billion decrease would have dismal effects. Our sales taxes fund essential aspects of our society including public education, roads, parks, healthcare and more.

The 6.25 percent sales tax, which was raised from 5 percent in 2009, is still low in comparison to other states. In many localities across the nation sales taxes exceed 7 or even 8 percent.

The entire public sector is threatened by this ballot initiative. Public higher education and public education at the K-12 level, specifically, are already struggling to provide quality education in today's economy. This referendum question threatens to exacerbate this problem and it threatens the education of all public school students in the state.

The 6.25 percent sales tax, which was raised from 5 percent in 2009, is still low in comparison to other states. In many localities across the nation, sales taxes exceed 7 or even 8 percent. The Massachusetts Taxpayers Foundation concludes that, "Of the 45 states with a broad-based sales tax, Massachusetts ranks 43rd in revenues collected per $1000 of income and 35th per capita." These are taxes that fund the services that create advanced society. Living in a world with public safety, public education and other public services, means we rely on sales taxes for everyday constituent services.

This tax decrease would directly affect the cost of our education at UMass. Less revenue will result in less state funding for all of Massachusetts' public colleges and universities. We have seen time and time again that when our legislators underfund the University, we the students, are left to pick up the tab.

This starkly contrasts the University's mission statement, "to provide an affordable and accessible education of high quality..." When we don't get the support we need from the state we get hit with fee hikes that make our public university less accessible and less affordable. The only way to live up to our mission statement is to prioritize education as a right that is accessible to the citizens of Massachusetts, much like our K-12 system.

To accomplish this, we must ensure that the responsibility for financing public higher education falls on the state as opposed to individual students and families. With the passage of Question 3, it is certain that the burden will be put on the students to fill the $2.5 billion gap. The tax cut could result in severe monetary cuts to the UMass system and therefore staff and faculty layoffs, fee increases, a reduction in academic programs and services as well as larger class sizes.

In times of economic turmoil, it is even more important for the Commonwealth to fund public higher education. An educated population is the only way to rebuild our economy. The Public Higher Education Network of Massachusetts (PHENOM) notes that over 80 percent of Massachusetts' college graduates stay and work in the Commonwealth.

These graduates pay taxes and "build and work in businesses that sustain the economy. Every time a fee is raised, that is one more barrier preventing Massachusetts' residents from receiving an education. Especially in light of our jobless economy, we must break down barriers to college access for our state's young people, not build them. We already have to fight for our right to an education and face fee hikes due to our poor economy.

With the passage of Question 3, our hopes to improve our economy and have affordable education in the commonwealth will deteriorate. The state will not be able to provide us with the funding we need, our fees will go up, and our programs will get cut. We will be paying more for fewer services and lower quality education. Protect our education and our economy by voting 'No' on Question 3 today.

The myth of big government

Mihnea Tudoreanu

This election season, we've been hearing nonstop claims about how the government is supposedly growing out of control and needs to be restrained. However, we almost never hear any actual numbers to go with those claims. What exactly has been growing? How much has it been growing? Where do we stand now compared with the past? The silence on these questions is deafening. So let's look at the facts. There is no single established way to measure the size of government, but the three most commonly used measures are tax rates, government spending (as a share of GDP), and the percentage of people employed by the government out of the total labor force.

But even if Obama did reverse the trend, we still have a smaller government now than we did under Reagan, and it will take a long time to get back to pre-1980 levels...

If we measure the size of government based on tax rates, then the federal government has been shrinking radically and continuously.

Taxes have been steadily declining for decades, especially for the rich. The top income tax rate (paid by the rich) was at its highest – 92 percent – in 1951-1952. After that, it fell to 91 percent, and stayed that way until 1963. Then it was gradually cut to 70 percent, and remained there throughout the 1970s. Under Reagan, it was 50 percent.

Under Clinton it was 39.6, and then Bush cut it to 35 percent. Obama has kept income tax rates at Bush-era levels. In fact, the absolute richest of the rich are paying even less than that: the 400 wealthiest Americans paid about 26.8 percent of their income in taxes in 1992, compared to a mere 16.62 percent today. So the idea that taxes have grown too high is not just 'alse; it is in fact the precise opposite of the truth. The last president who significantly increased taxes for the rich was Harry Truman. The long-term tax trend has been downhill ever since.

In terms of government spending, the decline is much smaller – but there is still a decline, at least from 1980 to the present day.

Total government spending in 1980 stood at 21.7 percent of GDP. In 2009 it was 20.7 percent. By the way, if you're wondering where the deficit and debt come from, they have a lot to do with the fact that taxes have been cut so much more than spending. Next, if we look at government employment (state and federal), we see another slow decline.

The government employed 18.08 percent of the workforce in 1980, compared with 17.22 percent in 2009. So if we measure the size of government by these standards, then it has only shrunk a little bit in the past 30 years. But the point is that it certainly hasn't grown.

One way or another, no matter how you measure it, the fact is that the US government has been shrinking since 1980 (and perhaps even since the 50s, if you look at taxes). The only question is whether it shrunk a lot or just a little.

Conservatives may argue that Obama has stopped or even reversed this shrinking trend. I doubt it, because he has not raised income taxes. But even if Obama did reverse the trend, we still have a smaller government now than we did under Reagan, and it will take a long time to get back to pre-1980 levels – let alone anywhere beyond that.

So the Tea Party hysteria about big government is utter nonsense. They are entitled to their own opinions, but not to their own facts. If they want to argue that the US government is still too big for their tastes – in other words, that it hasn't been shrinking fast enough – fine. That is an opinion. But if they say that the US government has grown much bigger than in the past, that is not an opinion. That is a lie.

The UCard is useless

Bobby Hitt

While I was covering the "Rally to Restore Sanity and/or Fear" I unfortunately lost my UCard when it fell off my lanyard. So, today I went to the UCard office in the Whitmore Administration Building to get a new one.

The very nice receptionist was actually at the rally that weekend too. But, she told me I could not use my debit to pay for a new UCard for $25. I was told to go to the OIT kiosk upstairs, but I had gone to that kiosk before and it was so slow that a loading bar didn't even show up for the minute I stood in front of it.

I then asked if I could use the computer in the office, but they told me it was office policy that they can't let people use the computers.

So, I walked over to the library where I made a deposit on my UCard account for $25 so I could pay for the new card. When I returned to the UCard office I asked the other receptionist if I could have a discount for the inconvenience, her first response was giggling.

You might think I am making a big deal out of nothing. Fine. But the fact that they don't even have a policy for discounts or refunds is in itself alarming.

When she realized that I was in fact serious she told me they could not do that. In maybe a more flippant manner than I should have asked to see her manager.

The portly manager received me politely and I explained my situation. However, he did not grant me my request either.

I responded in a justly flippant manner and asked him what the actual purpose of the UCard was.

He told me "identification". I already have identification.

"Do you know what I think the purpose of the UCard is?" I began, "The purpose of the UCard is to force students to spend money at the University."

"Well you seem to have all the answers," the bald manager said, "but if you don't have any more questions then you are wasting your time."

Then I went to various administrative officers until I talked to Jackie Watours. She basically told me that there was no policy in place to give discounts on the UCard.

Here's the thing. You might think I am making a big deal out of nothing. Fine. But the fact that they don't even have a policy for discounts or refunds is in itself alarming.

Also they used to accept debit cards. I am not sure when they stopped doing that, but I certainly wasn't informed. Nor do I look at their website enough to know that this was the policy for the current semester.

Here are a couple suggestions for the UCard office. One; Give me my UCard at a discount. Two; Get a computer where students can deposit or go back to taking debit cards.

I will not be getting a new UCard if I do not get a discount. I will have to use little forms to get into the dining hall and wait for people to open the door for me to my building. I can live with that. Why not make the fat bald manager's computer available to students?

Bobby Hitt can be reached at rhitt@student.umass.edu.

To the biased bidder: Supreme Court opened a Pandora's Box of campaign spending

Dean Curran

Today, Americans will vote in what has been the most expensive midterm election in history. Spending by interest groups is up fivefold from the 2006 midterms, and the center for Responsive Politics estimates that when all is said and done spending will amount to some four billion dollars. That is enough money to pay an in-state University of Massachusetts student's tuition (without financial aid) for 335,655 years, or treat each American to a Big Mac and fries. There are a variety of factors that account for this dramatic increase in campaign spending. It is true that congressional campaigns have been especially contentious this election season, providing incentive for more advertising. One landmark Supreme Court decision, Citizens United v. the Federal Election Commission held that corporate funding of independent political broadcasts cannot be limited. Decided this past January, this ruling will open up special interest spending in elections the likes of which this nation has never seen. It rolls back on decades of federal law, as well as laws in 20 states. In the past, only individuals could support candidates of their choosing through donations.

Corporations and unions were forbidden to do so except through political action committees (PACs), which in turn only raise money from individuals. This is no longer. The Court's ruling has dramatically enhanced the role of corporate interests in Washington. Furthermore, it threatens to undermine the influence of the ordinary voter and the integrity of our electoral process.

The Court's decisions have generated fierce criticism from both parties. President Obama said in his weekly radio address that, "this ruling strikes at our democracy itself," and "I can't think of anything more devastating to the public interest." Senator John McCain said that, "there's going to be, over time, a backlash... when you see the amounts of union and corporate money that's going to go into political campaigns."

The ruling was a 5-4 majority in favor of Citizens United, a non-profit political action group. In 2008, they sought to air commercials promoting its 'DirecTV' film Hillary: The Movie, a documentary critical of then senator and democratic primary candidate, Hillary Clinton, just before the primary. The U.S. District Court in Washington D.C. held that this was in violation of provisions of the Bipartisan Campaign Reform Act of 2002 that restricted "electioneering communications" defined as a "broadcast, cable or satellite communication that mentions a candidate within 60 days of a general election or thirty days before a primary." The Supreme Court overruled the lower court's decision, and also saw it necessary to overturn Austin v. Michigan Chamber of Commerce and McConnell v. FEC, which placed limits on corporate donations in elections.

Court's ruling has dramatically enhanced the role of corporate interests in Washington.

In the majority opinion, Justice Kennedy articulated that limits on campaign contributions and broadcasts violate free expression as guaranteed in the First Amendment. However, campaign finance laws do not imply in any way that corporations may be silenced. They merely limit a specific class of communication that is especially likely to corrupt the political process. In the years since these laws have been enacted, special interests have continued to play a major role in the national dialogue. These laws in no way restrict conventional television advertising, telephone, internet, or print advocacy, individual donations, or any other avenues of expression.

The Court also reasoned that speech cannot be regulated differently based on the identity of the speaker. In this case the speaker's identity is a corporation. However, the Supreme Court has on many occasions upheld restrictions on expression based upon who is expressing. For example, the Constitutional rights of students in public schools are not "automatically coextensive with the rights of adults in other settings," according to Bethel School Dist. 403 v. Fraser (1986). In Civil Service Comm'n v. Letter Carriers (1973) Executive branch employees are barred from taking "any active part in political management or political campaigns."

Prisoners are not entitled to full First Amendment rights, which the Court found to be "inconsistent with his status as a prisoner" in Jones v. North Carolina Prisoners' Labor Union Inc. (1977). In each of these instances, the Court has recognized that certain time, place, and manner restrictions are justified when there is a legitimate societal interest at stake.

Undeniably, there is a public interest in placing reasonable limitations on corporate campaign funding and political broadcasts. Endless corporate and union spending in our elections threatens the integrity of our electoral process in two ways. First, companies can spend endless amounts to sway public opinion through possibly deceptive advertising in pursuit of their narrow interests. For example, the same banks whose reckless greed led us into the worst economic collapse since the Great Depression can now spend unlimited sums to sway public opinion against candidates that have refused to bail them out. Second, this system places so much emphasis on fundraising in elections that politicians will have further incentive to decide issues based on the wishes of major campaign donors than the true will of the people.

There is a vicious double standard here. As an individual, it is against the law to hold a campaign sign within 150 feet of the polls, but corporations can run hours of negative advertising on Election Day. In Citizens United v. the Federal Election Commission, the Supreme Court ruled that corporations are entitled to the full speech rights of individuals. But corporations and people are not alike in this instance. Special interests have narrow objectives that are not necessarily in the national interest, and have far greater means to pursue them. Free speech, one of our most sacred national rights, should not be the justification for turning our democracy into what will essentially be an auction - with representation sold to the highest bidder.

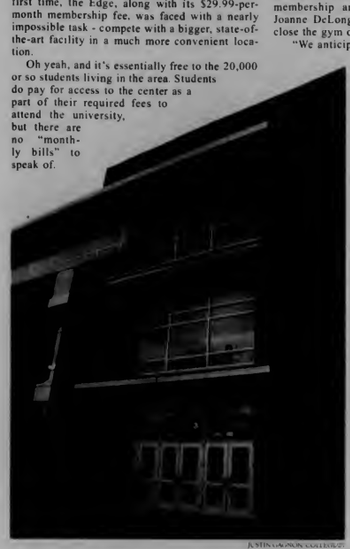
Local gyms fight to compete with Rec Center

By Justin Gagnon
Collegian Staff

The Leading Edge is a fitness center located just a mile down the road from the University of Massachusetts' Recreation Center. It's only been two years since the Edge opened, and due to its success, a second location opened a few exits down the highway. But on Dec. 4, 2009, it met its match.

When the Rec Center opened its doors for the first time, the Edge, along with its $29.99-per-month membership fee, was faced with a nearly impossible task - compete with a bigger, state-of-the-art facility in a much more convenient location.

Oh yeah, and it's essentially free to the 20,000 or so students living in the area. Students do pay for access to the center as a part of their required fees to attend the university, but there are no "monthly bills" to speak of.



JUSTIN GAGNON/COLLEGIAN

The opening of UMass' Recreation Center in December, 2009 has severely hurt business for local gyms, some of which even had to close.

In 2003, the mega-franchise Gold's Gym opened a branch in what probably seemed like an ideal location – a mile from a huge state university that lacked an adequate fitness center. In 2008, the owners wanted to "be recognized in the community as a locally-owned gym" and so they ditched the popular name and became The Leading Edge, according to a press release.

Posted in the Edge's window along with a letter to former members, the press release noted that after ownership problems, a decrease in membership and the waning economy, owner Joanne DeLong was left with no option but to close the gym on Oct. 20, 2010.

"We anticipated them closing...we had heard rumors maybe a year ago," said Western Mass. Planet Fitness Operations Manager Matthew Rogers.

Planet Fitness, located behind the Wal-Mart in Hadley, Mass., was hit "pretty hard" by the opening of the Rec Center initially, but according to Rogers, has since managed to do rather well for itself by offering a menu of incentives and by changing its target audience.

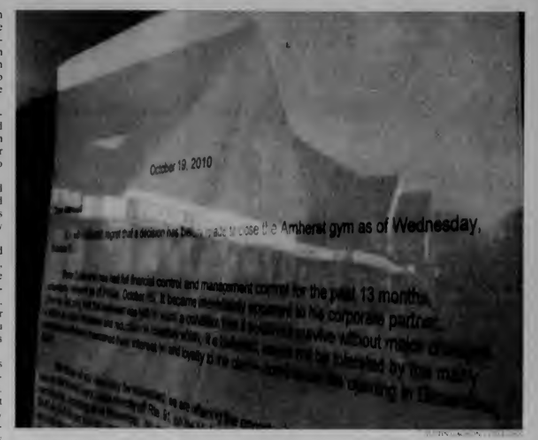
"Since [the Rec Center] has opened up, we've been slowly growing back," Rogers said. "Even though it initially hurt us, we've continued to grow and grow and grow by focusing on the residential community more."

In focusing on a new demographic of members, the Hadley Planet Fitness has become truer to its creed.

"We're the 'judgment free zone' in the sense where we cater to the average person," Rogers explained. "I think perhaps with the students, [the residential community] was a little intimidated at times; it was busy and it was difficult to use some of the equipment."

According to a few UMass students, this is exactly the problem with the new gym on campus. Just as Hall of Fame baseball player Yogi Berra once said, "Nobody goes there anymore. It's too crowded."

Sophie Aronson, a sophomore at UMass, opts to go to Planet Fitness. As a part of her friend's membership, the two can go to the gym together at no extra cost.



The Leading Edge, a local gym formerly known as Gold's Gym, posted a sign in their window to inform members that it would be closing its doors. The closing came less than one year after the Rec Center opened.

"The Rec Center is nice, but it's always super crowded and everyone stares at you," she said with a laugh. "It's not always easy to get there during the day if you live off-campus, and the parking is terrible."

She thinks, however, that the free tanning included in $19.99 month Black Card memberships is the main bait that draws students to the off-campus gym.

The frills of an all-inclusive membership weren't enough to keep all students going to Planet Fitness. A large handful chose to leave their monthly membership bills behind and now work out at the Rec Center full time. Rogers estimated that after the new gym opened, the Hadley location retained only 80 percent of its student memberships.

Lindsey Leiman, a UMass senior, was formerly a member at Planet Fitness, but after finally visiting the new facility and finding the perfect parking spot, she converted.

"I didn't even see the inside of the Rec Center until a month or so after it opened," she said. "I kept going to Planet Fitness just because it was what I was used to, and parking by the Rec Center seemed like a disaster. But when I walked inside, I was pretty angry at myself for not checking it out sooner."

If both gyms were free, Leiman said that she would probably alternate between the two because they both have their pros and cons, but she said she would ultimately choose the Rec Center.

"It has a wider variety of machines and equipment than any other gym I've ever been a member of," she said. "Plus, it has free classes. You can't really beat that. I guess the entire package being free doesn't hurt either."

Justin Gagnon can be reached at jgagnon@dailycollegian.com.

Final chapter of 'Saw' scares

COURTESY TWISTED PICTURES

The conclusion of the "Saw" series came this weekend with the release of "Saw 3D," the seventh film in the series. Ever since the release of the first film, the movies have become arguably some of the most important of the horror genre.

By Tyler Manoukian
Collegian Staff

This weekend, the seventh and final chapter of the "Saw" series was released with much anticipation as one of the greatest series of all time concluded. Released Halloween weekend, the killer puts on a mask of his own and scares the pants off audiences everywhere.

The movie has been pushed and hyped for the last few months with the intention of delivering one of the scariest films ever. The flick continues with the latest installment of the decorated series. "Saw 3D: The Final Chapter" brings another series of deadly traps and games with more mashed and mutilated bodies than actual survivors.

The movie focuses on Jill Tuck, played by Betsy Russell, the wife of the original Jigsaw, and his handpicked successor, Agent Mark Hoffman, played by Costas Mandylor. At the end of Saw VI, Jill placed a reverse bear trap on Hoffman's head with the intent to kill him, but Hoffman managed to escape the trap angrier than ever at Jill and Jigsaw's deceit. With new games, new traps and new bodily torture tactics, Hoffman kidnapped a writer who capitalized on self-help named Bobby Dagen, played by Sean Patrick Flannery. Along with Dagen, his lawyer, wife, publicist and manager are all captured in Jigsaw's newest game.

"Saw" takes on its alpha role as a primary horror film in the modern generation. This film represents a new type of horror genre recently uncovered. In the past, the horror genre meant a serial killer hunting down victims and killing them on site. "Halloween" and "Friday the 13th" were good examples of this type. "Saw" brings on a new sub-genre where the hunter captures his victims and toys with them. A new type of mutilation has arisen from all of this with new and intense slasher scenes.

Shooting the film in 3D will only increase its financial success, which fans will ultimately flock to theaters to see. What remaining fans the movie has, they can expect the same type of action as in previous installments. The 3D aspect makes the film a lot more popular and desirable to see. Intrigue and audience curiosity will be the foundation of this movie's success as it lacks a creative direction.

The 3D cinematography will turn out to be worth it for investors because of its insane graphic capabilities. If the film's plot line will not grab the attention of viewership, 3D will certainly draw a crowd. "Saw" is a great 3D film – blood splatter comes out into the audience almost as if you can touch it. It puts you in the movie, really gets you involved in and places you right into the action. However, one thing that does not really work out for the film was its lack of 3D display. While most of the scenes are 3D, there were some, like the death scenes, that really do nothing for the film. There is an extreme absence of 3D cinematography during these parts. Sometimes it is hard to tell that there is any 3D footage. In this sense, many fans will be disappointed.

After seven films, though, there is only so much of the plot to build on. While all the films have taken the same type of boring plotline – being captured and put in a game – the guts and gore are more grotesque than ever. Starting with a gruesome opening scene, this time the lives of three are on the line. Faced with the decision to either kill his friend or save the girl that has been playing the two of them, each man must decide what is most important. Fans will soon realize that the movie is just like the others.

Kevin Greutert directed the film and coincidentally was offered the chance to direct last week's release of "Paranormal Activity 2" before Lionsgate chose to exercise the option in his contract to do the final movie.

In terms of acting, Costas Mandylon is once again fantastic in his roles as Jigsaw 2.0 and an FBI Agent. His acting is the brightest spot of this movie as he blows the audience away with his manner. A strong build and a serious demeanor, we are able to see his capabilities as an actor. This film could open up some great opportunities for this guy.

All the others played good supporting roles in the movie, and as any horror film, did not need a star to draw a crowd. Betsy Russell did great in her secondary role as well. Perhaps the biggest star in the film is Tobin Bell. His role as John Kramer can never be underestimated. He holds the entire movie together. Even though he is dead, coming back as a spirit-type who offers his advice to his young protégé and talks to his wife, Jill, it is obvious that his support in the film is the glue that kept this birdhouse together. So much of this film is dependent on John's plans. Most of what transpires is the work of John in his will.

John also provided 90 percent of the back story in the movie. Every action taken is under John's past or present guidance and that is what makes this a unique film in regards to the rest of the series. While the series gets repetitive, this guidance makes the film complete.

Like any sequel, you must see the other previous six movies in order to understand this one. Ideally, this movie is be good for fans of the series and viewers looking for a scare. Viewers who do not know the series well will be very confused and should not see this movie. Watch the others and then go see this and it will be well worth it.

Florence explodes

By Acacia DiCiaccio
Collegian Staff

This Halloween evening, the brilliant British band Florence and The Machine graced the House of Blues in Boston to kick off their U.S. tour. The band consists of lead singer Florence Welch and "The Machine," keyboardist Isabella Summers, Robert Ackroyd on guitar, bassist Mark Saunders, and Tom Monger whose harp received a loud applause when placed on stage.

Their unique style of music combines the common classification of "Brit Pop" with indie rock and the powerful and emotive vocals of lead singer Welch. The band is on tour for their first record release, entitled "Lungs," which contains motifs of love and gothic imagery that were portrayed perfectly on Halloween night.

The House of Blues was packed with a crowd composed mostly of 20-somethings, many donning costumes in celebration of the holiday. With excited anticipation the crowd waited two hours before the headliner actually began their performance. Concertgoers had to endure two surprisingly terrible openers before their beloved band came onstage after what felt like an unnecessarily long time.

The first opening act, Hanni El Khatib, consisted of merely a drummer and a lead singer/guitarist with completely pointless lyrics and a flawed performance. The Smith Westerns followed, who may have had the potential for greatness had it not been for their completely tone deaf lead vocalist whose hipster pretense caused him not to care that no one was into the music.

After an agonizing wait, the band finally entered the stage, each member wearing a full skeleton costume. Florence herself wore a skeleton-bride costume that appeared to have been cheaply bought then modified, something Welch is known for. At nearly six feet tall, this redhead's presence was as strong as her vocal performance.

The set began with the song "Howl" about a werewolf. Welch threw in some scary shrieks to add to the song's Halloween theme. After the next few songs when Welch greeted the audience with a kind smile and genuine gratitude, she pointed out the fact that pretty much all of their songs related to Halloween motifs in some way. This, and the dramatic use of stage lighting, only added to her beautifully haunting vocals.

Even with the few words that she spoke between tracks, Welch's endearing personality shone through the skeletal makeup and spooky lyrics. The joy she felt for her artistic expression came out through her dancing – she often spun in circles reminiscent of a childlike celebration. Welch also actively involved the audience, encouraging them to sing a scary "Happy Birthday" to keyboardist Isabella Summers and asking everyone to jump up and down on the final joyful song, "Dog Days Are Over."

The attendees of the Boston show found themselves at a completely organic performance. Florence and the Machine is not known for sticking to one set list, and it was clear that the band chose the most thematic songs for their Halloween show. Not only were the costumes and songs unique to this one night, but listeners were also the first in the United States to see the band perform their newest song, "Strangeness and Charm" from their upcoming second album. The audience clearly approved of this catchy and emotive new track.

Again the audience was made to really work for what they wanted – the encore that was obviously demanded was a long one to wait for. Concertgoers cheered for a while until voices and hands began to hurt, and even after organized chanting and clapping rhythms it seemed to be an eternity before the band returned. The wait was worth it, though. The band saved their most popular songs for last. The encore began with "Heavy in Your Arms" from the Twilight Eclipse soundtrack, and just about everyone was singing along. The next song Welch wrote even before the band had formed. The playful tune about a violent relationship brought the audience to their toes. The band ended with their biggest hit "Dog Days Are Over" and Welch's energy channeled through the entire crowd. Despite how late everyone had been kept out, the final performance brought on a blast of vigor that no one wanted to end.

UMass falls to La Salle, 3–0, over weekend

Defender Kelsey Anderson, above, and the rest of the Minutewomen are preparing for their second straight A-10 postseason.

By David Martin
Collegian Staff

PHILADELPHIA — The Massachusetts women's soccer team couldn't extend its win streak to four games against La Salle on Sunday after clinching the fifth seed in the Atlantic 10 playoffs.

The Minutewomen (8-10-0, 5-4-0 A-10) faced a struggling Explorers team that was fighting for the sixth and final seed in the A-10 tournament.

UMass coach Ed Matz knew even before the match that it would be a challenging game to win.

"Today was going to be tough," Matz said. "La Salle had to win to earn a playoff spot, and we had already clinched ours [on Friday]. They had that level of intensity that we didn't at this point."

The Explorers (10-8-2, 4-4-1 A-10) got going early with strong offensive play that seldom left the UMass zone. That steady attack led to their first goal of the game from a perfectly placed chip shot by La Salle attacker Renee Washington in the 35th minute.

La Salle kept up the scoring in the second half as Amanda Komarnicki put away a rebound from Leigh Gray's blocked shot 61 minutes, 53 seconds into the game. Morgan Golden would then put the game away in the 85th minute with the third and final goal of the game.

The Explorers out-shot UMass, 11-7, on the day and led in corner kicks, 8-3.

Matz was sure to point out that there were other factors at work that worked against the Maroon and White.

"We were also tired and pretty banged up," Matz said. "We played on turf fields this weekend, which present a lot of challenges for a team who practices and plays on grass at home. Throughout the game, only the back four were really able to keep up, while our midfielders and attackers had trouble making plays. We just didn't work off the ball."

Starting goalkeeper Emily Cota found herself on the wrong end of a strong collision with an opposing attacker just before the second Explorer goal. She was down on the field for several minutes before being carted off to waiting medical staff. Backup keeper Emersyn Pullan played the final 28 minutes of the game and recorded one save while allowing one goal.

UMass solidified its second consecutive postseason birth with a hard-fought shutout win against Fordham on Friday.

The Minutewomen held off a tough Rams team on the road in their pursuit of the postseason with clutch performances by attacker Deanna Colarossi and goalkeeper Emily Cota.

Matz was very pleased with the team's effort in the victory.

"We did a great job on Friday," Matz said. "Fordham's good at home and we were able to pull off a great emotional game. Diana scored a great goal and we had strong defense that was highlighted by Emily's performance in net."

The Maroon and White got on the board early with the team's first shot off of the boot of Colarossi. Her goal in the 18th minute was the only goal of the night and her team leading ninth of the season. It would prove to be the only tally needed as defense worked hard to keep the Rams (7-10-1, 4-4-1 A-10) at bay.

At the end of the game, the Rams led the shots with a staggering 17-4 advantage and also led in corner kicks, 5-4. UMass led in fouls, 6-3.

Cota's performance in net was her best of her three consecutive shutouts. She had five saves on the day, with four of them being in the second half. Her biggest saves came in the final three minutes of play, as she held stopped two in the Ram's last-chance efforts.

David Martin can be reached at dnmartin@student.umass.edu.

Swimming and diving continue strong performances with wins

By Ben Lambert
Collegian Staff

On the night before Halloween, the Massachusetts swimming and diving teams had something scary in store for Stony Brook.

The men's team earned a 184-114 victory, while the women's team worked its way to a 159-141 win. After these victories, both teams have 2-1 records.

The freshmen led the way to victory for the men's team. Derek Hursch continued his strong start to the season with individual wins in the 100-yard backstroke and 400-yard individual medley. He also teamed with senior Max Butler, senior Brian Schmidt and sophomore Eric Zeimetz to claim the 200-yard medley relay.

Hursch has started his season on quite a hot streak. He now holds an 8-0 record in singles events this season, and earned Atlantic 10 Swimming and Diving Performer of the Week honors for this week. He also took home this award after his performance in the season opener at Boston University.

The freshmen also contributed to the effort this weekend. Chris Inglis earned his first-ever first place finish in the 200-yard backstroke, and added a second-place result in the 200-yard freestyle, and a third-place mark in the 400-yard IM. Troy Nichols also snagged his first career victory with a win the 1000-yard freestyle.

On the diving side of things, senior John Clark, junior Conor Dunn and sophomore Alexander Merkulov all turned in strong performances. Clark earned the gold medal in the one-meter dive, with Merkulov and Dunn following respectively. The order was mixed up in the three-meter dive, as Dunn took first place, with Merkulov and Clark earning second and third.

Junior Chelsea Downing led the women's squad, who finished first in both the 1000- and 500-yard freestyle, and added a second-place finish in the 400-yard IM. This kind of success is nothing new for Downing, who is the all-time UMass record holder in the 400-yard IM, the 1650 freestyle and the 500 freestyle.

Freshman Anna Cavanaugh also played a significant role for the Minutewomen. She claimed victory in the 100-yard butterfly, placed second in the 200-yard freestyle and 100-yard freestyle, and teamed with senior Jennifer Corriveau, senior Tavis Potter and sophomore Amina Meho to win the 200-yard freestyle relay as well. Cavanaugh started her UMass career strongly, as she came up with this strong performance just one week after earning her first collegiate victory at Army.

The women's diving team also had a solid day. Sophomore Molly Elkins won the 1-meter and 3-meter dives. Junior Hannah Swift was right behind her all the way, as she earned second place in both events. Elkins and Swift finished first and second in these events for the second straight week.

The UMass swimming and diving teams will next return to the pool on Friday, Nov. 5 at Binghampton where the Minutemen and Minutewomen will face off with a team headed by coach Sean Clark, a UMass alumni.

Ben Lambert can be reached at wlambert@student.umass.edu.

The Massachusetts swimming and diving teams had a successful weekend with both teams earning victories over Stony Brook. The men's team won 184–114 as the women were victorious, 159–141.

UM skillful at Head of Fish competition, finish in top 5

UMass took three races over the weekend at the Head of Fish Regatta. Next for the Minutewomen is a race at Dartmouth next weekend. Sophomore Emily Boucher finished third in singles.

By Stephen Hewitt
Collegian Staff

Last year, the Massachusetts rowing team had one of its best performances of the fall season at 2009's Head of the Fish Regatta, earning five first place finishes and several top 10 performances.

It was more of the same in 2010's version of the race, as the Minutewomen rowed to four first place finishes and a slew of top five and top 10 performances from other boats.

"The success of the past weekend was that of a team working together for good results," said UMass coach Jim Dietz of his team's performance in Saratoga Springs, N.Y. this past weekend.

Going against several other schools around the northeast on Saturday, the Minutewomen more than held their own, and will be happy about where they are as they head into the last three weeks of their fall season.

Starting off the day for UMass was junior Emily Boucher in the singles race. Boucher finished in third overall with a time of 16 minutes, 47.53 seconds, just over a minute behind the first place finisher from Montreal.

More success followed up that performance, as the Minutewomen finished in both first and second in the doubles race. The duo of Boucher and senior captain Elizabeth Euiler finished in first at a time of 14:38.97, about 14 seconds ahead of the team composed of juniors Kendall Bennett and Amanda Doolin.

UMass found more victory following that in the Light 4+, finishing in first with a time of 15:49.03, just one second ahead of a boat from Sacred Heart. The boat was led by senior Amy Nash.

The Collegiate 4x boat, consisting of Boucher, Euiler, graduate student Megan Donovan and senior captain Chelsea Wakeham claimed second place in its race with a time of 14:37.25, about 15 seconds behind the winning team from Colgate.

The Minutewomen also brought their Lightweight 8+ team to competition and seemingly destroyed their competitors, finishing in first place with a time of 13:42.69, which was 30 seconds ahead of the second-place boat from Tufts.

UMass capped off the day with a strong performance in the fours race, entering three boats into a 31 team field and finishing in the top 10 with all three of its boats.

The boat of Bennett, Doolin and seniors Alexandra DiMatteo and Kelsey Schachter finished in third place with a time of 13:40.81, about 20 seconds ahead of the next Minutewomen boat that came in fifth place.

With three weeks remaining in the fall season, Dietz and the coaching staff are very pleased with how things are shaping for the spring.

"We are showing a lot of potential and will continue to work different combinations for the remaining three weeks on the water," Dietz said.

The varsity crew will take this weekend off from competition, as the novice crew will travel to Hanover, N.H. to compete in the Dartmouth Novice Head this Saturday.

The varsity crew will race in its final regatta of the fall on Nov. 13 when they will travel back to Boston, Mass., the site of the Head of the Charles two weeks ago, to compete in the Foot of the Charles Regatta.

UM finishes third in A-10 Championships

Johnson twins cross line first for Minutemen in Pittsburgh

By Eric Mansfield
Collegian Staff

Both Massachusetts men's and women's crosscountry teams competed at Schenely Park in Pittsburgh, Pa., this weekend for the Atlantic 10 Championships. The men and women finished third and eighth in the 14-team meet, respectively.

In what was their final A-10 Championship meet as Minutemen, Kevin and David Johnson crossed the finish line first for UMass. Kevin finished in a time of 24 minutes, 59 seconds, with David just behind him in 25 minutes.

Not long after the twins came three other senior members of the team, Andrew Mulvaney (25:16), Scott VanderMolen (25:35) and Robert Deegan (25:38).

Rounding out the top seven was senior Sonny Gamble (25:48) and junior Andrew Erwin (25:57).

UMass coach Ken O'Brien was pleased with his team's effort.

In order to prepare for the course at Schenely Park, O'Brien simulated the course in their training. In years past, when O'Brien's Minutemen were not familiar with how to run the course, they struggled.

After implementing certain changes in their training prior to the meet in Pittsburgh, the Minutemen have run well the last two or three times they competed there.

With that training O'Brien said that he thought the team was prepared for the course and neutralized Duquesne's home course advantage.

In the weeks leading up to the meet O'Brien sensed that his team knew that they were "doing something the other teams haven't had a chance to do."

The team had a mental edge as far as preparation.

"We were ready to run pretty well. I thought we had a good day," O'Brien said.

O'Brien said that he thought the older runners responded well and did a fine job leading the team.

"It was as expected a team effort," O'Brien said.

Richmond took first place with three runners finishing in the top 10.

Senior Andrew Benford of Richmond took first place overall in the field of 144 with a time of 24:12.

Duquesne took second with two runners finishing in the top 10.

Leading the way for the Minutewomen was junior Karen Roa, finishing in 18th place out of the field of 139 runners. Roa finished with a time of 18:16.

Next to finish for UMass were seniors Elizabeth Fisk and Gina Perno with times of 18:41 and 18:45, respectively.

Rounding out the top five was sophomore Courtney Baldwin and junior Claire Petitt with times of 18:45 and 19:01.

Head Coach Julie LaFreniere said that the eighth place finish isn't too bad, being that fifth place was 11 points off.

That being the case, the women were still disappointed, LaFreniere said.

LaFreniere would add that there usually isn't that big of a gap in between their top four runners. In the past they've all been within five seconds of each other.

LaFreniere said that the finish only proves to be more disappointing when you know that it only would've taken each girl to make a few more passes to get to fifth place.

"Roa and Baldwin really took it out," LaFreniere said. "The women competed hard. They were gutsy."

LaFreniere said that freshman Mary Cole had a strong race and that she has been getting better with every meet.

LaFreniere said that while Schenely Park is not a good spectator course, the athletes like it.

"We were just a little bit off," LaFreniere said.

LaFreniere said some schools traveled on Thursday in order to get a day of recovery. UMass didn't leave campus until early Friday morning.

"I know I was exhausted by Friday night," LaFreniere said.

Both UMass teams will have the next week off and will then travel to Madison, Conn. for the NCAA Regional Championships on Nov. 13.

Teams from eight different regions will compete for the opportunity to go to the NCAA National Championships. Two teams from each region will earn an automatic bid, with the next best six from any region being selected by a committee.

UMass will compete amongst a field of about 25 schools from four or five major conferences within their region.

O'Brien said that having an older team and momentum on its side is a good plus for them and that they will be ready for the 10,000 meter course in Madison. The Minutemen have already competed on one 10,000 meter course at the Chili Pepper Festival in Arkansas just a few weeks ago.

LaFreniere said that over the course of the next couple of weeks the team will continue to keep building and that the meet in Madison will be "a different experience altogether."

Eric Mansfield can be reached at eamansf@student.umass.edu.

Senior Andy Mulvaney finished 20th place for the Minutemen, who finished at third in the Atlantic 10 championships.

Duncan more than a runner for UMass cross-country, track

By Eric Mansfield
Collegian Staff

Behind the success, the struggle and the triumph of an athlete there is usually something or someone in the background driving that person forward.

To the athlete, that person is nowhere near the background. In many ways, they are at the forefront, even if they aren't physically with that person.

Senior Massachusetts cross-country and track and field runner, Sean Duncan, was never pigeonholed as only a runner. Growing up, he played other sports like soccer and baseball as well.

When Duncan got to middle school, though, he realized that running was his athletic strength. When that happened, a certain member of the family got excited.

Sean's grandfather, Don Duncan, had been a long-time teacher as well as a cross-country and track and field coach at Weston High School in Massachusetts. A man who never competed as a runner, but as a soccer player at Fitchburg State, coached the Wildcats to a victory at the state meet in 1989, the same year Sean was born.

That win came only a year after Don was inducted into the Massachusetts State Track Coaches Association Hall of Fame.

Don's brother, Robert Duncan, received the same honor in 1989. He coached at Gardner High School, Sean's hometown, some 50 miles southeast of Weston.

Needless to say, running was in the family.

So when it became apparent that Sean was going to take running seriously, Don was going to be there for him in some capacity.

"He was kind of excited," Duncan said. "He would always give me little tips. He used to pump me up in that if I did have questions I could just call my grandfather and ask him and I'd probably get a pretty good sense of what was going on."

COURTESY UMASS MEDIA RELATIONS

Sean Duncan's running ability is a genetic quality, seen from both his grandfather and brother who both earned awards in running.

In summer training when Duncan wasn't running for the Wildcats of Gardner High, coach Ken Pelletier could not coach his runners due to Massachusetts Interscholastic Athletic Association rules.

Those rules did not seem to bother Duncan, though. After all, he did have a hall of fame grandfather at his full disposal.

"I could just go to my grandfather and be like 'What should I do for a workout?' Or he would come to the track and he would do workouts," Duncan said.

Duncan added that the advice that he would get from his grandfather was an advantage, but not always in the technical sense.

"I think the advantage was more mental knowing that I had that kind of support at my disposal," Duncan said. "I think some of the tips he gave me running sure helped, but it was more he let me develop. He would reinforce exactly what I was learning."

In the summer of 2005 Duncan noticed a significant amount of pain in his left foot. For about a month and a half, doctors struggled to figure out what was wrong with it.

In late October of that year, Duncan was diagnosed with a broken left navicular bone, almost collapsing the arch in his foot.

The doctor who made the diagnosis said that it may be a good idea to start thinking about taking up a different sport.

That didn't happen, though.

For eight long months, Duncan rehabilitated on the bike and in the pool.

During that time, Sean's grandfather would tell him not to worry about the long lay-off. Eight months is a long time for a runner to be out, but Don told Sean that he's had years of running to work with. If Sean wanted to get back to where he was, he would get there. The rehabilitation would just have to take strong mental fortitude.

Duncan said that during the time he had to rehabilitate, he started to appreciate the sport that much more. For him, running is that release from the outside world, something he can go to for relief.

"I really love running. It's my outlet for stress," Duncan said.

After all of the rehabilitation, Duncan arrived at Gardner High for his senior year of high school. He was nowhere near the runner he was before.

After a couple of months of trying to reacquire the success he had, Duncan reached his final home dual meet of his senior season.

While all of this was going on, Sean's grandfather was struggling with cancer and the disease had spread to his brain. The entire Duncan family knew that his passing could arrive at any time.

For the longest time, Don had been the rock, the foundation and the patriarch of the family. He was always there for everyone. He attended all of his grandchildren's sporting events throughout their respective childhoods.

Of course, with running being the connection, Sean's athletic pursuits in particular were of great interest to Don.

"I think he really enjoyed watching me run because without saying anything I picked up running, I liked running and I had success with running," Duncan said.

Throughout his coaching career, Don had seen hundreds upon hundreds of kids go through the high school running experience.

"To see a kid that was related to him, he was really, really excited about it because I was really gung-ho about running," Duncan said. "I loved putting in all the hard work and he'd give me as much hard work as I could handle."

In his final home dual meet of his senior year, Duncan put forth his best effort since he had come back from the injury.

He had won the race and felt as though that he was back to his pre-injury form.

When he crossed the finish line, though, Sean was greeted by his father, who was visibly upset.

Sean's father had received a phone call telling him his grandfather had passed away just before the gun went off.

"Things can happen and they affect you negatively and for me, it was more one of those things where it affected me positively," Duncan said. "I didn't think 'oh, my grandfather's dead, I don't have this in my life anymore.' I figured he's gone, he's given me as much as he can."

Not much time would pass before Sean would be tested again. The district meet, which was held at a different course in Gardner, was the following week.

"The one thing that he would want is for me to be really focused and run my [butt] off and run the way I am capable of," Duncan said. "I had no business belonging in the top 10, like maybe getting eighth, ninth, 10th."

No one would have been disappointed in one of those finishes for Sean. With just coming off of the injury and his grandfather's death, family and friends were going to support him no matter what.

The only one who wasn't going to accept a finish like that was Sean.

"I had had a heck of an advantage by having all these really good coaches," Duncan said. "There's no excuse for me to get ninth or tenth. I can win this thing. I got on the line going 'I'm going to win. That's the way my grandfather coached.' I was taught to be like that."

"I put that race to my grandfather," Duncan said. "My grandfather deserved one where I just got out and ran the way I'm supposed to run."

Sean didn't win, but took second.

"It's a pretty powerful thing when you have someone that means a lot to you and then you step on that line and it's crunch time, do or die," Duncan said. "Failure, or not running above and beyond that day, wasn't really an option."

Duncan believes that that race in particular is what made running at UMass more likely.

Duncan always wanted to run Division I and when he was given the opportunity to take a spot on the fall roster in 2007 he jumped to it.

When Duncan got to UMass, he quickly realized just how difficult it would be.

While the new surroundings and challenges at UMass were tough to bear, one aspect where Duncan didn't have to do a lot of adjusting was dealing with the coaching.

Duncan said that O'Brien and his grandfather, because of being around the same age and coaching for about the same amount of years, were actually quite similar in their coaching styles.

Because of his experience, Duncan said that O'Brien is great at figuring out how to motivate different runners. It was the same with his grandfather. He knew exactly what the kids were looking for from the coach.

It helped Duncan's comfort level and confidence level to know that there were people similar to his grandfather around to help him become the runner he wanted to be.

As important as the coaches are, Duncan made it clear that above all, his teammates are the ones that do the most to motivate him day in and day out.

"You see those guys getting better and you run with them every single day. And it's hard to not believe that you're getting better to," Duncan said.

November 6th will mark four years to the day that Sean lost his grandfather.

Although Sean is out right now with a stress fracture in his kneecap, he still acknowledges his grandfather's impact on his running.

"He's always there," Duncan said. "When I'm hurting, that part of the race. In the back of my mind when I'm really hurting I can hear him. When [I'm] out in the woods by yourself working with your teammates he'll pop into my head."

And if there's one thing Sean will always hold onto, it's a state championship pendant his grandfather gave him some years ago.

He won it the year Sean came into the world.

From the sound of things, Sean will cherish it until the day he leaves it.

DECISION 2010

Gov. Patrick places first

Incumbent beats out Baker and secures 49 percent of vote

By Sam Butterfield
Collegian Staff

The people of Massachusetts decided Tuesday that Deval Patrick deserved a second term as their governor, sending the one-term incumbent back to Beacon Hill with 49 percent of the vote.

Patrick survived an intense challenge from Republican Charlie Baker, a former businessman and William Weld administration staffer. The Governor also benefited from Independent Tim Cahill, who drew just under 10 percent of the vote, with many of those ballots likely going to Baker were Cahill not in the race.

After the polls closed at 8 p.m. yesterday, initial indications were that the race would be a close one, as Baker trailed Patrick by just two to three percent, according to live counts reported by news organizations like the Boston Globe. However, as more and more precincts reported their results, it became clear that Patrick was on his way to a second term.

As Patrick's reelection became more and more certain, it appeared his message of "generational responsibility," or an obligation on his and all generations' behalf to leave the world better off, resonated with Commonwealth voters. Throughout the campaign, Baker took a conventional approach of attempting to cast Patrick as a Beacon Hill insider, framing himself as an alternative to politics as usual.

As his campaign spokesman Rick Gorka said Sunday, "If you're happy with the way Massachusetts is being run and happy with the direction of the state, then vote for Gov. Patrick; if you think that Massachusetts can be owing better, then you have to vote for Charlie Baker."

Gorka's message initially looked like it may have held weight with Massachusetts voters, as recent polls conducted by several organizations indicated that a majority of Bay State residents believed the Commonwealth was headed in the wrong direction.

According to an Oct. 24 Boston Globe poll, 55 percent of likely voters believed the state was headed the wrong way, compared to just 39 percent who said it was headed in the right direction.

In the end, it may not have been about whether voters believed the state was going the right way, and more about simply who voters liked better.

Throughout the campaign, Patrick scored significantly higher than Baker or any of his other opponents in likability ratings.

"Our polling has consistently shown [Patrick] to be the person with the best temperament, and he's had job satisfaction numbers running in the mid-40s," said David Paleologos, director of the Suffolk University Political Research Center last week.

As the results continued to pour in, Patrick's margin remained relatively stable. With about half of the vote in, Patrick held 48 percent of the vote to Baker's 42, Cahill's eight percent and Green-Rainbow candidate Jill Stein's one percent. These numbers were more or less the median of what recent polls had indicated, as an Oct. 29 Rasmussen Reports poll put Patrick ahead just 46-to-44, while a Suffolk 7 News Boston poll gave Patrick 46 percent to Baker's 39, and the latest Globe poll gave Patrick a 43-to-39 edge.

As it turned out, the Governor bested all of those prognostications, and fears of an 11th hour shift of support away from Cahill to Baker never materialized.

Leading up to the election, pundits and pollsters had speculated that it was possible voters who had supported Cahill

The governor of Massachusetts has been elected for a second term. He and Lt. Gov. Murray plan to stay focused on the economy.

Incumbents prevail in Mass. elections

District 1

Democrat John Olver has been re-elected for another term in the Massachusetts First Congressional District.

Olver defeated Republican candidate Bill Gunn of Ware and Michael Engel of Easthampton in Tuesday's election.

In 1991, Olver was elected into office, succeeding the late U.S. Rep. Silvio Conte, and has represented the First District for 10 consecutive terms.

Stretching from the Berkshires to central Massachusetts, the first district is the largest, geographically-speaking, in the state.

This win for Olver marks two decades of him representing the First District in Congress. Olver, who once taught chemistry at the University of Massachusetts, has lived in Amherst for almost 50 years, has faced stiffer resistance this year on each side of the political spectrum than in recent times he has sought reelection.

In a recent interview with The Massachusetts Daily Collegian, Olver said of his goals if elected, "I'd like to create more jobs with investment in green energy and energy conservation-focused engineering and technology."

He added, "I would also like to bring our combat troops home from Afghanistan and pass economically advantageous, border-securing, comprehensive reform of our immigration policies."

Gunn was endorsed by Sen. Scott Brown, former Massachusetts Gov. Mitt Romney and the Tea Party Express. The GOP backed Gunn stands for reduction of federal spending and sought to repeal the national health care reform law. His campaign benefited greatly from the growing anti-incumbent sentiment across the country this year, but it was not enough to overcome the strong local support for the well-known Olver.

Engel, the owner of Cherry Picked Books in Easthampton, and a former professor of political science at then-Westfield State College (now a university), positioned himself as a progressive independent alternative to Olver.

District 2

Incumbent Springfield Democrat Richard Neal secured his spot for another term, trumping Hopedale Republican Tom Wesley's efforts to land the Congressional District 2 seat.

Neal, 61, won the election with 59 percent of the vote, with Wesley, 55, taking the other 41

National elections result in turnover of power to GOP

By Steven Thomma
McClatchy Newspapers (MCT)

WASHINGTON D.C. — Two years ago, Barack Obama promised change. Tuesday, the voters made a change of their own.

In a tidal wave of anger and anxiety, they voted President Barack Obama's Democrats out of office from coast to coast, sweeping them out of power in the House of Representatives and slashing their once near-invincible numbers in the Senate. Democrats appeared likely to hold a narrow Senate majority.

The vote changed the balance of power in Washington, slammed the brakes on Obama's agenda, and ignited anew the central question of what the country wants from its government. It also reopened debate over whether either major political party is anywhere near forging a durable majority coalition.

One passionate phenomenon more than any other colored the politics of 2010 — the "tea party" grass-roots rebellion, aimed first at establishment Republicans, then at the Democrats who controlled Washington until Tuesday. Tea party-backed Senate candidates won in Florida and Kentucky holding those seats for the GOP — but fell short in Delaware, where Republicans hoped to pick up the seat once held by Vice President Joe Biden.

Ultimately, though, Tuesday's vote was most about Obama, and about the country that sent him to the White House with great hopes, then watched in mounting frustration as unemployment increased despite his massive expansion of government spending and debt.

"This president has overpromised and underdelivered. People expected more change than they got," said Larry Sabato, the director of the Center for Politics at the University of Virginia. "Americans are trying to issue a midterm correction to Obama, to nudge him back to the middle, where they thought he was when they elected him. They're surprised he's as liberal as he's been."

Most presidential parties lose seats in the House of Representatives in the president's first midterm election; since 1960, the average loss has been 22.6 seats.

Over the past 80 years, only two presidents have seen their party gain House seats in their first midterm elections — Franklin D. Roosevelt in 1934 and George W. Bush in 2002. Each had unusual circumstances — voters rallied to FDR's Democrats as he marshaled the federal government to fight the Great Depression and to Bush's Republicans in the aftermath of the 2001 terrorist attacks.

However, the wholesale rejection of Obama's party Tuesday was deeper and more emphatic than average.

Why? One key reason is the economy. Although it's rebounded weakly from its collapse, the recovery has been painfully slow, and unemployment remains high at 9.6 percent.

For voters, the economy eclipsed all other issues Tuesday, according to exit polls; more than 80 percent of voters said they're worried about the country's direction and about half said they think that Obama's policies are hurting the country.

"We need change in a conservative way. Stop the spending and stop the taxes," said Olivia Quintana, 46, a financial analyst voting in West Kendall, Fla.

Any president should expect to be punished in a bad economy. Facing his first midterm elections during the recession of 1982, Ronald Reagan's Republican Party lost 26 House seats.

"If the unemployment rate were 6 percent, we wouldn't be having this conversation today," said Lee Miringoff, the director of the Marist Institute for Public Opinion at Marist College in Poughkeepsie, N.Y.

Obama also overpromised, encouraged by an often enthusiastic news media that greeted his candidacy and election with comparisons to Abraham Lincoln and FDR. The self-proclaimed apostle of "hope" and "change" set himself up to disappoint voters.

Expectations were great.

He said, for example, that his $814 billion stimulus package would keep unemployment from topping 8

This poll demonstrates the expected gains for the GOP. Election results confirmed what the polls had asserted, major losses for Democrats.

Mass. residents vote for cheaper liquor

By Sam Butterfield
Collegian Staff

Massachusetts voters decided Tuesday to eliminate the sales tax on alcohol, while keeping the Commonwealth's sales tax at 6.25 percent and voting not to eliminate a law which allows developers to obtain one permit to build low and mixed income housing.

Bay State citizens voted by a margin of 1,073,484-to-1,006,494 to remove the sales tax on alcohol, joining Kansas, Minnesota and North Dakota once again as the only states without sales tax applied to spirits.

The decision will likely benefit the liquor industry in the Bay State, which campaigned hard to remove the sales tax on alcohol, which was first instated in Massachusetts last August.

Almost all states impose an excise tax on liquor, and Massachusetts' excise taxes on spirits are relatively low across the spectrum of liquors, with a $4.05 tax per gallon on spirits, a $.55 tax on wine per gallon and a $.11 tax on beer per gallon. Most other states also levy sales tax on alcohol, and Massachusetts was one of just four states not to until last year, and now rejoins that group.

Question 2 concerned repealing a law which allowed developers to apply for one permit from town and city zoning boards to build low or moderate-income housing. Essentially, developers in the Bay State have been able to apply for a single permit to build low-to-middle income housing, in lieu of being forced to apply for numerous permits from cities, towns, counties and the state.

Massachusetts voters roundly rejected the measure, voting against it in a vast majority of corners of the state.

Question 2 picked up support in only a few areas of the Commonwealth, such as a few areas of south suburban Boston, the far northeast corner of the state, districts in the southeast area of Massachusetts, such as Bridgewater, Kingston, Halifax, Lakeville and Norton, and areas northwest of Lowell, like Westford, Dunstable and Groton.

Across the rest of the state, Question 2 was resoundingly rejected.

In Boston, the proposition was defeated 75-to-25 percent. In Worcester, it lost handily, by a count of 65-to-35 percent. Question 2 lost by the same spread in Springfield, and by slightly more in Holyoke, at 67-to-33 percent.

In the Pioneer Valley, it was squarely defeated, as Amherst voters downed it 78-to-22 percent, and Northampton voters chose more housing bylaws by just one percent more, at 77-to-23 percent.

Ballot Question 3, which would have scaled the state's scales tax down to three percent from 6.25 percent next year was also handily defeated.

The measure was downed by a count of 57-to-43 percent, with 1,208,082 votes against it to 906,977 in favor.

Though the Commonwealth has the ninth-highest sales tax in the country, Bay State voters decided not to scale back the 6.25-percent sales tax, with Massachusetts facing an unprecedented $2.8 billion budget gap.

Question 3 drew widespread support in the same areas where other conservative causes drew favorability: southeastern Massachusetts, in communities like Marshfield and Middleborough, further west, in such municipalities as Uxbridge, Northbridge and Upton, and in the north-central region of the state, in towns including Winchendon and Ashby.

Most of the western corner of the state voted against the initiative, with Amherst voting to keep the tax at its current level by a measure of 87-to-13 percent, and Northampton residents deciding against it at 80-to-20 percent.

DECISION 2010

Congressional races result in continued Democratic control of Mass. Districts

CONGRESS from page 1

percent. This is the first opponent Neal has faced since 1996, and the Congressman has held his seat since 1988.

Wesley surpassed the expectations of many polling experts such as those who contributed their opinions to The New York Times' FiveThirtyEight forecast map, which, as of its updated version on Oct. 31, suggested votes would return with 71.1 percent backing Neal, and Wesley falling with 25.6 percent.

Neal won the following precincts Agawam, Brookfield, Chicopee, East Longmeadow, Hadley, Monson, Northampton, Palmer, Southbridge, South Hadley, Springfield and Warren.

Though Wesley scored greater votes in central Massachusetts towns such as Leicester, Southbridge, Oxford and his hometown Hopedale, the difference in numbers was marginal in comparison to Neal's Springfield and Northampton numbers. Votes for Neal in Springfield, Neal's hometown, were 24,423 compared to Wesley's 6,872, and these greatly contributed to Neal's win.

After defeating the district's Tea Party candidate Dr. Jay Fleitman, a Northampton pulmonary physician, in the September primary, Wesley publicly denounced the idea that he was "the underdog" of the race.

Democrat Richard Neal wins another term in office.

Welsey, graduated from the United States Merchant Marine Academy in 1977 with a bachelor of science degree in marine transportation, and a recipient of a 1999 master's degree in management from Rensselaer Polytechnic Institute.

He is a retired U.S Navy pilot, who currently is on leave without pay from his position as director of strategic planning and corporate sustainability at Waters Corp. in Milford, managing green activities and initiatives.

Neal, 61, is a member of Congress' Ways and Means Committee and the Chairman of the Subcommittee on Select Revenue Measures. Neal, former mayor of Springfield, the district's most populated community, graduated from American International College in 1972 with a bachelor's degree in political science, and in 1976, Neal received a master's degree in public administration from the Barney School of Business and public administration at the University of Hartford.

McGovern beats Martin Lamb in Mass. District 3.

Barney Frank wins District 4 with a smaller margin than in past elections. Congressman Frank recieved 54 percent of the vote.

DISTRICT 3

Democrat James McGovern has been re-elected for another term in the Massachusetts Third Congressional District.

McGovern defeated Republican candidate Martin Lamb, and the independently-running candidate Patrick Barron. The incumbent Congressman won 56.3 percent of the vote, with Lamb finishing with 39.4 percent, and Barron received 4.3 percent of the final tally.

The incumbent Democrat has represented the district since 1997, making this McGovern's eighth term serving as Congressman for the Third District. He is a native of Worcester. The Third district spans from Fall River to Worcester and includes Franklin and Medway.

During his campaign, McGovern touted his record of bringing federal funding and jobs to the district.

Lamb proposed a plan cutting federal spending. The Republican hopeful is from Holliston, and has worked as a real estate attorney in the area.

Barron, of Worcester, said he felt representatives in Washington have lost touch with their votes. He has worked for the Massachusetts Department of Mental Health for 14 years.

DISTRICT 4

Longtime Democratic U.S. Rep. Barney Frank managed to fend off a challenge from Republican Sean Bielat last night, launching him to a 16th term in the House.

With 202 of the 208 precincts reporting, Frank picked up 55 percent of the vote, while Bielat garnered 43 percent. Independent Susan Allen and Tax Revolt Independent Don Jordan, who both struggled to gain attention in the race, each picked up 1 percent from the electorate.

The race had proved to be one of the toughest re-election battles for Frank, 70, with recent polls showing Bielat, 35, trailing only by about 10 percentage points. Bielat had also picked up endorsements from Arizona Sen. John McCain and 2008 vice presidential candidate and former Alaska Gov. Sarah Palin.

In an interview with The Massachusetts Daily Collegian last week, Frank, who has served as the chairman of the House Financial Services Committee since 2007, said that one of his primary reasons for running for re-election was to ensure that the eponymous Dodd-Frank Wall Street Reform Act, which imposes some of the most sweeping regulatory reforms since the Great Depression, is properly implemented.

Lisa Barstow, the director of communications for Bielat's campaign, told The Collegian last week that her candidate's primary reason for running was to help create jobs and to stimulate the economy.

Neither Frank nor Bielat's campaigns could be reached for comment last night.

District 4 is comprised of towns and cities along the southeastern portion of the state, including Brookline, Taunton and New Bedford.

DISTRICT 5

Democratic incumbent Niki Tsongas received 111,880 votes with 92 percent of the district reporting at 10:58 p.m. Tsongas was first elected in an Oct. 7 special election when her husband Paul Tsongas died in office.

Her opponent, GOP candidate Jon Golnik received 43 percent of the vote, with third party candidates Dale Brown and Bob Clark receiving 2 and 1 percent of the book receptively.

The fifth congressional district spans from Billerica to Westford.

Jon Golnick is a Republican business owner from Westford, Mass. who ran his campaign in the style of Scott Brown, touting that he was not a career politician.

Tsongas toured in Afghanistan and Iraq to hold workshops with women on the prevention of sexual assaults in the military. Recently, she defended the repeal of the "Don't Ask, Don't Tell" policy. Tsongas has developed programs including "Congress on Your Corner," a series of events hosted by Tsongas in different towns allowing community members to speak to the Congresswoman in person.

DISTRICT 6

Incumbent Democrat John Tierney has officially taken the win for the Massachusetts District 6 seat.

In the race against Republican Bill Hudak, Tierney was officially declared the winner when he had 58 percent of the votes, compared to Hudak's 42 percent. Boston.com reported that 79 percent of the total votes had been collected at the time of the declaration.

The district includes Peabody, Lynn, Gloucester and North Shore.

Tierney, from Salem, Mass., attended Salem State College and majored in political science. He is also chairman of the National Security and Foreign Affairs Subcommittee on the Committee on Oversight and Government Reform, and a member of the House Permanent Select Committee on Intelligence (HPSCI). Tierney has been previously elected to congress, and will remain.

His opponent, Hudak, formed Hudak Law Offices in 1986, where he's served as a practicing attorney for over 24 years. Hudak has been a member of the Saugus business and served the Saugus Rotary Club where he was president twice.

In an interview with The Massachusetts Daily Collegian last week, Frank, who has served as the chairman of the House Financial Services Committee since 2007, said that one of his primary reasons for running for re-election was to ensure that the eponymous Dodd-Frank Wall Street Reform Act, which imposes some of the most sweeping regulatory reforms since the Great Depression, is properly implemented.

In his "thank you" speech, Tierney said, "Thank you to all of the voters who supported my campaign today, as well as the volunteers across our area, whose energy and commitment helped us achieve this victory."

"Tonight I pledge to carry on my work in Congress to protect middle-class families, put Main Street's priorities before Wall Street, strengthen our education system and get local residents back to work. Lawmakers and citizens on both sides of the aisle must come together to resume our efforts to get our country back on the right track, and ensure that all of our families can make it in America," he added.

Markey wins for District 7.

DISTRICT 7

Long-time running Congressman Ed Markey has beaten out Republican opponent Gerry Dembrowski for the Massachusetts District 7 seat in the United States House of Representatives.

This victory marks Markey's 18th consecutive victory for District 7, which he has held without any significant challenges since 1976. His challenger, Dembrowski, had previously stated his hope that his confidence and superior public image would propel him to victory over Markey.

However, this was not enough to uproot Democrat Markey from his firmly entrenched position in the solidly blue District 7. Dembrowski received 33 percent of the vote in the district, far less that the 67 percent of voters who stuck with Markey.

The town of Arlington drew in the most Markey votes, with 14,738, with Framingham drawing in a high of 6,666 votes for Dembrowski.

Ed Markey is known for his pro-environment votes, serving on several House Environmental Oversight and Energy Boards. More recently, he led demands for British Petroleum to provide a live underwater video feed of the rupture in their pipeline this summer.

Dembrowski, a Woburn chiropractor, was new to the political scene, having been motivated to race by what he saw as corruption in Congress. In addition, the death of his wife due to breast cancer led him to realize that, under the universal healthcare policy, he most likely would not have been able to obtain proper health care. He stated that one of his goals in office would have been to repeal the healthcare law for that reason.

Capuano stays seated in Mass. District 8.

DISTRICT 8

United States Representative Mike Capuano won reelection for a seventh term in Massachusetts' eighth district in an uncontested election.

Capuano, Democrat, was the only uncontested candidate running for House of Representatives in Massachusetts and has been uncontested in his previous four races. Capuano has held the seat since 1999.

Capuano spokesperson Alison Mills said the uncontested election has allowed "Congressman Capuano has spent a great deal of time in his district talking with constituents."

Massachusetts' eighth district covers about 70 percent of Boston (wards 1-5, 7-19, and 21-22) as well as Cambridge, Somerville and Chelsea.

When asked about running for the Massachusetts Senate seat currently held by Scott Brown in 2012 by Boston based State House News Service Capuano said, "Talk to me in December."

Capuano ran for the senate seat vacated by Edward Kennedy, but lost to Attorney General Martha Coakley in the special election democratic primary last December.

DISTRICT 9

In an overwhelming majority Tuesday night, incumbent Stephen Lynch is re-elected for a fifth term. Lynch garnered 73 percent of the vote from 41,886 voters. Republican and first-time runner Vernon Harrison received 22 percent of the vote from 12,343. Independent Phil Dunkelbarger received five percent of the vote from only 2,816 voters.

All reporting precincts showed a majority in favor of Lynch. In Brockton, the home of one of Lynch's campaign offices, Lynch won 15,497 votes.

Lynch has been in Congress since 2001, when he was sworn in following the passing of Congressman John Joseph Moakley. In 1994, Lynch was elected to the Massachusetts House of Representatives. He was then elected to the Massachusetts State Senate, again, in a special election.

Lynch was raised by a working class family and continued his early adult life as an iron worker. Lynch currently serves as the co-founder and co-chair of the Congressional Labor and Working Families Caucus. He further believes that all Americans should be able to enjoy a decent standard of living and have the ability to provide for their families.

In 2007, Lynch introduced the Retirement Security Education Act in an attempt to improve financial literacy for Americans over 45 years old. In addition, Lynch believes that it is necessary to preserve social security. Recently, Lynch has been supportive of providing accessible health care to every family while simultaneously keeping health care costs down.

Though only registering 22 percent of the vote, first time runner Vernon Harrison received substantial amounts of votes in the Bridgewater precinct. Harrison won 3,341 votes, following closely behind Lynch's 4,984 received votes.

"I am pleased with what we were able to do with the resources we had," said Harrison following the election results. "I think we made the Republicans in the state proud."

DISTRICT 10

Democrat Bill Keating has been elected for his first term in the Massachusetts 10th Congressional District.

Keating defeated Republican candidate Jeff Perry, and three Independent candidates in Tuesday's election.

With 46.5 percent of the vote, the Democratic candidate won the election. Perry, took second with 42.7 percent of the vote.

Independent candidate Maryanne Lewis received six percent of the vote, Independent Jim Sheets won 3.8 percent, and Joe van Nes finished with one percent as of 95 percent of the votes being counted.

The district stretches from Quincy south and includes all of Barnstable, Dukes and Nantucket counties, as well as large tracts of Plymouth County and portions of Norfolk County on the South Shore. The district has been represented since 1997 by Quincy Democrat Bill Delahunt, who announced this March that he would not seek re-election.

It has been represented since 1997 by Quincy Democrat Bill Delahunt, who announced this March that he would not seek reelection. With Delahunt's retirement in what the Cook Partisan Voting Index ranks as the Commonwealth's most conservative district, the field was considered wide open.

Local and national Democratic organizations have attacked Perry for his handling of an incident regarding the questionable search of two teenage girls when he was a Wareham, Mass., police officer. Allegedly, Wareham officer at the time Scott Flanagan strip searched two teenagers in 1991 and 1992 under Perry's command. In a sworn deposition in 1990, former Wareham Police Chief Thomas A. Joyce said "Perry had not been 100 percent truthful to me," noting that Perry initially denied the searches ever took place. The families of the two girls sued the Wareham Police Department, with the jury finding in favor of the victim in one case and a pretrial settlement in the other.

Bobby Hitt, Sam Butterfield, Michelle Williams, Cameron Ford, Tim Jones, Alyssa Creamer, Lindsey Davis, Matthew M. Robare, William Perkins, Ashley Berger, Nick Bush, and Sam Hawes contributed to this story.

GOP candidate Baker falls short of Patrick

GOVERNOR from page 1

would shift their support at the last minute to Baker.

As Paleologos put it, "The question is, what is Cahill going to end up with and what is Stein going to end up with."

Widespread conjecture about a lack of voter enthusiasm also appeared to be proved moot, as the Globe reported that Massachusetts Secretary of State William Galvin, who also won reelection Tuesday, predicted near-record turnout levels.

By late afternoon yesterday, the Globe reported that several urban areas around the state were already reporting turnout of between 40 and 50 percent of potential voters, levels normally seen at the time polls close.

As for what ultimately tipped the vote in the incumbent's favor, Paleologos and Whitehead said Patrick had likely succeeded in convincing voters that he had protected them from the worst of the economic woes which have affected most of the country and that Baker had done a less than stellar job of endearing himself to the people of Massachusetts.

"Patrick has run a good campaign," said Whitehead, "six months ago, neutral observers would have said that Patrick's maximum share of the vote is less than 50 percent; since then, he has done a good job of remaining close to his maximum."

"A lot of voters conclude that he helped spare enough of them from a full dose of the ravages of the Great Recession, and also because a lot of them didn't take a shine to Baker as a person."

While all the candidates in the race made jobs and the economy their primary focus, it seems Patrick's emphasis on his administration's record of job creation this year paid dividends. The Governor's campaign has touted the fact that the Bay State has created some 50,000 jobs since the start of this year, positioning the Commonwealth near the front of states nationally in job creation.

"Massachusetts has created 40,500 private sector jobs since the start of the year, according to the Bureau of Labor Statistics, and that's hopeful news," said Patrick spokesman Alex Goldstein, reached by phone at Patrick headquarters in Boston on Friday.

Locally, Pioneer Valley voters overwhelmingly supported the Governor. In Amherst, Patrick took a whopping 80 percent to Baker's 11. In neighboring Northampton, Patrick swept up over 70 percent of the vote, with Baker garnering just 17. In more rural Hadley, Patrick grabbed 60 percent of the vote, with Baker wining just 28. Further south in the western corner of the state, Patrick held strong, though a few predominantly working class districts chose Baker, such as suburban Wilbraham, which chose Baker 52-to-37, and West Springfield, which gave 45 percent of its support to Baker and 40 to Patrick.

Across the state, Patrick drew a significant amount of his support from the inner-Boston area and less populated Western part of the state. The Governor trounced Baker in the capital by a margin of over two-to-one, and took Boston's surrounding areas strongly as well, winning Cambridge, Brookline, Watertown, Newton, Quincy, and his place of residence, Milton.

Baker drew much of his support from Boston's north and south suburban areas, and from parts of the center of the state as well. Baker won much of Plymouth County, including suburban Hingham, Cohasset, Marshfield and Duxbury, as well as large tracts of Cape Cod, like Sandwich, Barnstable.

Baker also took large swaths of the southeastern corridor of the state along the Rhode Island border, drawing a red line across such communities as Attleborough, Wrentham, Norfolk, Wrentham, Millis, Medway, Hollston and Foxborough.

Patrick won most of the Commonwealth's urban areas, taking Lowell 49 to Baker's 42 percent, winning Worcester by a margin of two-to-one, and easily claiming Springfield, with 63 percent, compared to just 25 for Baker.

By 10:30 p.m., just two hours and 30 minutes after polls closed across the state, the Boston Globe had called the election for Patrick, and Democrats would have at least four more years leading Massachusetts.

Former Harvard Pilgrim CEO Charlie Baker failed to garner enough support to displace Deval Patrick as governor of Massachusetts.

Boehner becomes new Speaker of the House

NATION from page 1

percent. It quickly topped 10 percent and remains near there.

He promised to change the way Washington works, but he eventually resorted to backroom deals to push a health care overhaul through Congress.

He kept troops in Iraq, escalated the war in Afghanistan, and kept open the prison at Guantanamo Bay, Cuba – to the disappointment of young and liberal voters who helped propel him to the White House.

A second major factor: Obama and Democrats in Congress overreached. After winning control of Congress in 2006 and the White House in 2008, Democrats thought the country wanted a sweeping expansion of government programs, as in FDR's New Deal in the 1930s and Lyndon Johnson's Great Society in the 1960s.

Liberals surely did. But most independents didn't, and conservatives rejected it as socialism.

Obama never successfully sold the health care law to the American people. By Election Day, it was difficult to find a Democrat running on support for the proposal they thought just months ago was an historic victory.

"People didn't like health care, it got passed despite their opposition, and they're taking revenge," said Peter Brown, the assistant director of the Quinnipiac University Polling Institute in Connecticut.

Obama also fell short in convincing the country that his stimulus package was well-designed or wise. He recently admitted that he was wrong to think the money would have an effect quickly and wrong to believe there were "shovel-ready" road projects. He also never managed to inform the public that his stimulus included tax cuts for everyone, not just spending.

"Do you think Bill Clinton would have gone a day without reminding people he cut taxes?" asked Sabato.

Republican John Boehner will replace Nancy Pelosi as the Speaker of the House due to the surge of the GOP this election cycle.

THE MASSACHUSETTS DAILY COLLEGIAN

EDITORIAL OPINION

WEDNESDAY, NOVEMBER 3, 2010

"If we don't believe in free expression for people we despise, we don't believe in it at all." -Noam Chomsky

EDITORIAL@DAILYCOLLEGIAN.COM

A future of pain and sorrow?

America is known by many names.

Some of them are the "land of promise" and the "land of opportunity," but it is fair to say that this "great" nation is on the verge of collapse?

Curtis Bloomfield

Many of us can probably recall growing up hearing the saying that our children are the future. When a child hears that they swell up with pride inside and dream that they can do anything they put their minds to. But what happens when their beautiful minds are put to waste?

This is what has been happening in America today. The public school systems have been failing the future of this country and if we do not take the necessary steps to fix it, the future won't be so bright.

There have been attempts made to improve the educational system in the United States, but with each attempt there appears to be a brick wall in the way of exceptional schools require students to enter a lottery system which would then randomly admit new students.

The problem with this system is that students who are better qualified to make it into these schools are sometimes left out, and there are very few spots to begin with. But then who are we to keep student who are average and lower out of these schools?

If the educational systems in these schools are so good, wouldn't they be able to help all students achieve better grades? From attempts by former and current presidents to chancellors of public schools we can narrow down this educational epidemic down to one thing and that is the teaching itself.

A lot of people like to include bad neighborhoods or the environment of a child's home as causes of their poor performance in school. Although these two do play a major role in shaping how a child learns, a teacher's job is to get through to these kids and to be a positive role model in these children's lives.

On the road to academic success, competent teachers are the vital middlemen.

The film "Waiting for Superman" shows us examples of why promising educational reform attempts have gone up in flames. As seen in the film, 30 developed countries are ranked and America is ranked a measly 25st in math and 21st in science.

It is evident that the nation we live in is not in the best standing when it comes to public education, but in order to fix this, we must ask ourselves one question, what is the real problem?

Why can't one of the so-called greatest nations in the world provide quality education for the children living in it? Michelle Rhee, former chancellor of the District of Columbia public schools, made a valiant effort to tackle this situation.

Washington, D.C. boasts a whopping 19.1 percent dropout rate in America, amongst the highest in America. Rhee definitely had her hands full when it came to this one. She was attempting to reform a public school system whose children have a history of below average scores on exams. She took a radical approach and fired 241 teachers who had neither proper certification or who had received bad evaluations.

In addition to firing inadequate educators, Rhee closed 21 schools with the greatest decreases in enrollment. The firing of bad teachers seemed to be a very good start, but the closing of schools would not necessarily help our leaders of tomorrow. "Waiting for Superman" shows a system where a number

In the face of adversities such as violent neighborhoods and neglectful homes, all a child needs is someone to look up to, someone to teach them that through education, there is a way to a better life.

Not only must they be taught these things, but they must also learn that they need to go back to those neighborhoods and help others who are in the positions that they once were.

I applaud Rhee on her evaluation and termination of teachers in D.C. and feel that we need to do these evaluations nationwide.

On the road to academic success, competent teachers are the vital middlemen. We need teachers that are willing to put the children first and that are properly qualified to educate kids from all backgrounds.

With policies such as tenures and not having to be officially certified, teachers today have gotten lazy and passive when it comes to educating children.

Bad neighborhoods and poor household environment do play imperative roles in education of kids nationwide, but if we improve teachers in all of our schools, we could revolutionize our education systems.

Sufficient education is the key to the future of our nation and if we do not deal with the issues today, tomorrow, our country will be in shambles.

Curtis Bloomfield is a Collegian columnist. He can be reached at cbloomfi@student.umass.edu.

But I am a person

I dislike that term. It negates the emotion of whoever is being spoken to. It negates the fact that obviously, this other person sees the speaker as a human being.

Will Syldor

Context is important too though. It depends on how it's said and why. I've heard it primarily in dialogues on race and racism. This is primarily because these are the spaces where I'm looking out for it the most. In other spaces - times when we are discussing-isms that I enact (heterosexism, genderism, ableism, classism, etc.) - it is me who is either saying it, or playing it out in how I essentially shut out the person who is making me feel this way.

But I am a person.

While this term annoys me to some extent, it also exhilarates and saddens me at the same time. It clarifies for me why I am bothered with the word "but" so much. This word captures the essence of the dichotomy many people socialized in the United States fall into. It is the idea of right and wrong, good and bad, negative and positive, hurtful and affirming, as if these ideas cannot exist at once or in a way in which the line between them either blurs or disappears. For example, if I call a white person racist and they say, "But I'm a person," this is what goes through my mind.

At first I am angered. I grow furious that once again, someone is trying to pull themselves out of a situation in which they have hurt me, therefore negating their accountability in that hurt. In four words, they seek to do away with my emotions, with me, concentrating in tunnel vision on their intentions and not on how it manifested into whatever space we're talking about. I want to grab them and scream into them the history of whites that have wiped the Island of Quesqueya (Haiti and the Dominican Republic) clean of Taínos. I want to convey to them in the loudest way the severity and urgency of racism.

I wanted to show them that neutrality is impossible here.

I want them to own the numbness they feel when faced with inequitable imprisonment rates, death rates, medical discrimination and malpractice rates, heart disease rates, suicide rates, economic mobility rates, housing rates and the consistent upholding of colonial ideals and values shown clearly in cases such as the millions movies. Films such as "Avatar" and "The Blind Side" make the sick certainty that few white people (and people of color) saw or took time to reflect on the blatant racism and sexism and ableism those movies profess (especially Avatar-racism in poor natives needing to be saved by the Great Whites, ableism in the act of running being so exhilarating and irresistible when faced with going back to a wheelchair and my sexism in not being able to articulate the sexism I saw in the film, heterosexism in the privileging and normalizing of hetero relationships, etc.).

I wanted to show them that neutrality is impossible here. We're all connected and neutrality is an excuse used to throw dirt over those connections, over the constant ways we continually harm and negate each other.

And so then I am also confused. I think, "What have I said that negates my obvious viewing of this individual as a person?"

I wonder what was lost and how deep my wanting to dehumanize this individual runs.

Do I hate this person? Is my hatred seeping through my words, through how I am relating? What am I saying and where is it coming from? Where am I coming from and to what end am I going? Am I preparing for war or peace with this person? Trying to work in that dichotomy of hate vs. love is like digging my own grave.

There's no room for ambiguity and seeing how every individual is complex beyond words. This negation of ambiguity therefore negates me, and prevents me from connecting immediately to whatever emotions this speaker is feeling. The "but" is like a drawbridge ripped up, leaving me faced with a wall and an ocean beneath it.

And then I feel love, knowing that the reaction to being seen as a racist is a reaction founded in a wanting to not be that way, to not have hurt me in that way. I see hope and possibility in how this person somehow almost subconsciously differentiates between being a racist and practicing racism and being a full feeling human being. I see hope there, because at that point I know we're talking about the same thing. We're talking about something that shouldn't exist, that no one should hold or enact. We're talking about something genocidal, something unacceptable, something horrible and murderous. This person, usually a white person, who says, "but I'm a person," also says, "but racism is inhuman."

Still, that "but," while bringing us closer, also pushes us away from owning our actions in that space and in our lives and how we speak and live in the world. What would it mean for white folks to say, "What I did and how I live is racist and I'm a person." What would that mean and implicate? Might this be why it's avoided?

And what does that space look like? I'll use myself. I am a sexist and a human being.

While I dehumanize and objectify women without even thinking about it, that sexism also exists with a deep sadness and disgust that I still act in this way, a sadness and disgust that translates into acting and thinking differently (I'm working on it).

When you speak or disagree with others, do you use "but", or "and?"

Will Syldor is a Collegian columnist. He can be reached at wsyldor@student.umass.edu.

Five Reasons Why it was a great election

1) Mass. isn't Dl.

2) Clerks actually got to count Republican votes.

3) Legalize Pot in 2012!

4) Revenge is a dish best served in Congress.

5) We didn't accidentally write 'erection' when we meant 'election.'

New and improved

When passing through campus, do you marvel at its architecture? At the height of the buildings, the sturdiness of the cement and the arrangement of the bricks? Prepare for further astonishment,

Yevgeniya Lomakina

as yet another edifice is about to be erected. The $156.5 million laboratory science building is just one of the innumerable construction projects currently taking place at the University of Massachusetts. It will be ready to open its doors, or rather, just its north wing, in the fall of 2012.

The remainder of the building is planned to be shell space for potential future endeavors. It seems like UMass is continuing in its structural trend: the larger the building, the more prospective students it will fit. With this year's "biggest ever freshmen class" and the next class, which will perhaps be even bigger, the University could surely use the extra space.

This, of course, is not the true reason for the 310,000 square feet which the new building will occupy.

State of the art research deserves state of the art facilities.

The future of scientific research cannot be predicted, declare the Facilities planning website. The site continues to say that it is therefore, "critical … [to] create large, flexible, and adaptable systems that can easily accommodate growth." The new building will provide "modern research space" for the university's science community. The UMass website assures us that the structure will "bring researchers from different fields together" and foster the groundbreaking discoveries that such collaborations may entail. State of the art research deserves state of the art facilities. The new building will include, among other things, radiant floor heating, water reclamation system, day lighting controls and other energy efficient arrangements.

Why the sudden need to expand?

UMass has recently launched its branding initiative program, one in which the university attempts to enhance its regional and worldwide reputation. No effort is too small for such a task. Michael Malone, vice chancellor for research and engagement, noted that if UMass does nothing, it cannot hope to rise among the nations' elite research institutions. The university must therefore, "accelerate growth to gain in the rankings." While the acquisition of knowledge is still a central part of the university, another challenge has been added: the race for the best.

The desire to compete is not the only reason behind this construction project.

Research revenue is an important part of the financial status of a university. The amount of research funds and their source (such as reputable science foundations) express a school's capacity to adapt to the modern, technology-driven world. As the amount of the public financial support decreases, universities are forced to find another source of revenue to find the scientific discoveries.

UMass has also been considering the alternative financing options. Malone proposed to create a separate institution that would be independent of the research conducted at the university. It would allow UMass to be able to perform research for businesses. Projects that will favor the business' interests and not the students' will be declined, says Malone.

The construction of this new building, however, is only the beginning. The university may choose to increase scientific activity campus-wide. The strategies are numerous and include hiring more professional staff, building renovations and introducing courses specifically focused on grant writing. The multi-part plan, proposed by Malone, is not completely finalized, but it is apparent that UMass is getting serious about the science.

UMass is not the only one. The University's president's report website boasts about the immense construction initiatives that are underway in the all four UMass campuses (Amherst, Lowell, Dartmouth and Boston). These institutions encompass, in one phrase, "Twenty first century facilities [which are] the coin of […] research-oriented universities-modern classrooms and labs, the latest instrumentation and technology, [… and] facilities that enhance campus life," according to the report.

The reality is, as always, far from being ideal. The words "21st century facilities" and "modern classrooms" sound futile when UMass liberal arts majors, while sitting in class, watch the dispersal of a water leak stain on the ceiling by the LCD projector.

Should universities focus on expansion-even if it is at the expense of other disciplines? Before building something new, it is important to take care of what was already there. But this comes at a risk of falling behind on the latest scientific discoveries. It is true that in the modern, technologically dependent world, disciplines outside of the sciences are having difficulty with financial support. It is also true that UMass, from its beginnings was a science oriented university. In 1863, the science was farming. Presently, it is biological/chemical research and engineering. Let the expansion of the sciences begin.

The S.P. Sullivan Memorial Prize

For Haiku Writing

S.P. Sullivan

A haiku is an old form of poetry from Japan,
originating from around the 17th century.

In English, haikus have usually been 17 syllables on three lines – five, seven and five.

S.P. Sullivan, former Collegian Managing Editor, was a major proponent of the haiku.

COURTESY CHARLOTTE MEDIA RELATIONS

Charlotte's Macky Wingo looks for a pass in a game earlier this season. The junior midfielder scored five goals in two games to help the 49ers earn the top spot in the conference tournament.

Wingo gets hat trick to earn weekly honors

By Jackson Alexander
Collegian Correspondent

Charlotte's Macky Wingo was named the Atlantic 10 Women's Soccer Player of the Week, while Richmond's Becca Wann and La Salle's Renee Washington shared the Rookie of the Week award.

Wingo scored five goals in two games this week and helped her team take the top spot in the conference tournament.

The junior midfielder began the week by recording her first collegiate hat trick versus Saint Joseph's in a 5-1 blowout. She followed up her hat trick by registering two goals in a 7-0 win over Temple.

A-10 W. Soccer

The award was her second Conference Player of the Week award this season.

Wann, meanwhile, scored three goals last week and nearly led her team to a surprise playoff berth.

She opened up the week with two goals in the Spider's 4-0 upset of Duquesne and topped it off when she helped Richmond secure its second upset in as many games, knocking off St. Bonaventure, 2-1. In the 10th minute, she scored her 10th goal of the season and gave the Spiders a 1-0 lead.

Washington helped send the Explorers into the playoffs with a game-winning goal in a 3-0 victory over Massachusetts.

The goal was her second of the week after she provided the only score in a 3-1 loss to Rhode Island.

The freshman also finished the regular season with ten goals, which put her in a four-way tie for the second most scores in the conference. Her mark also tied her for eighth most goals in a single season at La Salle.

Playoff field set

Charlotte (15-4, 8-1 A-10) and Dayton (16-3, 8-1 A-10) clinched the top two spots for this weeks A-10 tournament.

Charlotte won a tiebreaker with Dayton, giving it the top seed in the tournament, while the Flyers settled for the No. 2 seed.

The rest of the field consists of No. 3 Duquesne (9-8-1, 6-3 A-10), No. 4 St. Bonaventure (11-8, 5-4 A-10), No. 5 seed Massachusetts (8-10, 5-4 A-10), and No. 6 La Salle (10-8-2, 4-4-1 A-10).

The three-day tournament kicks off this Thursday with Duquesne playing La Salle and SBU playing UMass.

If the Bonnies were to advance to the second round, they could be the team to shake things up, and dethrone one of the top seeds.

SBU handed Charlotte and Dayton their only conference losses this season However, the Bonnies have been an enigma, dropping three matches to the seemingly inferior La Salle, Richmond, and Saint Louis.

By receiving the top two seeds in the tournament, both Dayton and Charlotte will have first-round byes.

The teams will open up play on the second day of the tournament with the 49ers facing the lowest remaining seed to advance, and the Flyers playing the highest remaining seed to advance.

The winners of the second round will face off this Sunday with the A-10 championship at stake.

Conn finishes strong

The Temple women's soccer team finished in last place in the A-10 standings this season. However, that did not stop Nikki Conn from being one of the most productive players in the league.

Conn was first in the A-10 in shots (86), second in points (24) and tied for second in goals (10).

These impressive numbers came in a down year for the Owls, who finished the season 1-7-1 in conference play and were last in the league in points with four.

The team got off to a nice start, going 5-5 in non-conference play, including a 7-0 victory over Howard.

Once A-10 play kicked off though, the success immediately ceased. Temple went 0-5-1 in its first six matches, until it finally defeated Rhode Island for its first and only conference win.

If it weren't for Conn, the team likely would have gone winless in the conference. The junior netted both of the Owls goals in a 2-1 victory the Rams two weeks ago.

Jackson Alexander can be reached at jtalexan@student.umass.edu

Postseason seeding set

A-10 from page 10

Temple attempts to shake off last season's 3-0 loss in the A-10 championship game to Richmond as it hosts No. 1 UMass on Friday at 2 p.m.

LHU secures No. 2

The newest member of the A-10 conference marched its way to the second seed by going 5-2 in conference play, as well as holding the best overall record of any A-10 team.

In the final weekend, the Lady Eagles edged a desperate Hawks club on Friday, 2-1, before falling to another desperate team in Temple in the season finale.

Friday's win came in overtime as Kristi Shepps scored her 17th goal of the season in the 74th minute.

Amy Hordendorf scored her team-high 18th goal in the second half to knot the score at one.

Shepps and Hordendorf together represent two of the top three scorers in the conference. Only Nicole McCreight of SJU has as many goals as Shepps. After the top three, the next closest goal scorer is a distant four goals behind.

The two Lady Eagles highlight a Lock Haven offense that crushed the A-10 in goals scored. The Lady Eagles had 60 shots find the back of the net throughout the season with SJU and Temple as the next closest teams with only 39 goals.

Lock Haven will look to bring its high-powered offense against Richmond in Friday's matinee matchup beginning at 11 a.m.

Pete Vasquez can be reached at pvasquez@student.umass.edu.

With the final weekend of the regular season over, the A-10 tournament seedings are set. Massachusetts will be No. 1, followed by Lock Haven at No. 2, Richmond at No. 3 and Temple at No. 4.

COURTESY TEMPLE MEDIA RELATIONS

Sophomore Tyler Witmer scored the game-winning goal in a double-overtime finish to give Temple the 2-1 victory over Charlotte. With the win, the Owls hand the 49ers their first conference loss of the season.

Witmer leads Temple

By Stephen Sellner
Collegian Correspondent

Tyler Witmer netted the game-winning goal in a double-overtime thriller, pushing Temple past Charlotte, 2-1.

The sophomore beat 49ers goalkeeper Gavin Dawson to clinch the victory, set up by a downfield pass from freshman Will Mayhew.

Charlotte tied the contest in the 88th minute after trailing since the 17 minute, 3rd second mark. Sophomore Donnie Smith capped a late offensive surge in the closing minutes of regulation to force overtime.

The Owls took an early lead on Vaughn Spurrier's third goal of the season, capitalizing on a deflection just inside the box.

The 49ers racked up 24 shots in the contest compared to Temple's seven. Charlotte scored once on eight shots on net, while the Owls netted both their shots on net in the match.

Temple's early goal forced the 49ers to play catch up for the majority of the game and the Charlotte offense rushed the net in the closing minutes of regulation, trying to force overtime.

A-10 M. Soccer

Though the 49ers were handed their first loss in Atlantic 10 play, they remain atop the conference standings.

The Owls (6-8, 4-3 A-10) return to action on Friday night against George Washington, while Charlotte (11-5, 6-1 A-10) hosts Massachusetts.

SLU tops SJU

Three first half goals lifted Saint Louis past Saint Joseph's, 3-0, on Sunday.

Christian Briggs scored the Billikens' first goal in the third minute off a corner kick by Jon Roeckle.

SLU jumped out to a 2-0 lead in the sixth minute, providing all the insurance it would need. Chad Vandegriffe scored the first goal of his career on a deflection by teammate Jake Brown.

The Billikens kept pouring it on, making the score 3-0 eleven minutes later. Alex Johnston fed Devon Newport in the penalty area, blasting a shot past SJU goalkeeper Michael Moulton.

Mark Pais earned his third shutout of the season, saving the only two shots on net against him.

Yiannys Degermentzidis replaced Moulton in net for the Hawks for the second half of play, tallying three saves.

The SLU defense never afforded SJU an opportunity to mount a comeback, limiting the Hawks to six total shots compared to the Billikens' 11.

SLU remains unbeaten at home and has surrendered only two goals in those contests.

Saint Joseph's painful season continues, suffering its 13th loss and sixth in conference play.

The Billikens earned their second consecutive 3-0 win after defeating Temple by the same score on Friday.

SLU (7-6, 4-3 A-10) hosts Rhode Island and UMass this weekend while the Hawks (2-13, 1-6 A-10) welcome Richmond and George Washington to close out their season.

A-10 weekly awards

La Salle's Ryan Sepe and Xavier's Luke Spencer were chosen as the A-10 Players of the Week, while Duquesne's Simon Gomez and St. Bonaventure's Emmett O'Connor received Rookie of the Week honors.

Sepe earned his first multi-goal game of the season, scoring two goals in the Explorers' 4-2 win over Rhode Island on Friday. The win marked the first over URI in the program's history.

Spencer netted two goals against Dayton in the closing minutes of play, resulting in a 2-1 triumph in XU's final regular season home game.

Gomez tallied one goal and three assists over the weekend, resulting in two Duquesne victories. The freshman led the Dukes to a 2-1 victory over Richmond with a goal and an assist. The forward has earned Rookie of the Week honors on three other occasions.

O'Connor recorded five points this weekend in St. Bonaventure's perfect weekend of play. The freshman forward netted two goals in the Bonnies' 3-1 win over GWU. The Ajax, Ontario native followed up that performance with a game-winning assist against Richmond.

A-10 teams begin their final games of regular season play this weekend.

Warriors stun Eagles with Cannata in net

By Stephen Sellner
Collegian Correspondent

Joe Cannata's 31 saves lifted Merrimack past the defending national champion Boston College, 4-2, on Saturday night.

Jesse Todd gave the Warriors an early lead, scoring on a power play 4:14 into the game. BC goalkeeper Parker Milner saved Carter Madsen's backhand shot, but Todd finished the rebound for his first goal of the season.

The Eagles tied the contest on a power play less than five minutes later, with Brian Gibbons firing a rebound past Cannata to knot the score at one apiece.

Shawn Bates' second collegiate goal helped Merrimack regain the lead in the 16th minute. Kyle Bigos penetrated towards the crease and fired a shot that was saved by Milner. The freshman, however, cleaned up the rebound after it was lost in front of the net.

Joe Cucci provided an insurance goal less than three minutes into the second period, knocking home a Stephane Da Costa rebound on an Eagles power play.

Cam Atkinson cut the margin to 3-2 with 17:12 to play in the game.

Ryan Flanigan responded later in the period to regain Merrimack's two-goal advantage.

Cannata took over from there, making 15 saves in the third period alone. The junior stoned 70-of-75 shots over the weekend against the Eagles.

BC hosts UMass Lowell on Tuesday and Merrimack visits Providence on Friday.

BEARS WIN IN OVERTIME

Spencer Abbott's breakaway goal in overtime led Maine past Vermont, 2-1, on Saturday night.

Tanner House made the Catamounts pay on the power play, beating goalkeeper Rob Madore six minutes into the second period on an assist from Gustav Nyquist.

Wahsontiio Stacey tied the game on a Vermont power play for his fourth goal of the season. The senior raced onto the ice on a delayed penalty call for a 6-on-4 advantage, knocking his own rebound past Maine goalkeeper Dan Sullivan.

The Black Bears did not wait long to reclaim the lead.

Robby Dee stunned the crowd, scoring with a single second remaining on the clock in the second period. The goal came on another Maine power play, resulting in a 2-1 advantage.

Jack Downing tied the score nine minutes into the third frame on a Vermont two-man advantage. The senior deflected Drew MacKenzie's shot in midair for his second goal in as many games.

Sullivan made 23 saves in the contest, while Madore totaled 39.

The Black Bears (4-1-2, 2-0 HEA) face off with undefeated BU on Saturday while the Catamounts (0-2-2, 0-1-1 HEA) visit UMass Lowell on Friday night.

BU ROUTS LOWELL

Chris Connolly scored the game-winner in Boston University's 5-1 victory over UMass Lowell on Friday night.

Alex Chiasson gave the Terriers a 1-0 lead late in the first period, set up by a David Warsofsky pass to silence a crowd of 4,120 fans.

BU dominated the second period, scoring three goals before the horn sounded. Corey Trivino found the back of the net four minutes, 15 seconds into the period after Chiasson's shot ricocheted directly to him after hitting off the boards.

Hockey East

Charlie Coyle and Sahir Gill made it a four-goal advantage, scoring in the sixth and 17th minutes, respectively.

UMass Lowell's lone goal came with 5:50 left to play in the game as Joe Caveney scored his first goal of the season, assisted by Michael Budd and Josh Holmstrom.

Terriers goalkeeper Kieran Millan was stingy in net, stopping 27-of-28 shot attempts, while the River Hawks' Marc Boulanger allowed five goals, stopping only 15 shots. Doug Carr replaced the freshman to start the third period, collecting three saves in his efforts.

Boston University remains atop the Hockey East standings, posting a 4-0-1 record in conference play.

The Terriers host Maine this Saturday while UMass Lowell (1-4-2, 1-4-1 HEA) welcomes Vermont on Friday.

Stephen Sellner can be reached at ssellner@student.umass.edu.

COURTESY MERRIMACK MEDIA RELATIONS

Joe Cannata got the start in net for the Warriors against Boston College over the weekend. The goaltender stopped 70-of-75 shots in two games, helping Merrimack stun the Eagles, 4-2, on Saturday night.

JEFF BERNSTEIN/COLLEGIAN

UMass finished the regular season with a 6-6 record in non-conference play with upsets against rivals Syracuse and UConn at home. Nevertheless, Miller believes the Minutewomen are lost in the shuffle.

Minutewomen in the shadow of larger sports at university

UMASS from page 10

season with a hot start with wins over some of the best teams in the nation, but struggled against its own conference and just barely snuck into the tournament. They eventually lost to Richmond and were not the A-10 Champions-a rarity for UMass coach Justine Sowry and Co.

This year, the Maroon and White weren't so stellar during their non-conference schedule with a 6-6 record, although they accomplished upsets against rivals Syracuse and Connecticut at home.

After falling out of the rankings, the Minutewomen are now in position to reclaim the A-10 crown - and nobody cares. Never mind the fact that the field hockey program is currently the most successful program UMass has to offer behind softball, but for the most part goes unnoticed among the community.

It's easy to get swept up in the three biggest sports here (basketball, football and hockey) and forget about some of the smaller sports. But if you take out the whole "it's football" argument and disregard the fact that Gillette Stadium is significantly nicer than the ratty-looking baseball diamond the field hockey team had to play on, the game I went to this Sunday was actually better to watch than last week's.

There are some times when the simple things are more enjoyable, and this is one of them. When you watch a team as good as the Minutewomen, there's no need for a fancy press box or a venue that holds over 68,000 people.

All that's needed is a good storyline, a well-played game and the rest will unfold in front of you. If you're one of those people who think there are only three sports at UMass worth watching, I would suggest attending a field hockey game, even if it takes a trip out of Amherst through the slums of Philadelphia to finally come to that realization.

Michigan defensive changes draw criticism

By Michael Rosenberg
Detroit Free Press (MCT)

On Oct. 11, two days after Michigan State rolled up 536 yards on Michigan, reporters naturally asked Rich Rodriguez whether he would make changes to his defense.

"Well, we've gotten to the point where we've simplified our schemes as best we can," he said then. "We don't want to limit ourselves to not give us a chance to win defensively, but we've got to balance that between not confusing our young guys as well."

Two weeks later, Rodriguez announced that freshman starters Carvin Johnson and Cam Gordon had swapped positions midseason. This is not the only reason Michigan just gave up 41 points to a mediocre Penn State team and a walk-on quarterback, but it didn't help.

That midseason position swap was just the latest in a long line of bizarre and misguided decisions that help explain why U-M's defense has gone from 24th in the country in 2007 (Lloyd Carr's last year) to 67th to 82nd to 106th. At that rate, U-M will be 130th next year, and there are only 120 teams.

There has been no consistent defensive philosophy, no big-picture vision. There have just been a lot of reactions to whatever just went wrong.

When Rodriguez arrived in December 2007, he brought most of his West Virginia staff with him. His last hire was defensive coordinator Scott Shafer (from the same post at Stanford), who had no input in hiring his assistants. The defensive staff was completely dysfunctional, and late in the season, Rodriguez scrapped Shafer's defense and installed a makeshift version of the 3-3-5 that worked for him at West Virginia. Predictably, that failed. Rodriguez fired Shafer at the end of the season.

Rodriguez then brought in a new coordinator, Greg Robinson, who has an impressive resumé but also has coached a lot more lousy defenses than good ones. The expectation, at least publicly, was that Robinson would design the team's scheme.

Then, this past off-season, Rodriguez (and, presumably, Robinson) made more confounding decisions. When linebackers coach Jay Hopson left to become Memphis defensive coordinator, Rodriguez had an opportunity. He could have hired a veteran coach, an excellent teacher who had experience formulating a game plan every week.

Instead, Rodriguez promoted a quality-control assistant, Adam Braithwaite, who had never coached in big-time football. Braithwaite coaches safeties and outside linebackers. Robinson now coaches linebackers in addition to coordinating the defense.

Rodriguez also added to the duties of one of his closest friends, Tony Gibson. Gibson, who had been the secondary coach, now coaches cornerbacks, free safeties and special teams.

I appreciate Rodriguez's loyalty to his friend. Unfortunately, Gibson is – by reputation and statistical measurement – one of the worst coaches on the staff. Almost everything Gibson touches is a disaster: U-M is 93rd in the nation in kickoff returns, 98th in punt returns and 117th in pass defense. The kicking game has been awful.

Michigan shifted to a 3-3-5 base defense. Robinson and Rodriguez have downplayed that shift, but the fact is that Rodriguez had run a 3-3-5 before and Robinson had not.

It has gotten to the point where it's hard to tell what defense U-M is running. The 3-3-5 requires frequent and varied blitzing to be effective, and Robinson has never been an aggressive blitzer.

Lately, U-M frequently has stacked eight men on the line of scrimmage, which has put even more pressure on the young secondary. The way Michigan has schemed lately, the Wolverines are virtually incapable of playing a two-deep zone to take pressure off the overmatched cornerbacks.

Monday, Rodriguez dismissed speculation that any staff changes were imminent. But Robinson has about as much chance of coordinating U-M's defense next year as he does of getting rehired as Syracuse's head coach – and frankly, I question whether Robinson even to come back. He is coaching a scheme he didn't create, supervising coaches he didn't hire, for a head coach he has never worked with before.

As Rodriguez pointed out Monday, "We're still five to the good and three to the bad," and his offense is so powerful that seven or eight victories is still possible. Rodriguez has lived up to his reputation as an offensive mastermind. Unfortunately, in this program, the offense is not the only thing that's hard to defend.

MAXWELL SPARK – COLLEGIAN

Michigan coach Rich Rodriguez has drawn criticism this year for changes on the defensive side of the ball in the middle of the season.

Pat's and Geno's subs duke it out

By Nick O'Malley
Collegian Staff

Since the dawn of time, man has pondered one simple question:

"Is the cheesesteak the most delicious-looking or most disgusting-looking sandwich on the planet?" The combination of densely-packed steak off the griddle with cheese wiz and onions is the perfect tri-fecta of unhealthy meat, processed topping and bad breath. But it is also absolutely delicious.

To further investigate the matter, The Massachusetts Daily Collegian took a side trip during its journey to and from Washington D.C. this weekend to stop in Philadelphia to cover UMass sports. The side trip, though, also provided the opportunity to delve into the flagship food item of the City of Brotherly Love.

As touristy as it sounds, I decided that I would have to try the two most famous cheesesteak joints in the city, the cross-street rivals Pat's Famous Steak and Geno's Steaks. Trying to replicate the authentic cheesesteak experience, I order "one, wiz, with" (one cheesesteak with cheese wiz and onions) from each location.

Because we'd gotten into town so late the night before, I decided to get up early and grab a couple of steaks for breakfast before we left for La Salle. It's not exactly the best thing for my stomach, but I'm willing to put myself at risk for journalism.

I tried Pat's first, because it was closer to where we parked. It's a simple setup: order steaks on the right, everything else on the left. A cheesesteak is $7.50 at Pat's-a dollar less than Geno's, but it gets you more steak.

Pat's features a solid sub roll, topped with a heaping serving of steak with perfectly-cooked onions added. The hot cheese is then added with a little dip of the spatula into the pot and spread across the top.

Unlike most cheesesteaks, it was clean with little greasy drip. It didn't live up to the stereotype, but was more than welcoming anyway. The cheese on top played a factor into this, although it seeped into the vacant spots in the meat and mostly hung around on top.

For a dollar less, Pat's brings a lot of meat, which is complimented by the toppings, but doesn't get all of the ingredients in each bite.

See LEGENDS on page 8

SCOTT MAZUR – COLLEGIAN

This delicious cheesesteak from Geno's Steaks cost staff writer Nick O'Malley $8.50, and included a "mortal" amount of steak, not to mention heaping portions of both cheese and onions. The outside walls and tables of this restaurant are covered with photos of the owner with various celebrities, such as Cher.

'Waking Sleeping Beauty' dazzles and enchants viewers

Ian Winship
Collegian Correspondent

"Waking Sleeping Beauty" is a documentary that gives you a look into what happened behind the scenes of animated Disney movies, as they made their comeback from the late 80's to the early 90's.

The film, which is directed by Don Hahn, is about the formerly failing legacy of Walt Disney and how it all got turned around. A lot of people remember the joyful animated Disney films from the past, but what they don't know is the hard work, turmoil and stress that went into creating each and every one of those films, from "Aladdin" to "Beauty and the Beast."

In this documentary you can glance into the very lives of the people that made all of the films possible. You get to look at not only the directors and chairmen, but the animators and songwriters that provide the true essence of the films. You get to look at the people that never really got the credit for what they had achieved. Most importantly, you get to see the relationships all of these people had with each other. You get to see the ups and downs of creating an award-winning animated motion picture.

It is important to understand the vast amount of work and resources that went into making an animated film back then. You needed hundreds of artists that would work day in and day out creating each and every frame of the movie.

These movies took years to produce, as well as millions of dollars. While they eventually became wildly popular, there were many flops in the process. You get a look at what happened as they were first shown.

Back in 1984, it was uncertain whether there really would be a Disney Animation Studio anymore. The older generation that had made the first ever animated movies was now just a little too old and the younger generation didn't yet have any credibility. Everything seemed to be at a standstill, and nobody really knew where to go. Eventually it all worked out, but those years were filled with much uncertainty.

There was a lot of change happening at Disney in the business sense, as well. New people were being brought in, as the old were stepping down. Some thought that the film aspect of Disney would vanish after the company's other successes. A lot of other animation studios were springing up that quite simply seemed to be doing a better job.

This film will bring up nostalgia in a lot of people. The stories behind the creation of films turn out to be as fascinating and enjoyable as the films themselves. You get to see original story boards and primary sketches for movies such as "Oliver and Company," "The Beauty and The Beast" and "The Lion King." Fans of the voice actors will be happy to see their favorite stars relaxing and enjoying their work.

If the process of filmmaking and animation fascinates you, than "Waking Sleeping Beauty" is without question a film to see. It will make you smile and laugh, but it will also make you think about these people and wonder how it really was to be apart of something that phenomenal.

Ian Winship can be reached at iwinship@student.umass.edu.

COURTESY THE HEAT WAVE – COLLEGIAN

"Waking Sleeping Beauty" examines the surge of successful films Disney had in the late 80's and early 90's, with such movies as "Beauty and the Beast" and "Lion King." The reversal of fortune that occurred for the studio at that time was astounding.

COURTESY MINEW.T

Tom Tom Club members Tina Weymouth and Chris Frantz may look unhappy, but don't be fooled. "Genius of Live" is an exuberant concert album, which without question will have music listeners dancing.

The Tom Tom Club drums up live album

By Glenn Gamboa
Newsday (MCT)

Tom Tom Club - Chris Frantz and Tina Weymouth - know that when they put out a live album, people will give it a lot of extra attention.

After all, Frantz and Weymouth were half of one of the best - if not the best - concert movies and live albums of all time when they did "Stop Making Sense" with their band Talking Heads.

However, "Genius of Live" (Nacional), which was released last month and which Tom Tom Club is promoting with a national tour, was never meant to compete with the classic.

"That was recorded at the Pantages Theater in Los Angeles with a massive crew and a huge audience," Frantz says, calling from the Connecticut home he and Weymouth share. "This album was recorded at our home in front of a small audience of friends."

"Genius of Live" was recorded to document a lineup of Tom Tom Club that worked well together, at a time when things were more uncertain, shortly after 9-11. The band wanted to take all the sadness and confusion they were feeling at the time and turn it into something positive and fun, Frantz says.

That good-time feeling has always been part of the Tom Tom Club sound, its mix of funk, reggae, Afrobeat and hip-hop showing how cultures can influence each other to create something new. But the sense of playing on "Genius of Live" seems heightened during the show, as they extend their classics like "The Man With the 4-Way Hips" and "Wordy Rappinghood" to epic, eight-minute-plus lengths.

And, of course, there's the masterful "Genius of Love."

"It's one of those songs that's always fun to play," Frantz says. "We're so happy that the audience reacts to it the same way that the band does, even today. When you write a song, you never know if it's going to stand the test of time."

But "Genius of Love" has

Warriors stun Eagles with Cannata in net

By Stephen Sellner
Collegian Correspondent

Joe Cannata's 31 saves lifted Merrimack past the defending national champion Boston College, 4-2, on Saturday night.

Jesse Todd gave the Warriors an early lead, scoring on a power play 4:14 into the game. BC goalkeeper Parker Milner saved Carter Madsen's backhand shot, but Todd finished the rebound for his first goal of the season.

The Eagles tied the contest on a power play less than five minutes later, with Brian Gibbons firing a rebound past Cannata to knot the score at one apiece.

Shawn Bates' second collegiate goal helped Merrimack regain the lead in the 16th minute. Kyle Bigos penetrated towards the crease and fired a shot that was saved by Milner. The freshman, however, cleaned up the rebound after it was lost in front of the net.

Joe Cucci provided an insurance goal less than three minutes into the second period, knocking home a Stephane Da Costa rebound on an Eagles power play.

Cam Atkinson cut the margin to 3-2 with 17:12 to play in the game.

Ryan Flanigan responded later in the period to regain Merrimack's two-goal advantage.

Cannata took over from there, making 15 saves in the third period alone. The junior stoned 70-of-75 shots over the weekend against the Eagles.

BC hosts UMass Lowell on Tuesday and Merrimack visits Providence on Friday.

Bears win in overtime

Spencer Abbott's breakaway goal in overtime led Maine past Vermont, 2-1, on Saturday night.

Tanner House made the Catamounts pay on the power play, beating goalkeeper Rob Madore six minutes into the second period on an assist from Gustav Nyquist.

Wahsontiio Stacey tied the game on a Vermont power play for his fourth goal of the season. The senior raced onto the ice on a delayed penalty call for a 6-on-4 advantage, knocking his own rebound past Maine goalkeeper Dan Sullivan.

Hockey East

The Black Bears did not wait long to reclaim the lead.

Robby Dee stunned the crowd, scoring with a single second remaining on the clock in the second period. The goal came on another Maine power play, resulting in a 2-1 advantage.

Jack Downing tied the score nine minutes into the third frame on a Vermont two-man advantage. The senior deflected Drew MacKenzie's shot in midair for his second goal in as many games.

Sullivan made 23 saves in the contest, while Madore totaled 39.

The Black Bears (4-1-2, 2-0 HEA) face off with undefeated BU on Saturday while the Catamounts (0-2-2, 0-1-1 HEA) visit UMass Lowell on Friday night.

BU routs Lowell

Chris Connolly scored the game-winner in Boston University's 5-1 victory over UMass Lowell on Friday night.

Alex Chiasson gave the Terriers a 1-0 lead late in the first period, set up by a David Warsofsky pass to silence a crowd of 4,120 fans.

BU dominated the second period, scoring three goals before the horn sounded. Corey Trivino found the back of the net four minutes, 15 seconds into the period after Chiasson's shot ricocheted directly to him after hitting off the boards.

Charlie Coyle and Sahir Gill made it a four-goal advantage, scoring in the sixth and 17th minutes, respectively.

UMass Lowell's lone goal came with 5:50 left to play in the game as Joe Caveney scored his first goal of the season, assisted by Michael Budd and Josh Holmstrom.

Terriers goalkeeper Kieran Millan was stingy in net, stopping 27-of-28 shot attempts, while the River Hawks' Marc Boulanger allowed five goals, stopping only 15 shots. Doug Carr replaced the freshman to start the third period, collecting three saves in his efforts.

Boston University remains atop the Hockey East standings, posting a 4-0-1 record in conference play.

The Terriers host Maine this Saturday while UMass Lowell (1-4-2, 1-4-1 HEA) welcomes Vermont on Friday.

Stephen Sellner can be reached at ssellner@student.umass.edu.

Joe Cannata got the start in net for the Warriors against Boston College over the weekend. The goaltender stopped 70-of-75 shots in two games, helping Merrimack stun the Eagles, 4-2, on Saturday night.

UMass finished the regular season with a 6-6 record in non-conference play with upsets against rivals Syracuse and UConn at home. Nevertheless, Miller believes the Minutewomen are lost in the shuffle.

Pat's and Geno's subs duke it out

By Nick O'Malley
Collegian Staff

Since the dawn of time, man has pondered one simple question:

"Is the cheesesteak the most delicious-looking or most disgusting-looking sandwich on the planet?" The combination of densely-packed steak off the griddle with cheese wiz and onions is the perfect tri-fecta of unhealthy meat, processed topping and bad breath. But it is also absolutely delicious.

To further investigate the matter, The Massachusetts Daily Collegian took a side trip during its journey to and from Washington D.C. this weekend to stop in Philadelphia to cover UMass sports. The side trip, though, also provided the opportunity to delve into the flagship food item of the City of Brotherly Love.

As touristy as it sounds, I decided that I would have to try the two most famous cheesesteak joints in the city, the cross-street rivals Pat's Famous Steak and Geno's Steaks. Trying to replicate the authentic cheesesteak experience, I order "one, wiz, with" (one cheesesteak with cheese wiz and onions) from each location.

Because we'd gotten into town so late the night before, I decided to get up early and grab a couple of steaks for breakfast before we left for La Salle. It's not exactly the best thing for my stomach, but I'm willing to put myself at risk for journalism.

I tried Pat's first, because it was closer to where we parked. It's a simple setup: order steaks on the right, everything else on the left. A cheesesteak is $7.50 at Pat's-a dollar less than Geno's, but it gets you more steak.

Pat's features a solid sub roll, topped with a heaping serving of steak with perfectly-cooked onions added. The hot cheese is then added with a little dip of the spatula into the pot and spread across the top.

Unlike most cheesesteaks, it was clean with little greasy drip. It didn't live up to the stereotype, but was more than welcoming anyway. The cheese on top played a factor into this, although it seeped into the vacant spots in the meat and mostly hung around on top.

For a dollar less, Pat's brings a lot of meat, which is complimented by the toppings, but doesn't get all of the ingredients in each bite.

See LEGENDS on page 8

This delicious cheesesteak from Geno's Steaks cost staff writer Nick O'Malley $8.50, and included a "mortal" amount of steak, not to mention heaping portions of both cheese and onions. The outside walls and tables of this restaurant are covered with photos of the owner with various celebrities, such as Cher.

'Waking Sleeping Beauty' dazzles and enchants viewers

Ian Winship
Collegian Correspondent

"Waking Sleeping Beauty" is a documentary that gives you a look into what happened behind the scenes of animated Disney movies, as they made their comeback from the late 80's to the early 90's.

The film, which is directed by Don Hahn, is about the formerly failing legacy of Walt Disney and how it all got turned around. A lot of people remember the joyful animated Disney films from the past, but what they don't know is the hard work, turmoil and stress that went into creating each and every one of those films, from "Aladdin" to "Beauty and the Beast."

In this documentary you can glance into the very lives of the people that made all of the films possible. You get to look at not only the directors and chairmen, but the animators and songwriters that provide the true essence of the films. You get to look at the people that never really got the credit for what they had achieved. Most importantly, you get to see the relationships all of these people had with each other. You get to see the ups and downs of creating an award-winning animated motion picture.

It is important to understand the vast amount of work and resources that went into making an animated film back then. You needed hundreds of artists that would work day in and day out creating each and every frame of the movie.

These movies took years to produce, as well as millions of dollars. While they eventually became wildly popular, there were many flops in the process. You get a look at what happened as they were first shown.

Back in 1984, it was uncertain whether there really would be a Disney Animation Studio anymore. The older generation that had made the first ever animated movies was now just a little too old and the younger generation didn't yet have any credibility. Everything seemed to be at a standstill, and nobody really knew where to go. Eventually it all worked out, but those years were filled with much uncertainty.

There was a lot of change happening at Disney in the business sense, as well. New people were being brought in, as the old were stepping down. Some thought that the film aspect of Disney would vanish after the company's other successes. A lot of other animation studios were springing up that quite simply seemed to be doing a better job.

This film will bring up nostalgia in a lot of people. The stories behind the creation of films turn out to be as fascinating and enjoyable as the films themselves. You get to see original story boards and primary sketches for movies such as "Oliver and Company," "The Beauty and The Beast" and "The Lion King." Fans of the voice actors will be happy to see their favorite stars relaxing and enjoying their work.

If the process of filmmaking and animation fascinates you, than "Waking Sleeping Beauty" is without question a film to see. It will make you smile and laugh, but it will also make you think about these people and wonder how it really was to be apart of something that phenomenal.

Ian Winship can be reached at iwinship@student.umass.edu.

"Waking Sleeping Beauty" examines the surge of successful films Disney had in the late 80's and early 90's, with such movies as "Beauty and the Beast" and "Lion King." The reversal of fortune that occurred for the studio at that time was astounding.

Tom Tom Club members Tina Weymouth and Chris Frantz may look unhappy, but don't be fooled. "Genius of Live" is an exuberant concert album, which without question will have music listeners dancing.

The Tom Tom Club drums up live album

By Glenn Gamboa
Newsday (MCT)

Tom Tom Club - Chris Frantz and Tina Weymouth - know that when they put out a live album, people will give it a lot of extra attention.

After all, Frantz and Weymouth were half of one of the best - if not the best - concert movies and live albums of all time when they did "Stop Making Sense" with their band Talking Heads.

However, "Genius of Live" (Nacional), which was released last month and which Tom Tom Club is promoting with a national tour, was never meant to compete with the classic.

"That was recorded at the Pantages Theater in Los Angeles with a massive crew and a huge audience," Frantz says, calling from the Connecticut home he and Weymouth share. "This album was recorded at our home in front of a small audience of friends."

"Genius of Live" was recorded to document a lineup of Tom Tom Club that worked well together, at a time when things were more uncertain, shortly after 9-11. The band wanted to take all the sadness and confusion they were feeling at the time and turn it into something positive and fun, Frantz says.

That good-time feeling has always been part of the Tom Tom Club sound, its mix of funk, reggae, Afrobeat and hip-hop showing how cultures can influence each other to create something new. But the sense of playing on "Genius of Live" seems heightened during the show, as they extend their classics like "The Man With the 4-Way Hips" and "Wordy Rappinghood" to epic, eight-minute-plus lengths.

And, of course, there's the masterful "Genius of Love."

"It's one of those songs that's always fun to play," Frantz says. "We're so happy that the audience reacts to it the same way that the band does, even today. When you write a song, you never know if it's going to stand the test of time."

But "Genius of Love" has

See GENIUS on page 8

Philadephia legends compete for city's tastiest cheesesteak

SUBS from page 7

Geno's came second. The flashier of the two cheesesteak joints, Geno's plays the celebrity card pretty heavily, with pictures of the owner with everyone from Sylvester Stallone to Oprah adorning the walls. In contrast to Pat's, where I ate off of a simple park-like table, Geno's is brighter and reaches for the spotlight. I ate my cheesesteak cuver a picture of Cher.

As for the cheesesteak itself, it was $8.50 for "one, wiz, with" and contained a mortal amount of steak that was cut into broader, wider pieces with another batch of tasty onions. The main difference, in addition to the style and amount of meat, was the placement of the cheese wiz directly onto the sub roll before the steak was added. The amount of cheese on the bun led to a little bit of drip action, but once again the sandwich was devoid of any greasy steak juice.

This may seem like a minute detail, but the equal distribution of the cheese throughout the entire cheesesteak prevents the meat from getting cold in the Philadelphia wind and ensures cheesiness in every bite. Under normal circumstances, I'd never be one to say there was such a thing as too much meat, but the more manageable amount of shaved steak makes for a more balanced sandwich. The wiz may sound questionable, but it's definitely worth it to go with the yellow stuff.

It's easy to determine each joint's niche. Pat's is the throwback tried-and-true steak place that gives every customer what they showed up for -steak. Geno's meanwhile, is the more cosmopolitan of the two, providing a more balanced sandwich. Preference honestly comes down to what the consumer is looking for in a sandwich. Pat's has a little more substance and meat, while Geno's has a little more style and cheese.

Nick O'Malley can be reached at nomalley@student.umass.edu.

'Genius of Live' sure to entertain music fans

TOM from page 7

stood the test of time for decades, re-worked and re-imagined by everyone from Grand Master Flash and The Furious Five to Mariah Carey. ("The one that totally surprised me was Mariah Carey's because it had such special meaning to her," Frantz says of Carcy's "Fantasy." "It was such a big success. That song helped put our kids through college.")

"We still get such a feeling of transcendence when we play that song," says Frantz, adding how thrilled he was at all the remixes of the song that are included with the "Genius of Live" album, from Latin alternative artists such as Kinky and Ozomatli to world-beat masters like Money Mark.

It was that feeling of transcendence that kept Nacional Records founder and president Tomas Cookman coming back to Tom Tom Club's live album, which was originally released in 2002. And whenever other people heard him playing it, they always wondered who it was.

"He asked us what we thought about it being rereleased, giving it a proper release," Frantz says. "We thought that was a great idea."

Tom Tom Club decided to support the new release with a full national tour as a way to look to the future. "We wanted to re-establish ourselves as a really great live touring band," Frantz says. "We still enjoy it and we want to see a whole lot of old friends and hopefully meet some new ones."

Though Frantz and Weymouth are also looking at producing some new artists and rebuilding their home studio in Connecticut so they can better handle future Tom Tom Club projects, they are still looking forward to performing regularly again.

Frantz says he and Weymouth would love to play with Talking Heads again, though after the band's stormy relationship and its frosty reunion when it was inducted into the Rock and Roll Hall of Fame in 2002, that doesn't seem likely.

"When we first started the Tom Tom Club, we saw it as a departure from Talking Heads and we wanted it to be different so it wouldn't be competition," Frantz says. "Talking Heads was the mother ship to us and in many ways it still is. We would be happy if we could do more with Talking Heads, but we remain very separate. Tina and Jerry (Harrison) and I would be open to do it if David (Byrne) would be interested. What could be better? Maybe someday it will happen."

Until then, though, Tom Tom Club will continue to work on its own "genius of love" and look to create another classic.

UMass streak deserves hype

Adam Miller

Just one week after covering the Massachusetts football team's game against New Hampshire at Gillette Stadium, I hit the road again for Comedy Central hosts Jon Stewart and Stephen Colbert's "Rally to Restore Sanity and or Fear" in Washington D.C., then left for Philadelphia to kill multiple birds (covering UMass sports, cutting down on driving time and sightseeing a great city) with one stone.

On Sunday afternoon, the Collegian staffers who made the road trip and I left the comfy confines of our Sheraton hotel, traveled roughly seven miles north on Broad Street through some rough neighborhood in Philly, passed fellow Atlantic 10 school Temple and arrived at La Salle just in time to cover the field hockey game.

When I got there, the environment was nothing like what I dealt with just last week. In fact, this stadium wasn't anywhere near the quality of Garber Field. Instead of a working press box with a view over the stadium, I had a seat on the top bleacher with spotty internet connection and surrounded by fans of the Explorers. The field itself didn't even belong to La Salle's field hockey team, but to the baseball team.

In addition, the Minutewomen didn't have the hype surrounding the game that the "Colonial Clash" had. The football team received coverage across Massachusetts and New Hampshire. The Hampshire Gazette was the only other paper besides the Collegian to cover the field hockey team's ninth-straight win.

But in this game, the drama provided all the entertainment necessary to make-up for what it lacked in pomp and circumstance. Just when it looked like the Minutewomen would cruise to a perfect season in the A-10 after a goal from junior Thando Zono, La Salle's Gabrielle Nolt scored during the final two minutes of the first half to tie the game.

UMass got past the field turf on a baseball diamond, which made controlling the ball that much more difficult and pulled off a second goal against the Explorers.

Following the game, there were only two people at the post-game interviews – myself and Nick O'Malley, the Collegian's Multimedia Sports Producer.

Needless to say, this game didn't get the attention it deserved. The Minutewomen finished their conference slate undefeated and finished the season as the only team to hold a nine-game winning streak all season.

UMass became arguably the best sports story of the semester without any acknowledgment.

The Minutewomen started last

See UMASS on page 6

JEFF BOSTETTER/COLLEGIAN

Senior Katie Kelly is leading a Minutewomen squad which Miller feels is not getting the credit it deserves due to larger sports such as football and basketball at UMass. The Minutewomen went undefeated in Atlantic 10 play to earn themselves a No. 1 seed in the conference tournament.

COURTESY RICHMOND MEDIA RELATIONS

Forward Dani Pycroft looks to attack the defense in a game earlier this season. The junior scored two goals over the weekend, including the lone score in an overtime victory over Temple on Friday.

Pycroft scores pair of goals to help UR earn playoff berth

By Pete Vasquez
Collegian Staff

With its postseason berth uncertain, one thing was a must for the Richmond field hockey team: win both home games and secure a spot in the final four.

Only two seeds remained open as Massachusetts and Lock Haven already solidified their spots as the first two seeds in the Atlantic 10 tournament. Barring any sort of collapse in the final weekend, the Minutewomen (13-6, 5-0 A-10) and Lady Eagles (14-6, 5-2 A-10) just had to decide who would be the top seed. UMass earned that mark with a perfect 5-0 conference record.

Three teams, however, including the Spiders, still had to battle for the last two seats. Richmond (10-9, 5-2 A-10) had the advantage of hosting both of its games against Temple and Saint Joseph's, coincidentally the other two teams hoping for a chance to play this upcoming weekend. All three teams were tied with a 3-2 conference record coming into the final weekend of regular season play.

Friday's matchup between Richmond and Temple remained scoreless even past the regulation 70 minutes. It was junior forward Dani Pycroft who gave the Spiders sole possession of third place, seven minutes and 33 seconds into overtime. Teammate Hannah Hess carried the ball into the circle, drew the goalie and made a nice cross to Pycroft who was waiting at the far post to convert the only score of the game.

It was Pycroft's first of two goals throughout the weekend. She also scored the first Richmond goal on Sunday against the Hawks en route to a 4-1 victory for the Spiders on senior day.

The two wins catapulted the Spiders to the No. 3 seed in the conference tournament, giving them a chance to fight to defend their title of reigning A-10 champions.

Pycroft was awarded with Co-Player of the Week honors along with La Salle's Gabrielle Nolt. Pycroft now has 30 career goals, which puts her in the top 10 on the all-time Richmond scoring list.

TEMPLE CLAIMS FINAL SPOT

It was a tall task but Temple managed to sneak into the tournament that it will be hosting come Friday. The Owls beat the No. 2 team in the conference in Lock Haven by a score of 3-2 on Sunday afternoon.

A-10 F. Hockey

Sophomore forward Caryn Lambright and junior defender Carissa Young each scored first-half goals to propel Temple (9-11, 4-3 A-10) over the Lady Eagles.

The game came after the heartbreaking loss to Richmond, which seriously threatened the Owls' chances of moving on. However, they regrouped within the next 48 hours and coupled with Saint Joseph's 4-1 loss to the Spiders, snagged the last seat.

Lambright and Temple took a 1-0 advantage 19 minutes into the contest. Just over three minutes later, Young, off of a penalty corner, fired a low shot past the right foot of the Lock Haven goalkeeper to double the Owls lead.

Despite being outshot 7-5 in the first half, Temple had a 2-1 advantage at the intermission.

Goalkeeper Sarah Dalrymple, one of the players being honored that game because of senior day, finished with three saves.

See A-10 on page 5

Villanova moves into 3-way tie atop CAA thanks to quarterback Whitney's effort

By Scott Cournoyer
Collegian Staff

Thanks to a 28-7 victory over Richmond on Saturday, Villanova moved into a three-way tie for the best record in the Colonial Athletic Association. The win marks the Wildcats' third-straight victory, continuing a home winning streak that now stands at 15, including 23 wins in the last 24 home games.

Quarterback Chris Whitney put on a running display, tallying 118 yards on the ground on 11 carries, including a 45-yard touchdown run on the Wildcats' second possession with just over five minutes left in the first quarter. Whitney had three touchdowns on the day, with two coming through the air, including one on a 5-yard connection to receiver Norman White on the third possession. Villanova ran for 244 total yards on the ground, marking their third consecutive game with 200-plus rushing yards.

Although much of the offense came on the ground for the Wildcats, the story of the game was the defense.

Linebacker Marquis Kirkland led Villanova on defense, racking up 11 tackles and two of the team's seven tackles for losses. The defense created four turnovers, with two on forced fumbles and two by interceptions from defensive backs James Pitts and Eric Loper. The Wildcats' defense has now only allowed one touchdown or less in five of eight games this season.

UNC PREVAILS

William and Mary (6-2, 4-1 CAA) held a double-digit lead in the fourth quarter Saturday against Atlantic Coastal Conference representative North Carolina before giving up 14 unanswered points on their way to a 21-17 loss, snapping a six-game winning streak. The Tribe remain winless against UNC in 14 meetings.

After senior Mike Callahan went down with an injury that knocked him out for the game, the Tribe's Michael Paulus stepped in, completing 24-of-35 passes, racking up 209 yards through the air and two touchdowns.

Both touchdowns went to receiver Chase Hill, one on a 6-yard pass and another on a 9-yard connection. The Tribe had four players with five-plus receptions and three with over 50 receiving yards.

The score remained 17-7 after three quarters of play, with W&M outgaining the Tar Heels in total offense, 192-141, at halftime. Linebacker Dante Cook recorded his fifth double-digit tackle performance in his last six games, providing hope for the Tribe as they attempted to claim their first victory over UNC in the series.

CAA Football

Behind 280 total yards of offense in the second half, however, UNC was able to rally and take the lead with just over five minutes left to play in the game. Running back Johnny White took it to the house on 67-yard touchdown run, giving the Tar Heels a 21-17 lead, proving to be the game winner.

CAA HONORS

Quarterback Chris Whitney, behind 118 yards and three total touchdowns was named this week's CAA Offensive Player of the Week. Whitney helped the Tribe rush for 244 yards on his way to leading the Wildcats to a 28-7 victory over Richmond.

Saturday's performance marked Whitney's sixth 100-yard rushing performance in his career and puts him in the lead with seven touchdowns on the ground for Villanova.

Linebacker Kyle Polk led Towson's (1-7, 0-5 CAA) defense with a game-high 13 tackles and two sacks against Rhode Island on Saturday. The true freshman limited the Rams to just 74 yards rushing while making three stops behind the line of scrimmage. Polk has 41 tackles on the season for the Tigers, including six plays behind the line of scrimmage.

Scott Cournoyer can be reached at scournoy@student.umass.edu.

Departments get new home

COURTESY UMASS MEDIA RELATIONS

The new $85 million dollar, 180,000-person, "state of the art" academic building is scheduled to be finished in the spring of 2014.

By Sam Hayes
Collegian Staff

The Communications, Journalism and Linguistics Departments will be getting a new home for the 2014 spring semester when a new $85 million dollar, 180,000-person, "state of the art" academic building is scheduled to be complete.

Secretary of the State Executive Office for Administration and Finance Jay Gonzalez said that the state will contribute $65 million to the University of Massachusetts for the building with a Higher Education Bond Bill. The building was proposed when Deval Patrick signed the $2 billion bill in 2008, but it has been delayed until now said UMass spokesperson Daniel Fitzgibbons.

The new academic classroom building (NACB), expected to be complete in January of 2014, will be a five story, 150,000 square foot "digitally enabled learning space" with everything from chalkboards and modern audio visual equipment to television and production studios, film screening rooms, computer labs, editing rooms, and speech perception and auditory phonetics labs, said Ed Blaguszewski in a UMass press release.

"'Digitally enabled learning space' means faculty will be able to integrate teaching materials such as multiple images and video into their classroom instruction, making it easier to engage students in the course material," explained Fitzgibbons in an e-mail interview.

"For the three academic units that will be in the building - communication, journalism and linguistics - there will be advanced technology that will put them into the forefront of their fields and help prepare students for their careers," Fitzgibbons said.

The NACB will be located near the campus pond, the Student Union, and The Murray D. Lincoln Campus Center, a spot where 3600 students pass each hour on their way to class. The NACB is planned to have LEED Gold rating for sustainable building and low energy usage.

"Our entire department is thrilled about the prospect of moving to the NACB," Linguistics Professor John McCarthy said.

"For our entire history, we've been housed in a 19th century building," McCarthy said about the Linguistics Department's current home, South College. "And we'll be moving into a 21st century one, skipping the 20th century entirely."

Good samaritan policy altered

SGA members meet with administrative staff to discuss issue

By Alyssa Creamer
Collegian Staff

On Oct. 20, the University of Massachusetts Vice Chancellor Jean Kim addressed the Student Government Association about recent concerns surrounding alterations made to the University's "Good Samaritan Protocol."

In recent years, the "Good Samaritan Protocol" or policy, has been known to students as a practice of the Dean of Students' Office in which students finding friends in physical danger after alcohol or drug consumption could seek emergency medical attention without fear of post-event judicial sanctions for both themselves, regardless of their own drug consumption during the incident, and the student in need of treatment.

Over the past summer, the Dean of Students' Office altered the content of this policy, removing the promise of judicial immunity for the students' actions if a friend or "Good Samaritan" was to call for medical assistance.

Several UMass students expressed outrage at the policy's textual changes. Many students, particularly members of the SGA believed the changes meant students lost their protection from the Code of Student Conduct from being judicially sanctioned.

"Personally, I am slightly offended the student body was not made aware of something that affects so many students," said SGA Associate Speaker Tina Kennedy prior to Kim's explanation.

In the past week, both Kim and the Dean of Students Jo-Anne Vanin attempted to assuage students' concerns by stating that the policy changes were to create a title reflecting the policy's "message of community and student safety first." When the policy was changed its title became "Commitment to a Caring Community."

Kim said at the SGA meeting "the only change to the policy was its name."

Vanin recently sent out an e-mail to the student body that stated that the policy had again changed to now include that "An individual who requires medical attention due to excessive alcohol or drug intoxication will be referred to BASICS. Neither the reporting party nor the individual needing medical attention will be charged under the Code of Student Conduct." The title was also changed back to its original 'Good Samaritan Protocol.'

"The rewording of the policy was intended to make it more specific to help the students identify what specifically were the kinds of symptoms to look for," said Vanin. "I worked on [the changes] with some folks from BASICS (Brief Alcohol Screening and Intervention for College Students) because we wanted to have a consistent message."

The policy's original changes included a list of symptoms displayed by sufferers of alcohol or drug poisoning. Students reacted to the changes focusing on the policy omission of what judicial procedures would follow after the incident, other than the policy's assurance that "[the] individual who requires medical attention due to excessive alcohol or drug intoxication will be referred to BASICS."

"It was mainly changed to go for greater clarity and to emphasize people getting help for each other," Vanin said of the title change.

"That was not successful, obviously," added Vanin of her attempt to make protocol's message clearer for the student body by creating the policy's name change and altering its content.

"When I understood there was a lot of anxiety that the message did not explicitly say that folks won't get in trouble, that's when I went back to the old name and put that neither the reporting party nor student that needs medical help will be charged," said Vanin.

Other students, a few of whom are resident assistants and peer mentors, also claimed they had been told by Resident Directors and Assistant Resident Directors that judicial sanction immunity was removed with the intent to enable

Student Government Association members and other UMass students met with Vice Chancellor Jean Kim to discuss the changes to the Good Samaritan Policy of the University.

Black out expierenced at UM

Around 1:27 p.m., on a particularly sunny Wednesday at the University of Massachusetts, the campus experienced a power outage.

Power went out in the Murray D. Lincoln Campus Center, the W.E.B Du Bois Library, in each of the dining commons and all of the residential areas.

Bartlett Hall, as well as several other classrooms across campus, experienced a brief surge, but the electricity immediately turned back on.

Some parts of campus experienced the black out for approximately an hour, whereas other parts of campus were fortunate enough to have their power return within a half hour.

Daniel Fitzgibbons, the Associate Director of the UMass News Office, said the blackout hit about 60 percent of campus, mostly on the west side.

Ed Blaguszewski, Executive Director of News and Media Relations, explained "The cause of the outage is being investigated, but the entire campus is back up and running."

According to the Physical Plant, a transformer is down. More information will be made available as news from the administration and Physical Plant comes in.

The blackout was caused by animal damage to a transformer. The damaged transformer caused power outages and surges in all campus buildings.

Utility services found that a transformer near Herter Hall had damage from what looked to be an animal.

Yet the cause of the power outage is still under investigation.

Sophomore Dara Nay said of the power outage across the flagship university campus, "I was at work at the time, so it just meant we couldn't use the computers. It came back on in a timely fashion though, so it didn't really affect my day."

Students go loco for Four Loko: state considers ban on the drink

By Ted Czech
York Daily Record, Pa. (MCT)

YORK, Pa - Police and education officials in York County say they're aware of the popularity - and potential danger - of alcoholic energy drinks that have become a favorite of young drinkers.

The drinks - with names like Four Loko, Joose and Tilt - combine a high malt liquor content, usually around 12 percent, with a heavy dose of caffeine. Doctors say the concoction produces a "wide-awake drunk" feeling that can lead to drinking to excess and drunk driving.

The effects of Four Loko, also known by its nicknames "Liquid Cocaine" and "Blackout in a Can," have been felt locally.

In August, a former York man, Elroy "Roy" McConnell, and his three sons, Elroy III, Nathan and Kelly, died when their car was struck by a 20-year-old man who police said had consumed four cans of Four Loko and had smoked marijuana.

(MCT)

Four Loko contains 12 percent of alcohol in each can as well as massive amounts of caffeine.

Last month, West York Borough Police spotted 21-year-old Jovae Eli Rivera drinking watermelon-flavored Four Loko on a sidewalk. They later arrested Rivera when he tried to rob a man at knifepoint, police said.

Dr. Michael Reihart, a doctor at Lancaster General Hospital's emergency room, said he's treated more than a dozen teens and adults over the past three months after they had drank Four Loko.

"It's a recipe for disaster because your body's natural defense is to get sleepy and not want to drink, but in this case you're tricking the body with the caffeine," he said.

York Hospital spokeswoman Cheryl Wintermyer said Thursday she was not aware of anyone being treated in the hospital for the effects of drinking alcoholic energy drinks.

Pennsylvania State Police Cpl. Brian Torkar, who conducts DUI checkpoints in York County, said he and his troopers are aware of the drinks.

"We know it's out there; it's appealing to a young crowd," he said. "It's in big, giant, multi-colored cans and it's inexpensive. It has a high concentration of alcohol, it's sweet-tasting, so it has the potential to cause us a problem ... there's a high possibility of abuse."

On Oct. 9, nine students from Central Washington University were hospitalized after drinking Four Loko at a party, one was in a coma for a while. The incident led the university, and also Washington-based grocery and pharmacy chain Haggen, to ban alcoholic energy drinks.

In addition, Washington State Attorney General Rob McKenna said he plans to push for a national restriction on the sale of caffeinated malt liquor.

ROTC, as she sees it

By Katie Landeck
Collegian Staff

The door opens and Cadet Melissa Sandefur walks in from the rain joking with Major Matthew Bachman. Dressed in her camouflage and boots, she is funny, vibrant and completely at home around the glossy black table in the center of Reserve Officer Training Core building.

Sandefur, a senior at the University of Massachusetts, joined the ROTC as a sophomore. At the time, she was attending the Kennesaw State University in Georgia. She transferred to UMass her junior year for the ROTC program.

The program trains students to become Second Lieutenants in the United States Army, teaching them about protocol and what it means to be a leader, in addition to physical training. As students progress, they are given more responsibility in the program. By their senior year, the students are running the battalion.

"The way the program works it is like personal growth," said Sandefur. "You can see yourself building each year and becoming more self confident in an effective way. It is challenging and rewarding."

See ROTC on page 2

Sandefur, and a fellow University of Massachusetts Reserve Officer Training Core member, look out of a helicopter, as they fly above the Pioneer Valley during a training drill.

Adios to Four Loko?

FDA evaluates the safety of the malt beverage

JOKO from page 1

"They're marketed to kids by using fruit flavors that mask the taste of alcohol and they have such high levels of stimulants that people have no idea how inebriated they really are," McKenna said. "They're packaged just like nonalcoholic drinks, but include a dangerous dose of malt liquor."

Chicago-based Phusion Projects, the company that produces Four Loko, did not return a request for comment.

Earlier this year, the University of Florida released its findings of a study of college-aged adults who frequented bars. The study found that patrons who consumed energy drinks mixed with alcohol "had a threefold increased risk of leaving a bar highly intoxicated and were four times more likely to intend to drive after drinking than bar patrons who drank alcohol only."

George Gessler, director of law enforcement services for the Pennsylvania DUI Association, said the potion of alcohol and caffeine can be a great disrupter to the body's equilibrium.

"Obviously, caffeine is a stimulant and alcohol is a depressant," he said. "You're going to have impairment from the alcohol, but then you're also going to have impairment from the caffeine. ... You're really going to be messing up your body, depending on how much you drink."

Gessler, who trains municipal and state officers in DUI investigation and drug recognition, said using more than one drug at one time – poly-drug use – is very common in Pennsylvania.

"Sixty percent of the people arrested for impaired driving are poly-drug users," he said.

In driving, being impaired by a stimulant can give a driver a false sense of security, and can produce overreaction and exaggerated reflexes. A depressant can produce a decrease in reaction time to tasks like acceleration and braking, Gessler said.

At the Quick 'n Beer & Food on West Market Street in West York, several flavors of Four Loko and Tilt sat in a display case, advertised for $3.99 for a 24.5-ounce can.

Manager Jenn Erntag said the store received its first shipment of the drinks in August and that since then, it's been selling "very well."

"Mostly, our customers are college kids, younger, definitely. I don't know if it's the fruity flavors or the alcohol content," she said. "We wouldn't want anything to happen to anybody, by any means. Hopefully, the kids are drinking it responsibly."

Erntag said she was aware of the recent headlines concerning the drinks.

"As far as the actual effects, we haven't seen it ... We sell it to go only, we don't let people drink it in-house," she said. The store's policy is that nothing over 16 ounces can be consumed on premises, she said.

According to York City Police Lt. Erik Kleynen, the alcoholic energy drinks are "something that we've seen, but not in the college area. It seems like a club crowd thing."

Ed Bruder, director of campus safety for York College, said use of the drinks has not been widespread on the mostly-dry campus. The college has one set of dorms where students who are 21 and older can drink.

"We've seen it pop up about two or three times, in isolated cases," he said. "We're certainly aware of it and on the lookout for it."

Student speaks on expierences in ROTC

Sandefur wipes the sweat from her forebrow as during a University of Massachusetts ROTC drill on campus.

ROTC from page 1

The training for the program is intense and involves a lot of work.

"We are up at 6:30 a.m. three days out of the week: Monday, Wednesday and Friday," said Sandefur. "We do sit-ups, push-ups, physical strength and endurance. On Monday sand Wednesdays we do tactical drills. We do land navigation where we go to certain training sets and look for points in the woods."

This training fosters camaraderie within the unit that goes beyond being training partners. After the students walk in, the room is full of chatter and jokes.

"We are all friends," said Sandefur.

Sandefur is studying to be a Foreign Area Officer in China or Southeast Asia, and work in the state department or the embassy. She picked this field because of her love of traveling and interest in foreign relations.

"I have always been fascinated with the aspect of the military that works with different people," said Sandefur. "I have always had friends in different countries, and I love to travel. I have 10 states left in the United States, and I have been to Aruba, Mexico, and Italy. I have not have been to Canada or China yet, but they are on my list."

Her life is more than just being a cadet. She is a political science major. She is a commuter senator in the SGA. She is in the National Guard working with a linguistic unit. She is learning to speak Mandarin Chinese. She loves to hang out with her friends, and for five years she was a freelance special effects make-up artist.

"We promote doing other things because we want well rounded individuals," said Sandefur. "I learned how to manage time wisely and get involved in other areas. Being in the ROTC is kind of like having another extracurricular activity."

Growing up in Georgia, Sandefur felt that she did not have as much exposure to the ROTC program as high school students in Massachusetts seem to have. However, she did grow up around the military as her father, grandfather and three of her uncles were enlisted.

"It's funny," said Sandefur. "I would not say that growing up around the military made me more open to joining; it was a gradual process. I joined because I wanted to join the army and be part of an organization that excels in leadership."

According to Sandefur, one place she practices her leadership skills in on-campus.

"I get more questions than anything when I walk around campus," said Sandefur. "We are most frequently asked what ROTC is. I am very well received and don't see anything negative come out at me."

She strongly encourages people that have questions about the program to come to the ROTC building and talk to Major Matthew Bachman or to contact him at 413-545-2321.

Over the course of her time at UMass, Sandfeur said that she has grown considerably and claims that if any element of her time here had been changed she would not have become the person that she is.

"I have more confidence than I did before," said Sandefur. "The best thing is that it gets you ready to be the best leader that you can be. The program surpasses all I could have expected. I am blessed to have gone through this program because we rank very high in the nation. When I leave here, I am confident in my abilities."

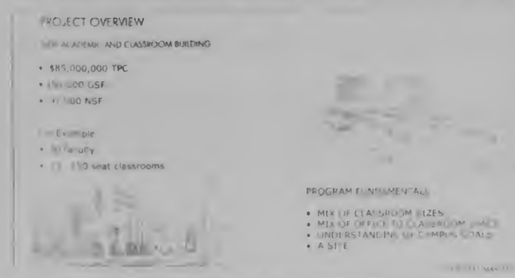
New man on campus

A 'state of the art' facility to be built by 2014



In March of 2009, Burt Hill Architects began to sketch and design the new building to become home to the Journalism, Communication and Linguistics departments of UMass.

CONSTRUCTION from page 1

"We'll finally have the lab space we need for all of our research, and our faculty and students will finally have a nice place to work," explained McCarthy.

Journalism Professor Norman Sims echoed McCarthy's excitement saying, "The new building will be a wonderful thing."

"It will be great to have new offices for the departments involved after decades in Bartlett Hall, South College, and Machmer," said Sims about the three department's current residences. Sims continued, "More important, I think is that there will be new classrooms in the building. Despite all the building in recent years, this will be the first new classroom building."

"There has not been a major academic building built on campus for decades and given the age and condition of many of our older buildings, this facility is way overdue," said Fitzgibbons, "Twice in the last 25 years, a new academic building has been proposed, but neither plan materialized."

The lack of new classroom construction is a leading reason for the proposed building. Another is the need for a more technologically advanced classrooms.

"A lot has changed in the learning environment and this new building will give faculty the ability to interact with students more effectively," said Fitzgibbons. "Students will be able to work in teams and faculty will be able employ the latest teaching technology to promote learning. Our current stock of classroom buildings are not designed for these types of learning."

UMass student Ashley O'Brien, 19, shared the professors' excitement. "We need more classroom buildings, because we have so many kids coming here now," said the Psychology major and Plainville, Mass. native. "It sucks to sit on the floors during an hour-long lecture, so this is definitely needed."

The new building will "help the campus attract students and faculty by providing a facility designed to improve the learning process," explained Fitzgibbons.

"The addition of needed classroom space will ease pressure on existing classrooms and give the campus more flexibility to schedule classes," said Fitzgibbons. It is unknown at this time what will be done with the space formerly held by the three departments in South College, Machmer and Bartlett.

"In recent years, there has been a concerted effort to improve classroom space all across campus with renovations, upgrades and the installation of learning technology," said Fitzgibbons, "New classroom space will also support the campus' growth strategy to boost enrollment."

The amount of construction on campus between the new science building and the Southwest Residential Area is substantial, but Fitzgibbons said, "it falls into different categories; the new lab science building is intended to provide much needed lab space for advanced research. The Southwest project was part of ongoing plans to improve existing facilities."

He continued, "The campus' capital plan strikes a balance between maintaining and improving our current facilities and constructing new facilities that support both the teaching and research missions of the institution."

The building is being built by Boston-based design firm Burt Hill.

Sam Hayes can be reached at sdhayes@student.umass.edu.

Dean of Students meet with SGA members to discuss policy

POLICY from page 1

the Dean of Students to sanction students because of "the abuse of the policy by repeat offenders."

"I'm an RA," said Jarred Rose, directing a question to Kim at the SGA meeting. "My RD [resident director] told us that the student that gets hospitalized can have a judicial sanction because the policy [to grant students immunity under the Good Samaritan policy] did not exist any longer."

After Rose's statement several UMass residential life resident assistants in attendance spoke up in agreement to being told a similar situation by their Residence Life employers.

Kim responded stating that "clearly there are a lot of misunderstandings."

Kim said at the meeting that a campus-wide announcement would be made, and Vanin's e-mail made good on Kim's statement.

"It's a rumor," said Vann about the policy being altered because of students not being sanctioned on multiple occasions because of the protocol's protections. "I have not had that reported to me. I think with any policy there is a chance that some people may not be responsible with how they follow it, but I think a higher concern for me is to make sure a student receives the help they need. I suppose that's an unfortunate consequence, but I'm focused on the health and safety of students."

"I do find it strange that there was so much initial confusion about the whole situation," said Rose. "I would think that Reslife, the [Resident Directors] mainly, wouldn't tell the RAs unless they were certain that something had been changed the way they said."

"The Vice Chancellor's explanation of the changes to the 'Good Samaritan Policy' certainly left something to be desired," said SGA senator Josh Davidson. "Prior to Wednesday's meeting, SGA leaders had been told the policy had been changed because of a concern it was being abused by students who needed it multiple times. Then on Wednesday, it was a "miscommunication" and an accidentally omitted line in the new policy."

"I don't buy the second explanation for a second," continued Davidson. "First of all, it took the Dean and the Vice Chancellor a month and a half to realize this omission existed? Even after the first explanation was told to both student leaders and RAs? No, this was an intentional change to the policy by the Dean's office. Secondly, I find it very confusing that the Dean's office was seeking to merely rename the "Good Samaritan Policy" and yet, forgot to add the line which actually spells out what that policy is."

"What did honestly go through my mind when I was listening to [Kim] was that it seemed like [the Vice Chancellor and Dean of Students' Office] realized their mistake and were making the necessary changes before the press got a hold of it," said Rose.

"My take on last Wednesday is that the Vice Chancellor was covering for a subordinate, most likely Dean Vanin. I think this was fairly obvious to everyone at the meeting, considering how disjointed and incoherent the Vice Chancellor's explanation was," said Davidson.

SGA senator Andrew Prowten said he was not surprised by the alleged confusion surrounding the policy between residence life directors and the dean of students' office. "UMass' biggest problem is communication," he said.

"I think from the moment Kim heard about the new policy she showed great concern. She initially told me she would study it this semester before they decided to re-implement it," said Prowten. "This was all politics; Kim didn't want to undermine the Dean, but then she realized [the SGA] wouldn't shut up."

"I think Kim's explanation was rather thin," continued Prowten. She seemed sort of desperate for us to believe her. I'm not sure if the Dean of Students will be doing a study to see if the protocol is necessary since the policy is back in place. As far as our questions go, she answered them all, but I feel as though there is a lot more to the story that Kim feels we don't need to know. Personally, I don't appreciate being left out, but I feel that we were all successful in pushing them to put the policy back in place." Prowten had said prior to the SGA meeting that it was his understanding that a study would be conducted since the policy's alteration to see if it was necessary.

"High-risk drinking is still challenge on our campus," said Vann during a phone interview a few days after the campus message was sent. "We would be foolish to not emphasize our need to be responsible to each other, and in those instances put student safety above all."

Public schools outdated

Dave Coffey

Last week, I had the opportunity to see the film titled "Waiting For Superman." The documentary, directed by David Guggenheim of "An Inconvenient Truth," takes an in-depth and concerned look at the American public school system and the unfortunate consequences for the future of our nation therein.

While the film mainly focuses on the performance of public schools in inner city and urban areas, most of the disturbing, yet, very real truths the film analyzes remain applicable to school systems across the country.

While there are many controversial topics addressed in the film, I will only discuss one of them here. Topics such as teachers unions, tenure and race relations in inner city environments constitute some fairly incendiary subjects, and require not only a more thorough and educated approach, but also an approach that lasts longer than 1,000 words. However, there is one very simple fact about American public schools that is very easy to identify and dissect despite its tremendously negative impact on the young generations and the future of America. Our public school systems are painfully and overwhelmingly outdated.

In "Waiting For Superman," the film brings up the obvious yet sometimes overlooked point that while kids in America are living in and preparing for a fast-moving and ever-growing modern world, millions of them are being educated in public school systems that were devised and created over a century ago. Needless to say, since the earliest days of the 20th century, the paradigm has clearly shifted. But many of the tendencies of our public schools haven't.

Education is not only suppose to teach children about the world around them, but also prepare them for that world, show them how to make a meaningful contribution to it, as well as demonstrate how to succeed and make a dignified living in it. In the world that our public school systems were born into, it was very possible for high school graduates to find sustainable careers without necessarily needing a post-secondary education.

Now, a century later, finding an occupation with good pay and avoiding unemployment is largely tied to obtaining a college degree. Unfortunately, our public school systems haven't yet caught up to this reality. According to the US Census Bureau, while about 85 percent of Americans between 25 and 29 years old have achieved the educational attainment of at least high school graduation, less than 30 percent of this same demographic have at least received a bachelor's degree. According to a 2003 study by the Bureau of Labor Services, those who have at least a bachelor's degree are not only less likely to be unemployed (4.8 percent national unemployment rate vs. 3.3 percent unemployment rate of bachelor's degree holders, as of 2003), but on average their median weekly earnings surpass the national average by nearly 50 percent with $622 a week as the national average vs $900/week average amongst bachelor's degree holders.

Some may be of the opinion that an increase in funds is a simple yet effective answer to the growing problem and underwhelming performance of American public schools. However, as "Waiting For Superman" clearly demonstrates, this cannot be the case, at least not on its very own. Since the Reagan administration, government spending per student in America has doubled, and yet test scores in reading and math have not improved at all. The massive increase in taxpayers' dollars isn't really helping at all.

Once again, let us analyze how the public school system is not necessarily underfunded, but simply operating in an extremely outdated fashion. When a primary education schedule was first conceived it was done so in a day and age when the U.S. economy was far more agrarian than it is now, in the age of digital information. The school day was crafted as to allow adequate time for the student to aid his or her family in various ways. A vacation during the summer was established in order to allow for families to have children around helping on the farms and plantations to bolster productivity during the busy summer months.

Clearly the days in which school children had to help out with the family farm are a thing of the relatively distant past. So, why do we our schools still run on an archaic schedule when it could run on a far more productive one? In Massachusetts, several different schools, both charter and public, have taken part in experiments to extend the school day by at about 25 percent, lengthening the time in class per day from six hours to around seven or eight hours. As a result of this extra time, the performance of the least proficient students (the ones whom improvement programs always try to target) greatly increased on the next year's MCAS (by 7.2, 4.7 and 10.8 percentage points in math, science and English, respectively). Similar studies have shown links between doing away with the three-month summer vacation and improvements on in schools as well.

As the title of "Waiting For Superman" implies, public education is not simply going to improve upon itself while we wait around for it to do so. There are many factors as to why many public schools perform poorly in addition to the fact that they operate on archaic and outdated terms. One thing that you can do to help is to educate yourself on education. How is taxpayer money being spent on it? What are its trends? What social factors have great effects on it? And, most importantly, what is it doing? In an increasingly global economy, education is key to individual and national success. Let's make it work for us, not against us.

Election analysis

Matthew M. Robare

I would have voted for Dan [illegible] I agreed with him 100 percent [illegible] but I agreed with him most of the time. However, I'm a Vermonter and I'm not [illegible] to vote in Massachusetts.

That being said, I was impressed with the race and each of the candidates. They made [illegible] and returned my calls very [illegible].

I struck first. When I was a freshman [illegible] gone around campus putting [illegible] a student of being a robot. I [illegible] column about the posters and he [illegible] a "Mission: Improvable" show, [illegible] on it. That was back in the [illegible].

[illegible] I met him again, this time at [illegible] Friday night. A mutual friend [illegible] he was running for State House [illegible] Miller High Life, I interviewed [illegible] and there. Let me tell you, there's [illegible] someone while buzzed. [illegible] about yourself, confident in your [illegible].

My main criticism of Sandell's campaign was that he was quick to go negative. He was very critical of Story and Melick in debates, but was especially harsh on Story.

[illegible] soon as Melick told me who he was [illegible] I knew I'd have to interview Ellen [illegible]. That's just good journalism to [illegible].

[illegible] barely dry on the page before Sandell [illegible] everyone to point out the fact [illegible] was also a University of Massachusetts [illegible] in addition to running against Story. I set up an interview with him for the following [illegible] and e mailed Story. She called me [illegible] and we arranged to meet at The [illegible] on Friday.

[illegible] great interviews and they all brought [illegible] to the table. Story had politi- [illegible] persuading jurors to vote one way [illegible] from Story. Melick was the only [illegible] elected to public office before, [illegible] in the Amherst Town Meeting.

[illegible] Story lost any sleep over her [illegible] Amherst is one of the most solidly Democratic towns in the state and even though Melick was running to her left on a lot of issues, he had no money and would have had to overcome student apathy and the town's anti-student sentiment in order to pull off the upset. Sandell did a little more fundraising and, from what I saw, had the most active campaign. He was helped out by the UMass Republican Club and non-student volunteers; he had people at the intersection of Main Street and Pleasant Street holding signs; he had posters and he had lawn signs.

Like he told me last night, he didn't lose because he didn't work hard.

I don't think Melick worked as hard as he could, although his resources were limited to $200 he loaned to himself. His website and campaign Facebook were not updated after mid-September and I never saw his people around town or on campus. Ultimately, I think he lacked organization. Sandell had the Republican Club to support him and do a lot of work, just as Story had the UDems to volunteer and go door-to-door.

My main criticism of Sandell's campaign was that he was quick to go negative. He was very critical of Story and Melick in debates, but was especially harsh on Story. It doesn't look very good for young men to be harsh on older women. I also don't think he needed to attack Melick at all in debates.

Story had the worst campaign of the three. She talked to local reporters, but avoided many of the facilities younger people use to get their information. Her online presence is limited to a Facebook page, stories written about her from the last few months and critical blog posts from Blue Mass Group. She has no website and her records in the legislature are sparse and hard to find. She didn't even fill out the issue questionnaire the Boston Globe sent out to everyone. "D" or no "D," if she hadn't been the incumbent since before the class of 2014 was born she would have lost badly.

I find it so ironic that Amherst would vote for someone because of their party affiliation and their status as an incumbent, but not on their record, or lack thereof. If the people of Amherst want to live up their ideals of democracy and liberalism, than I think they could start by putting more effort into deciding to whom they give their votes.

HITT COLUMN NOT A HIT

Dear Editor,

The fact that students like Bobby Hitt are allowed to write articles like his on the UCard on Nov. 2, 2010 is both off-putting and disgraceful. When a person's vocabulary is limited to describing UMass employees as "portly" and "fat bald manager" they should be sent back to junior high to learn both class and a new set of vocabulary.

He is an embarrassment to both the Collegian and the entire UMass Amherst community for his lack of respect, taste, intelligence and sense. Bobby, if everyone at UMass is given a discount on their UCard, doesn't it just mean that everyone pays the same price? And if the discount is just for you, why? So you can continue to insult the UMass staff in pointless and derogatory ways?

Another question that Bobby failed to answer is why the lack of discounts is in itself alarming? Isn't it common to have a set price for a product everyone at the University needs, and if not, why should some students receive discounts others do not?

While discussing his article with friends on my floor, other strangers walking by stopped in to share how appalled they were by this article. If the Collegian is looking for ed-ops that start a discussion, it's right here, but only because Bobby's statements are ridiculous.

Unfortunately, articles like this make students question the necessity and worth of the Collegian. I suggest that in his spare time, instead of chasing around UMass employees looking for the actual purpose of the UCard Bobby takes on another major (may I suggest English so he can learn some) and use it to help him write a sincere apology letter to the UCard Office and the manager he harassed.

Kerry McDonough

CLASH OF MORALS

Dear Editor,

The Colonial Clash was held in the largest football venue in New England and welcomed supporters of both teams to the game.

Taking my grandkids there to see the game was to be a family experience. Though we lost I was proud of the efforts of the team, band, cheerleaders and accomplishments the University showed on the message boards.

Though, I was disappointed in the behavior of the ZooMass students seated about me. There were females desperate for attention standing in the isles blocking our view and the male student stripping off his shirt to display his nipple hardware.

I was disappointed with the self appointed cheerleader trying to get a cheer going, but for some reason could not remember any of the words. I can only hope it was the intake of beverage that reduced the discourse of students to the right and left of us to four letter epithets. Thankfully when these two groups broke into a brawl security was on the scene to remove them before they anyone else was injured.

Matt and Kim prepare to bare all

Duo drops by Noho to promote new album

By Angela Stasiowski
Collegian Staff

Of all the famous male-female duos in the music industry, Matt and Kim certainly have the most impressive resume. After all, would Sonny and Cher streak through Times Square in the dead of winter? Certainly Donny and Marie Osmond wouldn't have allowed for food to be thrown at them while they performed. And, while Jack and Meg White are a rocking twosome, there is simply no way you will catch them playing "Seven Nation Army" from the inside of their refrigerator. In case you're curious, Matt and Kim can take credit for all of the above.

Hailing from Brooklyn, N.Y., Matt Johnson and Kim Schifino have never been afraid to live life. They are exactly what they make themselves out to be: bold, upbeat, and ready to take on whatever the world throws their way. These days, the world has thrown them some viral notability, which the band has graciously taken in stride.

The dynamic duo is headed for Pearl Street this coming Saturday in support of their latest album, "Sidewalks." The 9 p.m. show also features Javelin and Fletcher C. Johnson.

After Johnson and Schifino met at the Pratt Institute in New York, the couple got to work on recording. The product was "Matt and Kim," their simply-titled 2006 debut. The album was comprised of fast-paced and minimally produced dance-punk tunes. Songs like "Yea Yeah," "Light speed," and "No More Long Years" earned the band a loyal local following. For the next album, however, they decided not to work under the pressures of studio production, which had only granted them nine days to complete recording.

As a follow up, 2008's "Grand" was an improvement upon the duo's already well-received musical formula. The album was recorded in Johnson's childhood bedroom, and the stress-free environment shines through on every track. For feedback, Johnson bounced songs off of his brother, who then critiqued and inspired. Named after the street on which they lived, "Grand" has a very close-to-home feel, showing off more of the lyrical play from "Matt and Kim."

"Daylight," which struck gold when it was featured on a Bacardi commercial, is perhaps the band's best-known tune. Bright keyboard beneath carpe diem lyrics creates an effortless, feel-good tune.

Off the same album comes "Lessons Learned," an upbeat single with one of the most daring music videos of our generation. Well bundled at first, the pair slowly disrobe in the middle of Times Square, shedding clothing while onlookers stand with mouths agape. Unsurprisingly, there is something to be learned from such fearlessness.

Matt and Kim's latest release, "Sidewalks," which was released earlier this week, is anything but a departure for the band. Lots of synth, quirky vocals, and feel-good melodies consistently comprise the duo's songwriting recipe. If the single "Cameras" is any indication, the band is just as optimistic as ever. Falling into place with their back catalogue, the song is an upbeat testament to living life to the fullest. However, with the addition of horns and heavier production, the band sheds some of its rougher roots for a more polished, studio-oriented vibe.

Johnson has described the band's songwriting process as beginning with the basic beat and branching out from there. After the initial rhythm is set, Schifino does some free association, writing out whatever sentences the music evokes from her. From this writing, Johnson picks and chooses what he best relates to and the new song is born.

There is a big difference between Matt and Kim's recorded work and their live shows. Always smiling, the band is all about having fun in the live setting and sharing their happiness with the audience.

Sometimes learning to appreciate life is hard. Instead of stressing, allow Matt and Kim to do the work so you don't have to. A single song by these dance-punk pioneers and you'll be ready to take on the world with a smile as bright as Times Square. Of course, there are other paths to gaining this sort of appreciation, but it is definitely too cold in New York this time of year to be streaking.

Matt and Kim will be performing at Pearl Street Nightclub in Northampton on Saturday, Nov. 6 at 9 p.m. Tickets are $15 in advance and $18 at the door.

Angela Stasiowski can be reached at angelaa@dailycollegian.com.

Alternative duo Matt and Kim will drop by Pearl Street Nightclub in Northampton on Saturday at 9 p.m. on their tour to promote their latest release "Sidewalks."

Kirby unravels in 'Epic Yarn'

By Andrew Sheridan
Collegian Staff

It has been a long time since Kirby has had his day on the console venue. While he has starred in several handheld titles over the years and enjoyed popularity as a Super Smash Bros. character, it has been a full decade since Nintendo's favorite copycat has been given his own console platform. But now he's back, and he's got some new material.

"Kirby's Epic Yarn" for the Wii can be summed up in one simple word: "delightful" In his latest adventure, the pink puffball is swept up out of Dreamland and into the entirely fabric-based universe of Patchland. The landscape is cloth, the characters are yarn, the platforms are stitching and the bosses are buttons and string. While this may seem like a tacky gimmick, it is imaginatively executed. The world is colorful and creative, and unraveling waddle-dees is sure to put a smile on your face.

With its creative theme, "Epic Yarn" also represents a significant departure from the series' roots. The biggest change is the loss of Kirby's signature ability to inhale enemies and copy their powers. Also gone is his floating ability, with the rationale that a Kirby made of yarn couldn't hold any air.

Kirby's pliable nature is not entirely lost, as he is able to transform at will into objects such as bricks and cars. He can still float to a degree by turning into a parachute, but in both cases, the effect is not the same. The main combat mechanism is now a yarn whip, used to either unravel enemies or roll them up into projectiles. The whip also lets Kirby swing from buttons, tear open patches, and generally manipulate the fabric of his new universe.

It must be noted that "Epic Yarn" is not a hard game. The life bars and Maxim Tomatoes of old are gone in favor of a new system: complete immortality. That's right, the puffy pink protagonist cannot die, which makes playing "Epic Yarn" a bit like going bowling with the bumpers up. Damage from enemies causes Kirby to lose collectible gems, but it doesn't really matter. The gems are only useful in the over-world, a home base area similar to that of Paper Mario, but lacking in depth. Players can decorate Kirby's apartment and buy new tracks to play as background music, but overall it is a tacked-on feature that will entice few gamers.

The game also comes equipped with a two-player mode. While this is usually a poor choice for platforms, "Epic Yarn" pulls it off fairly well. Kirby is joined by his fuzzy companion Prince Fluff, and the camera follows whichever player is making more progress. This can cause players to get lost and fall off-screen, but lack of mortality makes it a non-issue.

Perhaps the best new feature is the ability to transform into powerful giant forms. At certain points in the game, Kirby will be re-wound into space ships, dolphins, robots, monster trucks and more. These provide a nice break from the action, and riding a snowboarding penguin down Christmas Mountain is hard to beat.

The plot unravels with few surprises. Cut-scenes are narrated as if they were a puppet show, and the simplistic story they spin involves a knitting sorcerer, magical sock portal, and a plot to take over Dreamland. The feel of the game is sometimes more childish than adult gamers might like, but with creative enemies, soothing music, and inventive gameplay, "Epic Yarn" is more broadly accessible than most kids' games.

The game's mechanics are fun, but one has to wonder why they were shoehorned into a Kirby game. Why not create a new protagonist to showcase these yarn-based shenanigans instead of retooling a classic? Kirby's main ability has always been absorbing powers, and without it the feel of a Kirby game is somehow lost. Fans of platform gaming are sure to enjoy "Kirby's Epic Yarn," but those looking for some old-school playtime with Dreamland's defender may be left with the short string.

Andrew Sheridan can be reached at asheri1@student.umass.edu.

Classic Nintendo copycat Kirby gets a new look in "Kirby's Epic Yarn" for the Wii console. After losing his imitation-via-inhilation and flotation abilities, the pink protagonist dons a fluffy yarn exterior as he fights buttoned bosses in Patchland.

European fashion explores sensuality

By Effie Speridakos
Collegian Correspondent

Italy, France, and Britain may be united under the title Western Europe, but the same cannot be said for their definition of fashion.

Florence, Italy is home to good food, fine wine and some of the most revered designers in the industry - Salvatore Ferragamo, Guccio Gucci, Emilio Pucci and Roberto Cavalli. Of course, this place is a style Mecca. Here, little black dresses are made for lounging and leather is a second skin.

Italian fashion is synonymous with flawless tailoring, which is why you have probably never seen an Italian muffin-top. The type of sex appeal the women of Rome and Milan exude is much different than the sex appeal that is so celebrated in America.

Even in the hell pits of July, an Italian won't be caught in short shorts. Instead, the Italians switch to cooler fabrics like linen and light cotton, and swap rubber flip flops for gladiator sandals. Rather than exposed thongs and plastic cleavage, an Italian woman's provocativeness comes from a wrap dress hugging every appropriate curve or peek of lace.

Italians have taught the world subtle sensuality and elegance through dress. Their elegance is maintained in their stature as they stroll over cobblestone streets in stilettos, never once glancing down or getting their heel caught. Fashion has a natural place within the Italian culture, which is why a true native has an effortless and intriguing style about them.

To spend a weekend in Paris during Fashion Week would be any fashionista's dream come true. Energy radiates from the smart outfits of every passerby. The image of a middle-aged woman dressed in a ghtzed-up derby hat, fur coat and textured tights carrying a classic chain strap Chanel is forever frozen in time. A glimpse of Louboutin's trademark red sole was revealed as she strode across the street, sparking her cigarette. This scene embodies Parisian flair at its finest.

Rather than lazy sweats and Uggs, Parisians find comfort in beauty. They flaunt shirred fur - not North Face. The women of Paris don't need to trend-chase, but always step out looking fresh and modern. To quote style-master Carrie Bradshaw, Parisians "dress in love" - if they love it, it's worth loving.

Britain may not be home to great teeth or food, but its people do know how to dress. The country is good at exporting dress-conscious figures like the Spice Girls and the Beatles.

In London, fashion means uber-cool grunge. Camden Market is the birth place of vintage Icons like Kate Moss and Alexa Chung. Light the city with a sense of fashion that is all its own - as underground as their Tube system.

Punk-rock is a signature style of fashion in London. The skull and crossbones look is a signature of late Brit designer, Alexander McQueen. Thanks to neighborly influence from Scotland, Brits rock plaid perfectly. Spikes, distressed fabric and eclectic hair dye are all in line with fashion in the streets of London.

Fashion, like culture, is as diverse as the countries from which they derive. Whether it's Florence or London, the fashion embodies the style and flare of the people who live there.

Effie Speridakos can be reached at esperida@student.umass.edu.

Violette wins POW honors, 3rd in CAA in points with 46

SPECIAL TEAMS from page 8

Still, he helped in the battle of field position, placing four out of five punts inside the opposing 20-yard line and connecting on a 25-yard field goal to extend the Minutemen lead to 10-5 with 1:51 left.

Against New Hampshire on Oct. 16, Morris chose to go for it on 4th-and-19 on the Wildcat 26-yard line in the first half and Violette missed two field goals, including a 40-yarder as time expired, as the Minutemen went into halftime down 15-0. Morris believes Violette was faced with unfortunate circumstances which led to his only miscues and still maintains confidence in him.

"Certainly, I have confidence in the offense on fourth down," Morris said. "I also have confidence in Violette, now. Two field goals he missed were into the wind and the other, the hold was dropped and he still got it up and it hit the upright."

Violette, a sophomore, assumed the punting and field goal duties at the beginning of the season over Brian Levengood, who is responsible for kickoffs. Violette is third in the Colonial Athletic Conference in scoring with 46 points (5.8 points per game), second only to kicker Mike Perry from Delaware.

He has converted 9-of-12 (75 percent) of his field goal attempts on the season, making all 19 extra points. Entering the game against the Spiders, Violette was a perfect 6-for-6 in field goals, but hadn't attempted one longer than 37 yards.

Violette's place kicking is reliable within a short field, yet he is 0-for-3 from over 40 yards. Morris is aware of his kicker's limitations, opting to stay with his offense in most fourth down situations rather than test the leg of his kicker.

"The opportunities have been there, going a little too far for a field goal and confident enough offensively [to go for it]," Morris said. "At this point, if we're not going for it and we are punting, they're looking at me like 'why?' They don't get it. There's savvy, there's smart and there's stupid and I hope that [my decision] falls in the savvy and smart range more than stupid."

Morris's decisions are eased by the fact that UMass is 15-21 (71.4 percent) on fourth down conversions (first in CAA, sixth in the Football Championship Subdivision), but Violette's lack of range can be a hindrance in the Minutemen's ability to capitalize on premium field position.

UMass has two muffed punts this season, including a first quarter miscue against UNH which led to an 8-0 deficit. Then again, the Minutemen are 2-for-2 in onside kick attempts, converting one in their season opening upset win against William & Mary.

UMass held the Dukes to zero yards on kick returns, however, they are ninth in the CAA in net kickoff yards. Morris believes that his special teams has work to do, but is pleased with their progress.

"Overall, we still have work to do," Morris said, "but we're excited about our kickoff team and the way they came about the other day against a real good return team at JMU."

Dan Gigliotti can be reached at dgigliot@student.umass.edu.

MASSACHUSETTS DAILY COLLEGIAN

Members of the UMass football team run out onto the field earlier this season. After a 21-14 comeback win against the Dukes last week, the Minutemen go for two in a row on Saturday.

Maine visits McGuirk

FOOTBALL from page 8

Rhode Island where they stopped Rhode Island on the last play from the [one-yard line], so it's a great high to go into the off-week with," Morris said.

In the all-time series with the Black Bears, UMass holds a 40-15-1 lead, dating back to 1909. Maine, however, has won the last two meetings after the Minutemen won the previous six contests. The games have been fairly close though, as four contests in the last seven years have been decided by eight points or less, including three by one point.

The two teams met last year on Halloween when the Black Bears handed UMass a 19-9 loss. Despite linebacker Tyler Holmes finishing the game with 16 tackles to lead the Minutemen defense, Maine quarterback Warren Smith was too much to handle.

Smith threw for 226 yards and rushed for 54, while being a part of both of the Black Bears' touchdowns.

"The Warren Smith kid, we know him very well," Morris said. "He does a great job distributing the ball. I like their offensive line and they've had some really quality games offensively and defensively both."

This season, Smith ranks fourth in the CAA in passing yards per game at 182.5, behind UMass' Kyle Havens who leads the conference at 234.8.

Maine's offense relies heavily on the passing game, with the rushing attack ranking second to last in the league at 126.6 yards per game.

The Minutemen will look to increase their chances of making the postseason with another conference win when the game kicks off this Saturday at 3:30 p.m.

Jay Asser can be reached at jasser@student.umass.edu.

Mass Attack looking for 1st win vs. Black Knights

By Steve Levine
Collegian Staff

The Massachusetts hockey team will receive a break from conference play this weekend when it hosts Army and the Under-20 Swedish National Team.

After going 0-2-2 in four consecutive conference matchups, the Minutemen hope to collect their first win of the season against Army (1-4-0) when they host the Black Knights for a 7 p.m. drop on Friday.

Last weekend, Army split its weekend series with Canisius, 1-1. After losing Friday's contest, 4-0, the Black Knights responded on Saturday with a 2-1win. Their grit and mental strength is something UMass coach Don Cahoon expects to see a lot of this Friday.

"They're going to be exactly what we pride ourselves of being - a hardworking team that has no quit," Cahoon said. "That's just the way that whole institution is built. I've been in enough games against that team to know that they'll overachieve simply because of their mentality. They have a few good players mixed in there and if we're not careful, they'll create a lot of problems for us."

Those players include Andy Starczewski, who leads the team with four points in five games. Bryant Skarda, Marcel Alvarez and Danny Colvin are tied for second with three points. Army also boasts a strong goaltender in Jay Clark, who has started all five games to go along with a .911 save percentage.

Despite its non-conference nature, Friday's game is a perfect opportunity for UMass to put one in the win column. Cahoon says his players are anxious for a win, which stems from last week's 3-2 loss against Providence when UMass had many more scoring opportunities than the Friars. Cahoon attributed that loss to special teams woes and defensive breakdowns.

"[I'm] not frustrated, just disappointed," Cahoon said about the abundance of one-goal losses. "I'm also hardened by the fact that we have some ability and we've got really good players that just need to mature a little bit. We're playing too hard and there's too much ability within that locker room to not look forward to what this could become if we right ourselves sooner rather than later."

Two young players that are finding the stat sheet often are sophomore Darren Rowe and freshman Michael Pereira.

Like the rest of the UMass defenseman, Rowe came into this season expected to fill the shoes of Justin Braun and Matt Irwin, who both signed entry-level contracts with the NHL's San Jose Sharks. Without them, Cahoon was afraid his team lacked effective power play blue-liners. Rowe, however, leads the team with five goals, three of which have come on the power play.

Cahoon is also impressed with Pereira, whose collegiate career is off to a flying start with three goals and two assists in six games.

Despite their youth and inexperience, Rowe and Pereira are becoming integral pieces to the team and are expected to contribute.

Following Friday's match, the Minutemen will welcome the Swedish Under-20 National Team for an exhibition at noon on Saturday. Cahoon will use the exhibition to evaluate more of his players and to scout some of Sweden's players who are college eligible.

"We want to win on Friday night, it's an NCAA game and we need to get in the win column," Cahoon said. "Saturday will be used as a tool to evaluate and we'll probably use a non-traditional lineup. Some of our better players may be out of the lineup and many of the players we're trying to develop will be in the lineup. Saturday is what it is. Friday's [game] is definitely a game that we'll play to win."

Steve Levine can be reached at slevine@student.umass.edu.

MASSACHUSETTS DAILY COLLEGIAN

Senior Paul Dainton makes a save in a game earlier this year. The Minutemen take on Army Friday.

UMass takes on DIII team in exhibition

M.HOOP from page 8

scorer Ricky Harris, who moved on after graduation and is now playing overseas.

Sophomores Sampson Carter and Terrell Vinson were also named by Kellogg to his potential starting lineup. Carter and Vinson were two of the five freshmen that had impressive rookie seasons last year.

Along with Carter, Vinson and Gurley, center Sean Carter and senior guard Gary Correia could round out the starting five for Kellogg.

Despite the potential opening lineup being one similar to last season, fans should expect to see some new faces take the court under Kellogg's watch.

"It's a chance for our guys where I can play different combinations and play a lot of guys and not totally worry about winning the game," Kellogg said.

Even though winning is not Kellogg's main concern, he doesn't consider the scrimmage to limit the level that UMass will compete at on the hardwood.

"It's going to be played like a real game, 40 minutes on the clock, keeping score," Kellogg said. "I'm going to coach and do things like we're trying to win the game, so we'll see how it goes."

Not only does Kellogg want to get himself accustomed to coaching in midseason form, but he is also trying to prepare the Minutemen for competing in a regular season atmosphere.

"One thing I always want to do is make sure that they get a chance to shoot in game-like conditions in our building and we want to do something before our first home game next Friday versus Rider," Kellogg said.

When the schedule was first released by UMass in September, the Minutemen were not scheduled to take on Brandeis. It wasn't until Oct. 26 that it was announced the two schools would meet.

"There were a few other teams we looked at in kind of a close scrimmage, but that just kind of never transpired," Kellogg said. "One of my close friends is an assistant coach [at Brandeis] and we had talked about playing kind of jokingly a little bit and one thing led to another and it transpired that we needed a game."

The Judges will come into the Mullins Center with an inexperienced lineup which includes 10 freshmen. These freshmen join a team which made it to the second round of the Division III NCAA tournament, where it fell to Franklin & Marshall, 65-63.

"They've really brought in one of the top recruitment classes in the country," Kellogg said. "I think they won't be totally playing at midseason form quite yet because of all their young kids."

Kellogg also said that the talent of the Judges will be a good test for the Minutemen as they begin to compete.

"A lot of the Division III guys I've spoken to, or people in the area, think that they have a chance to be a Final Four, [Elite] Eight, Sweet 16-type level talent down the line which is good for us," Kellogg said.

Black Bears paw way into Amherst

Minutemen host Maine Sat. after comeback against JMU

By Jay Assor
Collegian Staff

After playing one home game in its last six contests, the Massachusetts football team will host conference rival Maine at McGuirk Stadium on Saturday as it looks to win consecutive games for the first time since after the bye week.

"We have to play harder than [Maine] down here, it's our home turf," UMass coach Kevin Morris said in his weekly teleconference. "We're finally back home and we've had one home game in about seven weeks. So we'll be excited to be back home and defend the home turf and have a great contest against Maine."

The No. 15 Minutemen (5-3, 3-2 Colonial Athletic Association) are fresh off a come-from-behind victory over James Madison to break a two-game losing streak. UMass' offense scored 18 consecutive points, including 15 in the fourth quarter, while the defense shut out the Dukes in the second half to earn the 21-14 win.

The Black Bears (3-5, 2-3), meanwhile have had two weeks to prepare after not seeing action since Oct. 23 against Rhode Island. With its bye week, Maine has an advantage heading into the matchup with UMass, something which Morris recognizes.

"It doesn't change our game plan, but it certainly, I imagine, helps their game plan," Morris said. "[Maine coach] Jack [Cosgrove] has another week to get healthy and he had some guys banged up like we all do at this time of the year. So he has that advantage going in to get guys healthy and he mentioned he had a good Sunday practice, so they get the extra day ahead of us."

Against URI on the road, the Black Bears held onto their lead just long enough to survive a rally from the Rams. Despite leading 21-10 late in the third quarter and 28-17 in the fourth quarter, Maine allowed URI to close the gap to five points.

After punting, the Black Bears' defense had its backs against the wall as the Rams got to the one-yard line with one second remaining in the contest. Maine, however, preserved the 28-23 victory as they made a stop on the final play.

"They're coming off a big win at

Quarterback Kyle Havens looks to complete a pass earlier this season. Havens and the Minutemen host Maine Saturday.

Special teams unit still work in progress for Morris and Co.

By Dan Gigliotti
Collegian Staff

Special teams can often be the difference between a win and a loss in any football game, with the incalculable force of momentum seeming to shift more during kicking and punting plays than any other play.

For Massachusetts, special teams are an anomaly, proving to be its biggest asset at times and at others, its Achilles heel.

UMass benefited from its special teams play in a win at James Madison last week while it costed them in a loss to Richmond on Oct. 16.

Kicker/punter Caleb Violette earned Colonial Athletic Association Special Teams Player of the Week honors for his performance in his home state against the Dukes, kicking two field goals (33, 25) while having two punts of more than 50 yards.

"Violette's done a great job all year," UMass coach Kevin Morris said. "His punting at the beginning of the year wasn't as strong, but it has come back around. In the last few games he has punted very well."

Yet, with the ball on the JMU 28-yard line with five minutes, 32 seconds to play in the third quarter and his team facing a 14-3 deficit, Morris put his trust in his offense on 4th-and-8. Quarterback Kyle Havens converted a pass to wide receiver Anthony Nelson for a 19-yard first down completion, setting up a 25-yard Violette field goal.

On the first UMass possession during an 11-10 loss on Homecoming weekend against the Spiders, Violette set up to punt in his own end zone and watched an arrant snap fly through his grasp and out of play for a safety. Following the self-inflicted score, an opportunistic Minutemen hands unit recovered the ensuing free kick and drove to the Richmond 22-yard line. Violette then missed a 43-yard field goal.

Minutewomen head to Rhode Island

UM faces SBU in 11th A-10 tournament in team history

By Michael Counos
Collegian Staff

For the 11th time in team history, the Massachusetts women's soccer team has made the Atlantic 10 tournament, as it squares off with St. Bonaventure this Thursday.

UMass finished the season 8-10 and 5-4 in A-10 play en route to a No. 5 seed in its second-consecutive tournament berth.

The Minutewomen face the No.4 Bonnies, who finished 11-8 and 5-4 in the A-10.

This will be the first time the two teams have meet since Sept. 26, 2008 at Rudd Field, a game in which UMass won 2-1.

UMass clinched their berth with a 1-0 victory over Fordham last Friday. Gaining their fifth win in A-10 play, the Minutewomen tied their record for most conference victories since 2001. This is also the first time since 1999-2000 that UMass has qualified in back-to-back years.

"Everyone is pretty excited right now and we had a good week of practice, but what the [players] need to realize is that this is a special opportunity to make their conference tournament and they need to enjoy every single minute of it," UMass coach Ed Matz said.

The Bonnies are coming off a 2-1 loss to Richmond last Sunday. The loss snapped a four- game winning streak in which they defeated Fordham, Xavier, Dayton and George Washington. Anna Cunningham led the Bonnies in scoring with nine goals and 21 points, followed by Tori Burchett with six goals and Courtney Bosse with four, respectively. Between the pipes, Nicole Markert did the bulk of the work, sporting a 0.759 save percentage on 13 goals allowed.

"St. Bonaventure has a very good team," Matz said. "They do a good job of possessing the ball and also have a very good striker and a strong goalkeeper, as well as being extremely well-coached."

Against the Rams, junior Deanna Colorassi sced the game-winning goal in the 18th minute on the Minutewomen's first shot on goal. Colorassi collected a through ball from sophomore Jess Howe and sent a shot from the top of the 18-yard box past the fingertips of Rams' goaltender Sarah Zieman. Colorassi leads the team coming into the tournament with nine goals and 20 points.

Sophomore goaltender Emily Cota was strong in net with five saves in her fifth shutout of the season. Cota was tested more in the second half with four stops compared to just one in the first half.

La Salle proved to be tougher for UMass in the regular season closer. The Minutewomen dropped the game 3-0 in a back-and-forth game. UMass went down late in the first half off a Renee Washington goal followed by the Explorers tacking on two more in the second half off the foot of Amanda Komarnicki and Morgan Golden.

The Minutewomen's game will follow the No. 3 Duquesne versus No. 6 La Salle matchup, which will begin at 5 p.m. After both games, the highest-ranked seed remaining will face-off with No. 2 Dayton while the lowest seed will be matched up with No. 1 Charlotte.

"One of my goals coming into the program was to make the tournament and our team worked hard all season to realize that goal and I am very proud of them," Matz said.

UMass has won five conference titles in its history, as Matz, in his first year with the program will look to lead the Minutewomen to their sixth. The game will be played at a neutral site in Kingston R.I. and is set to start Thursday night, at 7:30 p.m.

Michael Counos can be reached at mcounos@student.umass.edu.

Consistency key for UMass in tournament

By David Martin
Collegian Staff

As the Massachusetts women's soccer team prepares to enter its second consecutive Atlantic 10 tournament against St. Bonaventure on Thursday, one thing remains certain in their game plan.

Consistency is key.

The Minutewomen are going to need strong, consistent play from all areas of the field in order to advance to the second round of the playoffs. UMass coach Ed Matz is fully aware of what the team has to do to succeed.

"We have to move the ball around strongly and efficiently," Matz said. "We need to have better passing, stronger ball possession and we need to translate those aspects into offensive chances. We have to get our offense going in order to establish ourselves early on in the game."

Matz's 4-3-3 offensive approach has led to 28 goals over the course of the season, a definite improvement to the 15 goals scored last year. The offense is all too essential to having a strong start to the game.

"We need to keep the play out of our zone and relieve the pressure off of our defenders," Matz said. "We need to be able to clear the ball well into the opposing zone and play on that. It doesn't matter if we lose by one or two, so we need to make sure that we aggressive and can score that winning goal."

Some of the notable players that will play into a successful offensive game are junior Deanna Colarossi and senior Therese Smith.

Colarossi and Smith have contributed significant numbers to the Maroon and White attacking game this season. Combined, the two have 16 goals, five assists and 37 points off of 89 shots. They have also played in 36 combined games and have started in 29 of them. With those kinds of numbers, it's clear that they will be the players expected to lead a strong scoring threat throughout the match.

On the defensive end, freshman defender Brittany Moore and freshman goalkeeper Emersyn Pullan are going to be critical in stopping the ball from crossing the UMass goal line.

Moore has really stood out this season as a strong defensive threat, starting in all 18 of the games this season. Her play has been solid and has molded well with the team's gamelans throughout the season. She also has two assists and 12 shots, with six of them being on goal, proving that she can also provide immediate offense in a quick transition up the field.

Pullan has been a strong backup in net to compliment starter Emily Cota throughout the season. Now, as Cota is unable to start due to her injury sustained on Sunday, Pullan will once again be asked to step up and be the last line of defense for the Minutewomen. Matz has no doubt that she's been exposed to the game and can play up to expectations set before her. Pullan has 17 saves and a .708 save percentage to her credit in seven games played. She has a 2-3 record out of her five starts, with both of her wins being shutouts.

Matz knows that the Bonnies will bring their best against the Minutewomen, especially considering that they will have the advantage of playing on their home field.

"They're going to be a tough team to play against in the playoffs," Matz said. "They're able to transition a 4-5-1 defensive game into a 4-3-3 offensive game very well and are great at passing the ball down the field. These are some of the aspects of their game plan that we have to focus on and prepare for."

In all, Matz is positive on the play that UMass can bring to the game.

"We're a very young team that's still trying to work on everything, but we can put on the pressure, we can run, keep on the ball and utilize passing lanes," Matz said. "We definitely have it in us to win this game and move on to the next round."

David Martin can be reached at dmartin@student.umass.edu.

JEFF BERNSTEIN/COLLEGIAN

Senior Therese Smith makes a move against a La Salle defender in a 3-0 victory last Saturday. Smith looks to lead the offense against the Bonnies.

JEFF BERNSTEIN/COLLEGIAN

Forward Terrell Vinson takes the ball to the basket against Xavier in a game last season. Vinson will likey start against the Judges in a preseason game on Thursday.

UM hosts Brandeis at Mullins

By Herb Scribner
Collegian Staff

Fans of the Massachusetts men's basketball team won't have to wait until next Friday to get a glimpse at the Minutemen.

UMass will hold an exhibition game against Brandeis on Thursday night at the Mullins Center at 7 p.m.

"This is our first exhibition game and it's an opportunity for us to play a different opponent other than ourselves and to do it in front of our home crowd," UMass coach Derek Kellogg said.

The game against the Judges will give Kellogg an opportunity to try out different lineups, which is something he hasn't settled on through the preseason practice.

"I'm going to play a lot of guys. I haven't settled on a true starting lineup yet," Kellogg said. "I have to start trying a few different lineups, because right now, we've kept it kind of constant in practice and I haven't really mixed it up enough."

Despite not having a full vision of what he wants in his starting lineup, Kellogg did have a likely starting lineup in mind, which includes guard Anthony Gurley.

Gurley, who averaged 13.6 points per game last season, will look to fill the shoes left by top-

How to pick up European men

By Ashley Berger
Collegian Staff

24-year-old author and Vanderbilt graduate Katherine Chloe Cahoon wrote "The Single Girl's Guide to Meeting European Men" as a tip book and guidelines for any girl going abroad with this dream, and she is currently working on a movie adaptation of the book.

"The Single Girl's Guide" offers young, curious women tips for dating overseas, advice on how to pack for the trip, firsthand insights of Cahoon's and her cohorts' experiences in Europe, looks at the hottest spots in Europe, fashion tips, and suggestions on how to avoid European prowlers.

Cahoon spent her college summers in various European locations, but did not originally go abroad with the intention of meeting a man.

"As an international media major, I wanted to go somewhere to study. It just worked naturally that I met so many men," she said.

The book delves into Cahoon's experiences, and in a phone interview Cahoon further explained one of her most memorable escapades at a Spanish car race. Cahoon wanted to attend a car race, but since none of her friends wanted to attend, she decided that she would go alone. An usher ended up selling her a VIP ticket. Out of pure coincidence, she was wearing the colors of Fernando Alfonso, a famous car racer.

At the end of the race, Cahoon was followed by photographers and fans because they thought she was Alfonso's girlfriend.

(MCT)

Tourists take a break at Trevi Fountain in Italy. A new book sightseer offers young women tips for meeting European men during the course of their travels throughout the continent.

"You can't duplicate that experience," she said. "People still make jokes about that, but it is something I will always remember."

Cahoon went solo to the event, and discussed how European men find it completely acceptable for women to be by themselves when they are out and about.

"Most girls get too scared or nervous to break out of a circle of girls," she said. "Guys won't break through a circle of girls in the same way a girl wouldn't just go up to a circle of guys."

"European men notice a girl who is by herself," she went on. "They will come up to you. They'll ask you if you are okay or need help finding something. They want to help you. However, a girl should only go by herself during the day, only when it is safe. But the largest number of girls that should go out in a group is three. That is a number that guys will feel comfortable talking to and breaking in with."

"It is fun to go somewhere that you know the language because then you can always improve," Cahoon said, regarding the language barrier and how she did not find it to be that much of an issue. "The men want you to get better. As long as you make an attempt to pick up key phrases and words and be mindful, they will encourage you to learn. The guys I met thought my poor Spanish and American accent was charming."

"You tend to learn more from one date with a foreign man than in a whole semester of a foreign language," Cahoon noted about dating and languages.

Cahoon also discusses how different European men dress and take care of themselves. "In swanky clubs, you will find the best dressed guys. Arguably, men get more dressed up to go out, the like to look nice," remarked Cahoon. "It's important for the men to dress up. It's more of an etiquette issue."

"Sometimes you find great business men who just came from work at a nice bar," Cahoon described. "But in the outdoor sports parks is where you would want to go to find the guys who have the best bodies because they spend all their time outdoors."

Though the book describes excursions all around Europe, Cahoon does not think she can pick a favorite place that she went, because each place was so special to her.

"Each place has its own special, hidden features. Each person has their own expectation and goal when they go abroad."

"You have to go to Europe to do what you want. My goal was to study and be wined and dined. My friends had different goals in regards to European, but we all came home feeling satisfied with the experience," Cahoon revealed. "Set your own goals and go achieve them."

All the way home: Study says drinking habits stick

By Ashley Berger
Collegian Staff

Everyone knows that what happens in Vegas stays in Vegas, but does the saying apply for every country in any given school's study abroad listings? A recent study done by the University of Washington indicates that drinking habits that students develop while studying abroad tend to stay with them when they return to the states.

Eric Pederson, a graduate student at the University of Washington, conducted the survey. Most of the 177 students were abroad for three to five months, and Pederson found that in that time span, participants' drinking habits doubled or tripled.

Students who are younger than 21 tripled their drinking habits, whereas students over 21 doubled their habits, the study found.

"Our data suggests that the students who drank the heaviest while abroad returned drinking at slightly higher levels when they came home (about two more drinks per week)," said Pederson. "This may not be particularly concerning, but it does suggest an increase."

Intoxication can lead to minor implications such as hangovers or a few missed classes. But this can also lead to more serious consequences such as fights and sexual experiences. The laws are different in other countries and students often times do not understand that an action that does not get them into trouble in the United States could get them into trouble in a foreign country.

"Discussing responsible drinking would likely be helpful," said Pederson. "I think it would be helpful to discuss the potential negative consequences that can result from taking it too far."

However, some students disagree with the surgery. University of Massachusetts senior Ryan Casey found that he drank less while he was abroad. An engineering major who studied in Ireland at the University College Cork last spring said that even though he was in a different country, he still had the same college budget. "It was more casual drinking in pubs, than drinking at a party with the expectation of getting drunk," said Casey. "Additionally, pints were generally five euro (about the equivalent of seven dollars), so watching your budget also meant watching how much you drink."

"Now that I'm back, I'd say that I probably drink more, though I would attribute this more to the fact that I'm in my senior year and living off-campus with my best buds," continued Casey.

Casey, who turned 21 one day after arriving in Ireland, thinks that a potential reason that students hit the bottle harder across oceans is because they generally take an easier class load so they have more time for traveling.

"The classes I was taking over there were not the most intellectually challenging, he said. "They were mostly gen-eds, and all were non-engineering classes."

Another difference that Casey observed in Ireland was that European pints are close to one-fifth larger than American ones.

"A U.S. pint is about 83 percent of a European pint by volume. I know this is by no means doubling the drinking habits, but by the time you think you've had your usual amount of alcohol, you may have just passed your tipping point," said Casey.

University of Washington research has suggested that drinking while studying abroad can lead to habits that follow students all the way home.

(MCT)

Beer is served at an Irish pub. According to a recent study, increased alcohol consumption abroad can lead to continuing these same habits at home.

Though the UMass International Programs office could not be reached to comment on thoughts regarding the study, Casey said, "IPO made it a point to tell us to definitely find out local laws. The IPO office of UCC definitely did."

European countries are generally the most popular for study abroad, though Pederson has no actual data to support the idea that students generally choose to study in countries that usually have more lenient drinking laws. "I'm not sure if a student really thinks about it, because the large majority of the countries students go to do have more lenient laws."

Drunk or not, study abroad generally positively effects students learning and personal experiences.

"I don't really feel much different," said Casey. "I guess I appreciate being home a little more, and love the idea that we live on a huge planet that should be further explored by everyone. It was definitely a nice change of pace for a semester though."

Real lessons for progressives

Mike Tudoreanu

I have been saying for quite some time that the Democrats were going to suffer a beating in the mid-terms because of their failure to take bold, radical steps to reduce unemployment and fix the economy. Now that the inevitable has happened, the first reaction from most of my left-leaning friends is to say that the Republicans are going to kill President Obama's plans for progressive reforms. I am very puzzled at this. Please tell me: What exactly were the Democrats going to do in the next two years that they are no longer able to achieve because of the Republican House?

Were they going to stop foreclosures? Obama specifically said he wasn't going to do it, back in September.

Create jobs? That would require massive government spending on public works, like in the New Deal, and the Democrats have consistently been against it since 2009.

Increase funding for public education? No, the Democrats have promoted charter schools instead. Strengthen environmental protections? BP got away with a slap on the wrist for exterminating wildlife in the Gulf. Pass the Employee Non-Discrimination Act or end "Don't Ask, Don't Tell?" The Democrats fought tooth and nail against anything like that. Let the Bush tax cuts expire? Obama was discussing ways to extend them just last month. Repeal the Patriot Act? Obama signed a one-year extension of it last week.

End the wars? Stop torture? Yeah, right.

So, what specific progressive initiatives will Obama have to give up? None, because he doesn't have any.

He did have two in the past: health care reform and restoring regulation of Wall Street. Both of those already passed – in a watered down, pro-corporate, mostly useless form, but they did pass. And that was it. There were no other big measures in the pipeline.

So cheer up, my progressive friends: we did not lose anything last Tuesday, because we had nothing left to lose. Obama had already betrayed most of his promises long before the election, and there was absolutely no reason to believe that the Democrats would suddenly wake up and start doing something about the economy if they won the mid-terms. Yes, the American left stands defeated today, but the defeat did not come on Tuesday.

It came all the way back in 2009. And it did not come from the Republicans. It came from the Democrats and their obstinate refusal to adopt the progressive policies that were necessary to lower unemployment and stop the banks running wild over people's lives.

The Republicans can scream all they want about Obama's supposed "radical agenda," but when asked to name specific pieces of legislation that are part of that agenda, the only two they can come up with are the health reform (which is more conservative than what Nixon wanted), and the bank bailout (which passed with Republican support, and was opposed by every group on the left of the Democrats). Obama's agenda was centrist from the beginning. It failed. It failed to fix the economy, and also spectacularly failed to keep moderate voters in the Democratic camp.

The fundamental mistake of the Democratic Party was their belief that moderate voters are ideological, and want ideologically moderate policies (meaning policies somewhere in between those demanded by the Democratic base and the Republican base). That is not true. The vast majority of voters – the vast majority of working people – want a job, a decent life, good health care and affordable education for their children. They don't care whether government policy is ideologically moderate, left or right. They just want it to deliver the goods. In this recession, the only way to deliver the goods would have been through strong left-wing policies.

The Democrats refused to enact such policies, under the absurd, mind-boggling logic that if you give public sector jobs and universal health care to moderates and conservatives, they will hate you for it. In reality, of course, showing moderates and conservatives that government can improve their lives is precisely the best way to persuade them away from conservatism. That was the secret to Franklin Delano Roosevelt's success.

But it's too late for that now. The Democrats blew their opportunity, and the majority of voters quite reasonably decided that if one party can't deliver the goods, they might as well try the other party. It wasn't an ideological choice. The Tea Party didn't win the election for the Republicans, ordinary people disappointed with Obama did. This election was not a defeat for progressive policies; it was a defeat for moderate policies wearing a progressive mask.

The lesson is not that progressives should move to the center (that's what got us here in the first place). The lesson is that the left must take a strong stance in favor of working people and against big business and Wall Street – or die. The lesson is that the left needs to campaign for more jobs (especially public sector jobs), higher wages, an end to foreclosures, more affordable education and strong measures against the extremely unpopular capitalists who caused this great recession.

But don't rely on the Democrats to get the message.

They will spend the next two years thinking that what voters want is for Barack Obama to sound more like Sarah Palin. If they are given a second chance in 2012, I see no reason to believe they will handle it any better than the first one. What the country needs is a strong, progressive, working class political movement to the left of the Democrats, and independent of their political machine. We need a labor movement and a Labor Party.

That is the only way change will ever happen.

A very sincere apology

Victoria Knobloch

Dear men,

I'm sorry. I am angry and mean. I feel that the appropriate adjective for my behavior, considering my gender, would be bitchy. This sexism stuff gets me so worked up and then I just lash out at random, innocent men, who have never ever done anything wrong.

My wrath is inexcusable, and I apologize.

My rage is almost always unnecessary. People, in general, are lovely. They are kind and respectful. They constantly think about others before they act, and when they realize they've done something wrong they apologize instantly and make a massive effort to never do it again. I should always be polite and calm when I address injustice because injustice is having a bad day and didn't mean any offence at all. People who engage in offensive language and actions will most definitely respond to a "please stop" and will never retort with condescending, patronizing, elitist defenses of their behavior. I've never seen a human being behave like that. Perhaps oppressed groups made them up so that they could complain more about how mistreated they are. Yeah, that must be it.

The Yale frat boys that marched through their campus in early October yelling, "No means yes, yes means anal!" did not mean to offend anyone. They were just having a little fun, and everyone is entitled to that. The editorial that ran in the Yale school paper talking about how the Yale women's center overreacted by suggesting that the brothers were promoting "an active call for sexual violence" made a great point. Women are prone to overreaction, and we definitely lack a sense of humor. Rape is funny these days. People are always making jokes about it. Us women folk just need to lighten up, I assume. The next time I'm walking across campus late at night by myself and I'm feeling a little bit jumpy – because rape and sexual assault is a very real thing on this campus – I'll just remember to have a little chuckle. Having a man violently attack me and force himself upon me in a display of dominance and power has never been more hilarious.

Maybe if us women all laughed a little bit more and stopped being such wet blankets, we'd get raped less.

Actually, there's a lot us women could be doing to stop rape. I understand that men lack decency and self-control, and that's got to be really tough. All those short skirts and low cut tops prancing around campus clearly just scream "Rape me," right?

There's also the inebriation. I know with every drink I consume on a Saturday night I'm thinking "Gosh, I hope I get drunk enough so that some guy thinks it's okay to have sex with me even if I say no. Or even better, when I'm passed out." It's true. I plan my weekends around it. I also realize that if I flirt with you all night and even bring you back to my room but then say no, you're entitled to rape me. I've led you on! It's only fair.

I can see the cogs in your brain turning, the protest forming. "But Tori, I would never rape anyone. I'm a nice guy." Well, Nice Guy, it's true, you're special. Friend to women everywhere, you are always jumping to our defense. You might as well put on a suit of armor and I'll swoon into your arms for being so brave. Not raping is hard work. Instead of men ending rape forever by not raping, apparently it is the job of women to wear longer skirts and be more sober and take self-defense classes. I think maybe we should start a Nice Guy Award where you get a medal for every day you don't rape someone. We need to reward such wonderful diligence.

But you should also know that my opinion isn't valid, because I hate men. Men are to blame for all my problems, relevant to sexism or not. I never have to deal with the consequences of my actions because I can always just blame a man! I hate men so much I can't stand to be around them, so I'm a lesbian. Of course, you should be aware that, like all lesbians, I have secret cravings for men and really just want to have sex with you. But I should also warn you I'm disgustingly ugly. Then there's the slow realization that my true place in life is in the kitchen. This is when you should ask me to make you a sandwich, because that would be hilarious. You could post "Make me a sandwich, woman" as your Facebook status and all your friends could "Like" it.

That way we could all have a good laugh, because no one has ever heard that joke before, and women doing household chores for men is one of the funnier images of our generation. With a creative wit like yours it's no wonder you have so many friends.

Now I still have all this misplaced rage to deal with. I was having a fantasy the other day about putting on a vigilante costume and going around campus late at night and cutting off the testicles of every man on campus that has ever been accused of sexual assault. The shock, the violence – gosh, I've just taken it too far. Maybe it shouldn't just be the assaulters. Maybe it should be every man who ever made a rape joke. Maybe it should be every man who ever called a girl a "bitch." Maybe it should be every man who whines and complains that I am overreacting when I take rape seriously, and that they themselves are not like that, and how dare I be so unfair. Let me tell you how much I care that it is not your fault you were born with a dick. A lot. Your pain at being a man keeps me up at night. And now this added fear of having your balls cut off? I'm just being mean. No one should have to deal with such threats about sexual violence.

No matter how much I apologize, I know some of you will still be a little bit irate about my radical notions. For you folks who are just stewing in your irritation and self-pity right now, and are all ready to explain to me how much I don't understand, I've got some advice: Do what oppressed people have been forced to do forever: Step back, sit down, and shut up.

Point-Counter-Point

"I disapprove of what you say, but I will defend to the death your right to say it." - Evelyn Beatrice Hall

Four Loko: Menace or magic?

Free to go 'loco' for Loko

Stacey Linehan

Four Loko is a popular alcoholic drink commonly referred to as "liquid cocaine" or "blackout in a can." The 23.5 oz. canned beverage contains 12 percent alcohol by volume and the "Four" in the name suggests the four other main ingredients; caffeine, taurine, guarana and alcohol which weigh in at 660 calories together. People think that the combination of alcohol and caffeine in the drink is so unsafe that it warrants FDA investigation and perhaps a complete ban on the product. I believe this idea is absurd; and Phusion Projects, the company that makes Four Loko, should not have to suffer as a result of stupidity of a few consumers.

The major concern regarding this drink is the fact that it contains both a depressant and a stimulant; which counteract one another. The caffeine masks the effects of the alcohol until the caffeine wears off.

In simple terms, people continue to drink because they don't feel the effects of the alcohol until much later.

As a bartender I know that one of the most popular drinks sold at the bar is Red Bull and vodka. Sure, I have to make the extra effort to mix two things together – but what the cocktail contains isn't much different from the contents of Four Loko. Furthermore, energy drinks paired with alcohol are nothing new, especially among college students who want to let loose quickly and party all night long. There are currently similar products on the market to feed this demand, for example, Joos, Sparks and Rockstar and Vodka.

But if they can't buy it in a can, they'll just mix it themselves. PJ (party juice), also known as "jungle juice" or "drank," is quite regularly served at frat parties and other house parties. This sort of drink is commonly made using two gallons of Hawaiian Punch for every one bottle of Everclear or Dcisel (150-190 proof) and a case of energy drinks.

Clearly every version of this concoction differs slightly but all have the same intention of masking the taste of alcohol while getting you inebriated and keeping you wired on caffeine so you can party longer.

All too often we point fingers at others, trying to blame a larger entity for our own stupidity. We blame fast food restaurants for making us fat, we blame headphone companies for damaging our ears, and now, Four Loko is the unfortunate company being blamed for irresponsible college kids who can't handle their alcohol and whine and complain about it. As an individual, you are responsible for what you choose to put in your body. If you are unsure as to what a product contains and you have any concerns regarding that product, you should look at the nutrition facts on the back of the can before you ingest it.

Four Loko should not be banned simply because people aren't using it properly. If I smack someone across the back of their head with a book and it catches on and other people start doing it, do books become unsafe? I'm sick of being babied by administrations telling me what I can and can not do or possess. They are slowly stripping down our right to make our own decisions because they think they know what is best for us. I'm a grown independent women capable of making my own decisions, and if I choose to drink a Four Loko, that should be up to me.

The fact is, it is an alcoholic drink, which in the United States means you must be 21-years-old in order to purchase it. In the U.S. you are considered an adult at the age of 18, and then have three extra years to mature before you are allowed to purchase and drink alcohol. By that time, you should be smart enough to know how you react to alcohol, and if you don't, you'll have to deal with the repercussions – and that's no ones problem but you're own.

The reason it is so popular amongst college kids is very simple. It is economically practical; it has a variety of nine fruity flavors that are appealing to those who may not like the taste of beer or harder alcohol and it gets you drunk quickly and allows you to feel more awake. To us, it makes more sense to throw down five bucks for a couple of cans that will last the weekend than to purchase a 30 dollar bottle of alcohol, some cartons of juice of soda to mix it with, some ice and don't forget the red solo cup! Clearly Phusion Projects has found a product that suits our desires, and with one can, you're well on your way to one hell of a night.

Let's face it: College kids drink to get drunk. Four Loko is not a drink that you serve in a wine glass at a fancy dinner party, nor is it a drink you play pong with. Each beverage has its purpose and the purpose of Four Loko's is to get you "nice" quickly, and as far as I'm concerned, the drink meets its job expectations.

Playing with fire

Shane Cronin

In September, shortly after I turned 21, I made my first lawful alcohol purchase. My order was nothing out of the ordinary for a college student. I bought a six-pack of beer and a cheap bottle of vodka to share with some friends over the course of Friday night. As I waited in line, I noticed that the girl ahead of me in the queue – college-aged – was buying only one item. It looked to be a tall can of soda. I assumed it was an energy drink, but thought it odd that someone would come into a liquor store for just that. After news stories began flooding in later in the month about a dangerous alcoholic beverage taking U.S. colleges by storm, I realized it was my first encounter with "Four Loko."

Although the alcoholic energy drink first hit shelves several years ago, it's come to prominence only recently. However, due to the widely publicized news coverage of illness and injury related to Four Loko, its fast track to fame may be coming to a legal halt. Don't be surprised if Four Loko's highly concentrated, intoxicating ingredients are curbed or outlawed sometime in the near future. Several state attorneys general have queried the Food and Drug Administration about banning the 23.5 oz. beverage nationwide including those in Washington, New York and New Jersey.

Four Loko's main ingredients include guarana, which is a natural, yet very strong caffeine, found in South America. In addition, the beverage contains the caffeine ordinarily found in coffee. Its recipe also boasts taurine, which is an amino acid thought to enhance athletic performance. Many energy drinks contain it. However, the drink's most controversial ingredient is the high concentration of alcohol. At between 11 and 12 percent, this little inexpensive drink packs a big punch. Less than $3 per can, it's a binge at a bargain.

The manager at Liquors 44 in Hadley told me he's sold more than 1000 of each Four Loko's nine flavors since the store began carrying the product a few months ago.

Since it only takes one of these potent drinks to become inebriated regardless of the imbiber's sex, the beverage has lethal potential. At Central Washington University last month, several students consumed so much of it that their blood alcohol levels were in the fatal range.

On Four Loko's Facebook fan page (with which I have mutual underage friends), young drinkers post their experiences. Many comments provide testimony to the drink's "blackout" effect, which many seem to believe is one of the product's selling points. However, one post struck me as very chilling. "FOUR LOKOS SHUD BE ILLEGAL." Underneath, the poster elaborated, "I almost died the first time i drank em hahaha and im never doin that again."

Guzzling just two of these 23.5 ounce intoxicants is the equivalent of chugging 12 beers. Dr. Martha Rosenthal, a professor of physiology and neuroscience at Florida Gulf Coast University, doesn't recommend doing this. "So if you chug 12 beers at once (or two Four Lokos), your body needs to essentially metabolize 12 hours' worth right away. It can't do this, so the alcohol builds up in your bloodstream and does nasty things like shutting down the respiratory centers of your brain."

A 2006 Wake Forest University study put the alcohol and energy drink combination to the test.

Of the 4,271 North Carolina college students who participated in the study, 697 reported mixing alcohol with an energy drink in the past 30 days. The results were alarming. Students who mixed the two beverages were more likely to sexually assault or be sexually assaulted. They were more likely to ride in a car with an intoxicated driver. They were more likely to be injured and receive medical treatment.

So what is a viable solution to stopping the Four Loko toxic phenomenon? Banning it on individual campuses, which many college administrators nationwide have already done, will not stop students from buying and consuming the beverage off-campus. The drink's infamy has only added to its attractiveness. The Wake Forest study suggests adding warning labels to energy drinks noting the danger of mixing them with alcohol. However, the warning/information label nudge almost always fails (think of the caloric content printed on Oreos packages that you pay no mind to).

Four Loko is not like other alcoholic beverages such as beer, wine, or even hard liquor in the sense that it does not make consumers feel as drunk as their blood alcohol level actually would show. This can lead to dangerous over-consumption. Furthermore, because those who drink Four Loko aren't fully aware of their intoxication, they often believe they can drive. The liability of consuming this drink trumps personal responsibility in this case. The most important thing to remember is that Four Loko is the face of a larger issue, and because of its enormous sales and popularity, if it is banned as an individual product, surely an imitation(s) will fill its void. Therefore, the FDA should act to ban the manufacturing and sale of all energy-alcoholic beverages.

College students and those even younger will no doubt continue to mix their own questionable concoctions: Red Bull and vodka, for example. However, they do not need the assistance of the alcohol industry creating the most dangerous recipes they can think of, and selling them in one cheap, easily accessible can.

New fad drives UMass 'Loko'

By Kaya Swainson
Collegian Correspondent

It took just one can.

Only 23.5 ounces caused Joshua Hussey to blackout after his first experience with Four Loko.

"I don't know what happened for four hours. I wasn't with anyone. I was on the streets alone – blackout drunk," said Hussey about his first experience with the popular caffeinated alcoholic beverage. He explained the feeling as "wide awake drunk." However, he explained, the feeling was short lived.

"I remember calling my friends around 3:45 a.m. We were in Northampton for that EDMC dance event at Diva's. They came and got me after 4:00 a.m. I was puking for the rest of the night."

This was Hussey's first full weekend in college this September.

Produced by Phusion Projects, the Four brand has been on the market since 2005, however, it is only recently started appearing on the college circuit. It only recently started appearing on the college circuit.

"I haven't heard of them until this semester," said Diane Fedorchak, the Project Director at the BASICS Program for alcohol screening and abuse at the University of Massachusetts. She said the drink was just brought to her attention this fall.

"It's equivalent to like five drinks isn't it?" asked Fedorchak.

Actually, according to CNN, it's equal to a six-pack of 12 oz. beer. Served in a 23.5 ounce, colorful aluminum can, Four Loko boasts an alcohol content of 12%, costs anywhere from $2.50-$3.00 per can, comes in nine flavors, and contains high levels of caffeine, taurine, and guarana – all of which are ingredients usually found in energy drinks. All these stimulants account for the "wide awake drunk" feeling students have reported after drinking the beverage, and it's this particular mixture that has officials like those at BASICS worried.

"We've had our eye out to see if they've appeared on campus, and they have," said Fedorchak.

"They're dangerous," explained Fedorchak. "It makes me sad we are poisoning our young people, and for what? To sell a product?" The Wall Street Journal reports Four Loko holds a rank of fourth in sales growth among alcoholic beverages at 7-Eleven stores. The drink has become increasingly popular amongst college students and UMass is no exception. "I know there's been an uptake in consumption of these types of beverages here at UMass," said Fedorchak.

Despite the dangers of mixing high levels of caffeine and alcohol, students are aware of this and continue to drink them.

"I've had them once or twice since then and they're definitely not good for you. They're awesome, but terrible for you" said Hussey.

Four Loko is not FDA approved, and the exact ingredients aren't quite clear because there is no information on the can and Phusion Projects has not released a complete list. "We don't know what's in it, but we have fun anyway," said UMass student Ye Liu.

In several states, attorneys are launching investigations into the potential health risks of the drink. Some schools are already all too familiar with the effects the drinks can have on their students. Ramapo College in New Jersey and Central Washington University in Roslyn, Wash. have already banned the drinks after several students at both schools were hospitalized after drinking the alcoholic energy drinks. "There's a reason, students are calling them 'coke' or 'blackout' in a can," said Fedorchak. But banning them wouldn't just solve the problem.

"There'd be something else on the market to replace it," explained Fedorchak, and students agree. UMass student Chris Lehman said, "I would've made up for them some other way."

"Exactly," agreed Liu with a nod.

No course of action has been employed at UMass to address this growing fad, but officials say they are keeping an eye out on the situation.

"I think if we have a couple of incidents, action will be taken," explained Fedorchak. "It's about keeping our students safe. Most students don't say they hope to blackout, vomit, and pee on themselves when they drink. They don't cross that line. Four Loko crosses that line."

Iron Chef takes on the best of Northampton

By Andrew Sheridan
Collegian Staff

This Friday, Iron Chef Michael Symon will be coming to Northampton for a unique event. Several of the Pioneer Valley's greatest culinary minds will assemble at the Calvin Theatre to face off against the Mediterranean master, and attempt to answer life's most savory question: whose cuisine reins supreme?

Cleveland native Michael Symon is the owner of five critically-acclaimed restaurants across Ohio and Illinois. After winning Food Network's "The Next Iron Chef" competition, he became the 11th permanent member of Iron Chef America's culinary pantheon. Focusing on Greek and Mediterranean cooking, Symon has been a successful addition and boasts an impressive 79 percent winning percentage in Kitchen Stadium. The home-town cooks to take on the Iron Chef will be Chef Maggie Zaccara of Hope & Olive, Chef Greg Monette of Chandler's and Chef Michaelangelo Wescott of Gypsy Apple. These three were chosen out of dozens of talented local chefs by an online voting process.

After the introduction of their cooking styles and credentials, Symon will select one challenger to be his opponent for the evening, and the battle will be underway. Much like the television program upon which it is based, this event will have the two chefs preparing five courses each, all based around a secret theme ingredient.

This evening's event is a charity fundraiser in support of the Friends of Children, a small local child advocacy group. The organization deals with at-risk children in the state foster care system. "We work to make sure that the best interests of the kids in the system are met," said Jane Lyons, executive director of the Friends of Children. "We want to be the squeaky wheel, because often they have no one to advocate for them."

One of their programs, entitled "Foster Dignity," is aimed at providing recently uprooted children with brand-new backpacks, school supplies, and other basic need. Other programs match emancipated foster kids with mentors, raise community awareness for their needs, and train volunteers to advocate for the children in the often-overburdened legal system.

This will be the fifth meeting of the copyright-skirting "Iron Cook" competition, but the first in four years. Prior years have featured such top-name talent as Rachael Ray, Martin Yan and Bobby Flay, all thanks to the support of Lou and Lesley Ekas. These two former cooks are the owners of "Art Thyme," a company which trains would-be celebrity chefs to be TV-ready. They have become un-official sponsors of Friends of Children, creating contacts and finding headliners for their tasty competitions.

Lea Auto and Yankee Candle are the premiere donors for the event, helping to construct two fully-stocked stage kitchens for the challengers to compete in. "We are so lucky to have such great corporate underwriting this year," said Lyons.

Judges include Mayor Clare Higgins of Northampton and Senator Stanley Rosenberg. Bidding will be held before the start of the competition to determine the third and final judge, and the lucky winner will take their seat on stage and enjoy all of the challengers' offerings.

"The event starts at 7 p.m., and if you don't plan on being the highest bidder, you should have dinner ahead of time" said Lyons. No food will be served to the majority of the attendees, and the aromas from the stage are guaranteed to stir up an appetite.

Tickets range from $25-$75, and are still available from the Iron Horse Entertainment Group website.

Andrew Sheridan can be reached at asheridan@student.umass.edu.

Franti chills with Calvin crowd

By David Brinch
Collegian Staff

One word comes to mind when describing Michael Franti's shoeless performance on Monday night at the Calvin Theater: Energy.

Franti and his band Spearhead electrified Northampton this week, performing two shows on Monday and Tuesday to a positive audience that was all about having a good time to his soulful and fun-loving lyrics.

After a strong opening set from British folk singer Bobby Long, Franti took the stage at Noho's small venue shortly after 9:15 p.m. to thunderous applause. Long is known most notably for his tune "Let Me Sign" which is featured on the "Twilight" soundtrack and his supporting band, the Kalob Griffin Band, just signed with ALO Records and will support Franti for the remainder of his fall tour.

The band started with a track off of Franti's new album, "The Sound of Sunshine" with "The Thing That Helps Me Get Through," a song that directly mirrors the first lyrics of the tune, "rock and roll with a whole soul." Franti's jovial way was on display early and often throughout the entire performance, getting the crowd into the music from the very beginning.

From there, Franti flirted with his reggae roots with a much more up-tempo version of "Rude Boys Back in Town" off of 2008's "Real Rebel Rockers." The EP was recorded mostly in Kingston, Jamaica and is one of Franti's more reggae-infused albums.

Next was another track off of Sunshine, "Only Thing Missing Was You," which started from fiery guitar licks from Franti's supporting strummers, Dave Shul and Jay Bowman, who were active all night long with bassist Carl Young. The song also taps into Franti's reggae sentiment, but not heavily and was executed perfectively.

He then took the time to share with the audience how great a day he had, "going for a run through the Sinith College campus," and "how he loved Massachusetts this time of year," which received thunderous applause.

After these few songs, Franti tapped into his political bravado with the multilingual, "Hello, Bonjour," from 2004's "Yell Fire." The album was recorded after Franti visited the war zones of the Middle East and Iraq, as Franti has been an outspoken advocate for peace not only through his lyrics in his music but by his constant humanitarian efforts. As Franti shouted hello in a number of different languages, the crowd echoed, which was pretty exhilarating.

Franti's tone switched from multicultural to friendly, with the whistling "Anytime You Need Me," which suffered from a generic chorus and basic sound.

Things started to get interesting when Franti invited people to dance on stage and actually "Shake It," a tune about dancing with a positive message - "you're perfect just the way you are."

With a bass-laden "Everyone Deserves Music" by Young, Shul and Bowman, Franti played the acoustic "Hey World (Don't Give Up Version)" with percussionist Manas Itiene playing a djembe, an African drum. Franti returned to his governmental issues in this soulful song which was better with Itiene sitting in.

Following a familiar pattern of slow song followed by a fast song, Franti followed with "The Sound of Sunshine," his No.1 song off his new album, which was poppy sounding like "Say Hey."

Franti decided to just walk through the crowd singing "Yell Fire!" off the self-titled LP and shaking hands with people. After a "Smell's like Teen Spirit" tease, Franti walked up into the balcony and had a young boy direct "Hey, Hey, Hey" which really got the crowd into the concert.

With another congratulatory shout-out to the San Francisco Giants, who had won the World Series during Franti's set, the San Francisco native went acoustic and started "I Got Love For You," a song that he wrote for his son, which prompted an "ole" chant.

Franti's crowd interaction continued, as he talked about his adoption and how he met with a local Northampton adoption agency that day and closed the set with his most popular tune, "Say Hey (I Love You)." He invited people under the age of 10 and over the age of 60 to join him onstage for the encore, as 15 people danced the night away.

Franti's performance was a mix of reggae, rock and soul added with fun-loving and smart lyrics that don't only make people happy but engaged about the state of the world. Above all, it provided the audience with a positive and interactive energy that cannot be replicated by other performers.

JEFF BRANDSTEIN/COLLEGIAN

Sophomore Freddie Riley drives in for a lay-up against Brandeis last night.

Minutemen romp Judges

Traynham leads with 15 points

By Jay Asser
Collegian Staff

In its first game action without former shooting guard and prolific scorer Ricky Harris, the Massachusetts basketball team saw its offensive production come from a variety of players.

Guard Anthony Gurley (13 points), the early favorite to replace Harris as the team leader in points this year, was second leading scorer on the Minutemen in UMass' 83-60 exhibition win over Brandeis at the Mullins Center on Thursday night.

The Boston, Mass. native set the tone early, scoring three of the Minutemen's first five field goals in as many possessions.

He also led the Minutemen with seven assists and was creating baskets for others as much as he was for himself.

"I didn't have a focus," Gurley said of his mindset on offense after the game. "I was just playing the game and letting the game come to me, stuff like that. If I had an open shot, knock it down. If I see my teammate open, pass it to him."

Last season, Gurley was second on the team in scoring with an average of 13.6 per game. After coming off the bench in the majority of the game he played, Gurley is looking to be an impact player in the starting lineup this year.

Bench steps up

Along with Gurley, UMass' second unit provided a bulk of the scoring.

The bench accounted for 19 of the Minutemen's 38 points in the first half, with newcomer Daryl Traynham (15 points) leading the charge. The freshman guard, who stands at 5-foot-9, scored eight points on 3-of-3 shooting from the field and played tight, full-court defense during the first half. He finished with a team-high in scoring in 22 minutes.

UMass	83
Brandeis	60

"I just try to come in and give my team a little bit of energy and boost it up," Traynham said. "They started off great and I just picked up the energy where they left off."

Raphiael Putney, after redshirting his freshman season, saw his first game-action in a UMass uniform and scored nine points in 14 minutes of play. The lanky forward gave the crowd in attendance a glimpse of his athleticism when he finished strong on two alley-oop lobs.

"In transition, coach just wants me to keep running lanes and use that to get quick points," Putney said. "That's all I do is keep running."

Sophomore Freddie Riley, who will be an offensive option off the bench this season, chipped in seven points and three assists. Riley, who is a threat from beyond the arc, was looking for his shot often and was the only UMass player to struggle from 3-point range.

Efficient offense

A significant part of the Minutemen offense last year was the 3-point shot. In its win over the Judges, UMass showed that it will still rely on the long ball, but only when it's open.

The Minutemen shot a staggering 6-of-9 from beyond the arc in the second half and were 10-of-19 for the game. Gurley was 3-of-4 from 3-point land, while Sampson Carter, Gary Correia and Daryl Traynham each hit their two attempts.

"I thought we did some good things offensively," UMass coach Derek Kellogg said. "I thought we passed the basketball, which was great to see, guys that maybe in the past had taken tough shots or bad shots."

Last year, UMass lived and died by 3-point shot, ranking first in the A-10 in attempts at 754 despite shooting just over 30 percent, which was the third-worst in the league.

Jay Asser can be reached at jasser@student.umass.edu.

Win and in for UMass

By Herb Scribner
Collegian Staff

The impressive performance by the Massachusetts men's soccer team this season all comes down to its final weekend against Charlotte and Saint Louis.

"If we don't win these games, then we don't deserve to go to the playoffs," UMass coach Sam Koch said. "So it's as simple as that."

Despite holding 14 points in the Atlantic 10 and being nestled in at third place, the Minutemen (5-4-7, 4-1-2 A-10) are still in potential danger of not qualifying for the post season.

"We don't win either one of these games, we're done, we're not in," Koch said. "Am I worried about it? We're in the playoffs now, we were just in the playoffs a weekend earlier."

The A-10 table is tight going into this weekend, with all the teams below front-runner No. 18 Charlotte are all within at least a two-point margin of each other.

UMass has the daunting task of taking on the ranked 49ers (11-5-0, 6-1-0 A-10) in the final weekend of play. Charlotte has been at its top form as of late, despite a 2-1 loss to Temple on Halloween, and will be a challenge for the Minutemen if they want to proceed to the playoffs.

"They're the best team in the league," Koch said. "So going to their place and play against the best team in the league, we've got to play our best game to beat them."

Charlotte has been known to be a thorn in UMass' side, as last season the 49ers kept the Minutemen out of the playoffs with a victory which pushed the Minutemen too far out of contention.

This season, Charlotte topped No. 23, Wake Forest, back in September to put them on the map of national rankings.

The 49ers have been on an offensive tear this season, including two straight matches over the course of a weekend when they scored three goals to down their opponents (SLU and Saint Joseph's).

Forward Andres Cuero has been the top scorer in a green and gold jersey, putting seven balls into the back of the net.

Following the Charlotte affair on Friday, the Maroon and White will travel to Saint Louis, another team that is in the playoff picture.

The Billikens (7-6-2, 4-3-0 A-10) are a historically strong team, producing such professionals such as former U.S. national team forward Brian McBride. This season, SLU is getting all of their offense from a handful of goal scorers including Adnan Gabeljic, Devon Newport, Benny Estes and Christian Briggs, all of whom have three goals on the year.

Koch sees the potential in the offensive-powered side however, and has been working the Minutemen defense all throughout training.

"[We're] just trying to tighten up the defense a little bit and just make sure we're compact as a unit and we play quicker," Koch said. "We've got to move the ball faster."

With these large games looming for UMass, and with the potential of the team's surprisingly strong A-10 play being erased, Koch feels there is no pressure heading into the weekend.

"To be honest, in a funny way, there's no pressure," Koch said. "I think there would be more pressure if we were trying to win both to be in first place or trying to worry about seeding. We're not worried about seeding we just want to make sure we're playing. Right now, we want to play well, we want to win a game to make sure that we're in."

After this weekend, there should be a clear indication if the Minutemen make the A-10 playoffs. As of now they sit in the third spot, with the top six making the postseason, and the top two getting a first round bye.

Herb Scribner can be reached at hscribne@student.umass.edu.

MICHAEL WOOD/COLLEGIAN

Freshman Hannah Prince tries to get the ball up the field during the Minutewomen's win against Lock Haven. They begin their first game of the Atlantic 10 tournament tonight.

Minutewomen take on TU

By Michael Wood
Collegian Staff

When the Massachusetts field hockey team begins Atlantic 10 tournament play against Temple this weekend, it will have a No. 1 seed and 11 players who have received conference honors leading the way.

Eleven Minutewomen have been named for All-Conference honors, with Senior Makaela Potts taking home the title of Defensive Player of the Year for the second consecutive season, and goalkeeper Alesha Widdall being named A-10 Student Athlete of the Year.

The top-ranked Minutewomen enter the A-10 tournament with a perfect, 5-0, record in regular season conference play, and will face the bottom-seeded Owls on Friday, Nov. 5 in Philadelphia. The winner of that game will advance to the championship game on Saturday.

The Maroon and White have won nine straight games, beginning with an upset victory over then-No. 8 Syracuse. Since that game, UMass has not lost, and posted a 7-1 record at home, including a victory over Saint Joseph's on Senior Day to close out the year.

"It did mean a little extra to us to sweep A-10s," UMass coach Justine Sowry said. "But when we have such great conference play, there's a bigger target on our backs. We have to have really good support off the ball for each other. We'll definitely be a targeted team."

In addition to the 11 honored players, the team received another accolade; Sowry earned the 2010 A-10 Coach of the Year honor. In four seasons at the helm of the Minutewomen, Sowry has received the honor three times.

The last time they played Temple, the Minutewomen escaped with a 1-0 victory in a hard-fought game over a team that always seems to give them trouble. Sowry made it clear that regardless of what the seeding in the tournament is, there is too much parity in the conference to take anybody for granted.

"[The parity] is a great thing for the conference," Sowry said. "We just know that we've done everything in our power to be prepared by playing a tough out-of-conference schedule and putting ourselves in the best possible position in the seeding. Now it's being focused, prepared, and really taking care of one moment at a time. If we do that, we should come out on top."

Often times a team with a top seed can let it go to its head, and players overlook the next opponent, thinking they should beat them without a fight. Not this Minutewomen team. Sowry has made it clear all season long that her philosophy is one game at a time. Temple has always given UMass a tough game, and it is a team that fights hard until the final whistle. She stressed to her team that regardless of how the regular season went, the time to prove themselves has arrived.

"I'm looking for us to come out ready and firing," Sowry said. "We've definitely prepared, but now all the games of the regular season mean absolutely nothing. We have to come out with a great attitude and be ready to play against a good Temple team playing at home. We've got to be firing on all cylinders."

If the Minutewomen win the A-10 championship, they will qualify to host the Northern Pacific Field Hockey Conference winner in an NCAA playin game to determine who will advance to the 2010 NCAA tournament.

St. Bonaventure shuts out UMass

Bonnies take 26 shots in victory

By Michael Counos
Collegian Staff

The Massachusetts women's soccer team will have to wait another year for its shot at an Atlantic 10 conference title.

UMass lost to St. Bonaventure on a rainy, Wednesday night, 2-0, in Kingston, R.I. The Minutewomen, who haven't won a tournament game since 1997, were pressured by the Bonnies' offense the entire game and were outshot, 26-5, and 10-2 for shots on goal.

SBU	2
UMass	0

The UMass defense held off the pressure in the first half, going into intermission tied at zero apiece. SBU's pressure continued in the second stanza and a goal in the 68th minute by Tori Burchett put the Minutewomen (8-11, 5-5 A-10) by one. They looked to equalize with a shot by Lauren Skesavage, but turned away by Bonnies' goaltender Nicole Markert.

"I think we played a very strong first half, while they had a lot of shots none of them were on goal," UMass coach Ed Matz said. "After they scored the first goal we were pressuring the ball upfield more and that's how they scored the second."

After a yellow card by junior Deanna Colorassi, the Bonnies (12-8, 6-4 A-10) doubled their lead in the 79th minute with a goal by SBU's leading scorer, Anna Cunningham. Courtney Bosse and Sarah Clark earned the assist.

Freshman Emersyn Pullan got the start in net after sophomore Emily Cota broke her leg in the previous game against La Salle. Pullan allowed two goals and turned away eight while Markert made three saves for the Bonnies.

"I'm disappointed that we lost, but I am not disappointed with the effort," Matz said.

Prior to the contest, four players earned A-10 honors, as Colorassi and senior Therese Smith were both named to the A-10 First Team All-Conference while freshman Brittany Moore was selected to the All-Rookie team and senior Ashley Hamel was one of 11 players to receive Academic All-Conference honors.

As a transfer forward from Oakland, Colorassi scored 20 points for the Minutewomen with nine goals. Including a hat-trick against Temple on Oct. 22, Colorassi's nine goals is the most scored by a Minutewoman since 2004.

Smith was another vital part of the offense, scoring 17 points for UMass including a game-winner in overtime on senior day against Saint Louis at Rudd Field. The senior is the program's active leading career scorer with 41 points on 16 goals and nine assists.

Moore started all 18 regular season games as a freshman and helped UMass lock down seven shutouts on the season while also contributing with two assists. Hamel sports a 3.78 GPA and was fourth on the team in scoring with eight points. Both of her career goals this season were game-winners and she led the team in assists with four.

Redshirt senior Sydney Stoll was plagued by a hamstring injury most of the season, but did return late and contributed with a two-goal performance against Xavier. Both Pullan and sophomore Emily Cota saw time in net, while Cota carried the bulk of the work. The two combined for 79 saves, a 0.725 save percentage and seven shutouts in the regular season.

UMass will be losing five seniors to graduation including Kelsey Anderson, Smith, Stoll, Alyssa Visconti and Hamel. In his first season with the Minutewomen, Matz led his team to its second consecutive A-10 tournament.

"I would say this team learned a lot about commitment, dedication, hard work and what it takes to play Division I soccer," Matz said. "I think they all realized they can win games and hate when they lose and I see us enjoying success in the future."

Michael Counos can be reached at mcounos@student.umass.edu.

SGA debate student sanctions

By Ashley Berger
Collegian Staff

The University of Massachusetts' Student Government Association (SGA) meeting on Wednesday, Nov. 3 sparked debate regarding two issues concerning the student body.

The meeting began with Attorney General Kyle Howard expressing deep concern regarding judicial hearings and the consequences that seemingly follow students after they conclude their years at the University of Massachusetts. In his position, he has been working closely with the Dean of Students Jo-Anne Vanin and has noticed some problems in regards to how the judicial process and further actions are not necessarily fair.

Howard's main concern is with the Hearing Board, the legal administration that students seek out after they feel dissatisfied with the outcome of their judicial hearing.

According to the current policy, the SGA is not consulted when picking students, something that Howard, describes as "cherry-picked" students. UMass undergraduates also must have a 2.0 GPA, and must not be under university sanction. Four thousand students per year at UMass fall under sanction, and the sanctions follow a student for two semesters.

"There are more discipline cases each year than Bachelor's degrees given from the university," Howard pointed out.

The university and some of the surrounding towns' police stations have an agreement that allows two institutions essentially to exchange student's information so that, respectively, the other side will be able to see what the student's previous records show.

"Essentially, students can be punished for the same crime twice," Howard iterated in his speech.

In response to the unfairness and lack of actual student representation within the Hearing Board, Howard created a list of requests to the Dean of Students' office. These requests included the SGA's appointment or approval of students on these Hearing Boards, dropping the sanction requirements for student membership on Hearing Boards, providing better training for those who do serve on Hearing Boards, potentially establishing educational alternatives to sanctions (Howard alluded to BASICS and community service), and ceasing the use of police reports as evidence in cases of civil infractions.

Howard proceeded to give one example of getting "written-up."

"If you get caught playing soccer in your hallway, you are charged with 'endangering behavior,'" he said. "This is ridiculous that it will continue to follow the student after they have graduated."

"I'm hoping that the Dean will respond better a second time around," says Howard. "Now that she knows I have brought it up with the SGA, she knows that I have more than one voice behind me."

Dean Vanin was unable to be reached for comment on the matter by publication time.

The main motion of the night was in the presentation of 2010-F13, a motion that would allow the Speaker of the Senate or the Secretary of University Policy and External Affairs to present their opposition to the "Bring Dollars Home" resolution at the Amherst Town Meeting on Nov. 8.

Student Government Association Senators listen as a fellow senator brought up an issue during a recent meeting.

Sponsored mainly in part by Senator Nathan Lamb, Howard made it a clear point to repeat that by passing this motion, the SGA is not opposing the town of Amherst, but opposing an opinion that the town is currently holding.

The Senate invited Corporal James Marley, a UMass student in the Marine Corps Reserve, to speak in regards to the issue at hand. He described to the Senate how the lack of support has had horrible effects on soldiers at war, because it suggests to them that those at home do not care enough to support them.

"If UMass did not say anything, I would feel as though they turned their back on me," he said.

Speaker of the House Modesto Montero made it a point to explicitly state that there is a significant different between not supporting the war and de-funding the war.

"We are not saying that by de-funding the war, we are not supporting it," he said.

Marley further explained, "If you don't support the war, then support the resolution to end the war. While there is a war over there, you have to keep them funded so they have enough ammunition and necessities to fight and protect themselves in order to come home safe."

Though there seemed to be strong opposition from the other side, in a role-call vote the resolution passed.

"I am pleased," Senator Lamb said of the passing of the resolution. "I think that this is an important issue for us to form an opinion on. I was disappointed with how intense the debate was, that it got so political. I had a feeling it would pass and am happy that it did."

Bill Cody, another Senator sponsor of the resolution, was "extremely happy with how it turned out. I think that the SGA should take a leadership stance in any and all political arenas."

Speaker Montero said he was pleased with how the debate itself was handled.

"I'm happy with how [this

State Dept. talks Muslim affairs

Sara Jackson
Collegian Correspondent

Farah Pandith, Secretary of State Hillary Clinton's Special Representative to Muslim Communities, participated in a conference call with university journalists across the country last Thursday.

Pandith, who often focuses her efforts on people under age 30 and calls this generation the "change makers," spoke on-the-record to participants, addressing issues facing Muslim Americans and United States relations with Middle Eastern Countries.

Pandith encouraged students to "look at ways we can challenge issues that are not always discussed on the world stage."

During the call, Pandith expressed a "need to be proactive" when engaging in topics surrounding Muslims both in the United States and abroad. In particular, Pandith pointed to the Obama administration for setting a tone which values significant diplomatic engagement with Muslims globally.

However, it was not until President Obama's speech in Cairo on June 4, 2009 that Pandith said the administration outlined its plan of action regarding Muslim relations. It was two weeks after this speech that Pandith was appointed to her current position.

From Cairo, Obama addressed the Muslim world when he said he traveled to Egypt to reframe America's relationship with Muslims.

"I have come here to seek a new beginning between the United States and Muslims around the world," he said in the landmark appearance. "One based upon mutual interest and mutual respect, and one based upon the truth that America and Islam are not exclusive, and need not be in competition."

Pandith described her role as working on a "people-to-people" level. She said she sees her work as seeking "innovation on the ground," and spends her

See PANDITH on page 3

Farah Pandith was sworn into the newly created position of Special Representative to Muslim Communities on Sept. 15, 2009.

UM ranks high for doctorates

By Nancy Pierce
Collegian Correspondent

Every student wants to get value and fulfillment out of their education. With the rising cost of tuition, what student wouldn't be concerned with the quality of classes and professors?

Several University of Massachusetts programs were recently included in a study conducted by the National Research Council ranking 5,000 Doctoral programs at 212 universities. UMass was ranked highly, competing with some of the most prestigious top-performing schools in the country.

UMass had 39 fields of study eligible for assessment, five of which were ranked highly. Programs including food science, kinesiology, linguistics, and polymer science and engineering ranked among the top programs.

In a table of top-performing institutions prepared by the university news web-magazine Inside Higher Ed, eight programs had strong showings: animal biotechnology, chemical engineering, chemistry, computer science, history, mathematics, philosophy, and psychology. UMass was also the only campus to have its African-American studies program included.

The Linguistics department was ranked highest among the University's programs. According to a graph on PhDs.org, the Linguistics department at UMass had high showings for survey quality, research product, and student outcomes.

When asked how this will affect the department and what can be attributed to its success, John McCarthy, head of the Linguistics Department, said, "All of us - faculty, graduate students, and undergraduates- were very pleased at this news. It's recognition of the outstanding work that comes out of our department. It's important for everyone to realize that UMass Amherst has departments like ours that compete at the very highest level, against universities with far more resources, such as MIT, Harvard, Stanford, UCLA, or Berkeley."

As the only school with an African-American studies department included, it was categorized into the larger department of American Studies, and continued to make very impressive showings in the rankings.

South College is the home to the Linguistics Department.

No butts about it

UMass student Chelsey Smith picked up cigarette butts on Nov 8, as apart of No Butts About It Day.

On an average day at the University of Massachusetts, you can see cigarette butts all over the ground, flicked aside by passing students and faculty.

But they didn't stay there long there, because Sunday was the fourth annual "No Butts About It Day" on Nov. 8.

Student volunteers spread out and picked up every cigarette butt they could find, and collecting them in clear plastic bags. Last year, 12 pounds of butts were picked up during the event.

The event was organized by the Student Health Advisory Board.

Almost three million Americans have Type 1 diabetes, but only one of them startedtThe College Diabetes Network.

University of Massachusetts student Christina Roth started the College Diabetes Network at UMass in the 2010 spring semester, and now it has expanded to Harvard University, Pennsylvania State University, Trinity College, University of Wisconsin-Madison, and soon Loyola University in Chicago.

"It is a way to connect all of us," said Roth, a 21-year-old student who was diagnosed with diabetes seven years ago. "It came out of being [at UMass] and not having any resources," said Roth of her decision to create the group.

"[The College Diabetes Network] makes it easier to live on-campus with diabetes," said Roth, a senior psychology major. "these are the ways to make a difference at the base...and the stuff that makes you feel not crazy."

At first, the network was just students "talking about living with diabetes, just to support each other," said Roth..

The College Diabetes Network (CDN) started off small last year, but as interest grew, Roth began getting emails from the community asking in what ways they could help. The organization grew into a website and a network including students at other universities and parents.

"We started off with a small goal of connecting people at UMass," said the Hingham, Mass. native, "now we work with administrators to make changes on campus."

Roth and her organization are working with the University by "trying to change meal plans to make them better for diabetics and expand food choices to make them healthier."

Roth also hopes to raise awareness of Type 1 diabetes on-campus.

Dealing with diabetes

DIABETES from page 1

"There is no reason college or education should hurt anyone's health," said Roth.

Roth describes when she was first diagnosed with Type 1 as "out of control."

"For years I struggled with it," she said, "but at college, I really got in control…it became important for me to stay healthy."

"It's a personal issue and that's why I'm so passionate," said Roth. "I never thought I'd do anything with diabetes," laughed Roth, looking back at when she was first diagnosed.

Roth explained that just because the CDN deals with Type 1 diabetes does not mean she thinks that Type 2 diabetes is not a serious disease, or that it is not important. "[Type 2 diabetes] is so different [from Type 1 diabetes] and not many people in college have Type 2."

The CDN invites speakers to campus to speak with the group about treating and living with diabetes. At one point, companies like Omnipod, Dexcom and Medtronic, makers of products like insulin and glucose testing monitors, came to campus and showed off their new equipment. "That night, everyone started a new technology," said Roth.

When she graduates this spring, she will retain control over the organization, but a new student will take over control of UMass's chapter. Roth said there are several frontrunners for the position, but did not name specifics.

After graduating, Roth hopes to work in a hospital with patients with juvenile diabetes before going to graduate school to learn how to further assist people with treatment of the disease.

"My mom was instrumental in helping parents," said Roth about the parental assistance the CDN offers. Roth explained how difficult it is for parents who cared for children with Type 1 diabetes when the child leaves for college.

"They may be used to checking the child's blood sugar while they are asleep, and they no longer can," said Roth. The CDN offers tips and a forthcoming blog to help parents.

The College Diabetes Network is a non-profit organization with a pending 501(c)(3) status. "We hope to keep the organization growing and permanent," said Roth, who also said they are applying for grants and funding.

"The UMass chapter is the most established," said Roth. Prior to joining the network, Harvard University had a small organization of diabetes support, but no resources or community. Now with their new CDN chapter, they do.

Sam Hayes can be reached at sdhayes@student.umass.edu.

Roth, who was diagnosed with Type 1 diabetes seven years ago, plans to continue to work with the College Diabetes Network after graduation.

Several departments at UMass are ranked in Top 6 in nation

Chair of the African-American Studies department Dr. Amilcar Shabazz is proud of his department's high ranking.

Ph.D from page 1

Chair of the African-American Studies department Dr. Amilcar Shabazz said, "we were ranked number six amongst other American Studies programs. We're right up there with the Ivies; Yale, Harvard, etc."

Shabazz said he was proud that, "we're ranked within the cream of the crop, top universities and top programs all over the country, the fact that we place in top 10 and six in student outcomes is [an] additional source of evidence that we do a very good job in this department in preparing students for the job market, and research and service to community."

One category where the African American studies program exceeded was in diversity. The program had a one-to-three range ranking in diversity, higher than any of the other departments listed.

When asked what these rankings mean for the University, Shabazz said, "We view it as affirming and providing additional evidence of the great job we're doing preparing the next generation of professors that study the culture, history, politics, and literature of united states."

According to Shabazz, these rankings are useful for funding purposes, students considering graduate programs, administrators, and professors. The data is also organized on PhDs.org into a comparative look at the schools based on priority of the rankings and categories.

John Mullin, dean of the University's graduate programs, said the NRC rankings "measure deeply with 22 different criteria. This makes it more formal and meaningful than other rankings."

He emphasized that "they look at everything, quality of students, faculty, and, above all reputation."

The rankings were organized in a peer ranking style, meaning faculty from other campuses were asked to rank aspects of other universities.

Mullin said he attributes the success of these programs to the "commitment of faculty and desire of students."

He added, "Faculty really want to make a contribution to society. The faculty in these programs aim to make students the best they can be; well placed in the jobs and schools they want, and contribute to improvement of the nation and state, whether it's cleaner air, creating a new plastic, understanding cultures, etc."

The types of students that could find these rankings useful are students entering into graduate and doctoral programs. These rankings lay out and compare some of the top graduate programs in the country.

According to Mullin, graduate students at UMass have an average GPA of 3.5, GRE scores in the 90th percentile and 18 percent of the student body identify as of a different ethnicity than white.

Nancy Pierce can be reached at npierce@student.umass.edu.

Mount Holyoke College chronicles food history dating to school opening

BY SARA JACKSON
COLLEGIAN CORRESPONDENT

At Mount Holyoke College, the time is now to start talking about food.

In the college's library atrium, below posters for an on-campus talk about the climate crisis' impact on the future of food and the college's Art Museum's exhibit on wine, lies the rich history of food on Mount Holyoke's campus titled, Everything is Wholesome and Abundant: A Culinary Chronicle of Mount Holyoke College, 1837-Today.

The exhibit chronicles the dining experience at Mount Holyoke College, including the initial issue of administrators pondering how to feed their entering class of 300 women, to today's issue of how to feed students healthy yet cost efficient food.

Emily Dickinson, a student during the college's first year in 1837, was very impressed with the quality and variety of the food that was served to her daily.

According to the college, in a letter to her family while at school, Dickinson said, "Everything is wholesome and abundant and much nicer than I should imagine could be provided for almost 300 girls. We have also a great variety upon our tables and frequent changes." The exhibit's title was taken from Dickinson's writing.

Many students felt the same as the poet 173 years later.

Ami Terachi, a sophomore at Mount Holyoke, said the barbeque pizza at Prospect Hall was her favorite item on Mount Holyoke's menu. Among Prospect Hall's perks is its waffle bar on Sunday mornings and various different make-your-own options throughout the week which vary between baked potatoes, pasta and tacos, among others.

Prospect Hall is a favorite among a lot of students, with junior Alexandra Horne declining to pick one item as her favorite, saying, "I just like a lot of options."

The exhibit explains that at that time in history, the only places the College had to model themselves after in order to feed that many people were hospitals, mental asylums and utopian communities. In feeding its students, the college could not rely on the food it produced, as it had no gardens, or even its own water source.

A photograph of the members of the Mount Holyoke Seminary pie circle of 1877 making pies in the Domestic Hall.

A lot of food was brought in from local farms in the Pioneer Valley and even as far as from Boston. In 1852, a pump house was built on campus to give the campus its own filterable water.
